| # | ARTICLE   | IF  | CITATIONS |
|---|---|-----|-----------|
| 1 | Assessment of atrial regional and global electromechanical function by tissue velocity echocardiography: a feasibility study on healthy individuals. Cardiovascular Ultrasound, 2005, 3, 4.   | 1.6 | 43        |
| 2 | The effects of heart rate on myocardial velocity and atrio-ventricular displacement during exercise with and without beta-blockade: a tissue Doppler echocardiographic study. European Journal of Echocardiography, 2005, 6, 127-133.           | 2.3 | 9         |
| 3 | Is left ventricular diastolic function an independent marker of prognosis after acute myocardial infarction?. International Journal of Cardiology, 2004, 96, 183-189.   | 1.7 | 26        |
| 4 | Assessment of the longitudinal and circumferential left ventricular function at rest and during exercise in healthy elderly individuals by tissue-Doppler echocardiography: relationship with heart rate. Clinical Science, 2004, 106, 451-457. | 4.3 | 19        |
| 5 | The Association Between Residual Myocardial Ischemia and Heart Rate Variability Early After Acute Myocardial Infarction. Annals of Noninvasive Electrocardiology, 1998, 3, 288-297.   | 1.1 | 0         |
| 6 | Markers of risk after acute myocardial infarction. A comparison of clinical variables, ambulatory and exercise electrocardiography, echocardiography, and stress echocardiography. Coronary Artery Disease, 1997, 8, 327-334.                   | 0.7 | 7         |
| 7 | ST-Segment depression on ambulatory electrocardiography in the early in-hospital period after acute myocardial infarction predicts early and late mortality: A short-term and a 3-year follow-up study. Clinical Cardiology, 1995, 18, 392-400. | 1.8 | 8         |
