| #  | ARTICLE                                                                                                                                                                                                      | IF   | CITATIONS |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 1  | Management of Children with Acute Asthma Attack: A RAND/UCLA Appropriateness Approach. International Journal of Environmental Research and Public Health, 2021, 18, 12775.                                   | 2.6  | 8         |
| 2  | QuantiFERON-TB Performs Better in Children, Including Infants, than in Adults with Active Tuberculosis: a Multicenter Study. Journal of Clinical Microbiology, 2019, 57, .                                   | 3.9  | 13        |
| 3  | Pediatric Tuberculosis in Italian Children: Epidemiological and Clinical Data from the Italian Register of Pediatric Tuberculosis. International Journal of Molecular Sciences, 2016, 17, 960.               | 4.1  | 31        |
| 4  | Performance of interferon- $\gamma$ Release Assay for the Diagnosis of Active or Latent Tuberculosis in Children in the First 2 Years of Age. Pediatric Infectious Disease Journal, 2014, 33, e226-e231.     | 2.0  | 38        |
| 5  | Tuberculosis infection in foreign-born children: a screening survey based on skin and blood testing [Short communication]. International Journal of Tuberculosis and Lung Disease, 2011, 15, 1182-1184.      | 1.2  | 7         |
| 6  | Performance of Commercial Blood Tests for the Diagnosis of Latent Tuberculosis Infection in Children and Adolescents. Pediatrics, 2009, 123, e419-e424.                                                      | 2.1  | 132       |
| 7  | Prior tuberculin skin testing does not boost QuantiFERON-TB results in paediatric contacts. European Respiratory Journal, 2008, 32, 524-525.                                                                 | 6.7  | 27        |
| 8  | T-Cell-Based Diagnosis of Neonatal Multidrug-Resistant Latent Tuberculosis Infection. Pediatrics, 2007, 119, e1-e5.                                                                                          | 2.1  | 41        |
| 9  | Use in routine clinical practice of two commercial blood tests for diagnosis of infection with Mycobacterium tuberculosis: a prospective study. Lancet, The, 2006, 367, 1328-1334.                           | 13.7 | 468       |
| 10 | Tracheobronchial anomalies in chromosome 22q11.2 microdeletion. American Journal of Medical Genetics, Part A, 2006, 140A, 790-793.                                                                           | 1.2  | 7         |
| 11 | Routine Hospital Use of a New Commercial Whole Blood Interferon- $\gamma$ Assay for the Diagnosis of Tuberculosis Infection. American Journal of Respiratory and Critical Care Medicine, 2005, 172, 631-635. | 5.6  | 240       |
| 12 | T Cell-Based Tracking of Multidrug Resistant Tuberculosis Infection after Brief Exposure. American Journal of Respiratory and Critical Care Medicine, 2004, 170, 288-295.                                    | 5.6  | 131       |
| 13 | Alternaria spores at different heights from the ground. Allergy: European Journal of Allergy and Clinical Immunology, 2004, 59, 746-752.                                                                     | 5.7  | 16        |
| 14 | Extraction of a Rubber Bullet From a Bronchus After 1 Year. Chest, 1999, 115, 1210-1213.                                                                                                                     | 0.8  | 23        |
