#	ARTICLE	IF	CITATIONS
1	In memoriamâ€”Stephen I. Szjra, D.Sc., M.D. (1923â€”2021). <i>Neuropsychopharmacology</i> , 2022, 47, 614-615.	2.8	0
2	CME: Light Therapy: Why, What, for Whom, How, and When (And a Postscript about Darkness). <i>Praxis</i> , 2022, 111, 56-62.	0.2	4
3	Perspectives in affective disorders: Clocks and sleep. <i>European Journal of Neuroscience</i> , 2020, 51, 346-365.	1.2	64
4	Lightening depression. <i>Bipolar Disorders</i> , 2020, 22, 872-873.	1.1	1
5	The relevance of daylight for humans. <i>Biochemical Pharmacology</i> , 2020, 191, 114304.	2.0	70
6	The Role of Daylight for Humans: Gaps in Current Knowledge. <i>Clocks & Sleep</i> , 2020, 2, 61-85.	0.9	88
7	Prevalence of seasonal depression in a prospective cohort study. <i>European Archives of Psychiatry and Clinical Neuroscience</i> , 2019, 269, 833-839.	1.8	27
8	Effects of a dawn-dusk simulation on circadian rest-activity cycles, sleep, mood and well-being in dementia patients. <i>Experimental Gerontology</i> , 2019, 124, 110641.	1.2	22
9	Why Should We Abolish Daylight Saving Time?. <i>Journal of Biological Rhythms</i> , 2019, 34, 227-230.	1.4	61
10	Does anaesthesia stop the clock?. <i>Sleep Medicine Reviews</i> , 2018, 37, 3.	3.8	2
11	Seasonality in affective disorders. <i>General and Comparative Endocrinology</i> , 2018, 258, 244-249.	0.8	63
12	Stabilising sleep for patients admitted at acute crisis to a psychiatric hospital (OWLS): an assessor-blind pilot randomised controlled trial. <i>Psychological Medicine</i> , 2018, 48, 1694-1704.	2.7	58
13	Bright Light Delights: Effects of Daily Light Exposure on Emotions, Restactivity Cycles, Sleep and Melatonin Secretion in Severely Demented Patients. <i>Current Alzheimer Research</i> , 2017, 14, 1063-1075.	0.7	34
14	Subjective Mood in Young Unmedicated Depressed Women under High and Low Sleep Pressure Conditions. <i>Biology</i> , 2016, 5, 52.	1.3	6
15	Commentary on â€œBlueâ€ blocking glasses as additive treatment for mania: a randomized placeboâ€controlled trialâ€. <i>Bipolar Disorders</i> , 2016, 18, 383-384.	1.1	3
16	The twoâ€process model of sleep regulation: a reappraisal. <i>Journal of Sleep Research</i> , 2016, 25, 131-143.	1.7	1,052
17	Melatonin rhythms in renal transplant recipients with sleepâ€wake disturbances. <i>Chronobiology International</i> , 2016, 33, 810-820.	0.9	12
18	The effect of bright light therapy on sleep and circadian rhythms in renal transplant recipients: a pilot randomized, multicentre wait-list controlled trial. <i>Transplant International</i> , 2015, 28, 59-70.	0.8	29

#	ARTICLE	IF	CITATIONS
19	Blue Blocker Glasses as a Countermeasure for Alerting Effects of Evening Light-Emitting Diode Screen Exposure in Male Teenagers. <i>Journal of Adolescent Health</i> , 2015, 56, 113-119.	1.2	216
20	The hockey-stick method to estimate evening dim light melatonin onset (DLMO) in humans. <i>Chronobiology International</i> , 2014, 31, 349-355.	0.9	60
21	Reply to Cordi et al.. <i>Current Biology</i> , 2014, 24, R795.	1.8	4
22	Circadian Sleep-Wake Cycles, Well-Being, and Light Therapy in Borderline Personality Disorder. <i>Journal of Personality Disorders</i> , 2013, 27, 680-696.	0.8	38
23	Young Women With Major Depression Live on Higher Homeostatic Sleep Pressure Than Healthy Controls. <i>Chronobiology International</i> , 2012, 29, 278-294.	0.9	32
24	Chronotherapeutics (light and wake therapy) as a class of interventions for affective disorders. <i>Handbook of Clinical Neurology</i> / Edited By P J Vinken and G W Bruyn, 2012, 106, 697-713.	1.0	33
25	Temporal organization as a therapeutic target. <i>Dialogues in Clinical Neuroscience</i> , 2012, 14, 335-337.	1.8	8
26	Higher Frontal EEG Synchronization in Young Women with Major Depression: A Marker for Increased Homeostatic Sleep Pressure?. <i>Sleep</i> , 2011, 34, 1699-1706.	0.6	13
27	Sleep-wake cycles and cognitive functioning in schizophrenia. <i>British Journal of Psychiatry</i> , 2011, 198, 269-276.	1.7	170
28	Serum factors in older individuals change cellular clock properties. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2011, 108, 7218-7223.	3.3	84
29	A Randomized, Double-Blind, Placebo-Controlled Study of Light Therapy for Antepartum Depression. <i>Journal of Clinical Psychiatry</i> , 2011, 72, 986-993.	1.1	195
30	Chronotherapeutics: An example of translational research for sleep and mood disorders. <i>Sleep and Biological Rhythms</i> , 2010, 8, 161-162.	0.5	3
31	The Circadian Rest-Activity Cycle in Korsakoff Psychosis. <i>American Journal of Geriatric Psychiatry</i> , 2010, 18, 33-41.	0.6	9
32	Human Retinal Light Sensitivity and Melatonin Rhythms Following Four Days in Near Darkness. <i>Chronobiology International</i> , 2009, 26, 93-107.	0.9	18
33	Subjective Well-Being Is Modulated by Circadian Phase, Sleep Pressure, Age, and Gender. <i>Journal of Biological Rhythms</i> , 2009, 24, 232-242.	1.4	90
34	From the basic neuroscience of circadian clock function to light therapy for depression: On the emergence of chronotherapeutics. <i>Journal of Affective Disorders</i> , 2009, 116, 159-160.	2.0	49
35	Circadian Disruption and Psychiatric Disorders: The Importance of Entrainment. <i>Sleep Medicine Clinics</i> , 2009, 4, 273-284.	1.2	32
36	New perspectives on techniques for the clinical psychiatrist: Brain stimulation, chronobiology and psychiatric brain imaging. <i>Psychiatry and Clinical Neurosciences</i> , 2008, 62, 627-637.	1.0	2

#	ARTICLE	IF	CITATIONS
37	Diurnal variation of depressive symptoms. <i>Dialogues in Clinical Neuroscience</i> , 2008, 10, 337-343.	1.8	122
38	Wavelength-dependent effects of evening light exposure on sleep architecture and sleep EEG power density in men. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2006, 290, R1421-R1428.	0.9	152
39	Biological rhythm disturbances in mood disorders. <i>International Clinical Psychopharmacology</i> , 2006, 21, S11-S15.	0.9	279
40	Evening exposure to blue light stimulates the expression of the clock gene PER2 in humans. <i>European Journal of Neuroscience</i> , 2006, 23, 1082-1086.	1.2	120
41	ISAD Committee on Chronotherapeutics in Affective Disorders. <i>Sleep and Biological Rhythms</i> , 2006, 4, 84-84.	0.5	1
42	Thermoregulatory effects of melatonin in relation to sleepiness. <i>Chronobiology International</i> , 2006, 23, 475-484.	0.9	122
43	Treatment of behavioural, cognitive and circadian rest-activity cycle disturbances in Alzheimer's disease: haloperidol vs. quetiapine. <i>International Journal of Neuropsychopharmacology</i> , 2006, 9, 507.	1.0	34
44	Chronotherapeutics (light and wake therapy) in affective disorders. <i>Psychological Medicine</i> , 2005, 35, 939-944.	2.7	216
45	High Sensitivity of Human Melatonin, Alertness, Thermoregulation, and Heart Rate to Short Wavelength Light. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2005, 90, 1311-1316.	1.8	721
46	Brightening Depression. <i>Science</i> , 2004, 303, 467c-469.	6.0	64
47	Waking up properly: is there a role of thermoregulation in sleep inertia?. <i>Journal of Sleep Research</i> , 2004, 13, 121-127.	1.7	77
48	Evening melatonin and bright light administration induce additive phase shifts in dim light melatonin onset. <i>Journal of Pineal Research</i> , 2004, 36, 192-194.	3.4	46
49	Dawn-dusk simulation light therapy of disturbed circadian rest-activity cycles in demented elderly. <i>Experimental Gerontology</i> , 2003, 38, 207-216.	1.2	147
50	Human sleep spindle characteristics after sleep deprivation. <i>Clinical Neurophysiology</i> , 2003, 114, 2258-2267.	0.7	69
51	Life between Clocks: Daily Temporal Patterns of Human Chronotypes. <i>Journal of Biological Rhythms</i> , 2003, 18, 80-90.	1.4	1,832
52	Is Sleep per se a Zeitgeber in Humans?. <i>Journal of Biological Rhythms</i> , 2003, 18, 170-178.	1.4	93
53	Chronobiology and mood disorders. <i>Dialogues in Clinical Neuroscience</i> , 2003, 5, 315-325.	1.8	67
54	Decline in Long-Term Circadian Rest-Activity Cycle Organization in a Patient with Dementia. <i>Journal of Geriatric Psychiatry and Neurology</i> , 2002, 15, 55-59.	1.2	24

#	ARTICLE	IF	CITATIONS
55	No evidence for a phase delay in human circadian rhythms after a single morning melatonin administration. <i>Journal of Pineal Research</i> , 2002, 32, 1-5.	3.4	52
56	Early morning melatonin administration impairs psychomotor vigilance. <i>Behavioural Brain Research</i> , 2001, 121, 167-172.	1.2	46
57	Dynamics of frontal EEG activity, sleepiness and body temperature under high and low sleep pressure. <i>NeuroReport</i> , 2001, 12, 2277-2281.	0.6	144
58	Disturbed Circadian Rest-Activity Cycles in Schizophrenia Patients: An Effect of Drugs?. <i>Schizophrenia Bulletin</i> , 2001, 27, 497-502.	2.3	83
59	Haloperidol Disrupts, Clozapine Reinstates the Circadian Rest-Activity Cycle in a Patient With Early-Onset Alzheimer Disease. <i>Alzheimer Disease and Associated Disorders</i> , 2000, 14, 212-215.	0.6	47
60	Actigraphy to measure day structure as a therapeutic variable in the treatment of schizophrenic patients. <i>Acta Psychiatrica Scandinavica</i> , 2000, 102, 91-95.	2.2	23
61	PHASE ADVANCE AFTER ONE OR THREE SIMULATED DAWNS IN HUMANS. <i>Chronobiology International</i> , 2000, 17, 659-668.	0.9	36
62	The Human Circadian Pacemaker Can See by the Dawn's Early Light. <i>Journal of Biological Rhythms</i> , 2000, 15, 437-446.	1.4	62
63	Warm feet promote the rapid onset of sleep. <i>Nature</i> , 1999, 401, 36-37.	13.7	329
64	Winter and summer outdoor light exposure in women with and without seasonal affective disorder. <i>Journal of Affective Disorders</i> , 1999, 56, 163-169.	2.0	43
65	A rapid-cycling bipolar patient treated with long nights, bedrest, and light. <i>Biological Psychiatry</i> , 1999, 45, 1075-1077.	0.7	84
66	Sleep deprivation in depression: what do we know, where do we go?. <i>Biological Psychiatry</i> , 1999, 46, 445-453.	0.7	383
67	Evening administration of melatonin and bright light: Interactions on the EEG during sleep and wakefulness. <i>Journal of Sleep Research</i> , 1998, 7, 145-157.	1.7	110
68	Homeostatic versus Circadian Effects of Melatonin on Core Body Temperature in Humans. <i>Journal of Biological Rhythms</i> , 1997, 12, 509-517.	1.4	130
69	The Acute Soporific Action of Daytime Melatonin Administration: Effects on the EEG during Wakefulness and Subjective Alertness. <i>Journal of Biological Rhythms</i> , 1997, 12, 636-643.	1.4	67
70	A schizophrenic patient with an arrhythmic circadian rest-activity cycle. <i>Psychiatry Research</i> , 1997, 73, 83-90.	1.7	74
71	The hypothermic effect of late evening melatonin does not block the phase delay induced by concurrent bright light in human subjects. <i>Neuroscience Letters</i> , 1997, 232, 57-61.	1.0	54
72	A relationship between heat loss and sleepiness: effects of postural change and melatonin administration. <i>Journal of Applied Physiology</i> , 1997, 83, 134-139.	1.2	194

#	ARTICLE	IF	CITATIONS
73	â€œNaturalâ€™ light treatment of seasonal affective disorder. Journal of Affective Disorders, 1996, 37, 109-120.	2.0	136
74	A human phase-response curve to light. Neuroscience Letters, 1991, 133, 36-40.	1.0	585
75	Prediction of the antidepressant response to total sleep deprivation by diurnal variation of mood. Psychiatry Research, 1990, 32, 113-124.	1.7	88
76	Seasonality in freerunning circadian rhythms in man. Die Naturwissenschaften, 1984, 71, 316-319.	0.6	64
77	Circadian Rhythm Mechanisms in Affective Illness and in Antidepressant Drug Action. Pharmacopsychiatry, 1982, 15, 31-39.	1.7	228
78	Sleep deprivation: Effects on circadian rhythms of rat brain neurotransmitter receptors. Psychiatry Research, 1981, 5, 67-76.	1.7	66
79	Seasonality in biochemical determinations: A source of variance and a clue to the temporal incidence of affective illness. Psychiatry Research, 1979, 1, 53-60.	1.7	130
