

Ming Lu

List of Publications by Citations

Source: <https://exaly.com/author-pdf/8985292/ming-lu-publications-by-citations.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
36	Anti-Inflammatory Mechanism of Neural Stem Cell Transplantation in Spinal Cord Injury. <i>International Journal of Molecular Sciences</i> , 2016 , 17,	6.3	47
35	Secretome of Olfactory Mucosa Mesenchymal Stem Cell, a Multiple Potential Stem Cell. <i>Stem Cells International</i> , 2016 , 2016, 1243659	5	43
34	Molecular basis of the tarantula toxin jingzhaotoxin-III (JRTX-Cj1) interacting with voltage sensors in sodium channel subtype Nav1.5. <i>FASEB Journal</i> , 2011 , 25, 3177-85	0.9	27
33	Clinical Cell Therapy Guidelines for Neurorestoration (IANR/CANR 2017). <i>Cell Transplantation</i> , 2018 , 27, 310-324	4	25
32	Shotgun proteomics and network analysis between plasma membrane and extracellular matrix proteins from rat olfactory ensheathing cells. <i>Cell Transplantation</i> , 2010 , 19, 133-46	4	25
31	Olfactory mucosa: a rich source of cell therapy for central nervous system repair. <i>Reviews in the Neurosciences</i> , 2015 , 26, 281-93	4.7	23
30	Hypoxia-preconditioned olfactory mucosa mesenchymal stem cells abolish cerebral ischemia/reperfusion-induced pyroptosis and apoptotic death of microglial cells by activating HIF-1. <i>Aging</i> , 2020 , 12, 10931-10950	5.6	19
29	Electrophysiological characterization of NSCs after differentiation induced by OEC conditioned medium. <i>Acta Neurochirurgica</i> , 2011 , 153, 2085-90	3	15
28	Co-transplantation of autologous OM-MSCs and OM-OECs: a novel approach for spinal cord injury. <i>Reviews in the Neurosciences</i> , 2016 , 27, 259-70	4.7	11
27	Olfactory Mucosa Mesenchymal Stem Cells Alleviate Cerebral Ischemia/Reperfusion Injury Golgi Apparatus Secretory Pathway Ca ²⁺ -ATPase Isoform1. <i>Frontiers in Cell and Developmental Biology</i> , 2020 , 8, 586541	5.7	11
26	Hypoxic Culture Promotes Dopaminergic-Neuronal Differentiation of Nasal Olfactory Mucosa Mesenchymal Stem Cells via Upregulation of Hypoxia-Inducible Factor-1. <i>Cell Transplantation</i> , 2017 , 26, 1452-1461	4	10
25	Electrophysiological characterisation of human umbilical cord blood-derived mesenchymal stem cells induced by olfactory ensheathing cell-conditioned medium. <i>Neurochemical Research</i> , 2013 , 38, 2483-9	4.6	10
24	Olfactory Mucosa Mesenchymal Stem Cells Ameliorate Cerebral Ischemic/Reperfusion Injury Through Modulation of UBIAD1 Expression. <i>Frontiers in Cellular Neuroscience</i> , 2020 , 14, 580206	6.1	9
23	Extracellular vesicles derived from hypoxia-preconditioned olfactory mucosa mesenchymal stem cells enhance angiogenesis via miR-612. <i>Journal of Nanobiotechnology</i> , 2021 , 19, 380	9.4	8
22	Effects of Hypoxia on Differentiation of Mesenchymal Stem Cells. <i>Current Stem Cell Research and Therapy</i> , 2020 , 15, 332-339	3.6	8
21	Regulation of neuronal-glial fate specification by long non-coding RNAs. <i>Reviews in the Neurosciences</i> , 2016 , 27, 491-9	4.7	7
20	Hyperthermia-conditioned OECs serum-free-conditioned medium induce NSC differentiation into neuron more efficiently by the upregulation of HIF-1 alpha and binding activity. <i>Transplantation</i> , 2014 , 97, 1225-32	1.8	7

19	Insight into the proteomic profiling of exosomes secreted by human OM-MSCs reveals a new potential therapy. <i>Biomedicine and Pharmacotherapy</i> , 2020 , 131, 110584	7.5	7
18	Regulation and direction of umbilical cord blood mesenchymal stem cells to adopt neuronal fate. <i>International Journal of Neuroscience</i> , 2014 , 124, 149-59	2	6
17	Standards of clinical-grade olfactory ensheathing cell culture and quality control (2020 China Version). <i>Journal of Neurorestoratology</i> , 2020 , 8, 217-231	3.3	6
16	Ischemic-hypoxic preconditioning enhances the mitochondrial function recovery of transplanted olfactory mucosa mesenchymal stem cells via miR-181a signaling in ischemic stroke. <i>Aging</i> , 2021 , 13, 11234-11256	5.6	6
15	Facile Electrochemical Microbiosensor Based on Self-Assembly of Ag Nanoparticles Coated on TiCT for Measurements of Chloride Ions in the PD Mouse Brain. <i>Analytical Chemistry</i> , 2021 , 93, 7647-7656	7.8	6
14	Hypoxic preconditioning rejuvenates mesenchymal stem cells and enhances neuroprotection following intracerebral hemorrhage via the miR-326-mediated autophagy. <i>Stem Cell Research and Therapy</i> , 2021 , 12, 413	8.3	6
13	Differentiation of human olfactory mucosa mesenchymal stem cells into photoreceptor cells. <i>International Journal of Ophthalmology</i> , 2017 , 10, 1504-1509	1.4	5
12	Hyperthermia influences fate determination of neural stem cells with lncRNAs alterations in the early differentiation. <i>PLoS ONE</i> , 2017 , 12, e0171359	3.7	5
11	Effects of the Insulted Neuronal Cells-Derived Extracellular Vesicles on the Survival of Umbilical Cord-Derived Mesenchymal Stem Cells following Cerebral Ischemia/Reperfusion Injury. <i>Oxidative Medicine and Cellular Longevity</i> , 2020 , 2020, 9768713	6.7	5
10	Hypoxic and ischemic effects on gene and protein expression levels of paracrine factors by human olfactory mucosa mesenchymal-like stem cells. <i>Journal of Neurorestoratology</i> , 2016 , Volume 4, 85-94	3.3	5
9	Olfactory ensheathing cells facilitate neurite sprouting and outgrowth by secreting high levels of hevin. <i>Journal of Chemical Neuroanatomy</i> , 2019 , 104, 101728	3.2	3
8	Effects of IGFBP-2 on proliferation and differentiation in neural stem cell line C17.2. <i>Journal of Neurorestoratology</i> , 2017 , Volume 5, 143-153	3.3	2
7	Monitoring of pH in Subacute PD Mouse Brains with a Ratiometric Electrochemical Microsensor Based on Poly(melamine) Films.. <i>ACS Sensors</i> , 2021 ,	9.2	2
6	OM-MSCs Alleviate the Golgi Apparatus Stress Response following Cerebral Ischemia/Reperfusion Injury via the PEDF-PI3K/Akt/mTOR Signaling Pathway. <i>Oxidative Medicine and Cellular Longevity</i> , 2021 , 2021, 4805040	6.7	2
5	Tailoring Oxygen-Containing Groups on Graphene for Ratiometric Electrochemical Measurements of Ascorbic Acid in Living Subacute Parkinson's Disease Mouse Brains. <i>Analytical Chemistry</i> , 2021 ,	7.8	2
4	Hypoxic conditioned promotes the proliferation of human olfactory mucosa mesenchymal stem cells and relevant lncRNA and mRNA analysis. <i>Life Sciences</i> , 2021 , 265, 118861	6.8	2
3	Hypoxia-preconditioned mesenchymal stem cells attenuate microglial pyroptosis after intracerebral hemorrhage. <i>Annals of Translational Medicine</i> , 2021 , 9, 1362	3.2	1
2	Repair of spinal cord injury by hypoxia-inducible factor-1a-expressing neural stem cells. <i>Journal of Medical Hypotheses and Ideas</i> , 2014 , 8, 27-29		0

- 1 A phosphoproteomics study reveals a defined genetic program for neural lineage commitment of neural stem cells induced by olfactory ensheathing cell-conditioned medium. *Pharmacological Research*, **2021**, 172, 105797
