Version: 2024-02-01

#	Article	IF	CITATIONS
1	Urinary Phthalate Metabolite Concentrations and Diabetes among Women in the National Health and Nutrition Examination Survey (NHANES) 2001–2008. Environmental Health Perspectives, 2012, 120, 1307-1313.	6.0	181
2	Hypertensive Disorders of Pregnancy and Maternal Cardiovascular Disease Risk Factor Development. Annals of Internal Medicine, 2018, 169, 224.	3.9	181
3	Racial/Ethnic Disparities in Environmental Endocrine Disrupting Chemicals and Women's Reproductive Health Outcomes: Epidemiological Examples Across the Life Course. Current Epidemiology Reports, 2016, 3, 161-180.	2.4	118
4	Gender and racial/ethnic differences in the associations of urinary phthalate metabolites with markers of diabetes risk: national health and nutrition examination survey 2001–2008. Environmental Health, 2014, 13, 6.	4.0	100
5	The Environment and Reproductive Health (EARTH) Study: a prospective preconception cohort. Human Reproduction Open, 2018, 2018, .	5.4	90
6	Racial/Ethnic Differences in Hormonally-Active Hair Product Use: A Plausible Risk Factor for Health Disparities. Journal of Immigrant and Minority Health, 2012, 14, 506-511.	1.6	87
7	The association between phthalates and metabolic syndrome: the National Health and Nutrition Examination Survey 2001–2010. Environmental Health, 2016, 15, 52.	4.0	87
8	Pregnancy urinary phthalate metabolite concentrations and gestational diabetes risk factors. Environment International, 2016, 96, 118-126.	10.0	81
9	Evaluating effects of prenatal exposure to phthalate mixtures on birth weight: A comparison of three statistical approaches. Environment International, 2018, 113, 231-239.	10.0	81
10	Hair product use, age at menarche and mammographic breast density in multiethnic urban women. Environmental Health, 2018, 17, 1.	4.0	79
11	Maternal urinary phthalate metabolites in relation to gestational diabetes and glucose intolerance during pregnancy. Environment International, 2019, 123, 588-596.	10.0	75
12	Urinary cadmium concentrations and metabolic syndrome in U.S. adults: The National Health and Nutrition Examination Survey 2001–2014. Environment International, 2018, 121, 349-356.	10.0	66
13	Trimester-Specific Urinary Bisphenol A Concentrations and Blood Glucose Levels Among Pregnant Women From a Fertility Clinic. Journal of Clinical Endocrinology and Metabolism, 2017, 102, 1350-1357.	3.6	53
14	Childhood Hair Product Use and Earlier Age at Menarche in a Racially Diverse Study Population: A Pilot Study. Annals of Epidemiology, 2011, 21, 461-465.	1.9	52
15	Prenatal stress-immune programming of sex differences in comorbidity of depression and obesity/metabolic syndrome. Dialogues in Clinical Neuroscience, 2016, 18, 425-436.	3.7	52
16	Preterm Delivery and Maternal Cardiovascular Disease Risk Factors: The Nurses' Health Study II. Journal of Women's Health, 2019, 28, 677-685.	3.3	50
17	Racial and ethnic variations in phthalate metabolite concentration changes across full-term pregnancies. Journal of Exposure Science and Environmental Epidemiology, 2017, 27, 160-166.	3.9	49
18	Pregnancy Hyperglycaemia and Risk of Prenatal and Postpartum Depressive Symptoms. Paediatric and Perinatal Epidemiology, 2015, 29, 281-289.	1.7	47

#	Article	IF	CITATIONS
19	Urinary concentrations of parabens mixture and pregnancy glucose levels among women from a fertility clinic. Environmental Research, 2019, 168, 389-396.	7.5	46
20	Approaches for incorporating environmental mixtures as mediators in mediation analysis. Environment International, 2019, 123, 368-374.	10.0	43
21	Racial/Ethnic Disparities in Pregnancy and Prenatal Exposure to Endocrine-Disrupting Chemicals Commonly Used in Personal Care Products. Current Environmental Health Reports, 2021, 8, 98-112.	6.7	42
22	Gestational Age, Infant Birth Weight, and Subsequent Risk of Type 2 Diabetes in Mothers: Nurses' Health Study II. Preventing Chronic Disease, 2013, 10, E156.	3.4	36
23	Association of Periconception Paternal Body Mass Index With Persistent Changes in DNA Methylation of Offspring in Childhood. JAMA Network Open, 2019, 2, e1916777.	5.9	36
24	Perinatal weight and risk of prenatal and postpartum depressive symptoms. Annals of Epidemiology, 2017, 27, 695-700.e1.	1.9	34
25	Urinary phthalate metabolite concentrations and maternal weight during early pregnancy. International Journal of Hygiene and Environmental Health, 2017, 220, 1347-1355.	4.3	32
26	Trimester-specific phthalate concentrations and glucose levels among women from a fertility clinic. Environmental Health, 2018, 17, 55.	4.0	31
27	Associations Between Prenatal Urinary Biomarkers of Phthalate Exposure and Preterm Birth. JAMA Pediatrics, 2022, 176, 895.	6.2	31
28	Pregnancy urinary bisphenol-A concentrations and glucose levels across BMI categories. Environment International, 2018, 113, 35-41.	10.0	30
29	Chemical/straightening and other hair product usage during childhood, adolescence, and adulthood among African-American women: potential implications for health. Journal of Exposure Science and Environmental Epidemiology, 2020, 30, 86-96.	3.9	30
30	Climate factors and gestational diabetes mellitus risk – a systematic review. Environmental Health, 2020, 19, 112.	4.0	30
31	Associations of Per- and Polyfluoroalkyl Substances (PFAS) With Glucose Tolerance During Pregnancy in Project Viva. Journal of Clinical Endocrinology and Metabolism, 2020, 105, e2864-e2876.	3.6	29
32	Hormonal activity in commonly used Black hair care products: evaluating hormone disruption as a plausible contribution to health disparities. Journal of Exposure Science and Environmental Epidemiology, 2021, 31, 476-486.	3.9	25
33	Continuous Glucose Monitoring, Glycemic Variability, and Excessive Fetal Growth in Pregnancies Complicated by Type 1 Diabetes. Diabetes Technology and Therapeutics, 2018, 20, 413-419.	4.4	24
34	Assessing Indoor Dust Interference with Human Nuclear Hormone Receptors in Cell-Based Luciferase Reporter Assays. Environmental Health Perspectives, 2021, 129, 47010.	6.0	23
35	Impact of "healthier―materials interventions on dust concentrations of per- and polyfluoroalkyl substances, polybrominated diphenyl ethers, and organophosphate esters. Environment International, 2021, 150, 106151.	10.0	22
36	A Prospective Study of Early Pregnancy Essential Metal(loid)s and Glucose Levels Late in the Second Trimester. Journal of Clinical Endocrinology and Metabolism, 2019, 104, 4295-4303.	3.6	21

#	Article	IF	CITATIONS
37	Evaluating associations between early pregnancy trace elements mixture and 2nd trimester gestational glucose levels: A comparison of three statistical approaches. International Journal of Hygiene and Environmental Health, 2020, 224, 113446.	4.3	21
38	Diet and erythrocyte metal concentrations in early pregnancy—cross-sectional analysis in Project Viva. American Journal of Clinical Nutrition, 2021, 114, 540-549.	4.7	20
39	Urinary phthalate metabolite concentrations and serum hormone levels in pre- and perimenopausal women from the Midlife Women's Health Study. Environment International, 2021, 156, 106633.	10.0	20
40	Phthalate metabolite exposures among immigrants living in the United States: findings from NHANES, 1999–2014. Journal of Exposure Science and Environmental Epidemiology, 2019, 29, 71-82.	3.9	19
41	Chemical contaminant exposures assessed using silicone wristbands among occupants in office buildings in the USA, UK, China, and India. Environment International, 2021, 156, 106727.	10.0	19
42	Pregnancy phthalate metabolite concentrations and infant birth weight by gradations of maternal glucose tolerance. International Journal of Hygiene and Environmental Health, 2019, 222, 395-401.	4.3	18
43	SARS-CoV-2 in diabetic pregnancies: a systematic scoping review. BMC Pregnancy and Childbirth, 2021, 21, 573.	2.4	18
44	Preterm Birth and Subsequent Risk of Type 2 Diabetes in Black Women. Epidemiology, 2014, 25, 805-810.	2.7	17
45	Socioeconomic and racial/ethnic differences in use of endocrine-disrupting chemical-associated personal care product categories among pregnant women. Environmental Research, 2021, 198, 111212.	7.5	17
46	Pregnancy Per- and Polyfluoroalkyl Substance Concentrations and Postpartum Health in Project Viva: A Prospective Cohort. Journal of Clinical Endocrinology and Metabolism, 2020, 105, e3415-e3426.	3.6	16
47	Urinary phthalate metabolite concentrations and personal care product use during pregnancy – Results of a pilot study. Science of the Total Environment, 2022, 835, 155439.	8.0	14
48	Birth Outcomes in a Prospective Pregnancy–Birth Cohort Study of Environmental Risk Factors in Kuwait: The TRACER Study. Paediatric and Perinatal Epidemiology, 2016, 30, 408-417.	1.7	13
49	Urinary phthalate metabolite concentrations and hot flashes in women from an urban convenience sample of midlife women. Environmental Research, 2021, 197, 110891.	7.5	13
50	Early pregnancy essential and non-essential metal mixtures and gestational glucose concentrations in the 2nd trimester: Results from project viva. Environment International, 2021, 155, 106690.	10.0	13
51	Gastric Bypass Surgery in Severely Obese Women With Type 1 Diabetes: Anthropometric and Cardiometabolic Effects at 1 and 5 Years Postsurgery. Diabetes Care, 2015, 38, e104-e105.	8.6	12
52	Association of self-reported personal care product use with blood glucose levels measured during pregnancy among women from a fertility clinic. Science of the Total Environment, 2019, 695, 133855.	8.0	12
53	Associations between sociodemographic characteristics and exposures to PBDEs, OH-PBDEs, PCBs, and PFASs in a diverse, overweight population of pregnant women. Journal of Exposure Science and Environmental Epidemiology, 2020, 30, 42-55.	3.9	12
54	Time-specific placental growth factor (PIGF) across pregnancy and infant birth weight in women with preexisting diabetes. Hypertension in Pregnancy, 2016, 35, 436-446.	1.1	11

#	Article	IF	CITATIONS
55	Racial differences in neonatal hypoglycemia among very early preterm births. Journal of Perinatology, 2018, 38, 258-263.	2.0	11
56	Multiple mediators approach to study environmental chemicals as determinants of health disparities. Environmental Epidemiology, 2018, 2, e015.	3.0	11
57	Serum beta-carotene modifies the association between phthalate mixtures and insulin resistance: The National Health and Nutrition Examination Survey 2003–2006. Environmental Research, 2019, 178, 108729.	7.5	11
58	Acculturation and endocrine disrupting chemical-associated personal care product use among US-based foreign-born Chinese women of reproductive age. Journal of Exposure Science and Environmental Epidemiology, 2021, 31, 224-232.	3.9	11
59	Endocrine disrupting chemical-associated hair product use during pregnancy and gestational age at delivery: a pilot study. Environmental Health, 2021, 20, 86.	4.0	10
60	Hair Maintenance and Chemical Hair Product Usage as Barriers to Physical Activity in Childhood and Adulthood among African American Women. International Journal of Environmental Research and Public Health, 2020, 17, 9254.	2.6	8
61	Time trends in pregnancy-related outcomes among women with type 1 diabetes mellitus, 2004–2017. Journal of Perinatology, 2020, 40, 1145-1153.	2.0	8
62	Urinary phthalate and DINCH metabolite concentrations and gradations of maternal glucose intolerance. Environment International, 2022, 161, 107099.	10.0	8
63	Per- and polyfluoroalkyl substance plasma concentrations and metabolomic markers of type 2 diabetes in the Diabetes Prevention Program trial. International Journal of Hygiene and Environmental Health, 2021, 232, 113680.	4.3	7
64	Identifying windows of susceptibility to endocrine disrupting chemicals in relation to gestational weight gain among pregnant women attending a fertility clinic. Environmental Research, 2021, 194, 110638.	7.5	7
65	Much to HAPO FUS About: Increasing Maternal Glycemia in Pregnancy Is Associated With Worsening Childhood Glucose Metabolism. Diabetes Care, 2019, 42, 393-395.	8.6	6
66	Associations of insulin pump and continuous glucose monitoring use with pregnancy-related outcomes in women with type 1 diabetes. Diabetes Research and Clinical Practice, 2022, 187, 109854.	2.8	6
67	Protracted Impairment of Maternal Metabolic Health in Mouse Dams Following Pregnancy Exposure to a Mixture of Low Dose Endocrine-Disrupting Chemicals, a Pilot Study. Toxics, 2021, 9, 346.	3.7	6
68	Association of Urinary Phthalate and Phthalate Replacement Metabolite Concentrations with Serum Lipid Biomarker Levels among Pregnant Women Attending a Fertility Center. Toxics, 2022, 10, 292.	3.7	6
69	Endocrine-Disrupting Chemical Exposures in Pregnancy: a Sensitive Window for Later-Life Cardiometabolic Health in Women. Current Epidemiology Reports, 2021, 8, 130-142.	2.4	5
70	Paternal bias: The impact of not accounting for paternal confounders in reproductive epidemiological studies. American Journal of Obstetrics and Gynecology, 2020, 222, 87-88.	1.3	4
71	Perinatal urinary benzophenone-3 concentrations and glucose levels among women from a fertility clinic. Environmental Health, 2020, 19, 45.	4.0	4
72	Polybrominated diphenyl ethers in early pregnancy and preterm birth: Findings from the NICHD Fetal Growth Studies. International Journal of Hygiene and Environmental Health, 2022, 243, 113978.	4.3	4

#	Article	IF	CITATIONS
73	Average and time-specific maternal prenatal inflammatory biomarkers and the risk of labor epidural associated fever. PLoS ONE, 2019, 14, e0222958.	2.5	3
74	Ambient PM gross \hat{I}^2 -activity and glucose levels during pregnancy. Environmental Health, 2021, 20, 70.	4.0	3
75	The immigrant birthweight paradox in an urban cohort: Role of immigrant enclaves and ambient air pollution. Journal of Exposure Science and Environmental Epidemiology, 2022, 32, 571-582.	3.9	3
76	Pregnancy urinary concentrations of bisphenol A, parabens and other phenols in relation to serum levels of lipid biomarkers: Results from the EARTH study. Science of the Total Environment, 2022, 833, 155191.	8.0	2
77	Prenatal Dietary Intake and Blood Metal Concentrations During the 1st Trimester of Pregnancy in Project Viva. Current Developments in Nutrition, 2020, 4, nzaa061_066.	0.3	0
78	Cumulative phthalate exposure and risk of hot flashes within the Midlife Women's Health Study. ISEE Conference Abstracts, 2021, 2021, .	0.0	0
