#	ARTICLE	IF	CITATIONS
1	The Stability of the Electron Strahl against the Oblique Fast-magnetosonic/Whistler Instability in the Inner Heliosphere. <i>Astrophysical Journal Letters</i> , 2022, 926, L26.	8.3	8
2	Thin Current Sheet Behind the Dipolarization Front. <i>Journal of Geophysical Research: Space Physics</i> , 2021, 126, e2021JA029518.	2.4	8
3	Impact of the Solar Wind Dynamic Pressure on the Field-Aligned Currents in the Magnetotail: Cluster Observation. <i>Journal of Geophysical Research: Space Physics</i> , 2021, 126, .	2.4	0
4	Unusual Location of the Geotail Magnetopause Near Lunar Orbit: A Case Study. <i>Journal of Geophysical Research: Space Physics</i> , 2020, 125, e2019JA027401.	2.4	8
5	Nighttime Magnetic Perturbation Events Observed in Arctic Canada: 2. Multiple-Instrument Observations. <i>Journal of Geophysical Research: Space Physics</i> , 2019, 124, 7459-7476.	2.4	35
6	A three-dimensional model of spiral null pair to form ion-scale flux ropes in magnetic reconnection region observed by Cluster. <i>Physics of Plasmas</i> , 2019, 26, 112901.	1.9	4
7	Spatial Distribution and Semiannual Variation of Cold-Dense Plasma Sheet. <i>Journal of Geophysical Research: Space Physics</i> , 2018, 123, 464-472.	2.4	7
8	Modeling, Analysis, and Interpretation of Photoelectron Energy Spectra at Enceladus Observed by Cassini. <i>Journal of Geophysical Research: Space Physics</i> , 2018, 123, 287-296.	2.4	5
9	Influence of the IMF Cone Angle on Invariant Latitudes of Polar Region Footprints of FACs in the Magnetotail: Cluster Observation. <i>Journal of Geophysical Research: Space Physics</i> , 2018, 123, 2588-2597.	2.4	4
10	Observations of Kelvin-Helmholtz Waves in the Earth's Magnetotail Near the Lunar Orbit. <i>Journal of Geophysical Research: Space Physics</i> , 2018, 123, 3836-3847.	2.4	13
11	Evaluating the Skill of Forecasts of the Near-Earth Solar Wind Using a Space Weather Monitor at L5. <i>Space Weather</i> , 2018, 16, 814-828.	3.7	22
12	A direct examination of the dynamics of dipolarization fronts using MMS. <i>Journal of Geophysical Research: Space Physics</i> , 2017, 122, 4335-4347.	2.4	44
13	Slow electrostatic solitary waves in Earth's plasma sheet boundary layer. <i>Journal of Geophysical Research: Space Physics</i> , 2016, 121, 4452-4465.	2.4	38
14	Cassini observations of Saturn's southern polar cusp. <i>Journal of Geophysical Research: Space Physics</i> , 2016, 121, 3006-3030.	2.4	17
15	Substructures within a dipolarization front revealed by high-temporal resolution Cluster observations. <i>Journal of Geophysical Research: Space Physics</i> , 2016, 121, 5185-5202.	2.4	9
16	A sequence of flux transfer events potentially generated by different generation mechanisms. <i>Journal of Geophysical Research: Space Physics</i> , 2016, 121, 8624-8639.	2.4	9
17	First in situ evidence of electron pitch angle scattering due to magnetic field line curvature in the ion diffusion region. <i>Journal of Geophysical Research: Space Physics</i> , 2016, 121, 4103-4110.	2.4	15
18	<i>In-situ</i> observations of flux ropes formed in association with a pair of spiral nulls in magnetotail plasmas. <i>Physics of Plasmas</i> , 2016, 23, .	1.9	11

#	ARTICLE	IF	CITATIONS
19	The Earth: Plasma Sources, Losses, and Transport Processes. <i>Space Science Reviews</i> , 2015, 192, 145-208.	8.1	54
20	Evidence of transient reconnection in the outflow jet of primary reconnection site. <i>Annales Geophysicae</i> , 2014, 32, 239-248.	1.6	7
21	On the fine structure of dipolarization fronts. <i>Journal of Geophysical Research: Space Physics</i> , 2014, 119, 6367-6385.	2.4	26
22	Temporal and spatial scales of a high-flux electron disturbance in the cusp region: Cluster observations. <i>Journal of Geophysical Research: Space Physics</i> , 2014, 119, 4536-4543.	2.4	12
23	Direct observation of closed magnetic flux trapped in the high-latitude magnetosphere. <i>Science</i> , 2014, 346, 1506-1510.	12.6	46
24	Observation of double layer in the separatrix region during magnetic reconnection. <i>Geophysical Research Letters</i> , 2014, 41, 4851-4858.	4.0	48
25	Electron pitch angle/energy distribution in the magnetotail. <i>Journal of Geophysical Research: Space Physics</i> , 2014, 119, 7214-7227.	2.4	39
26	In situ spatiotemporal measurements of the detailed azimuthal substructure of the substorm current wedge. <i>Journal of Geophysical Research: Space Physics</i> , 2014, 119, 927-946.	2.4	49
27	Solar wind entry into the high-latitude terrestrial magnetosphere during geomagnetically quiet times. <i>Nature Communications</i> , 2013, 4, 1466.	12.8	68
28	Sources of electron pitch angle anisotropy in the magnetotail plasma sheet. <i>Journal of Geophysical Research: Space Physics</i> , 2013, 118, 6042-6054.	2.4	32
29	Cluster observations near reconnection X lines in Earth's magnetotail current sheet. <i>Journal of Geophysical Research: Space Physics</i> , 2013, 118, 4199-4209.	2.4	19
30	Characteristics of the Taylor microscale in the solar wind/foreshock: magnetic field and electron velocity measurements. <i>Annales Geophysicae</i> , 2013, 31, 2063-2075.	1.6	3
31	Double cusp encounter by Cluster: double cusp or motion of the cusp?. <i>Annales Geophysicae</i> , 2013, 31, 713-723.	1.6	13
32	Observation of multiple subcavities adjacent to single separatrix. <i>Geophysical Research Letters</i> , 2013, 40, 2511-2517.	4.0	27
33	An indication of the existence of a solar wind strahl at 10 AU. <i>Geophysical Research Letters</i> , 2013, 40, 2495-2499.	4.0	10
34	Magnetic topologies of an in vivo FTE observed by Double Star/TC-1 at Earth's magnetopause. <i>Geophysical Research Letters</i> , 2013, 40, 3502-3506.	4.0	62
35	Flow bouncing and electron injection observed by Cluster. <i>Journal of Geophysical Research: Space Physics</i> , 2013, 118, 2055-2072.	2.4	38
36	Spatial distribution of rolled up Kelvin-Helmholtz vortices at Earth's dayside and flank magnetopause. <i>Annales Geophysicae</i> , 2012, 30, 1025-1035.	1.6	59

#	ARTICLE	IF	CITATIONS
37	Inner plasma structure of the low-latitude reconnection layer. Journal of Geophysical Research, 2012, 117, .	3.3	9
38	Temporal evolution and electric potential structure of the auroral acceleration region from multispacecraft measurements. Journal of Geophysical Research, 2012, 117, .	3.3	11
39	Electron dynamics in the reconnection ion diffusion region. Journal of Geophysical Research, 2012, 117, .	3.3	12
40	Asymmetry in the current sheet and secondary magnetic flux ropes during guide field magnetic reconnection. Journal of Geophysical Research, 2012, 117, .	3.3	40
41	Solar cycle variations of the Cluster spacecraft potential and its use for electron density estimations. Journal of Geophysical Research, 2012, 117, .	3.3	52
42	AXIOM: advanced X-ray imaging of the magnetosphere. Experimental Astronomy, 2012, 33, 403-443.	3.7	30
43	IMPALAS: Investigation of MagnetoPause Activity using Longitudinally-Aligned Satellites—a mission concept proposed for the ESA M3 2020/2022 launch. Experimental Astronomy, 2012, 33, 365-401.	3.7	0
44	Uranus Pathfinder: exploring the origins and evolution of Ice Giant planets. Experimental Astronomy, 2012, 33, 753-791.	3.7	44
45	Alfvén: magnetosphere-ionosphere connection explorers. Experimental Astronomy, 2012, 33, 445-489.	3.7	9
46	Midnight sector observations of auroral omega bands. Journal of Geophysical Research, 2011, 116, .	3.3	18
47	Saturn's low-latitude boundary layer: 2. Electron structure. Journal of Geophysical Research, 2011, 116, n/a-n/a.	3.3	3
48	Average magnetotail electron and proton pitch angle distributions from Cluster PEACE and CIS observations. Geophysical Research Letters, 2011, 38, n/a-n/a.	4.0	59
49	Spatiotemporal features of the auroral acceleration region as observed by Cluster. Journal of Geophysical Research, 2011, 116, n/a-n/a.	3.3	17
50	Evolution in space and time of the quasi-static acceleration potential of inverted-V aurora and its interaction with Alfvénic boundary processes. Journal of Geophysical Research, 2011, 116, n/a-n/a.	3.3	22
51	Evidence of the origin of the Hall magnetic field for reconnection: Hall MHD reconstruction results from Cluster observations. Journal of Geophysical Research, 2011, 116, n/a-n/a.	3.3	17
52	Observations of electron vorticity in the inner plasma sheet. Annales Geophysicae, 2011, 29, 1517-1527.	1.6	4
53	On The Propagation And Modulation Of Electrostatic Solitary Waves Observed Near The Magnetopause On Cluster. AIP Conference Proceedings, 2011, , .	0.4	1
54	Cluster observations of a transient signature in the magnetotail: implications for the mode of reconnection. Annales Geophysicae, 2011, 29, 2131-2146.	1.6	4

#	ARTICLE	IF	CITATIONS
55	First measurements of electron vorticity in the foreshock and solar wind. <i>Annales Geophysicae</i> , 2010, 28, 2187-2200.	1.6	9
56	A new form of Saturn's magnetopause using a dynamic pressure balance model, based on in situ, multi-instrument Cassini measurements. <i>Journal of Geophysical Research</i> , 2010, 115, .	3.3	145
57	South-north asymmetry of field-aligned currents in the magnetotail observed by Cluster. <i>Journal of Geophysical Research</i> , 2010, 115, .	3.3	34
58	Electron acceleration signatures in the magnetotail associated with substorms. <i>Journal of Geophysical Research</i> , 2010, 115, .	3.3	64
59	Cluster observations of bidirectional beams caused by electron trapping during antiparallel reconnection. <i>Journal of Geophysical Research</i> , 2010, 115, .	3.3	58
60	Simultaneous FAST and Double Star TC1 observations of broadband electrons during a storm time substorm. <i>Journal of Geophysical Research</i> , 2010, 115, .	3.3	6
61	Generation of whistler mode emissions in the inner magnetosphere: An event study. <i>Journal of Geophysical Research</i> , 2010, 115, .	3.3	39
62	Characteristics of Langmuir electric field waveforms and power spectra exhibiting nonlinear behavior in Earth's foreshock. <i>Journal of Geophysical Research</i> , 2010, 115, .	3.3	14
63	On the multispacecraft determination of periodic surface wave phase speeds and wavelengths. <i>Journal of Geophysical Research</i> , 2010, 115, .	3.3	11
64	Wave-particle interactions in the equatorial source region of whistler-mode emissions. <i>Journal of Geophysical Research</i> , 2010, 115, .	3.3	51
65	Magnetic reconnection and cold plasma at the magnetopause. <i>Geophysical Research Letters</i> , 2010, 37, .	4.0	35
66	Comprehensive ground-based and in situ observations of substorm expansion phase onset. <i>Journal of Geophysical Research</i> , 2010, 115, .	3.3	15
67	PEACE Data in the Cluster Active Archive. <i>Thirty Years of Astronomical Discovery With UKIRT</i> , 2010, , 129-144.	0.3	23
68	Multispacecraft observations of the electron current sheet, neighboring magnetic islands, and electron acceleration during magnetotail reconnection. <i>Physics of Plasmas</i> , 2009, 16, .	1.9	57
69	Multipoint observations of plasma distributions around an X line. , 2009, , .		1
70	The Apparent Layered Structure of the Heliospheric Current Sheet: Multi-Spacecraft Observations. <i>Solar Physics</i> , 2009, 259, 389-416.	2.5	28
71	Solar wind entry via flux tube into magnetosphere observed by Cluster measurements at dayside magnetopause during southward IMF. <i>Science in China Series D: Earth Sciences</i> , 2009, 52, 2104-2111.	0.9	3
72	Boundary layer plasma flows from high-latitude reconnection in the summer hemisphere for northward IMF: THEMIS multipoint observations. <i>Geophysical Research Letters</i> , 2009, 36, .	4.0	4

#	ARTICLE	IF	CITATIONS
73	Tracing solar wind plasma entry into the magnetosphere using ionâ€œelectron temperature ratio. Geophysical Research Letters, 2009, 36, .	4.0	24
74	Spatial structures of magnetic depression in the Earth's highâ€œaltitude cusp: Cluster multipoint observations. Journal of Geophysical Research, 2009, 114, .	3.3	47
75	Simultaneous observations of flux transfer events by THEMIS, Cluster, Double Star, and SuperDARN: Acceleration of FTEs. Journal of Geophysical Research, 2009, 114, .	3.3	27
76	Reply to comment by H. Hasegawa on â€œEvolution of Kelvinâ€œHelmholtz activity on the dusk flank magnetopauseâ€œ. Journal of Geophysical Research, 2009, 114, .	3.3	3
77	Cluster observations of the entry layer equatorward of the cusp under northward interplanetary magnetic field. Journal of Geophysical Research, 2009, 114, .	3.3	38
78	Dynamics and waves near multiple magnetic null points in reconnection diffusion region. Journal of Geophysical Research, 2009, 114, .	3.3	37
79	Radial evolution of nonthermal electron populations in the lowâ€œlatitude solar wind: Helios, Cluster, and Ulysses Observations. Journal of Geophysical Research, 2009, 114, .	3.3	234
80	Surveys on magnetospheric plasmas based on the Double Star Project (DSP) exploration. Science in China Series D: Earth Sciences, 2008, 51, 1639-1647.	0.9	2
81	Observation of energetic electrons within magnetic islands. Nature Physics, 2008, 4, 19-23.	16.7	238
82	Multiple cusps during an extended northward IMF period with a significant $\langle i \rangle_B \langle i \rangle_y$ component. Journal of Geophysical Research, 2008, 113, .	3.3	14
83	Electron flatâ€œtop distributions around the magnetic reconnection region. Journal of Geophysical Research, 2008, 113, .	3.3	78
84	Electron density estimations derived from spacecraft potential measurements on Cluster in tenuous plasma regions. Journal of Geophysical Research, 2008, 113, .	3.3	135
85	Observations of an active thin current sheet. Journal of Geophysical Research, 2008, 113, .	3.3	40
86	The relationship between $\langle j \rangle_B \sim \langle B \rangle$ and $\langle \hat{r} \rangle_P \langle i \rangle_e$ in the magnetotail plasma sheet: Cluster observations. Journal of Geophysical Research, 2008, 113, .	3.3	14
87	Cluster observations of â€œcraterâ€œ flux transfer events at the dayside highâ€œlatitude magnetopause. Journal of Geophysical Research, 2008, 113, .	3.3	39
88	Cluster observations of the midaltitude cusp under strong northward interplanetary magnetic field. Journal of Geophysical Research, 2008, 113, .	3.3	13
89	Magnetotail dipolarization and associated current systems observed by Cluster and Double Star. Journal of Geophysical Research, 2008, 113, .	3.3	14
90	Electron temperature anisotropy constraints in the solar wind. Journal of Geophysical Research, 2008, 113, .	3.3	219

#	ARTICLE	IF	CITATIONS
91	Near-Earth substorm features from multiple satellite observations. Journal of Geophysical Research, 2008, 113, .	3.3	26
92	Global MHD simulation of flux transfer events at the high-latitude magnetopause observed by the Cluster spacecraft and the SuperDARN radar system. Journal of Geophysical Research, 2008, 113, .	3.3	7
93	Local field-aligned currents in the magnetotail and ionosphere as observed by a Cluster, Double Star, and MIRACLE conjunction. Journal of Geophysical Research, 2008, 113, .	3.3	10
94	Cluster observations of an ion-scale current sheet in the magnetotail under the presence of a guide field. Journal of Geophysical Research, 2008, 113, .	3.3	80
95	Formation of the low-latitude boundary layer and cusp under the northward IMF: Simultaneous observations by Cluster and Double Star. Journal of Geophysical Research, 2008, 113, .	3.3	32
96	Coordinated Cluster and Double Star observations of the dayside magnetosheath and magnetopause at different latitudes near noon. Journal of Geophysical Research, 2008, 113, .	3.3	3
97	Multispacecraft observation of electron beam in reconnection region. Journal of Geophysical Research, 2008, 113, .	3.3	26
98	Effect of a northward turning of the interplanetary magnetic field on cusp precipitation as observed by Cluster. Journal of Geophysical Research, 2008, 113, .	3.3	24
99	Electron structure of the magnetopause boundary layer: Cluster/Double Star observations. Journal of Geophysical Research, 2008, 113, .	3.3	12
100	Cluster observations of electrostatic solitary waves near the Earth's bow shock. Journal of Geophysical Research, 2008, 113, .	3.3	38
101	Flattened current sheet and its evolution in substorms. Journal of Geophysical Research, 2008, 113, .	3.3	46
102	Study of near-Earth reconnection events with Cluster and Double Star. Journal of Geophysical Research, 2008, 113, .	3.3	59
103	Oscillation of electron counts at 500 eV downstream of the quasi-perpendicular bow shock. Journal of Geophysical Research, 2008, 113, .	3.3	2
104	Electron trapping around a magnetic null. Geophysical Research Letters, 2008, 35, .	4.0	33
105	Evolution of Kelvin-Helmholtz activity on the dusk flank magnetopause. Journal of Geophysical Research, 2008, 113, .	3.3	95
106	Evidence of an extended electron current sheet and its neighboring magnetic island during magnetotail reconnection. Journal of Geophysical Research, 2008, 113, .	3.3	92
107	Multispacecraft and ground-based observations of substorm timing and activations: Two case studies. Journal of Geophysical Research, 2008, 113, .	3.3	21
108	Structure of the near-Earth plasma sheet during tailward flows. Annales Geophysicae, 2008, 26, 709-724.	1.6	4

#	ARTICLE	IF	CITATIONS
109	Multi-spacecraft observation of plasma dipolarization/injection in the inner magnetosphere. Annales Geophysicae, 2007, 25, 801-814.	1.6	88
110	TC1 and Cluster observation of an FTE on 4 January 2005: A close conjunction. Geophysical Research Letters, 2007, 34, .	4.0	16
111	TC-1 observations of flux pileup and dipolarization-associated expansion in the near-Earth magnetotail during substorms. Geophysical Research Letters, 2007, 34, .	4.0	30
112	Energy input from the exterior cusp into the ionosphere: Correlated ground-based and satellite observations. Geophysical Research Letters, 2007, 34, .	4.0	11
113	Cluster observations of waves in the whistler frequency range associated with magnetic reconnection in the Earth's magnetotail. Journal of Geophysical Research, 2007, 112, .	3.3	95
114	Response of the magnetosheathâ€cusp region to a coronal mass ejection. Journal of Geophysical Research, 2007, 112, .	3.3	4
115	Strong bulk plasma acceleration in Earth's magnetosheath: A magnetic slingshot effect?. Geophysical Research Letters, 2007, 34, .	4.0	61
116	Multi-Spacecraft Study of the 21 January 2005 ICME. Solar Physics, 2007, 244, 139-165.	2.5	50
117	Cluster Observations of the Magnetospheric Low-Latitude Boundary Layer and Cusp during Extreme Solar Wind and Interplanetary Magnetic Field Conditions: I. 10 November 2004 ICME. Solar Physics, 2007, 244, 201-232.	2.5	4
118	Cluster Observations of the Magnetospheric Low-Latitude Boundary Layer and Cusp during Extreme Solar Wind and Interplanetary Magnetic Field Conditions: II. 7 November 2004 ICME and Statistical Survey. Solar Physics, 2007, 244, 233-261.	2.5	9
119	Active Spacecraft Potential Control: Results From the Double Star Project. IEEE Transactions on Plasma Science, 2006, 34, 2046-2052.	1.3	13
120	Remote sensing of a magnetotail reconnection X-line using polar rain electrons. Geophysical Research Letters, 2006, 33, .	4.0	15
121	Shell-instability generated waves by low energy electrons on converging magnetic field lines. Geophysical Research Letters, 2006, 33, .	4.0	4
122	Response of the midâ€altitude cusp to rapid rotations of the IMF. Geophysical Research Letters, 2006, 33, .	4.0	18
123	Temporal evolution of a staircase ion signature observed by Cluster in the mid-altitude polar cusp. Geophysical Research Letters, 2006, 33, .	4.0	19
124	Phase space density analysis of the outer radiation belt energetic electron dynamics. Journal of Geophysical Research, 2006, 111, .	3.3	88
125	Evidence for newly closed magnetosheath field lines at the dayside magnetopause under northward IMF. Journal of Geophysical Research, 2006, 111, .	3.3	99
126	Instabilities driven by ion shell distributions observed by Cluster in the midaltitude plasma sheet boundary layer. Journal of Geophysical Research, 2006, 111, .	3.3	11

#	ARTICLE	IF	CITATIONS
127	Cluster observations of energetic ionospheric ion beams in the auroral region: Acceleration and associated energy-dispersed precipitation. Geophysical Research Letters, 2006, 33, .	4.0	1
128	Cluster encounter with an energetic electron beam during a substorm. Journal of Geophysical Research, 2006, 111, .	3.3	16
129	Dynamics of thin current sheets associated with magnetotail reconnection. Journal of Geophysical Research, 2006, 111, .	3.3	109
130	Cluster observations of flux rope structures in the near-tail. Annales Geophysicae, 2006, 24, 651-666.	1.6	33
131	Cluster PEACE observations of electron pressure tensor divergence in the magnetotail. Geophysical Research Letters, 2006, 33, .	4.0	40
132	Cluster Observations of the CUSP: Magnetic Structure and Dynamics. Surveys in Geophysics, 2005, 26, 5-55.	4.6	25
133	Observations of a Unique Cusp Signature at Low and Mid Altitudes. Surveys in Geophysics, 2005, 26, 307-339.	4.6	4
134	Cluster observations of currents in the plasma sheet during reconnection. Geophysical Research Letters, 2005, 32, .	4.0	30
135	Cluster electron observations of the separatrix layer during traveling compression regions. Geophysical Research Letters, 2005, 32, .	4.0	17
136	Energy deposition by Alfvén waves into the dayside auroral oval: Cluster and FAST observations. Journal of Geophysical Research, 2005, 110, .	3.3	113
137	Multipoint observations of transient reconnection signatures in the cusp precipitation: A Cluster-IMAGE detailed case study. Journal of Geophysical Research, 2005, 110, .	3.3	19
138	Characteristics of the magnetosheath electron boundary layer under northward interplanetary magnetic field: Implications for high-latitude reconnection. Journal of Geophysical Research, 2005, 110, .	3.3	81
139	Ionospheric signatures of plasma injections in the cusp triggered by solar wind pressure pulses. Journal of Geophysical Research, 2005, 110, .	3.3	10
140	Interferometric identification of ion acoustic broadband waves in the auroral region: CLUSTER observations. Geophysical Research Letters, 2005, 32, .	4.0	4
141	On the formation of the high-altitude stagnant cusp: Cluster observations. Geophysical Research Letters, 2005, 32, n/a-n/a.	4.0	24
142	Relating near-Earth observations of an interplanetary coronal mass ejection to the conditions at its site of origin in the solar corona. Geophysical Research Letters, 2005, 32, .	4.0	11
143	A survey of flux transfer events observed by Cluster during strongly northward IMF. Geophysical Research Letters, 2005, 32, n/a-n/a.	4.0	28
144	Ion sound wave packets at the quasiperpendicular shock front. Geophysical Research Letters, 2005, 32, .	4.0	38

#	ARTICLE	IF	CITATIONS
145	A phase locking mechanism for nongyrotropic electron distributions upstream of the Earth's bow shock. <i>Journal of Geophysical Research</i> , 2005, 110, .	3.3	4
146	The location of the open-closed magnetic field line boundary in the dawn sector auroral ionosphere. <i>Annales Geophysicae</i> , 2004, 22, 3625-3639.	1.6	24
147	Cluster observations of ULF waves with pulsating electron beams above the high latitude dusk-side auroral region. <i>Geophysical Research Letters</i> , 2004, 31, n/a-n/a.	4.0	8
148	Thin electron-scale layers at the magnetopause. <i>Geophysical Research Letters</i> , 2004, 31, .	4.0	68
149	Cluster observations of lower hybrid turbulence within thin layers at the magnetopause. <i>Geophysical Research Letters</i> , 2004, 31, .	4.0	92
150	Cluster observations of finite amplitude Alfvén waves and small-scale magnetic filaments downstream of a quasi-perpendicular shock. <i>Journal of Geophysical Research</i> , 2004, 109, .	3.3	60
151	Cluster observations of quasi-periodic impulsive signatures in the dayside northern lobe: High-latitude flux transfer events?. <i>Journal of Geophysical Research</i> , 2004, 109, .	3.3	11
152	Flow shear near the boundary of the plasma sheet observed by Cluster and Geotail. <i>Journal of Geophysical Research</i> , 2004, 109, .	3.3	35
153	Correlation between suprathermal electron bursts, broadband extremely low frequency waves, and local ion heating in the midaltitude cleft/low-latitude boundary layer observed by Cluster. <i>Journal of Geophysical Research</i> , 2004, 109, .	3.3	18
154	What high altitude observations tell us about the auroral acceleration: A Cluster/DMSP conjunction. <i>Geophysical Research Letters</i> , 2003, 30, .	4.0	27
155	Observations of auroral broadband emissions by CLUSTER. <i>Geophysical Research Letters</i> , 2003, 30, .	4.0	22
156	Cluster electric current density measurements within a magnetic flux rope in the plasma sheet. <i>Geophysical Research Letters</i> , 2003, 30, .	4.0	77
157	Cluster observations of the high-altitude cusp for northward interplanetary magnetic field: A case study. <i>Journal of Geophysical Research</i> , 2003, 108, .	3.3	31
158	Cluster four spacecraft measurements of small traveling compression regions in the near-tail. <i>Geophysical Research Letters</i> , 2003, 30, n/a-n/a.	4.0	33
159	Statistical distributions of field-aligned electron events in the near-equatorial magnetosphere observed by the Low Energy Plasma Analyzer on CRRES. <i>Journal of Geophysical Research</i> , 2002, 107, SMP 29-1.	3.3	16
160	Motion of auroral ion outflow structures observed with CLUSTER and IMAGE FUV. <i>Journal of Geophysical Research</i> , 2002, 107, SMP 17-1-SMP 17-11.	3.3	7
161	Simultaneous acceleration and pitch angle scattering of field-aligned electrons observed by the LEPA on CRRES. <i>Journal of Geophysical Research</i> , 2002, 107, SMP 1-1-SMP 1-9.	3.3	6
162	PEACE: A PLASMA ELECTRON AND CURRENT EXPERIMENT. <i>Space Science Reviews</i> , 1997, 79, 351-398.	8.1	391
