

Chris I Baker

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/890934/chris-i-baker-publications-by-year.pdf>

Version: 2024-04-26

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

117
papers

9,849
citations

#	Paper	IF	Citations
117	Illusory faces are more likely to be perceived as male than female.. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2022 , 119,	11.5	2
116	An Empirically Driven Guide on Using Bayes Factors for M/EEG Decoding 2022 , 2022,		1
115	Direct comparison of contralateral bias and face/scene selectivity in human occipitotemporal cortex. <i>Brain Structure and Function</i> , 2021 , 1	4	0
114	Theta-burst TMS of lateral occipital cortex reduces BOLD responses across category-selective areas in ventral temporal cortex. <i>NeuroImage</i> , 2021 , 230, 117790	7.9	5
113	Disrupted object-scene semantics boost scene recall but diminish object recall in drawings from memory. <i>Memory and Cognition</i> , 2021 , 49, 1568-1582	2.2	3
112	Multiple adjoining word- and face-selective regions in ventral temporal cortex exhibit distinct dynamics. <i>Journal of Neuroscience</i> , 2021 ,	6.6	3
111	Quantifying aphantasia through drawing: Those without visual imagery show deficits in object but not spatial memory. <i>Cortex</i> , 2021 , 135, 159-172	3.8	20
110	Distinct Representational Structure and Localization for Visual Encoding and Recall during Visual Imagery. <i>Cerebral Cortex</i> , 2021 , 31, 1898-1913	5.1	10
109	Representation of Contralateral Visual Space in the Human Hippocampus. <i>Journal of Neuroscience</i> , 2021 , 41, 2382-2392	6.6	5
108	Expert Tool Users Show Increased Differentiation between Visual Representations of Hands and Tools. <i>Journal of Neuroscience</i> , 2021 , 41, 2980-2989	6.6	4
107	Resolving visual motion through perceptual gaps. <i>Trends in Cognitive Sciences</i> , 2021 , 25, 978-991	14	1
106	Highly similar and competing visual scenes lead to diminished object but not spatial detail in memory drawings.. <i>Memory</i> , 2021 , 1-14	1.8	1
105	Reply to Intraub. <i>Current Biology</i> , 2020 , 30, R1465-R1466	6.3	2
104	Memorability of words in arbitrary verbal associations modulates memory retrieval in the anterior temporal lobe. <i>Nature Human Behaviour</i> , 2020 , 4, 937-948	12.8	14
103	Intention to learn modulates the impact of reward and punishment on sequence learning. <i>Scientific Reports</i> , 2020 , 10, 8906	4.9	2
102	Boundaries Extend and Contract in Scene Memory Depending on Image Properties. <i>Current Biology</i> , 2020 , 30, 537-543.e3	6.3	13
101	Recent advances in understanding object recognition in the human brain: deep neural networks, temporal dynamics, and context. <i>F1000Research</i> , 2020 , 9,	3.6	6

100	Revealing the multidimensional mental representations of natural objects underlying human similarity judgements. <i>Nature Human Behaviour</i> , 2020 , 4, 1173-1185	12.8	42
99	Rapid and dynamic processing of face pareidolia in the human brain. <i>Nature Communications</i> , 2020 , 11, 4518	17.4	20
98	The Human Posterior Superior Temporal Sulcus Samples Visual Space Differently From Other Face-Selective Regions. <i>Cerebral Cortex</i> , 2020 , 30, 778-785	5.1	14
97	Memorability of photographs in subjective cognitive decline and mild cognitive impairment: Implications for cognitive assessment. <i>Alzheimer's and Dementia: Diagnosis, Assessment and Disease Monitoring</i> , 2019 , 11, 610-618	5.2	10
96	Scene Perception in the Human Brain. <i>Annual Review of Vision Science</i> , 2019 , 5, 373-397	8.2	71
95	Visual responsiveness in sensorimotor cortex is increased following amputation and reduced after mirror therapy. <i>NeuroImage: Clinical</i> , 2019 , 23, 101882	5.3	6
94	Similarity judgments and cortical visual responses reflect different properties of object and scene categories in naturalistic images. <i>NeuroImage</i> , 2019 , 197, 368-382	7.9	18
93	THINGS: A database of 1,854 object concepts and more than 26,000 naturalistic object images. <i>PLoS ONE</i> , 2019 , 14, e0223792	3.7	35
92	Distinct subdivisions of human medial parietal cortex support recollection of people and places. <i>ELife</i> , 2019 , 8,	8.9	33
91	Differential Representations of Perceived and Retrieved Visual Information in Hippocampus and Cortex. <i>Cerebral Cortex</i> , 2019 , 29, 4452-4461	5.1	17
90	Finding the baby in the bath water - evidence for task-specific changes in resting state functional connectivity evoked by training. <i>NeuroImage</i> , 2019 , 188, 524-538	7.9	7
89	Scenes in the Human Brain: Comparing 2D versus 3D Representations. <i>Neuron</i> , 2019 , 101, 8-10	13.9	3
88	Drawings of real-world scenes during free recall reveal detailed object and spatial information in memory. <i>Nature Communications</i> , 2019 , 10, 5	17.4	35
87	Differential impact of reward and punishment on functional connectivity after skill learning. <i>NeuroImage</i> , 2019 , 189, 95-105	7.9	7
86	A Posterior-Anterior Distinction between Scene Perception and Scene Construction in Human Medial Parietal Cortex. <i>Journal of Neuroscience</i> , 2019 , 39, 705-717	6.6	29
85	Statistical power comparisons at 3T and 7T with a GO / NOGO task. <i>NeuroImage</i> , 2018 , 175, 100-110	7.9	13
84	Impact of time-of-day on diffusivity measures of brain tissue derived from diffusion tensor imaging. <i>NeuroImage</i> , 2018 , 173, 25-34	7.9	29
83	Differential Sampling of Visual Space in Ventral and Dorsal Early Visual Cortex. <i>Journal of Neuroscience</i> , 2018 , 38, 2294-2303	6.6	24

82	Bayesian population receptive field modelling. <i>NeuroImage</i> , 2018 , 180, 173-187	7.9	37
81	Comparing Clinical Perimetry and Population Receptive Field Measures in Patients with Choroideremia 2018 , 59, 3249-3258		10
80	Transcranial Magnetic Stimulation to the Occipital Place Area Biases Gaze During Scene Viewing. <i>Frontiers in Human Neuroscience</i> , 2018 , 12, 189	3.3	2
79	Author response: The representational dynamics of task and object processing in humans 2018 ,		2
78	Deconstructing multivariate decoding for the study of brain function. <i>NeuroImage</i> , 2018 , 180, 4-18	7.9	122
77	The representational dynamics of task and object processing in humans. <i>ELife</i> , 2018 , 7,	8.9	72
76	Distinct contributions of functional and deep neural network features to representational similarity of scenes in human brain and behavior. <i>ELife</i> , 2018 , 7,	8.9	60
75	Contributions of low- and high-level properties to neural processing of visual scenes in the human brain. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2017 , 372,	5.8	83
74	The categories, frequencies, and stability of idiosyncratic eye-movement patterns to faces. <i>Vision Research</i> , 2017 , 141, 191-203	2.1	24
73	Trajectory of phantom limb pain relief using mirror therapy: Retrospective analysis of two studies. <i>Scandinavian Journal of Pain</i> , 2017 , 15, 98-103	1.9	17
72	Scanning the horizon: towards transparent and reproducible neuroimaging research. <i>Nature Reviews Neuroscience</i> , 2017 , 18, 115-126	13.5	646
71	The impact of reward and punishment on skill learning depends on task demands. <i>Scientific Reports</i> , 2016 , 6, 36056	4.9	25
70	Making Sense of Real-World Scenes. <i>Trends in Cognitive Sciences</i> , 2016 , 20, 843-856	14	71
69	Impact of time-of-day on brain morphometric measures derived from T1-weighted magnetic resonance imaging. <i>NeuroImage</i> , 2016 , 133, 41-52	7.9	58
68	Differences in Looking at Own- and Other-Race Faces Are Subtle and Analysis-Dependent: An Account of Discrepant Reports. <i>PLoS ONE</i> , 2016 , 11, e0148253	3.7	18
67	The Temporal Dynamics of Scene Processing: A Multifaceted EEG Investigation. <i>ENeuro</i> , 2016 , 3,	3.9	26
66	Evaluating the correspondence between face-, scene-, and object-selectivity and retinotopic organization within lateral occipitotemporal cortex. <i>Journal of Vision</i> , 2016 , 16, 14	0.4	30
65	Scene-Selectivity and Retinotopy in Medial Parietal Cortex. <i>Frontiers in Human Neuroscience</i> , 2016 , 10, 412	3.3	44

64	Multi-Voxel Decoding and the Topography of Maintained Information During Visual Working Memory. <i>Frontiers in Systems Neuroscience</i> , 2016 , 10, 2	3.5	37
63	Facing up to stereotypes. <i>Nature Neuroscience</i> , 2016 , 19, 763-4	25.5	1
62	Seeing is not feeling: posterior parietal but not somatosensory cortex engagement during touch observation. <i>Journal of Neuroscience</i> , 2015 , 35, 1468-80	6.6	29
61	Plasticity of the human visual system after retinal gene therapy in patients with Leber's congenital amaurosis. <i>Science Translational Medicine</i> , 2015 , 7, 296ra110	17.5	39
60	Long-term plasticity in adult somatosensory cortex: functional reorganization after surgical removal of an arteriovenous malformation. <i>Neurocase</i> , 2015 , 21, 618-27	0.8	1
59	Influence of lexical status and orthographic similarity on the multi-voxel response of the visual word form area. <i>NeuroImage</i> , 2015 , 111, 321-328	7.9	17
58	Diffusion MRI properties of the human uncinate fasciculus correlate with the ability to learn visual associations. <i>Cortex</i> , 2015 , 72, 65-78	3.8	25
57	Characteristic visuomotor influences on eye-movement patterns to faces and other high level stimuli. <i>Frontiers in Psychology</i> , 2015 , 6, 1027	3.4	6
56	A Retinotopic Basis for the Division of High-Level Scene Processing between Lateral and Ventral Human Occipitotemporal Cortex. <i>Journal of Neuroscience</i> , 2015 , 35, 11921-35	6.6	83
55	Holding a stick at both ends: on faces and expertise. <i>Frontiers in Human Neuroscience</i> , 2014 , 8, 442	3.3	3
54	Faces in the eye of the beholder: unique and stable eye scanning patterns of individual observers. <i>Journal of Vision</i> , 2014 , 14, 6	0.4	65
53	Task context impacts visual object processing differentially across the cortex. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2014 , 111, E962-71	11.5	101
52	Global motion perception deficits in autism are reflected as early as primary visual cortex. <i>Brain</i> , 2014 , 137, 2588-99	11.2	77
51	Imaging Perception 2014 , 157-190		
50	Goal-dependent dissociation of visual and prefrontal cortices during working memory. <i>Nature Neuroscience</i> , 2013 , 16, 997-9	25.5	126
49	Deconstructing visual scenes in cortex: gradients of object and spatial layout information. <i>Cerebral Cortex</i> , 2013 , 23, 947-57	5.1	96
48	Slower rate of binocular rivalry in autism. <i>Journal of Neuroscience</i> , 2013 , 33, 16983-91	6.6	89
47	Teaching an adult brain new tricks: a critical review of evidence for training-dependent structural plasticity in humans. <i>NeuroImage</i> , 2013 , 73, 225-36	7.9	164

46	Tunnel vision: sharper gradient of spatial attention in autism. <i>Journal of Neuroscience</i> , 2013 , 33, 6776-81	6.6	62
45	The ventral visual pathway: an expanded neural framework for the processing of object quality. <i>Trends in Cognitive Sciences</i> , 2013 , 17, 26-49	14	650
44	On evidence, biases and confounding factors: Response to commentaries. <i>NeuroImage</i> , 2013 , 73, 265-7	7.9	16
43	Impaired fixation to eyes during facial emotion labelling in children with bipolar disorder or severe mood dysregulation. <i>Journal of Psychiatry and Neuroscience</i> , 2013 , 38, 407-16	4.5	19
42	Beyond perceptual expertise: revisiting the neural substrates of expert object recognition. <i>Frontiers in Human Neuroscience</i> , 2013 , 7, 885	3.3	36
41	Remodeling human cortex through training: comment on May. <i>Trends in Cognitive Sciences</i> , 2012 , 16, 96-7; author reply 97-8	14	9
40	Disentangling visual imagery and perception of real-world objects. <i>NeuroImage</i> , 2012 , 59, 4064-73	7.9	136
39	Visual Processing in the Primate Brain 2012 ,		1
38	Start position strongly influences fixation patterns during face processing: difficulties with eye movements as a measure of information use. <i>PLoS ONE</i> , 2012 , 7, e31106	3.7	53
37	Atypical integration of motion signals in Autism Spectrum Conditions. <i>PLoS ONE</i> , 2012 , 7, e48173	3.7	46
36	Real-world scene representations in high-level visual cortex: it's the spaces more than the places. <i>Journal of Neuroscience</i> , 2011 , 31, 7322-33	6.6	214
35	Toward a new model of scientific publishing: discussion and a proposal. <i>Frontiers in Computational Neuroscience</i> , 2011 , 5, 55	3.5	25
34	A new neural framework for visuospatial processing. <i>Nature Reviews Neuroscience</i> , 2011 , 12, 217-30	13.5	845
33	Differential contributions of occipitotemporal regions to person perception. <i>Cognitive Neuroscience</i> , 2011 , 2, 210-211	1.7	6
32	Cortical representations of bodies and faces are strongest in commonly experienced configurations. <i>Nature Neuroscience</i> , 2010 , 13, 417-8	25.5	79
31	High-level visual object representations are constrained by position. <i>Cerebral Cortex</i> , 2010 , 20, 2916-25	5.1	138
30	The neural basis of visual object learning. <i>Trends in Cognitive Sciences</i> , 2010 , 14, 22-30	14	75
29	Informativeness and learning: Response to Gauthier and colleagues. <i>Trends in Cognitive Sciences</i> , 2010 , 14, 236-237	14	6

28	"Referred visual sensations": rapid perceptual elongation after visual cortical deprivation. <i>Journal of Neuroscience</i> , 2009 , 29, 8960-4	6.6	21
27	Reorganization of visual processing in macular degeneration is not specific to the "preferred retinal locus". <i>Journal of Neuroscience</i> , 2009 , 29, 2768-73	6.6	88
26	Circular analysis in systems neuroscience: the dangers of double dipping. <i>Nature Neuroscience</i> , 2009 , 12, 535-40	25.5	1908
25	Feedback of visual object information to foveal retinotopic cortex. <i>Nature Neuroscience</i> , 2008 , 11, 1439-45	15.5	127
24	Reorganization of visual processing in macular degeneration: replication and clues about the role of foveal loss. <i>Vision Research</i> , 2008 , 48, 1910-9	2.1	104
23	How position dependent is visual object recognition?. <i>Trends in Cognitive Sciences</i> , 2008 , 12, 114-22	14	89
22	Privileged coding of convex shapes in human object-selective cortex. <i>Journal of Neurophysiology</i> , 2008 , 100, 753-62	3.2	20
21	Does the fusiform face area contain subregions highly selective for nonfaces?. <i>Nature Neuroscience</i> , 2007 , 10, 3-4	25.5	55
20	Visual word processing and experiential origins of functional selectivity in human extrastriate cortex. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2007 , 104, 9087-92	11.5	277
19	Discrimination training alters object representations in human extrastriate cortex. <i>Journal of Neuroscience</i> , 2006 , 26, 13025-36	6.6	192
18	Integration of visual and auditory information by superior temporal sulcus neurons responsive to the sight of actions. <i>Journal of Cognitive Neuroscience</i> , 2005 , 17, 377-91	3.1	261
17	Separate face and body selectivity on the fusiform gyrus. <i>Journal of Neuroscience</i> , 2005 , 25, 11055-9	6.6	383
16	Reorganization of visual processing in macular degeneration. <i>Journal of Neuroscience</i> , 2005 , 25, 614-8	6.6	202
15	Acquisition of Long-Term Visual Representations: Psychological and Neural Mechanisms 2005 , 11-35		2
14	Role of attention and perceptual grouping in visual statistical learning. <i>Psychological Science</i> , 2004 , 15, 460-6	7.9	123
13	Impact of learning on representation of parts and wholes in monkey inferotemporal cortex. <i>Nature Neuroscience</i> , 2002 , 5, 1210-6	25.5	251
12	Neuronal representation of disappearing and hidden objects in temporal cortex of the macaque. <i>Experimental Brain Research</i> , 2001 , 140, 375-81	2.3	53
11	Neural representation for the perception of the intentionality of actions. <i>Brain and Cognition</i> , 2000 , 44, 280-302	2.7	243

10	Gaze following and joint attention in rhesus monkeys (<i>Macaca mulatta</i>). <i>Journal of Comparative Psychology</i> (Washington, D C: 1983), 1997 , 111, 286-93	2.1	192
9	Revealing the multidimensional mental representations of natural objects underlying human similarity judgments		2
8	THINGS: A database of 1,854 object concepts and more than 26,000 naturalistic object images		1
7	Whole-brain MEG decoding of symbolic and non-symbolic number stimuli reveals primarily format-dependent representations		1
6	Deconstructing multivariate decoding for the study of brain function		3
5	Representation of contralateral visual space in the human hippocampus		4
4	The temporal evolution of conceptual object representations revealed through models of behavior, semantics and deep neural networks		1
3	Distinct subdivisions of human medial parietal cortex are recruited differentially for memory recall of places and people		3
2	Quantifying Aphantasia through drawing: Those without visual imagery show deficits in object but not spatial memory		1
1	An empirically-driven guide on using Bayes Factors for M/EEG decoding		2
