#	Article	IF	Citations
1	Effects of intensive repetition of a new facilitation technique on motor functional recovery of the hemiplegic upper limb and hand. Brain Injury, 2010, 24, 1202-1213.	1.2	100
2	Benefits of a Repetitive Facilitative Exercise Program for the Upper Paretic Extremity After Subacute Stroke. Neurorehabilitation and Neural Repair, 2013, 27, 296-305.	2.9	80
3	Effects of repetitive facilitative exercise with neuromuscular electrical stimulation, vibratory stimulation and repetitive transcranial magnetic stimulation of the hemiplegic hand in chronic strokeÂpatients. International Journal of Neuroscience, 2016, 126, 1007-1012.	1.6	17
4	RELATIONSHIP BETWEEN DYSGEUSIA AND DYSESTHESIA IN STROKE PATIENTS. International Journal of Neuroscience, 2008, 118, 137-147.	1.6	11
5	Anti-spastic effects of footbaths in post-stroke patients: A proof-of-principle study. Complementary Therapies in Medicine, 2014, 22, 1001-1009.	2.7	9
6	Stroke Patient with Mirror Movement of the Affected Hand Due to an Ipsilateral Motor Pathway Confirmed by Transcranial Magnetic Stimulation: A Case Report. International Journal of Neuroscience, 2010, 120, 231-235.	1.6	6
7	Combination therapy with repetitive facilitative exercise program and botulinum toxin type A to improve motor function for the upper-limb spastic paresis in chronic stroke: A randomized controlled trial. Journal of Hand Therapy, 2022, 35, 507-515.	1.5	6
8	Effects of Repetitive Facilitative Exercise on Spasticity in the Upper Paretic Limb After Subacute Stroke. Journal of Stroke and Cerebrovascular Diseases, 2018, 27, 2863-2868.	1.6	5
9	The Change of Motor Evoked Potentials during Training of Hemiplegic Hand in Stroke Patients The Japanese Journal of Rehabilitation Medicine, 2000, 37, 925-933.	0.1	2
10	Could fatigue be used as a paradoxical intervention to improve motor learning after stroke?., 2012,,.		1
11	Mirror therapy for involuntary movement due to chronic thalamic hemorrhage: a case report. European Journal of Physical and Rehabilitation Medicine, 2017, 53, 968-971.	2.2	O
12	Short-latency Somatosensory Evoked Potentials(SSEPs) to Median Nerve Stimulation and Upper Limb Function in Patients with Putaminal Hemorrhage The Japanese Journal of Rehabilitation Medicine, 1996, 33, 310-315.	0.1	0
13	A Case of Upside-down Writing and Upside-down Drawing. Higher Brain Function Research, 2017, 37, 372-379.	0.0	O
