#	ARTICLE	IF	CITATIONS
1	Cluster-based energy consumption forecasting in smart grids. Journal of Physics: Conference Series, 2019, 1205, 012051.	0.4	3
2	Fast Two-Dimensional Smoothing with Discrete Cosine Transform. Communications in Computer and Information Science, 2016, , 646-656.	0.5	2
3	Deep Neural Networks for Emotion Recognition. Lecture Notes in Computer Science, 2020, , 365-379.	1.3	2
4	A class of numerical algorithms for integral equations of the first kind on source-like representations. Computational Mathematics and Modeling, 1994, 5, 182-186.	0.5	1
5	Development of Energy Saving Technologies for Smart Buildings by Using Computer Algebra. Programming and Computer Software, 2020, 46, 324-329.	0.9	1
6	Melanoma Detection Computer System Development with Deep Neural Networks. Communications in Computer and Information Science, 2020, , 422-434.	0.5	1
7	On methods of building the trading strategies in the cryptocurrency markets. Discrete and Continuous Models and Applied Computational Science, 2022, 30, 79-87.	0.3	1
8	A stable algorithm for separating the basic component of an experimental spectrum. Computational Mathematics and Modeling, 1995, 6, 101-104.	0.5	0
9	A method for approximate construction of the basic component in the class of functions of bounded variation. Computational Mathematics and Modeling, 1997, 8, 172-180.	0.5	0
10	Buildings electricity consumption modeling using artificial intelligence systems. , 2018, , .		0
11	On methods to improve the reliability of recommender systems based on user clustering. Economic Analysis Theory and Practice, 2019, 18, 1348-1361.	0.3	0
12	ON AUTOMATIC DETECTION OF ANOMALIES IN IMAGES WITH ADVERSARIAL LEARNING. MatematiÄeskie Metody V TehnologiiÄch I Tehnike, 2022, , 77-80.	0.1	0
