#	Article	IF	CITATIONS
1	Targeted Sequencing Identifies the Genetic Variants Associated with High-altitude Polycythemia in the Tibetan Population. Indian Journal of Hematology and Blood Transfusion, 2022, 38, 556-565.	0.6	4
2	Genomic insights into the formation of human populations in East Asia. Nature, 2021, 591, 413-419.	27.8	216
3	Using Composite Phenotypes to Reveal Hidden Physiological Heterogeneity in High-Altitude Acclimatization in a Chinese Han Longitudinal Cohort. Phenomics, 2021, 1, 3-14.	2.9	10
4	Effects of altitude on human oral microbes. AMB Express, 2021, 11, 41.	3.0	15
5	Effects of Helicobacter pylori Infection on the Oral Microbiota of Reflux Esophagitis Patients. Frontiers in Cellular and Infection Microbiology, 2021, 11, 732613.	3.9	8
6	Migration effects on the intestinal microbiota of Tibetans. PeerJ, 2021, 9, e12036.	2.0	4
7	Smaller reaction volume of triplex taqman realâ€time reverse transcriptionâ€PCR assays for diagnosing coronavirus disease 2019. Journal of Clinical Laboratory Analysis, 2021, , e24137.	2.1	2
8	The distinctive geographic patterns of common pigmentation variants at the OCA2 gene. Scientific Reports, 2020, 10, 15433.	3.3	8
9	Prioritizing natural-selection signals from the deep-sequencing genomic data suggests multi-variant adaptation in Tibetan highlanders. National Science Review, 2019, 6, 1201-1222.	9.5	30
10	Fluorescent probe for Cu <sup>2+</sup> and the secondary application of the resultant complex to detect cysteine. RSC Advances, 2019, 9, 16812-16818.	3.6	22
11	The massive assimilation of indigenous East Asian populations in the origin of Muslim Hui people inferred from paternal Y chromosome. American Journal of Physical Anthropology, 2019, 169, 341-347.	2.1	16
12	Genome-Wide Association Study Identifies a New Locus at 7q21.13 Associated with Hepatitis B Virus–Related Hepatocellular Carcinoma. Clinical Cancer Research, 2018, 24, 906-915.	7.0	37
13	Associations of high-altitude polycythemia with polymorphisms in PIK3CD and COL4A3 in Tibetan populations. Human Genomics, 2018, 12, 37.	2.9	16
14	Physiological, hematological and biochemical factors associated with high-altitude headache in young Chinese males following acute exposure at 3700Âm. Journal of Headache and Pain, 2018, 19, 59.	6.0	15
15	Genetic polymorphisms of the drug-metabolizing enzyme cytochrome P450 2A6 in a Tibetan Chinese population. International Journal of Clinical and Experimental Pathology, 2018, 11, 5024-5033.	0.5	0
16	Association between IL-1 gene polymorphisms and tuberculosis susceptibility in the Chinese Tibetan population. International Journal of Clinical and Experimental Pathology, 2018, 11, 5441-5449.	0.5	2
17	Increasing the reference populations for the 55 AISNP panel: the need and benefits. International Journal of Legal Medicine, 2017, 131, 913-917.	2.2	38
18	Investigation of the major cytochrome P450 1A2 genetic variant in a healthy Tibetan population in China. Molecular Medicine Reports, 2017, 16, 573-580.	2.4	5

Longli Kang

#	Article	IF	CITATIONS
19	Differentiated demographic histories and local adaptations between Sherpas and Tibetans. Genome Biology, 2017, 18, 115.	8.8	67
20	Association between single nucleotide polymorphisms in ADRB2, GNB3 and GSTP1 genes and high-altitude pulmonary edema (HAPE) in the Chinese Han population. Oncotarget, 2017, 8, 18206-18212.	1.8	10
21	<i>TCF7L2</i> polymorphisms and the risk of schizophrenia in the Chinese Han population. Oncotarget, 2017, 8, 28614-28620.	1.8	10
22	Genome-wide association study of high-altitude pulmonary edema in a Han Chinese population. Oncotarget, 2017, 8, 31568-31580.	1.8	7
23	Associations of high altitude polycythemia with polymorphisms in <i>EPHA2</i> and <i>AGT</i> in Chinese Han and Tibetan populations. Oncotarget, 2017, 8, 53234-53243.	1.8	14
24	Associations between polymorphisms in the IL-4 gene and renal cell carcinoma in Chinese Han population. Oncotarget, 2017, 8, 82078-82084.	1.8	3
25	Associations of high altitude polycythemia with polymorphisms in <i>EPAS1, ITGA6</i> and <i>ERBB4</i> in Chinese Han and Tibetan populations. Oncotarget, 2017, 8, 86736-86746.	1.8	13
26	Angiotensin II receptor 1 gene variants are associated with high-altitude pulmonary edema risk. Oncotarget, 2016, 7, 77117-77123.	1.8	8
27	Vitamin D receptor gene associations with pulmonary tuberculosis in a Tibetan Chinese population. BMC Infectious Diseases, 2016, 16, 469.	2.9	20
28	MtDNA analysis reveals enriched pathogenic mutations in Tibetan highlanders. Scientific Reports, 2016, 6, 31083.	3.3	22
29	P2X7R Gene Polymorphisms are Associated with Increased Risk of Pulmonary Tuberculosis in the Tibetan Chinese Population. American Journal of Tropical Medicine and Hygiene, 2016, 95, 1016-1020.	1.4	9
30	Ancestral Origins and Genetic History of Tibetan Highlanders. American Journal of Human Genetics, 2016, 99, 580-594.	6.2	208
31	Telomere length <i>â€</i> related gene <i>ACYP2</i> polymorphism is associated with the risk of HAPE in Chinese Han population. Journal of Gene Medicine, 2016, 18, 244-249.	2.8	18
32	Genetic polymorphisms study of pharmacogenomic VIP variants in Han ethnic of China's Shaanxi province. Environmental Toxicology and Pharmacology, 2016, 46, 27-35.	4.0	8
33	Genetic polymorphisms of pharmacogenomic VIP variants in the Mongol of Northwestern China. BMC Genetics, 2016, 17, 70.	2.7	6
34	WDR1 and CLNK gene polymorphisms correlate with serum glucose and high-density lipoprotein levels in Tibetan gout patients. Rheumatology International, 2016, 36, 405-412.	3.0	5
35	Genotype-phenotype analysis of CYP2C19 in the Tibetan population and its potential clinical implications in drug therapy. Molecular Medicine Reports, 2016, 13, 2117-2123.	2.4	12
36	CLPTM1L polymorphism as a protective factor for lung cancer: a case–control study in southern Chinese population. Tumor Biology, 2016, 37, 10533-10538.	1.8	6

Longli Kang

#	Article	IF	CITATIONS
37	The population genetics of pharmacogenomics VIP variants in the Sherpa population. Drug Metabolism and Pharmacokinetics, 2016, 31, 82-89.	2.2	8
38	Genetic polymorphisms analysis of drug-metabolizing enzyme CYP2C9 in the Uyghur population. Xenobiotica, 2016, 46, 709-714.	1.1	6
39	Genetic polymorphism analysis of the drug-metabolizing enzyme CYP1A2 in a Uyghur Chinese population: a pilot study. Xenobiotica, 2016, 46, 542-547.	1.1	2
40	Genetic variation in the ABCG2 gene is associated with gout risk in the Chinese Han population. Clinical Rheumatology, 2016, 35, 159-163.	2.2	18
41	Identification of a shared protective genetic susceptibility locus for colorectal cancer and gastric cancer. Tumor Biology, 2016, 37, 2443-2448.	1.8	2
42	The relationship between polymorphisms of <i>XRCC5</i> genes with astrocytoma prognosis in the Han Chinese population. Oncotarget, 2016, 7, 85283-85290.	1.8	8
43	<i>TERT</i> rs2853676 polymorphisms correlate with glioma prognosis in Chinese population. Oncotarget, 2016, 7, 73781-73791.	1.8	3
44	A 3.4-kb Copy-Number Deletion near EPAS1 Is Significantly Enriched in High-Altitude Tibetans but Absent from the Denisovan Sequence. American Journal of Human Genetics, 2015, 97, 54-66.	6.2	69
45	Genetic polymorphism analysis of the drug-metabolizing enzyme CYP2C9 in a Chinese Tibetan population. Gene, 2015, 567, 196-200.	2.2	4
46	Genetic Polymorphisms Analysis of Pharmacogenomic VIP Variants in Miao Ethnic Group of Southwest China. Medical Science Monitor, 2015, 21, 3769-3776.	1.1	11
47	FGFR2 gene polymorphisms are associated with breast cancer risk in the Han Chinese population. American Journal of Cancer Research, 2015, 5, 1854-61.	1.4	23
48	Genetic polymorphisms of pharmacogenomic VIP variants in the lhoba population of southwest China. International Journal of Clinical and Experimental Pathology, 2015, 8, 13293-303.	0.5	15
