#	ARTICLE	IF	CITATIONS
1	The Cholesterol Content of Western Diets Plays a Major Role in the Paradoxical Increase in High-Density Lipoprotein Cholesterol and Upregulates the Macrophage Reverse Cholesterol Transport Pathway. <i>Arteriosclerosis, Thrombosis, and Vascular Biology</i> , 2011, 31, 2493-2499.	1.1	64
2	Effect of atorvastatin on lipoprotein (a) and interleukin-10: A randomized placebo-controlled trial. <i>Diabetes and Metabolism</i> , 2011, 37, 124-130.	1.4	25
3	Differential effects of gemfibrozil and fenofibrate on reverse cholesterol transport from macrophages to feces in vivo. <i>Biochimica Et Biophysica Acta - Molecular and Cell Biology of Lipids</i> , 2011, 1811, 104-110.	1.2	25
4	ATP-binding cassette G5/G8 deficiency causes hypertriglyceridemia by affecting multiple metabolic pathways. <i>Biochimica Et Biophysica Acta - Molecular and Cell Biology of Lipids</i> , 2011, 1811, 1186-1193.	1.2	20
5	Monocyte gene-expression profile in men with familial combined hyperlipidemia and its modification by atorvastatin treatment. <i>Pharmacogenomics</i> , 2008, 9, 1035-1054.	0.6	17
6	Seeking Novel Targets for Improving In Vivo Macrophage-Specific Reverse Cholesterol Transport: Translating Basic Science into New Therapies for the Prevention and Treatment of Atherosclerosis. <i>Current Vascular Pharmacology</i> , 2011, 9, 220-237.	0.8	13
7	Resveratrol administration or SIRT1 overexpression does not increase LXR signaling and macrophage-to-feces reverse cholesterol transport in vivo. <i>Translational Research</i> , 2013, 161, 110-117.	2.2	8
