citing authors

#	ARTICLE	IF	CITATIONS
1	Effect of Different Tillage Systems on Soil Organic Carbon and Enzymatic Activity. <i>Agronomy</i> , 2022, 12, 208.	3.0	16
2	Hygroscopic contributions to bark water storage and controls exerted by internal bark structure over water vapor absorption. <i>Trees - Structure and Function</i> , 2021, 35, 831-843.	1.9	22
3	Vertical Variability in Bark Hydrology for Two Coniferous Tree Species. <i>Frontiers in Forests and Global Change</i> , 2021, 4, .	2.3	4
4	Does Mixing Tree Species Affect Water Storage Capacity of the Forest Floor? Laboratory Test of Pine-Oak and Fir-Beech Litter Layers. <i>Forests</i> , 2021, 12, 1674.	2.1	5
5	Using undisturbed soil samples to study how rock fragments and soil macropores affect the hydraulic conductivity of forest stony soils: Some methodological aspects. <i>Journal of Hydrology</i> , 2019, 570, 132-140.	5.4	26
6	The effect of the bulk density and the decomposition index of organic matter on the water storage capacity of the surface layers of forest soils. <i>Geoderma</i> , 2017, 285, 27-34.	5.1	22
7	Hydrological properties of bark of selected forest tree species. Part 2: Interspecific variability of bark water storage capacity. <i>Folia Forestalia Polonica, Series A</i> , 2017, 59, 110-122.	0.3	8
8	Hygroscopicity of the bark of selected forest tree species. <i>IForest</i> , 2017, 10, 220-226.	1.4	24
9	The effect of the shape parameters of a sample on the hydraulic conductivity. <i>Journal of Hydrology</i> , 2016, 534, 230-236.	5.4	8
10	The effect of stand species composition on water storage capacity of the organic layers of forest soils. <i>European Journal of Forest Research</i> , 2015, 134, 187-197.	2.5	41
11	Hydrological properties of bark of selected forest tree species. Part I: the coefficient of development of the interception surface of bark. <i>Trees - Structure and Function</i> , 2014, 28, 831-839.	1.9	12
12	A laboratory method to determine the hydraulic conductivity of mountain forest soils using undisturbed soil samples. <i>Journal of Hydrology</i> , 2014, 519, 1649-1659.	5.4	25
13	The water absorbability of beech ( <i>Fagus sylvatica</i> L.) and fir ( <i>Abies alba</i> Mill.) organic matter in the forest floor. <i>Annals of Forest Research</i> , 2014, 62, .	1.1	6
14	Tree Bark: A Surprising and Diverse Reservoir for Water. <i>Frontiers for Young Minds</i> , 0, 10, .	0.8	0
