

Leonie Beljaars

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/8932943/leonie-beljaars-publications-by-year.pdf>

Version: 2024-04-24

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
18	Osteoprotegerin Expression in Liver is Induced by IL13 through TGF β <i>Cellular Physiology and Biochemistry</i> , 2022 , 56, 28-38	3.9	1
17	Current Concepts of Biliary Atresia and Matrix Metalloproteinase-7: A Review of Literature. <i>Frontiers in Medicine</i> , 2020 , 7, 617261	4.9	4
16	Osteoprotegerin is More than a Possible Serum Marker in Liver Fibrosis: A Study into its Function in Human and Murine Liver. <i>Pharmaceutics</i> , 2020 , 12,	6.4	5
15	Phosphate Groups in the Lipid A Moiety Determine the Effects of LPS on Hepatic Stellate Cells: A Role for LPS-Dephosphorylating Activity in Liver Fibrosis. <i>Cells</i> , 2020 , 9,	7.9	1
14	Design of a Gene Panel to Expose the Versatile Role of Hepatic Stellate Cells in Human Liver Fibrosis. <i>Pharmaceutics</i> , 2020 , 12,	6.4	2
13	Rho-kinase inhibitor coupled to peptide-modified albumin carrier reduces portal pressure and increases renal perfusion in cirrhotic rats. <i>Scientific Reports</i> , 2019 , 9, 2256	4.9	14
12	WNT-5A regulates TGF β -related activities in liver fibrosis. <i>American Journal of Physiology - Renal Physiology</i> , 2017 , 312, G219-G227	5.1	31
11	Upregulation of Epac-1 in Hepatic Stellate Cells by Prostaglandin E in Liver Fibrosis Is Associated with Reduced Fibrogenesis. <i>Journal of Pharmacology and Experimental Therapeutics</i> , 2017 , 363, 126-135	4.7	13
10	The Elusive Antifibrotic Macrophage. <i>Frontiers in Medicine</i> , 2015 , 2, 81	4.9	41
9	Hepatic Localization of Macrophage Phenotypes during Fibrogenesis and Resolution of Fibrosis in Mice and Humans. <i>Frontiers in Immunology</i> , 2014 , 5, 430	8.4	51
8	Novel engineered targeted interferon-gamma blocks hepatic fibrogenesis in mice. <i>Hepatology</i> , 2011 , 54, 586-96	11.2	69
7	Tumor-targeted intracellular delivery of anticancer drugs through the mannose-6-phosphate/insulin-like growth factor II receptor. <i>International Journal of Cancer</i> , 2010 , 126, 1966-1981	7.5	28
6	Inhibition of cytomegalovirus infection by lactoferrin in vitro and in vivo. <i>Antiviral Research</i> , 2004 , 63, 197-208	10.8	55
5	The preferential homing of a platelet derived growth factor receptor-recognizing macromolecule to fibroblast-like cells in fibrotic tissue. <i>Biochemical Pharmacology</i> , 2003 , 66, 1307-17	6	73
4	Targeting hepatic stellate cells for cell-specific treatment of liver fibrosis. <i>Frontiers in Bioscience - Landmark</i> , 2002 , 7, e214-22	2.8	40
3	The influence of charge clustering on the anti-HIV-1 activity and in vivo distribution of negatively charged albumins. <i>Biochemical Pharmacology</i> , 2002 , 63, 1663-73	6	5
2	The antiviral protein human lactoferrin is distributed in the body to cytomegalovirus (CMV) infection-prone cells and tissues. <i>Pharmaceutical Research</i> , 2002 , 19, 54-62	4.5	4

- 1 Characteristics of the hepatic stellate cell-selective carrier mannose 6-phosphate modified albumin (M6P(28)-HSA). *Liver*, **2001**, 21, 320-8
