| #  | Article  | IF  | CITATIONS |
|----|--|-----|-----------|
| 1  | Cognitive Vulnerabilities and Depression Versus Other Psychopathology Symptoms and Diagnoses in<br>Early Adolescence. Journal of Clinical Child and Adolescent Psychology, 2012, 41, 539-560.  | 3.4 | 106       |
| 2  | Impact of Substance Use Disorders on Recovery From Episodes of Depression in Bipolar Disorder<br>Patients: Prospective Data From the Systematic Treatment Enhancement Program for Bipolar Disorder<br>(STEP-BD). American Journal of Psychiatry, 2010, 167, 289-297. | 7.2 | 103       |
| 3  | Emotional Maltreatment, Peer Victimization, and Depressive versus Anxiety Symptoms During<br>Adolescence: Hopelessness as a Mediator. Journal of Clinical Child and Adolescent Psychology, 2013,<br>42, 332-347.   | 3.4 | 100       |
| 4  | Mindfulnessâ€Based Cognitive Therapy for Nonremitted Patients with Bipolar Disorder. CNS<br>Neuroscience and Therapeutics, 2012, 18, 133-141.  | 3.9 | 99        |
| 5  | Stress and the Development of Cognitive Vulnerabilities to Depression Explain Sex Differences in Depressive Symptoms During Adolescence. Clinical Psychological Science, 2015, 3, 702-714.   | 4.0 | 92        |
| 6  | Attenuated intrinsic connectivity within cognitive control network among individuals with remitted depression: Temporal stability and association with negative cognitive styles. Human Brain Mapping, 2017, 38, 2939-2954.  | 3.6 | 84        |
| 7  | Inflexibility as a Vulnerability to Depression: A Systematic Qualitative Review. Clinical Psychology:<br>Science and Practice, 2017, 24, 245-276.  | 0.9 | 73        |
| 8  | Mindfulness-Based Cognitive Therapy for Bipolar Disorder. Journal of Psychiatric Practice, 2011, 17, 410-419.  | 0.7 | 65        |
| 9  | Pubertal timing and vulnerabilities to depression in early adolescence: Differential pathways to depressive symptoms by sexâ~†. Journal of Adolescence, 2014, 37, 165-174.   | 2.4 | 63        |
| 10 | Cognitive Risk and Protective Factors for Suicidal Ideation: A Two Year Longitudinal Study in<br>Adolescence. Journal of Abnormal Child Psychology, 2016, 44, 1145-1160.   | 3.5 | 60        |
| 11 | INFLEXIBLE COGNITION PREDICTS FIRST ONSET OF MAJOR DEPRESSIVE EPISODES IN ADOLESCENCE. Depression and Anxiety, 2016, 33, 1005-1012.  | 4.1 | 58        |
| 12 | Adherence to Pharmacological Treatment for Juvenile Bipolar Disorder. Journal of the American<br>Academy of Child and Adolescent Psychiatry, 2007, 46, 831-839.  | 0.5 | 54        |
| 13 | It Gets Better: Future Orientation Buffers the Development of Hopelessness and Depressive Symptoms following Emotional Victimization during Early Adolescence. Journal of Abnormal Child Psychology, 2015, 43, 465-474.  | 3.5 | 50        |
| 14 | Kindling of life stress in bipolar disorder: Comparison of sensitization and autonomy models Journal of Abnormal Psychology, 2015, 124, 4-16.  | 1.9 | 50        |
| 15 | Moderate Childhood Stress Buffers Against Depressive Response to Proximal Stressors: A Multi-Wave<br>Prospective Study of Early Adolescents. Journal of Abnormal Child Psychology, 2015, 43, 1403-1413.  | 3.5 | 48        |
| 16 | Negative cognitive style interacts with negative life events to predict first onset of a major depressive episode in adolescence via hopelessness. Journal of Abnormal Psychology, 2018, 127, 1-11.  | 1.9 | 47        |
| 17 | Cognitive Vulnerabilities as Predictors of Stress Generation in Early Adolescence: Pathway to Depressive Symptoms. Journal of Abnormal Child Psychology, 2013, 41, 1027-1039.  | 3.5 | 46        |
| 18 | Rumination and Overgeneral Autobiographical Memory in Adolescents: An Integration of Cognitive<br>Vulnerabilities to Depression. Journal of Youth and Adolescence, 2015, 44, 806-818.  | 3.5 | 46        |

| #  | Article  | IF  | CITATIONS |
|----|--|-----|-----------|
| 19 | Effects of mood and aging on keystroke dynamics metadata and their diurnal patterns in a large<br>open-science sample: A BiAffect iOS study. Journal of the American Medical Informatics Association:<br>JAMIA, 2020, 27, 1007-1018.     | 4.4 | 46        |
| 20 | Development of an Integrated Psychosocial Treatment to Address the Medical Burden Associated with<br>Bipolar Disorder. Journal of Psychiatric Practice, 2011, 17, 224-232.   | 0.7 | 41        |
| 21 | Early Pubertal Timing as a Vulnerability to Depression Symptoms: Differential Effects of Race and Sex.<br>Journal of Abnormal Child Psychology, 2014, 42, 527-538.   | 3.5 | 41        |
| 22 | Associations between sleep disturbance, cognitive functioning and work disability in Bipolar<br>Disorder. Psychiatry Research, 2015, 230, 567-574.   | 3.3 | 39        |
| 23 | Phenotypic effects of a bipolar liability gene among individuals with major depressive disorder.<br>American Journal of Medical Genetics Part B: Neuropsychiatric Genetics, 2010, 153B, 303-309.   | 1.7 | 38        |
| 24 | Negative Inferential Style, Emotional Clarity, and Life Stress: Integrating Vulnerabilities to Depression in Adolescence. Journal of Clinical Child and Adolescent Psychology, 2013, 42, 508-518.  | 3.4 | 37        |
| 25 | Flexible parasympathetic responses to sadness facilitate spontaneous affect regulation.<br>Psychophysiology, 2017, 54, 1054-1069.  | 2.4 | 36        |
| 26 | Affective Disruption From Social Rhythm and Behavioral Approach System (BAS) Sensitivities. Clinical<br>Psychological Science, 2016, 4, 418-432.   | 4.0 | 35        |
| 27 | A Vulnerability-Stress Examination of Response Styles Theory in Adolescence: Stressors, Sex<br>Differences, and Symptom Specificity. Journal of Clinical Child and Adolescent Psychology, 2014, 43,<br>813-827.                          | 3.4 | 34        |
| 28 | Mood instability as a predictor of clinical and functional outcomes in adolescents with bipolar I and bipolar II disorder. Journal of Affective Disorders, 2018, 236, 199-206.   | 4.1 | 34        |
| 29 | Let your fingers do the talking: Passive typing instability predicts future mood outcomes. Bipolar<br>Disorders, 2018, 20, 285-288.  | 1.9 | 33        |
| 30 | Overgeneral autobiographical memory, emotional maltreatment, andÂdepressive symptoms in<br>adolescence: Evidence of a cognitive vulnerability–stress interaction <sup>â~†</sup> . Journal of<br>Adolescence, 2013, 36, 201-208.          | 2.4 | 32        |
| 31 | Identifying a physical indicator of suicide risk: Non-suicidal self-injury scars predict suicidal ideation and suicide attempts. Comprehensive Psychiatry, 2016, 65, 79-87.  | 3.1 | 32        |
| 32 | Negative cognitive styles synergistically predict suicidal ideation in bipolar spectrum disorders: A<br>3-year prospective study. Psychiatry Research, 2015, 226, 162-168.   | 3.3 | 31        |
| 33 | Cognitive and Emotionâ€Regulatory Mediators of the Relationship Between Behavioral Approach System<br>Sensitivity and Nonsuicidal Selfâ€Injury Frequency. Suicide and Life-Threatening Behavior, 2015, 45,<br>495-504.                   | 1.9 | 31        |
| 34 | Autonomic reactivity and vulnerability to depression: A multi-wave study Emotion, 2017, 17, 602-615.   | 1.8 | 31        |
| 35 | The interaction of affective states and cognitive vulnerabilities in the prediction of non-suicidal self-injury. Cognition and Emotion, 2015, 29, 539-547.   | 2.0 | 30        |
| 36 | Emotion regulation characteristics and cognitive vulnerabilities interact to predict depressive symptoms in individuals at risk for bipolar disorder: A prospective behavioural high-risk study. Cognition and Emotion, 2013, 27, 63-84. | 2.0 | 29        |

| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 37 | Pubertal Timing, Peer Victimization, and Body Esteem Differentially Predict Depressive Symptoms in African American and Caucasian Girls. Journal of Early Adolescence, 2015, 35, 378-402.   | 1.9 | 29        |
| 38 | Deficits in Emotional Clarity and Vulnerability to Peer Victimization and Internalizing Symptoms<br>Among Early Adolescents. Journal of Youth and Adolescence, 2016, 45, 183-194.   | 3.5 | 29        |
| 39 | Inflexibility as a vulnerability to depression: A systematic qualitative review Clinical Psychology:<br>Science and Practice, 2017, 24, 245-276.  | 0.9 | 29        |
| 40 | Cognitive control neuroimaging measures differentiate between those with and without future recurrence of depression. NeuroImage: Clinical, 2018, 20, 1001-1009.  | 2.7 | 28        |
| 41 | Correlates of real world executive dysfunction in bipolar I disorder. Journal of Psychiatric Research, 2014, 53, 87-93.   | 3.1 | 27        |
| 42 | SPECIFIC MOOD SYMPTOMS CONFER RISK FOR SUBSEQUENT SUICIDAL IDEATION IN BIPOLAR DISORDER WITH AND WITHOUT SUICIDE ATTEMPT HISTORY: MULTI-WAVE DATA FROM STEP-BD. Depression and Anxiety, 2016, 33, 464-472.  | 4.1 | 27        |
| 43 | Trait Affect, Emotion Regulation, and the Generation of Negative and Positive Interpersonal Events.<br>Behavior Therapy, 2017, 48, 435-447.   | 2.4 | 27        |
| 44 | Neural markers of attention to aversive pictures predict response to cognitive behavioral therapy in anxiety and depression. Biological Psychology, 2017, 123, 269-277.   | 2.2 | 26        |
| 45 | Behavioral Approach System (BAS)-Relevant Cognitive Styles in Individuals with High Versus Moderate<br>BAS Sensitivity: A Behavioral High-Risk Design. Cognitive Therapy and Research, 2013, 37, 139-149.   | 1.9 | 25        |
| 46 | Cognitive reappraisal attenuates the association between depressive symptoms and emotional response to stress during adolescence. Cognition and Emotion, 2019, 33, 524-535.   | 2.0 | 25        |
| 47 | A randomized, placebo-controlled proof-of-concept trial of adjunctive topiramate for alcohol use disorders in bipolar disorder. American Journal on Addictions, 2016, 25, 94-98.  | 1.4 | 24        |
| 48 | Impulsivity predicts the onset of DSM-IV-TR or RDC hypomanic and manic episodes in adolescents and young adults with high or moderate reward sensitivity. Journal of Affective Disorders, 2016, 198, 88-95.   | 4.1 | 24        |
| 49 | Integrated cross-network connectivity of amygdala, insula, and subgenual cingulate associated with facial emotion perception in healthy controls and remitted major depressive disorder. Cognitive, Affective and Behavioral Neuroscience, 2017, 17, 1242-1254. | 2.0 | 24        |
| 50 | Using resting-state intrinsic network connectivity to identify suicide risk in mood disorders.<br>Psychological Medicine, 2020, 50, 2324-2334.  | 4.5 | 23        |
| 51 | A Lifespan Model of Interference Resolution and Inhibitory Control: Risk for Depression and Changes with Illness Progression. Neuropsychology Review, 2020, 30, 477-498.  | 4.9 | 23        |
| 52 | Extreme attributions predict transition from depression to mania orÂhypomania in bipolar disorder.<br>Journal of Psychiatric Research, 2013, 47, 1329-1336.   | 3.1 | 22        |
| 53 | Suicide risk characteristics among aborted, interrupted, and actual suicide attempters. Psychiatry Research, 2016, 242, 357-364.  | 3.3 | 22        |
| 54 | Using ambulatory assessment to measure dynamic risk processes in affective disorders. Journal of Affective Disorders, 2019, 259, 325-336.   | 4.1 | 22        |

| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 55 | Extreme Attributions Predict the Course of Bipolar Depression. Journal of Clinical Psychiatry, 2013, 74, 249-255.   | 2.2 | 21        |
| 56 | The cyclical nature of depressed mood and future risk: Depression, rumination, and deficits in emotional clarity in adolescent girls. Journal of Adolescence, 2015, 42, 68-76.  | 2.4 | 21        |
| 57 | Affective instability and the course of bipolar depression: Results from the STEP-BD randomised controlled trial of psychosocial treatment. British Journal of Psychiatry, 2016, 208, 352-358.  | 2.8 | 21        |
| 58 | Cognitive Vulnerabilities Amplify the Effect of Early Pubertal Timing on Interpersonal Stress<br>Generation During Adolescence. Journal of Youth and Adolescence, 2014, 43, 824-833.  | 3.5 | 20        |
| 59 | Positive overgeneralization and Behavioral Approach System (BAS) sensitivity interact to predict prospective increases in hypomanic symptoms: A behavioral high-risk design. Behaviour Research and Therapy, 2012, 50, 231-239.                 | 3.1 | 17        |
| 60 | Cognitive and Interpersonal Vulnerability to Suicidal Ideation: A Weakest Link Approach. Behavior<br>Therapy, 2014, 45, 778-790.  | 2.4 | 17        |
| 61 | Disrupted engagement of networks supporting hot and cold cognition in remitted major depressive disorder. Journal of Affective Disorders, 2018, 227, 183-191.   | 4.1 | 17        |
| 62 | Nonsuicidal self-injury scar concealment from the self and others. Journal of Psychiatric Research, 2020, 130, 313-320.   | 3.1 | 17        |
| 63 | Cognitive control and network disruption in remitted depression: a correlate of childhood adversity.<br>Social Cognitive and Affective Neuroscience, 2018, 13, 1081-1090.   | 3.0 | 16        |
| 64 | Influence of childhood adversity, approach motivation traits, and depression on individual differences in brain activation during reward anticipation. Biological Psychology, 2019, 146, 107709.  | 2.2 | 16        |
| 65 | The Immediate and Long-Term Effects of an Intensive Meditation Retreat. Mindfulness, 2017, 8, 1064-1077.  | 2.8 | 15        |
| 66 | Differential engagement of cognitive control regions and subgenual cingulate based upon presence<br>or absence of comorbid anxiety with depression. Journal of Affective Disorders, 2018, 241, 371-380.   | 4.1 | 15        |
| 67 | Extreme Cognitions in Bipolar Spectrum Disorders: Associations With Personality Disorder Characteristics and Risk for Episode Recurrence. Behavior Therapy, 2015, 46, 242-256.  | 2.4 | 14        |
| 68 | Developmental changes in resting-state functional networks among individuals with and without internalizing psychopathologies. Depression and Anxiety, 2019, 36, 141-152.   | 4.1 | 14        |
| 69 | Cognitive Styles in Mood Disorders: Discriminative Ability of Unipolar and Bipolar Cognitive Profiles.<br>International Journal of Cognitive Therapy, 2015, 8, 35-60.   | 2.2 | 13        |
| 70 | Perseverate or decenter? Differential effects of metacognition on the relationship between<br>parasympathetic inflexibility and symptoms of depression in a multi-wave study. Behaviour Research<br>and Therapy, 2017, 97, 123-133.             | 3.1 | 12        |
| 71 | Personality disorder symptom severity predicts onset of mood episodes and conversion to bipolar I<br>disorder in individuals with bipolar spectrum disorder Journal of Abnormal Psychology, 2017, 126,<br>271-284.                              | 1.9 | 11        |
| 72 | Memory performance predicts response to psychotherapy for depression in bipolar disorder: A pilot<br>randomized controlled trial with exploratory functional magnetic resonance imaging. Journal of<br>Affective Disorders, 2018, 229, 342-350. | 4.1 | 10        |

| #  | Article   | IF   | CITATIONS |
|----|---|------|-----------|
| 73 | Multidimensional imaging techniques for prediction of treatment response in major depressive disorder. Progress in Neuro-Psychopharmacology and Biological Psychiatry, 2019, 91, 38-48.   | 4.8  | 10        |
| 74 | Sleep disturbance and physiological regulation among young adults with prior depression. Journal of Psychiatric Research, 2019, 115, 75-81.   | 3.1  | 9         |
| 75 | Extreme attributions predict suicidal ideation and suicide attempts in bipolar disorder: prospective data from STEP-BD. World Psychiatry, 2014, 13, 95-96.  | 10.4 | 8         |
| 76 | The Titrated Monetary Incentive Delay Task: Sensitivity, convergent and divergent validity, and neural correlates in an RDoC sample. Journal of Clinical and Experimental Neuropsychology, 2019, 41, 512-529.   | 1.3  | 8         |
| 77 | Pre-scan cortisol is differentially associated with enhanced connectivity to the cognitive control network in young adults with a history of depression. Psychoneuroendocrinology, 2019, 104, 219-227.  | 2.7  | 7         |
| 78 | Selfâ€reported affective biases, but not all affective performance biases, are present in depression remission. British Journal of Clinical Psychology, 2019, 58, 274-288.  | 3.5  | 7         |
| 79 | Brain-behavioral adaptability predicts response to cognitive behavioral therapy for emotional disorders: A person-centered event-related potential study. Neuropsychologia, 2020, 145, 106408.  | 1.6  | 7         |
| 80 | The role of lifetime anxiety history in the course of bipolar spectrum disorders. Psychiatry Research, 2018, 264, 202-209.  | 3.3  | 6         |
| 81 | Predictors of Attrition in Longitudinal Neuroimaging Research: Inhibitory Control, Head Movement, and Resting-State Functional Connectivity. Brain Connectivity, 2018, 8, 527-536.  | 1.7  | 6         |
| 82 | A Latent Structure Analysis of Cognitive Vulnerability to Depression in Adolescence. Behavior<br>Therapy, 2019, 50, 755-764.  | 2.4  | 6         |
| 83 | Decentering predicts attenuated perseverative thought and internalizing symptoms following stress exposure: A multi-level, multi-wave study. Behaviour Research and Therapy, 2022, 152, 104017.   | 3.1  | 6         |
| 84 | Asymptomatic Hyperamylasemia and Hyperlipasemia Associated With Aripiprazole. Journal of Clinical<br>Psychopharmacology, 2009, 29, 504-506.   | 1.4  | 5         |
| 85 | Inflexible autonomic responses to sadness predict habitual and real-world rumination: A multi-level,<br>multi-wave study. Biological Psychology, 2020, 153, 107886.   | 2.2  | 5         |
| 86 | Efficacy of Electroconvulsive Therapy in Fahr Disease Associated With Bipolar Psychotic Disorder.<br>Journal of ECT, 2009, 25, 213-215.   | 0.6  | 4         |
| 87 | Norms for Performance in the Workplace in Healthy People: <i>Data from the National Comorbidity Survey Replication Study</i> . CNS Spectrums, 2011, 16, 143-152.  | 1.2  | 4         |
| 88 | The Effect of a College Pen Incentive on Survey Response Rate Among Recent College Graduates.<br>Evaluation Review, 2011, 35, 93-99.  | 1.0  | 2         |
| 89 | 247. BiAffect: Passive Monitoring of Psychomotor ActivityÂin Mood Disorders Using Mobile Keystroke<br>Kinematics. Biological Psychiatry, 2019, 85, S102-S103.   | 1.3  | 2         |
| 90 | Using Network Parcels and Resting-State Networks to Estimate Correlates of Mood Disorder and<br>Related Research Domain Criteria Constructs of Reward Responsiveness and Inhibitory Control.<br>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2021, , . | 1.5  | 2         |

| #   | Article   | IF  | CITATIONS |
|-----|---|-----|-----------|
| 91  | Aggression Protects Against the Onset of Major Depressive Episodes in Individuals With Bipolar<br>Spectrum Disorder. Behavior Therapy, 2017, 48, 311-321.   | 2.4 | 1         |
| 92  | 220. Childhood Adversity Disrupts Cognitive Control Development and Function. Biological Psychiatry, 2018, 83, S88.   | 1.3 | 1         |
| 93  | O23. Inhibitory Control and Neuroprogression of Mood Disorders. Biological Psychiatry, 2019, 85, S115.  | 1.3 | 1         |
| 94  | 537. Attenuated Intrinsic Connectivity within Cognitive Control Network among Individuals with<br>Remitted Depression is Associated with Cognitive Control Deficits and Negative Cognitive Styles.<br>Biological Psychiatry, 2017, 81, S217-S218. | 1.3 | 0         |
| 95  | 935. Acute Cortisol Reactivity is Associated with Increased Connectivity from Default Mode to<br>Cognitive Control Networks in Remitted Adolescent-Onset Depression. Biological Psychiatry, 2017, 81,<br>S378-S379.                               | 1.3 | 0         |
| 96  | 131. Anticipatory Cortisol Modulation of Memory, Affective Processing, and Resting-State Networks<br>During fMRI in Mood Disorders. Biological Psychiatry, 2018, 83, S53-S54.   | 1.3 | 0         |
| 97  | F141. Cross-Network Associations With Rumination Across Late Adolescent Development. Biological Psychiatry, 2018, 83, S292-S293.  | 1.3 | 0         |
| 98  | T140. Intrinsic Network Connectivity Reliably Distinguishes Retrospective Risk for Suicidal Behavior in<br>Individuals With Mood Disorders. Biological Psychiatry, 2019, 85, S183.  | 1.3 | 0         |
| 99  | Neuroticism and Rumination are Overlapping Constructs, yet Show Unique Relationships With Resting<br>State Networks, Remitted Depression, and Risk for Depression Relapse. Biological Psychiatry, 2020, 87,<br>S17-S18.                           | 1.3 | 0         |
| 100 | A new instrument to assess counterdependency, evaluated in the context of postpartum depression<br>Psychoanalytic Psychology, 2021, 38, 49-57.  | 0.6 | 0         |
