#	ARTICLE	IF	CITATIONS
1	Food anthocyanins decrease concentrations of TNF- α in older adults with mild cognitive impairment: A randomized, controlled, double blind clinical trial. <i>Nutrition, Metabolism and Cardiovascular Diseases</i> , 2021, 31, 950-960.	2.6	20
2	Doomsday Prepping During the COVID-19 Pandemic. <i>Frontiers in Psychology</i> , 2021, 12, 659925.	2.1	17
3	Plasma prolactin is higher in major depressive disorder and females, and associated with anxiety, hostility, somatization, psychotic symptoms and heart rate. <i>Comprehensive Psychoneuroendocrinology</i> , 2021, 6, 100049.	1.7	9
4	Cortisol in relation to problematic eating behaviours, adiposity and symptom profiles in Major Depressive Disorder. <i>Comprehensive Psychoneuroendocrinology</i> , 2021, 7, 100067.	1.7	2
5	Pro-Inflammatory Cytokines are Dysregulated in Depression and Correlated With Measures of Psychopathology. <i>International Journal of Psychophysiology</i> , 2021, 168, S143.	1.0	0
6	Patients' sun practices, perceptions of skin cancer and their risk of skin cancer in rural Australia. <i>Health Promotion Journal of Australia</i> , 2020, 31, 84-92.	1.2	9
7	Exposure to Domestic Violence during Adolescence: Coping Strategies and Attachment Styles as Early Moderators and their Relationship to Functioning during Adulthood. <i>Journal of Child and Adolescent Trauma</i> , 2020, 13, 185-198.	1.9	9
8	Overeating and food addiction in Major Depressive Disorder: Links to peripheral dopamine. <i>Appetite</i> , 2020, 148, 104586.	3.7	38
9	Relationships Between Depressive Symptoms, Other Psychological Symptoms, and Quality of Life. <i>Psychiatry Research</i> , 2020, 289, 113049.	3.3	18
10	Cognitive Distortions in Relation to Plasma Cortisol and Oxytocin Levels in Major Depressive Disorder. <i>Frontiers in Psychiatry</i> , 2020, 10, 971.	2.6	19
11	Medical student perceptions of physical and emotional safety before and after 5-week mental health placements. <i>Australasian Psychiatry</i> , 2020, 28, 229-234.	0.7	3
12	Comparing neuropsychological performance in adults with obsessive-compulsive disorder, attention-deficit hyperactivity disorder and healthy controls: An online study. <i>Journal of Obsessive-Compulsive and Related Disorders</i> , 2019, 23, 100477.	1.5	1
13	Psychological Mechanisms Predicting Wellbeing in Pet Owners: Rogers' Core Conditions versus Bowlby's Attachment. <i>Anthrozoos</i> , 2019, 32, 399-417.	1.4	23
14	Cortisol, oxytocin, and quality of life in major depressive disorder. <i>Quality of Life Research</i> , 2019, 28, 2919-2928.	3.1	28
15	Weight gain in Major Depressive Disorder: Linking appetite and disordered eating to leptin and ghrelin. <i>Psychiatry Research</i> , 2019, 279, 244-251.	3.3	25
16	Plasma cortisol and oxytocin levels predict help-seeking intentions for depressive symptoms. <i>Psychoneuroendocrinology</i> , 2018, 87, 159-165.	2.7	16
17	Completion rates and psychosocial intervention effectiveness in an Australian substance use therapeutic community. <i>Substance Abuse Treatment, Prevention, and Policy</i> , 2018, 13, 33.	2.2	22
18	Problematic eating behaviours, changes in appetite, and weight gain in Major Depressive Disorder: The role of leptin. <i>Journal of Affective Disorders</i> , 2018, 240, 137-145.	4.1	22

#	ARTICLE	IF	CITATIONS
19	Modelling complex relationships between physiological and psychosocial factors in depression. <i>International Journal of Psychophysiology</i> , 2016, 108, 107.	1.0	0
20	Cognitive factors predicting checking, procrastination and other maladaptive behaviours: Prospective versus Inhibitory Intolerance of Uncertainty. <i>Journal of Obsessive-Compulsive and Related Disorders</i> , 2016, 9, 30-35.	1.5	22
21	Graduate-entry medical students: older and wiser but not less distressed. <i>Australasian Psychiatry</i> , 2016, 24, 88-92.	0.7	24
22	Electrophysiology of facilitation priming in obsessive-compulsive and panic disorders. <i>Clinical Neurophysiology</i> , 2016, 127, 464-478.	1.5	4
23	Specific Attitudes Which Predict Psychology Students' Intentions to Seek Help for Psychological Distress. <i>Journal of Clinical Psychology</i> , 2014, 70, 273-282.	1.9	43
24	How specific are inhibitory deficits to obsessive-compulsive disorder? A neurophysiological comparison with panic disorder. <i>Clinical Neurophysiology</i> , 2014, 125, 463-475.	1.5	26
25	Skin conductance measures of emotional reactivity to threatening stimuli in obsessive-compulsive disorder versus panic disorder. <i>International Journal of Psychophysiology</i> , 2014, 94, 209.	1.0	0
26	Neural time course of threat-related attentional bias and interference in panic and obsessive-compulsive disorders. <i>Biological Psychology</i> , 2013, 94, 116-129.	2.2	40
27	Updating medical school psychiatry curricula to meet projected mental health needs. <i>Australasian Psychiatry</i> , 2013, 21, 578-582.	0.7	15
28	It's time to examine the status of our undergraduate mental health curricula. <i>Medical Journal of Australia</i> , 2013, 198, 533-534.	1.7	4
29	The role of problem orientation and cognitive distortions in depression and anxiety interventions for young adults. <i>Advances in Mental Health</i> , 2011, 10, 52-61.	0.7	16
30	The effects of need for autonomy and preference for seeking help from informal sources on emerging adults' intentions to access mental health services for common mental disorders and suicidal thoughts. <i>Advances in Mental Health</i> , 2011, 10, 29-38.	0.7	77
31	Sequence effects in the Go/NoGo task: Inhibition and facilitation. <i>International Journal of Psychophysiology</i> , 2009, 74, 209-219.	1.0	27
32	Event-related potentials during an emotional Stroop task. <i>International Journal of Psychophysiology</i> , 2007, 63, 221-231.	1.0	153
