#	ARTICLE	IF	CITATIONS
1	Rapid behavioural response of urban birds to COVID-19 lockdown. Proceedings of the Royal Society B: Biological Sciences, 2021, 288, 20202513.	1.2	45
2	Egg recognition: The importance of quantifying multiple repeatable features as visual identity signals. PLoS ONE, 2021, 16, e0248021.	1.1	12
3	Stable hydrogen isotope measurements of songbird feathers: effects of intra-feather variability and sample processing. Journal of Ornithology, 2020, 161, 381-388.	0.5	2
4	Behavioural polymorphism in wintering white-throated sparrows, <i>Zonotrichia albicollis</i> . Animal Behaviour, 2020, 164, 91-98.	0.8	3
5	Are Two Days Enough? Checking the Accuracy of the Survey Protocols Used in Common Bird Monitoring Schemes. Ardeola, 2018, 65, 41-52.	0.4	2
6	Inability of Biometry to Discriminate Iberian and Common Chiffchaffs During the Autumn Migration Period. Ardeola, 2017, 64, 49.	0.4	5
7	A macroecological perspective for phenological research under climate change. Ecological Research, 2017, 32, 633-641.	0.7	10
8	The value of long-term studies in behavioural ecology. Ecosistemas, 2017, 26, 21-31.	0.2	1
9	Sexing of <i>Phylloscopus</i> based on multivariate probability of morphological traits. Ringing and Migration, 2016, 31, 83-97.	0.2	5
10	An evaluation of monk parakeet damage to crops in the metropolitan area of Barcelona. Animal Biodiversity and Conservation, 2016, 39, 141-145.	0.3	41
11	Wintering forest birds roost in areas of higher sun radiation. European Journal of Wildlife Research, 2014, 60, 59-67.	0.7	11
12	Female-female competition is influenced by forehead patch expression in pied flycatcher females. Behavioral Ecology and Sociobiology, 2014, 68, 1195-1204.	0.6	29
13	Complex phenological changes and their consequences in the breeding success of a migratory bird, the white stork <i>Ciconia ciconia</i> . Journal of Animal Ecology, 2013, 82, 1072-1086.	1.3	40
14	Spring phenology delays in an insular subtropical songbird: is response to climate change constrained by population size?. Journal of Ornithology, 2012, 153, 355-366.	0.5	7
15	Drivers of population variability in phenological responses to climate change in Japanese birds. Climate Research, 2012, 54, 95-112.	0.4	13
16	Challenging claims in the study of migratory birds and climate change. Biological Reviews, 2011, 86, 928-946.	4.7	286
17	Ecological Impacts of the North Atlantic Oscillation (NAO) in Mediterranean Ecosystems. Advances in Global Change Research, 2011, , 153-170.	1.6	28
18	Impact of climate change on plant phenology in Mediterranean ecosystems. Global Change Biology, 2010, 16, 1082-1106.	4.2	351

#	ARTICLE	IF	CITATIONS
19	Determining the Environmental Factors Underlying the Spatial Variability of Insect Appearance Phenology for the Honey Bee, <i>Apis mellifera</i> , and the Small White, <i>Pieris rapae</i> . <i>Journal of Insect Science</i> , 2010, 10, 1-21.	0.6	13
20	Nest Size, Nest Building Behaviour and Breeding Success in a Species with Nest Reuse: The White Stork <i>Ciconia ciconia</i> . <i>Annales Zoologici Fennici</i> , 2010, 47, 184-194.	0.2	36
21	Long-term temporal changes of plant phenology in the Western Mediterranean. <i>Global Change Biology</i> , 2009, 15, 1930-1948.	4.2	173
22	Partial least squares regression as an alternative to current regression methods used in ecology. <i>Oikos</i> , 2009, 118, 681-690.	1.2	568
23	The relative importance of conditions in wintering and passage areas on spring arrival dates: the case of long-distance Iberian migrants. <i>Journal of Ornithology</i> , 2008, 149, 199-210.	0.5	49
24	Geographic variation in onset of singing among populations of two migratory birds. <i>Acta Oecologica</i> , 2008, 34, 50-64.	0.5	14
25	Heterogeneous intra-annual climatic changes drive different phenological responses at two trophic levels. <i>Climate Research</i> , 2008, 36, 181-190.	0.4	81
26	Why are bird migration dates shifting? A review of weather and climate effects on avian migratory phenology. <i>Climate Research</i> , 2007, 35, 37-58.	0.4	344
27	Environmental and geographical constraints on common swift and barn swallow spring arrival patterns throughout the Iberian Peninsula. <i>Journal of Biogeography</i> , 2007, 34, 1065-1076.	1.4	16
28	Spatial patterns of white stork (<i>Ciconia ciconia</i>) migratory phenology in the Iberian Peninsula. <i>Journal of Ornithology</i> , 2007, 148, 293-308.	0.5	26
29	Climate change and bird phenology: a long-term study in the Iberian Peninsula. <i>Global Change Biology</i> , 2006, 12, 1993-2004.	4.2	100
30	Temporal trends in phenology of the honey bee <i>Apis mellifera</i> (L.) and the small white <i>Pieris rapae</i> (L.) in the Iberian Peninsula (1952-2004). <i>Ecological Entomology</i> , 2006, 31, 261-268.	1.1	86
31	Do changes in climate patterns in wintering areas affect the timing of the spring arrival of trans-Saharan migrant birds?. <i>Global Change Biology</i> , 2005, 11, 12-21.	4.2	152
32	Phenology and climate change: a long-term study in a Mediterranean locality. <i>Oecologia</i> , 2005, 146, 484-495.	0.9	281
