#	ARTICLE	IF	CITATIONS
1	Modeling nonhuman conventions: the behavioral ecology of arbitrary action. <i>Behavioral Ecology</i> , 2018, 29, 598-608.	1.0	4
2	Experimental evolution of color preference for oviposition in <i>Drosophila melanogaster</i> . <i>Journal of Bioeconomics</i> , 2018, 20, 125-140.	1.5	8
3	Reply to Sherratt and Hohen: Goldilocks and the half-empty glass. <i>Behavioral Ecology</i> , 2018, 29, e9-e10.	1.0	0
4	When it's good to signal badness: using objective measures of discriminability to test the value of being distinctive. <i>Animal Behaviour</i> , 2017, 129, 113-125.	0.8	4
5	Foraging \hat{t} . , 2017, , 237-253.		3
6	Why Complex Signals Matter, Sometimes. <i>Animal Signals and Communication</i> , 2016, , 119-135.	0.4	3
7	Reliability, uncertainty, and costs in the evolution of animal learning. <i>Current Opinion in Behavioral Sciences</i> , 2016, 12, 73-79.	2.0	57
8	Should receivers follow multiple signal components? An economic perspective. <i>Behavioral Ecology</i> , 2016, 27, 36-44.	1.0	25
9	Does multimodality per se improve receiver performance? An explicit comparison of multimodal versus unimodal complex signals in a learned signal-following task. <i>Behavioral Ecology and Sociobiology</i> , 2016, 70, 409-416.	0.6	13
10	Blue jays, <i>Cyanocitta cristata</i> , devalue social information in uncertain environments. <i>Animal Behaviour</i> , 2016, 112, 53-62.	0.8	46
11	Experimental Evolution and Economics. <i>SAGE Open</i> , 2015, 5, 215824401561252.	0.8	19
12	Why are signals reliable? Honesty depends on costs, sometimes. <i>Animal Behaviour</i> , 2015, 110, e13-e16.	0.8	3
13	Experimental evolution of prepared learning. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2014, 111, 11750-11755.	3.3	102
14	Why not lie? Costs enforce honesty in an experimental signalling game. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2014, 281, 20132457.	1.2	23
15	Receiver tolerance for imperfect signal reliability: results from experimental signalling games. <i>Animal Behaviour</i> , 2014, 94, 1-8.	0.8	5
16	Subjective costs drive overly patient foraging strategies in rats on an intertemporal foraging task. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2013, 110, 8308-8313.	3.3	85
17	Tracking a changing environment: optimal sampling, adaptive memory and overnight effects. <i>Behavioural Processes</i> , 2012, 89, 86-94.	0.5	37
18	Patch exploitation as choice: symmetric choice in an asymmetric situation?. <i>Animal Behaviour</i> , 2011, 81, 683-689.	0.8	3

#	ARTICLE	IF	CITATIONS
19	Caching economics: jays cache more when handling times are short and habitats are poor. <i>Animal Behaviour</i> , 2011, 82, 579-585.	0.8	4
20	An experimental analysis of receiver economics: cost, reliability and uncertainty interact to determine a signal's value. <i>Oikos</i> , 2010, 119, 254-263.	1.2	13
21	Components of change in the evolution of learning and unlearned preference. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2009, 276, 3201-3208.	1.2	108
22	Why do animals make better choices in patch-leaving problems?. <i>Behavioural Processes</i> , 2009, 80, 252-260.	0.5	16
23	Decision ecology: Foraging and the ecology of animal decision making. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2008, 8, 475-484.	1.0	156
24	Patience. <i>Current Biology</i> , 2008, 18, R11-R12.	1.8	36
25	Effects of temporal clumping and payoff accumulation on impulsiveness and cooperation. <i>Behavioural Processes</i> , 2006, 71, 29-40.	0.5	13
26	What makes information valuable: signal reliability and environmental uncertainty. <i>Animal Behaviour</i> , 2006, 71, 1119-1129.	0.8	70
27	Information and its use by animals in evolutionary ecology. <i>Trends in Ecology and Evolution</i> , 2005, 20, 187-193.	4.2	1,143
28	The economic basis of cooperation: tradeoffs between selfishness and generosity. <i>Behavioral Ecology</i> , 2004, 15, 255-261.	1.0	50
29	Impulsiveness without discounting: the ecological rationality hypothesis. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2004, 271, 2459-2465.	1.2	83
30	When are two heads better than one? Visual perception and information transfer affect vigilance coordination in foraging groups. <i>Behavioral Ecology</i> , 2004, 15, 898-906.	1.0	31
31	Choice and context: testing a simple short-term choice rule. <i>Animal Behaviour</i> , 2003, 66, 59-70.	0.8	19
32	Site selection under differential predation risks by drifting prey in streams. <i>Oikos</i> , 2003, 102, 85-94.	1.2	4
33	Discounting and Reciprocity in an Iterated Prisoner's Dilemma. <i>Science</i> , 2002, 298, 2216-2218.	6.0	269
34	Discrimination, discounting and impulsivity: a role for an informational constraint. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2002, 357, 1527-1537.	1.8	66
35	A simple spatially explicit ideal-free distribution: a model and an experiment. <i>Behavioral Ecology and Sociobiology</i> , 2001, 49, 220-234.	0.6	13
36	The adaptive value of preference for immediacy: when shortsighted rules have farsighted consequences. <i>Behavioral Ecology</i> , 2001, 12, 330-339.	1.0	149

#	ARTICLE	IF	CITATIONS
37	Cumulative Benefit Games: Achieving Cooperation when Players Discount the Future. <i>Journal of Theoretical Biology</i> , 2000, 205, 1-16.	0.8	16
38	On the spurious occurrence of Tit for Tat in pairs of predator-approaching fish. <i>Animal Behaviour</i> , 1997, 53, 113-131.	0.8	33
39	Iterated Prisoner's Dilemma: Pay-off Variance. <i>Journal of Theoretical Biology</i> , 1997, 188, 1-10.	0.8	2
40	Error and Discounting in the Iterated Prisoner's Dilemma. <i>Journal of Theoretical Biology</i> , 1995, 176, 457-469.	0.8	27
41	On the economics of sit-and-wait foraging: site selection and assessment. <i>Behavioral Ecology</i> , 1995, 6, 258-268.	1.0	25
42	Testing models of non-kin cooperation: mutualism and the Prisoner's Dilemma. <i>Animal Behaviour</i> , 1995, 50, 527-535.	0.8	158
43	Failure of simple optimal foraging models to predict residence time when patch quality is uncertain. <i>Behavioral Ecology</i> , 1993, 4, 350-363.	1.0	36
44	Dimensional analysis in behavioral ecology. <i>Behavioral Ecology</i> , 1993, 4, 172-183.	1.0	62
45	Learning and Behavioral Ecology: Incomplete Information and Environmental Predictability. , 1993, , 195-218.		87
46	Change, regularity, and value in the evolution of animal learning. <i>Behavioral Ecology</i> , 1991, 2, 77-89.	1.0	187
47	Variance and the Value of Information. <i>American Naturalist</i> , 1989, 134, 128-140.	1.0	894
48	Tracking a fluctuating environment: a study of sampling. <i>Animal Behaviour</i> , 1988, 36, 87-105.	0.8	115
49	On economically tracking a variable environment. <i>Theoretical Population Biology</i> , 1987, 32, 15-25.	0.5	167
50	How constant is the constant of risk-aversion?. <i>Animal Behaviour</i> , 1986, 34, 1659-1667.	0.8	66
51	How important are partial preferences?. <i>Animal Behaviour</i> , 1985, 33, 667-669.	0.8	60
52	Central place foraging: Single-prey loaders again. <i>Animal Behaviour</i> , 1983, 31, 238-243.	0.8	70
53	Optimal foraging: Some simple stochastic models. <i>Behavioral Ecology and Sociobiology</i> , 1982, 10, 251-263.	0.6	314
54	Communication as information use: insights from statistical decision theory. , 0, , 89-112.		4
