#	ARTICLE	IF	CITATIONS
1	Luminescent properties of carbon quantum dots synthesized by microplasma method. Journal of Luminescence, 2022, 246, 118806.	3.1	3
2	Luminescence of single color centers created in LiF crystals at low dose of irradiation. AIP Conference Proceedings, 2021, , .	0.4	0
3	The formation of surface periodic structures based on alkali halide crystals containing metal nanoparticles by ion implantation. AIP Conference Proceedings, 2021, , .	0.4	1
4	Luminescence of body tissues of <i>Epischura baikalensis</i> . AIP Conference Proceedings, 2021, , .	0.4	0
5	The conversion of color centers in lithium fluoride crystals at temperatures of 50–490°C. AIP Conference Proceedings, 2021, , .	0.4	0
6	Synthesis and optical properties of lithium nanoparticles in wide-gap dielectrics. AIP Conference Proceedings, 2021, , .	0.4	0
7	Generation of laser radiation by color centers in diamond crystals (review). AIP Conference Proceedings, 2021, , .	0.4	6
8	Luminescent properties of nanoparticles created by laser ablation of natural diamond single crystals. AIP Conference Proceedings, 2021, , .	0.4	1
9	Creation of luminescent defects in crystals by coherent pairs of femtosecond laser pulses. Journal of Luminescence, 2021, 234, 117989.	3.1	5
10	The theoretical substantiation of the spatial-modulation luminescent method for studying the orientations of quantum systems in crystals. Journal of Luminescence, 2021, 240, 118469.	3.1	0
11	Fluorescent carbon quantum dots formed from glucose solution by microplasma treatment. AIP Conference Proceedings, 2021, , .	0.4	1
12	X-ray luminescence in diamonds and its application in industry. AIP Conference Proceedings, 2021, , .	0.4	7
13	Luminescence of zircons from highly diamondiferous kimberlites of Yakutia. AIP Conference Proceedings, 2021, , .	0.4	0
14	Polarization-interferometric method for measuring the pedestal of femtosecond radiation. AIP Conference Proceedings, 2021, , .	0.4	0
15	Monitoring the Heat of a Material during the Laser Formation of Defects. Bulletin of the Russian Academy of Sciences: Physics, 2020, 84, 811-814.	0.6	3
16	Fabrication of metal-dielectric nanocomposites using a table-top ion implanter. Surface and Coatings Technology, 2020, 393, 125742.	4.8	13
17	Laser recording of color voxels in lithium fluoride. Optics and Laser Technology, 2020, 131, 106430.	4.6	8
18	Temperature Dependence of the Red Photoluminescence Spectra of Diamonds. Bulletin of the Russian Academy of Sciences: Physics, 2019, 83, 310-313.	0.6	3

#	ARTICLE	IF	CITATIONS
19	The role of heat effects in the process of formation of color centers in LiF during filamentation of femtosecond laser pulses. EPJ Web of Conferences, 2019, 220, 02007.	0.3	1
20	The axial VUV radiation intensity distribution of a glow discharge and its application for creation luminescence centers in crystalline media. AIP Conference Proceedings, 2019, , .	0.4	0
21	Synthesis of a luminescent metamaterial layer in an alkali halide matrix by implanting metal ions emitted by a low-voltage vacuum spark. AIP Conference Proceedings, 2019, , .	0.4	0
22	Creating of luminescent defects in crystalline media by a scanning laser beam. Applied Physics Letters, 2019, 114, .	3.3	12
23	Preface: XVI International Conference on Luminescence and Laser Physics Devoted to the 100th Anniversary of Irkutsk State University. AIP Conference Proceedings, 2019, , .	0.4	0
24	The role of avalanche ionization in generation of defects in lithium fluoride crystals under the action of femtosecond laser pulses. , 2019, , .		0
25	Luminescent properties of radiation induced defects in sodium and magnesium fluorides nanocrystals. Journal of Luminescence, 2018, 201, 57-64.	3.1	11
26	Laser luminescent polarization microscopy of defects induced in lithium fluoride crystals by femtosecond pulses. Journal of Physics: Conference Series, 2018, 1115, 052028.	0.4	0
27	Table-Top Ion Implanter Based on Low-Voltage Vacuum Spark. , 2018, , .		0
28	Formation of aggregate color centers under the action of femtosecond laser pulses. Journal of Physics: Conference Series, 2018, 1115, 052029.	0.4	2
29	Formation of a Thin Luminescent Layer in LiF Crystals under Glow Discharge Radiation. Technical Physics Letters, 2018, 44, 659-662.	0.7	4
30	Laser writing of full-color luminescent images in the volume of an optical carriers. , 2018, , .		0
31	Temperature quenching of the luminescence of SiV centers in CVD diamond films. Bulletin of the Russian Academy of Sciences: Physics, 2017, 81, 1154-1158.	0.6	3
32	Localization of 523 and 794 defects in diamond. Bulletin of the Russian Academy of Sciences: Physics, 2017, 81, 1099-1104.	0.6	3
33	Investigation of single defects created in crystals by laser emission and hard radiation. Journal of Physics: Conference Series, 2017, 793, 012018.	0.4	1
34	Luminescent centers in nanolayers of LiF crystals with embedded silver ions. Journal of Physics: Conference Series, 2017, 830, 012145.	0.4	6
35	The Memorizing Luminescent Crystalline Materials Based on Color Centers for Investigation the Highly Nonlinear Interaction of Light and Matter and for Other Applications. , 2017, , .		1
36	Comment on “Features of propagation of high-intensity laser pulses in Magnesium and Sodium fluoride crystals” by L. Bryukvina, Journal of Luminescence, 162 (2015) 145–148. Journal of Luminescence, 2016, 171, 259-264.	3.1	0

#	ARTICLE	IF	CITATIONS
37	Quantum trajectories of the photoluminescence of F 2 centers in a LiF crystal. Bulletin of the Russian Academy of Sciences: Physics, 2016, 80, 89-92.	0.6	0
38	Formation of defects in lithium fluoride ceramics upon irradiation with femtosecond laser pulses. Bulletin of the Russian Academy of Sciences: Physics, 2016, 80, 60-63.	0.6	2
39	Red luminescence decay kinetics in Brazilian diamonds. Bulletin of the Russian Academy of Sciences: Physics, 2016, 80, 74-77.	0.6	1
40	Quantum trajectories of photoluminescence of F 2 centers in a LiF crystal. Bulletin of the Russian Academy of Sciences: Physics, 2016, 80, 81-84.	0.6	2
41	Stochastic model of a nanocluster of a smoky quartz composition. Glass Physics and Chemistry, 2016, 42, 480-483.	0.7	0
42	Transformation of the microstructure and luminescence characteristics of LiF films during annealing. Physics of the Solid State, 2016, 58, 1772-1776.	0.6	0
43	Multiple filamentation of femtosecond laser pulses. Bulletin of the Russian Academy of Sciences: Physics, 2016, 80, 64-67.	0.6	0
44	Storing energy in lithium fluoride crystals irradiated with femtosecond laser pulses. Bulletin of the Russian Academy of Sciences: Physics, 2016, 80, 85-88.	0.6	3
45	Spectral properties of a Nd ³⁺ -doped Li ₃ Ba ₂ Gd ₃ (MoO ₄) ₈ crystal. Bulletin of the Russian Academy of Sciences: Physics, 2016, 80, 78-80.	0.6	0
46	Luminescence in diamonds of the São Luiz placer (Brazil). Russian Geology and Geophysics, 2015, 56, 729-736.	0.7	6
47	The accumulation of femtosecond laser radiation energy in crystals of lithium fluoride. , 2015, , .		1
48	Highly sensitive nonlinear luminescent ceramics for volumetric and multilayer data carriers. Quantum Electronics, 2015, 45, 953-958.	1.0	7
49	Multiple growth events in diamonds with cloudy microinclusions from the Mir kimberlite pipe: evidence from the systematics of optically active defects. Russian Geology and Geophysics, 2015, 56, 330-343.	0.7	15
50	Diffusion and aggregation of subsurface radiation defects in lithium fluoride nanocrystals. Physics of the Solid State, 2015, 57, 1752-1758.	0.6	3
51	Differentiation of types of single radiation defects in crystals through the properties of their fluorescence intensity trajectories. , 2015, , .		1
52	Peculiar properties of some components in a plant cell vacuole morphological structure revealed by confocal microscopy. Cell and Tissue Biology, 2015, 9, 406-414.	0.4	2
53	3D Fluorescent Carriers of Visual and Digital Information. , 2015, , .		0
54	Properties of femtosecond laser-induced defects in alkali metal fluoride crystals. Bulletin of the Russian Academy of Sciences: Physics, 2014, 78, 1374-1378.	0.6	4

#	ARTICLE	IF	CITATIONS
55	Structural changes accompanying color center formation in lithium fluoride exposed to femtosecond laser pulses. <i>Inorganic Materials</i> , 2014, 50, 625-630.	0.8	12
56	Formation of color centers in a thin layer of LiF crystals under VUV radiation from a barrier discharge. <i>Technical Physics Letters</i> , 2014, 40, 393-396.	0.7	4
57	Simulation of filamentation of single femtosecond laser pulses in LiF. <i>Laser Physics</i> , 2014, 24, 074001.	1.2	13
58	Formation of color centers and light scattering structures by femtosecond laser pulses in sodium fluoride. <i>Optics Communications</i> , 2014, 330, 56-60.	2.1	14
59	Study of the fluorescence blinking behavior of single $F_{2\cdot}$ color centers in LiF crystal. <i>Journal of Physics: Conference Series</i> , 2014, 552, 012048.	0.4	3
60	Tonoplast of <i>Beta vulgaris</i> L. contains detergent-resistant membrane microdomains. <i>Planta</i> , 2013, 237, 859-871.	3.2	45
61	Determining the orientation of single quantum systems by means of scanning fluorescence microscopy. <i>Bulletin of the Russian Academy of Sciences: Physics</i> , 2013, 77, 36-38.	0.6	0
62	Complex cylindrical vector beam excludes the orientation dependence of the intensity of scanning fluorescence images of single molecules. <i>JETP Letters</i> , 2013, 97, 52-56.	1.4	6
63	Luminescence Properties of Surface Radiation-Induced Defects in Lithium Fluoride. <i>Journal of Applied Spectroscopy</i> , 2013, 80, 731-736.	0.7	4
64	Photoinduced formation of metal nanoparticles in $\hat{\Gamma}^3$ -irradiated sodium-fluoride crystals. <i>Journal of Surface Investigation</i> , 2013, 7, 617-621.	0.5	11
65	Point defects isomerism in lithium fluoride crystals and nanocrystals. <i>Crystal Research and Technology</i> , 2013, 48, 381-386.	1.3	5
66	Color centers aggregation kinetics in lithium fluoride after gamma irradiation. <i>Journal of Luminescence</i> , 2013, 143, 207-214.	3.1	17
67	The aggregation and characteristics of radiation-induced defects in lithium fluoride nanocrystals. <i>Radiation Effects and Defects in Solids</i> , 2013, 168, 130-136.	1.2	11
68	Formation of luminescent emitters by intense laser radiation in transparent media. <i>Quantum Electronics</i> , 2013, 43, 463-466.	1.0	39
69	Systematic features of diffusion and aggregation of intrinsic defects in dielectric crystals. <i>Physics of the Solid State</i> , 2012, 54, 1768-1775.	0.6	3
70	Formation and properties of metallic nanoparticles in lithium and sodium fluorides with radiation-induced color centers. <i>Physics of the Solid State</i> , 2012, 54, 2374-2379.	0.6	19
71	Luminescent scanning confocal microscope modified for observation of arbitrarily oriented single quantum systems. <i>Technical Physics Letters</i> , 2012, 38, 387-391.	0.7	2
72	Aggregate color center formation processes in lithium fluoride crystals after irradiation. <i>Journal of Applied Spectroscopy</i> , 2011, 77, 857-868.	0.7	9

#	ARTICLE	IF	CITATIONS
73	Luminescent method for determining low concentrations of a substance in optically dense media. Journal of Applied Spectroscopy, 2011, 78, 725-732.	0.7	1
74	3D Fluorescent Imaging with Highly Nonlinear Photosensitive Materials. , 2011, , .		1
75	Characterization of fiber supercontinuum by chromatic scattering. , 2011, , .		0
76	On the influence of dispersion on the spatial distribution of the intensity of luminescence excited by opposing laser pulses. Optics and Spectroscopy (English Translation of Optika I Spektroskopiya), 2009, 106, 121-126.	0.6	0
77	Static multislit dispersive optical spectrometer based on complementary Golay sequences. Technical Physics Letters, 2008, 34, 453-455.	0.7	0
78	Elementary-oscillator model for color centers with degenerate levels. Physics of the Solid State, 2008, 50, 1761-1765.	0.6	1
79	Spatially periodic modulation of the level population upon saturation for centers with weak and strong electron-phonon interactions. Physics of the Solid State, 2008, 50, 1779-1783.	0.6	0
80	Highly nonlinear fundamental mechanisms of excitation and coloring of wide-gap crystals by intense femtosecond laser pulses. Optics and Spectroscopy (English Translation of Optika I Spektroskopiya), 2008, 105, 348-351.	0.6	14
81	Static multislit dispersive optical spectrometers for solid-state spectroscopy. Optics and Spectroscopy (English Translation of Optika I Spektroskopiya), 2008, 105, 478-479.	0.6	0
82	Complementary Golay series in multislit dispersion optical spectroscopy. Journal of Optical Technology (A Translation of Opticheskii Zhurnal), 2008, 75, 289.	0.4	0
83	Modulation frequency doubling in the axially periodic dependence of the luminescence of F 3 + centers in LiF crystals. Optics and Spectroscopy (English Translation of Optika I Spektroskopiya), 2006, 101, 265-270.	0.6	1
84	A method for studying the multipolarity and orientation of elementary oscillators in cubic crystals on the basis of axially periodic dependence of the luminescence intensity. Optics and Spectroscopy (English Translation of Optika I Spektroskopiya), 2004, 96, 857-861.	0.6	2
85	First Organophosphorus Nonlinear-Optical Media. Doklady Chemistry, 2004, 394, 34-35.	0.9	0
86	<title>Spatially periodical structures under femtosecond pulsed excitation of crystals</title>. , 2004, , .		0
87	Nanocomposites with Magnetic, Optical, Catalytic, and Biologically Active Properties Based on Arabinogalactan. Doklady Chemistry, 2003, 393, 287-288.	0.9	34
88	A Femtosecond Crystal Interferometric Autocorrelometer. Instruments and Experimental Techniques, 2003, 46, 814-817.	0.5	1
89	On a Spatially Selective Phototransformation Method for Investigation of Diffusion of Quantum Systems. Russian Physics Journal, 2003, 46, 984-990.	0.4	0
90	The piezomodulation method for investigating the multipolarity of elementary oscillators in cubic crystals. Optics Communications, 2003, 224, 263-267.	2.1	1
