#	ARTICLE	IF	CITATIONS
1	Grouping tree species to estimate basal area increment in temperate multispecies forests in Durango, Mexico. <i>Forest Ecosystems</i> , 2024, 11, 100158.	3.2	2
2	Book review "Wattles: Australian Acacia species around the world" by David M. Richardson, Johannes J. Le Roux and Elizabete Marchante. <i>Forest Ecosystems</i> , 2024, 11, 100175.	3.2	0
3	Latitudinal patterns of forest ecosystem stability across spatial scales as affected by biodiversity and environmental heterogeneity. <i>Global Change Biology</i> , 2023, 29, 2242-2255.	9.7	12
4	Are absorptive root traits good predictors of ecosystem functioning? A test in a natural temperate forest. <i>New Phytologist</i> , 2023, 239, 75-86.	7.8	7
5	Environmental filtering drives biodiversity-spatial stability relationships in a large temperate forest region. <i>Functional Ecology</i> , 2023, 37, 1688-1702.	3.6	2
6	Using Functional Traits to Improve Estimates of Height-Diameter Allometry in a Temperate Mixed Forest. <i>Forests</i> , 2023, 14, 1604.	2.2	1
7	Native diversity buffers against severity of non-native tree invasions. <i>Nature</i> , 2023, 621, 773-781.	36.2	11
8	Selective logging destabilizes the functioning and composition of forest ecosystems at multiple spatial scales. <i>Oikos</i> , 2023, 2023, .	2.7	1
9	Stabilizing forest productivity and resilience at multiple scales. <i>Forest Ecosystems</i> , 2023, 10, 100136.	3.2	0
10	Integrated global assessment of the natural forest carbon potential. <i>Nature</i> , 2023, 624, 92-101.	36.2	45
11	Effects of neighborhood interaction on tree growth in a temperate forest following selection harvesting. <i>Ecological Indicators</i> , 2022, 136, 108663.	6.4	5
12	Spatial asynchrony matters more than alpha stability in stabilizing ecosystem productivity in a large temperate forest region. <i>Global Ecology and Biogeography</i> , 2022, 31, 1133-1146.	5.9	28
13	Estimating height-diameter relations for structure groups in the natural forests of Northeastern China. <i>Forest Ecology and Management</i> , 2022, 519, 120298.	3.3	5
14	Assessing scale-dependent effects on Forest biomass productivity based on machine learning. <i>Ecology and Evolution</i> , 2022, 12, .	1.9	6
15	Co-limitation towards lower latitudes shapes global forest diversity gradients. <i>Nature Ecology and Evolution</i> , 2022, 6, 1423-1437.	8.0	35
16	Evaluation of the Site Form as a Site Productive Indicator in Temperate Uneven-Aged Multispecies Forests in Durango, Mexico. <i>Plants</i> , 2022, 11, 2764.	3.6	2
17	Mismatch between species distribution and climatic niche optima in relation to functional traits. <i>Forest Ecosystems</i> , 2022, 9, 100077.	3.2	0
18	What Is a Forest ?. <i>Managing Forest Ecosystems</i> , 2021, , 1-22.	0.0	0

#	ARTICLE	IF	CITATIONS
19	Analyzing Forest Ecosystems. <i>Managing Forest Ecosystems</i> , 2021, , 81-158.	0.0	2
20	Forest Production. <i>Managing Forest Ecosystems</i> , 2021, , 221-280.	0.0	0
21	Forest Assessment and Observation. <i>Managing Forest Ecosystems</i> , 2021, , 23-80.	0.0	0
22	A classification of woody communities based on biological dissimilarity. <i>Applied Vegetation Science</i> , 2021, 24, .	1.8	5
23	Comparing the relative effects of species and size structure on forest productivity in different local environments. <i>Scandinavian Journal of Forest Research</i> , 2021, 36, 188-197.	1.5	1
24	Dynamics and drivers of aboveground biomass accumulation during recovery from selective harvesting in an uneven-aged forest. <i>European Journal of Forest Research</i> , 2021, 140, 1163-1178.	2.5	9
25	Decomposing Spatial β -Diversity in the temperate forests of Northeastern China. <i>Ecology and Evolution</i> , 2021, 11, 11362-11372.	1.9	7
26	Unravelling biodiversity-productivity relationships across a large temperate forest region. <i>Functional Ecology</i> , 2021, 35, 2808-2820.	3.6	21
27	Mycorrhizal type and soil pathogenic fungi mediate tree survival and density dependence in a temperate forest. <i>Forest Ecology and Management</i> , 2021, 496, 119459.	3.3	9
28	The Shape and Growth of Forest Trees. <i>Managing Forest Ecosystems</i> , 2021, , 159-219.	0.0	2
29	Analyzing the Biological and Structural Diversity of Hyrcanian Forests Dominated by <i>Taxus baccata</i> L.. <i>Forests</i> , 2020, 11, 701.	2.2	10
30	ALS-Based Detection of Past Human Activities in the BiaÅowieÅ¼a Forest- New Evidence of Unknown Remains of Past Agricultural Systems. <i>Remote Sensing</i> , 2020, 12, 2657.	4.1	15
31	Scale-dependent effects of neighborhood biodiversity on individual tree productivity in a coniferous and broad-leaved mixed forest in China. <i>Ecology and Evolution</i> , 2020, 10, 8225-8234.	1.9	16
32	Functional traits influence biomass and productivity through multiple mechanisms in a temperate secondary forest. <i>European Journal of Forest Research</i> , 2020, 139, 959-968.	2.5	40
33	Patterns of Density and Production in the Community Forests of the Sierra Madre Occidental, Mexico. <i>Forests</i> , 2020, 11, 307.	2.2	8
34	Latitudinal gradients and ecological drivers of β -diversity vary across spatial scales in a temperate forest region. <i>Global Ecology and Biogeography</i> , 2020, 29, 1257-1264.	5.9	25
35	Assessing biotic and abiotic effects on forest productivity in three temperate forests. <i>Ecology and Evolution</i> , 2020, 10, 7887-7900.	1.9	14
36	To Act or not to Act . BiaÅowieÅ¼a. Forest under Conflicting Ecological Paradigms. β -Diversity in a Temperate Forest under Conflicting Ecological Paradigms. <i>Ecology and Evolution</i> , 2020, 10, 7887-7900.	1.9	14

#	ARTICLE	IF	CITATIONS
37	Biodiversity-ecosystem functioning relationships of overstorey versus understorey trees in an old-growth temperate forest. <i>Annals of Forest Science</i> , 2019, 76, 1.	2.1	7
38	Discriminating among forest communities based on taxonomic, phylogenetic and trait distances. <i>Forest Ecology and Management</i> , 2019, 440, 40-47.	3.3	17
39	Effects of density and structure on production in the communal forests of the Mexican Sierra Madre Occidental. <i>Southern Forests</i> , 2019, 81, 1-10.	0.7	9
40	Inconsistent responses of soil respiration and its components to thinning intensity in a <i>Pinus tabulaeformis</i> plantation in northern China. <i>Agricultural and Forest Meteorology</i> , 2019, 265, 370-380.	4.8	33
41	Functional and phylogenetic diversity determine woody productivity in a temperate forest. <i>Ecology and Evolution</i> , 2018, 8, 2395-2406.	1.9	60
42	Site index models for Calabrian pine in the central Mediterranean region of Turkey. <i>Journal of Sustainable Forestry</i> , 2018, 37, 459-474.	1.4	9
43	Biomass-dominant species shape the productivity-diversity relationship in two temperate forests. <i>Annals of Forest Science</i> , 2018, 75, 1.	2.1	20
44	Inconsistent autotrophic respiration but consistent heterotrophic respiration responses to 5-years nitrogen addition under natural and planted <i>Pinus tabulaeformis</i> forests in northern China. <i>Plant and Soil</i> , 2018, 429, 375-389.	3.7	13
45	How beta diversity and the underlying causes vary with sampling scales in the Changbai mountain forests. <i>Ecology and Evolution</i> , 2017, 7, 10116-10123.	1.9	16
46	Soil Elements Influencing Community Structure in an Old-Growth Forest in Northeastern China. <i>Forests</i> , 2016, 7, 159.	2.2	2
47	Combined effects of nitrogen addition and organic matter manipulation on soil respiration in a Chinese pine forest. <i>Environmental Science and Pollution Research</i> , 2016, 23, 22701-22710.	5.3	13
48	Relationships between tree biomass productivity and local species diversity. <i>Ecosphere</i> , 2016, 7, e01562.	2.2	16
49	Diversity and production in an Afromontane Forest. <i>Forest Ecosystems</i> , 2016, 3, .	3.2	29
50	Drivers of seedling survival in a temperate forest and their relative importance at three stages of succession. <i>Ecology and Evolution</i> , 2015, 5, 4287-4299.	1.9	37
51	Effects of Nitrogen Addition on Leaf Decomposition of Single-Species and Litter Mixture in <i>Pinus tabulaeformis</i> Forests. <i>Forests</i> , 2015, 6, 4462-4476.	2.2	10
52	Reproduction and vegetative growth in the dioecious shrub <i>Acer barbinerve</i> in temperate forests of Northeast China. <i>Plant Reproduction</i> , 2015, 28, 111-119.	2.4	2
53	Maximum density patterns in two natural forests: An analysis based on large observational field studies in China. <i>Forest Ecology and Management</i> , 2015, 346, 98-105.	3.3	12
54	The Effects of habitat area, vegetation structure and insect richness on breeding bird populations in Beijing urban parks. <i>Urban Forestry and Urban Greening</i> , 2015, 14, 1027-1039.	5.3	72

#	ARTICLE	IF	CITATIONS
55	Competition effects in an afrotemperate forest. <i>Forest Ecosystems</i> , 2014, 1, .	3.2	41
56	Analysing structural diversity in two temperate forests in northeastern China. <i>Forest Ecology and Management</i> , 2014, 316, 139-147.	3.3	29
57	Seed dispersal and seedling recruitment of trees at different successional stages in a temperate forest in northeastern China. <i>Journal of Plant Ecology</i> , 2014, 7, 337-346.	2.4	23
58	Analyzing selective harvest events in three large forest observational studies in North Eastern China. <i>Forest Ecology and Management</i> , 2014, 316, 100-109.	3.3	24
59	Forest observational studies-an essential infrastructure for sustainable use of natural resources. <i>Forest Ecosystems</i> , 2014, 1, .	3.2	22
60	Competition effects in an afrotemperate forest. <i>Forest Ecosystems</i> , 2014, 1, 13.	3.2	5
61	Spatial Characteristics of Tree Diameter Distributions in a Temperate Old-Growth Forest. <i>PLoS ONE</i> , 2013, 8, e58983.	2.5	15
62	The interaction of tomato powder and soy germ on prostate carcinogenesis in the TRAMP model. <i>FASEB Journal</i> , 2013, 27, 235.1.	0.5	0
63	Forest Structure and Diversity. <i>Managing Forest Ecosystems</i> , 2012, , 29-83.	0.0	97
64	Species-habitat associations in a northern temperate forest in China. <i>Silva Fennica</i> , 2012, 46, .	1.3	22
65	A spatially explicit heightâ€“diameter model for Scots pine in Estonia. <i>European Journal of Forest Research</i> , 2011, 130, 303-315.	2.5	56
66	Gender-related distributions of <i>Fraxinus mandshurica</i> in secondary and old-growth forests. <i>Acta Oecologica</i> , 2010, 36, 55-62.	1.2	27
67	Partitioning temperate plant community structure at different scales. <i>Acta Oecologica</i> , 2010, 36, 306-313.	1.2	21
68	Estimating Tree Survival: A Study Based on the Estonian Forest Research Plots Network. <i>Annales Botanici Fennici</i> , 2009, 46, 336-352.	0.1	27
69	Forest research and education in Germany. <i>Forest Science and Technology</i> , 2005, 1, 77-83.	0.8	1
70	DBH growth model for <i>Pinus densiflora</i> and <i>Quercus variabilis</i> mixed forests in central Korea. <i>Ecological Modelling</i> , 2004, 176, 187-200.	2.5	48
71	An analysis of spatial forest structure using neighbourhood-based variables. <i>Forest Ecology and Management</i> , 2003, 183, 137-145.	3.3	174
72	Adapting silvicultural management systems to urban forests. <i>Urban Forestry and Urban Greening</i> , 2002, 1, 107-113.	5.3	12

#	ARTICLE	IF	CITATIONS
73	Timber harvest planning with spatial objectives, using the method of simulated annealing. Raumliche Nutzungsplanung mit Hilfe der Methode "Simulated Annealing". European Journal of Forest Research, 2002, 121, 25-34.	0.5	24
74	A model for the diameter-height distribution in an uneven-aged beech forest and a method to assess the fit of such models. Silva Fennica, 2001, 35, .	1.3	31
75	The Crown Window " a simple device for measuring tree crowns. European Journal of Forest Research, 2000, 119, 43-50.	0.5	11
76	Baumhhenschtzung mit Hilfe der bivariaten Johnsons SBB-Funktion. European Journal of Forest Research, 1999, 118, 355-367.	0.5	3
77	Assessing populations of tree seedlings in multi-species natural forests. New Forests, 0, , .	1.7	0
