

# Qiuying Zhao

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/8999272/qiuying-zhao-publications-by-year.pdf>

**Version:** 2024-04-26

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

15  
papers

633  
citations

11

L-index

#	Paper	IF	Citations
15	Prenatal disruption of blood-brain barrier formation via cyclooxygenase activation leads to lifelong brain inflammation.. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2022</b> , 119, e2113310119	11.5	2
14	IL4-driven microglia modulate stress resilience through BDNF-dependent neurogenesis. <i>Science Advances</i> , <b>2021</b> , 7,	14.3	27
13	Ginsenoside Rb1 induces a pro-neurogenic microglial phenotype via PPAR $\alpha$ activation in male mice exposed to chronic mild stress. <i>Journal of Neuroinflammation</i> , <b>2021</b> , 18, 171	10.1	2
12	Pioglitazone alleviates maternal sleep deprivation-induced cognitive deficits in male rat offspring by enhancing microglia-mediated neurogenesis. <i>Brain, Behavior, and Immunity</i> , <b>2020</b> , 87, 568-578	16.6	18
11	Roles of serotonin in the fetal brain. <i>Handbook of Behavioral Neuroscience</i> , <b>2020</b> , 437-447	0.7	
10	Maternal immune activation-induced PPAR $\delta$ -dependent dysfunction of microglia associated with neurogenic impairment and aberrant postnatal behaviors in offspring. <i>Neurobiology of Disease</i> , <b>2019</b> , 125, 1-13	7.5	40
9	Exposure to Citalopram Mitigates Maternal Stress Effects on Fetal Brain Development. <i>ACS Chemical Neuroscience</i> , <b>2019</b> , 10, 3307-3317	5.7	11
8	Minocycline inhibits microglial activation and alleviates depressive-like behaviors in male adolescent mice subjected to maternal separation. <i>Psychoneuroendocrinology</i> , <b>2019</b> , 107, 37-45	5	43
7	Salvianolic acid B promotes microglial M2-polarization and rescues neurogenesis in stress-exposed mice. <i>Brain, Behavior, and Immunity</i> , <b>2017</b> , 66, 111-124	16.6	55
6	The antidepressant-like effects of pioglitazone in a chronic mild stress mouse model are associated with PPAR $\delta$ -mediated alteration of microglial activation phenotypes. <i>Journal of Neuroinflammation</i> , <b>2016</b> , 13, 259	10.1	77
5	Salvianolic acid B ameliorates depressive-like behaviors in chronic mild stress-treated mice: involvement of the neuroinflammatory pathway. <i>Acta Pharmacologica Sinica</i> , <b>2016</b> , 37, 1141-53	8	43
4	Phenotypic dysregulation of microglial activation in young offspring rats with maternal sleep deprivation-induced cognitive impairment. <i>Scientific Reports</i> , <b>2015</b> , 5, 9513	4.9	56
3	Maternal sleep deprivation inhibits hippocampal neurogenesis associated with inflammatory response in young offspring rats. <i>Neurobiology of Disease</i> , <b>2014</b> , 68, 57-65	7.5	49
2	Pro- and anti-inflammatory cytokines expression in rats brain and spleen exposed to chronic mild stress: involvement in depression. <i>Behavioural Brain Research</i> , <b>2011</b> , 225, 135-41	3.4	208
1	IL4-driven microglia modulate stress resilience through BDNF-dependent neurogenesis		2
