#	ARTICLE	IF	CITATIONS
1	Comment on "On the Rootless Nature of a Devonian Suture in SW Iberia (Ossa-Morena Complex)." Tj ETQq1 1 0.784314 rgBT / Overlock Tectonics, 2022, 41, .	2.8	2
2	U-Pb age dating and geochemical fingerprints of Cambrian granites in the North Moroccan Meseta. Implication for the continental rift opening in the Northwest Gondwana margin. Journal of African Earth Sciences, 2022, , 104644.	2.0	1
3	Transcurrent displacement of the Cadomian magmatic arc. Precambrian Research, 2021, 361, 106251.	2.7	7
4	Geochronology and isotopic geochemistry of Ediacaran high-K calc-alkaline felsic volcanism: An example of a Moroccan perigondwanan (Avalonian?) remnant in the El Jadida horst (Mazagonia). Journal of African Earth Sciences, 2020, 163, 103669.	2.0	23
5	Detrital zircon U-Pb ages in the Rif Belt (northern Morocco): Paleogeographic implications. Gondwana Research, 2019, 70, 133-150.	6.0	23
6	Structure and exhumation of the Cap des Trois Fourches basement rocks (Eastern Rif, Morocco). Journal of African Earth Sciences, 2019, 150, 657-672.	2.0	15
7	Petrogenesis of Derraman Peralkaline granite (Oulad Dlim Massif, West African Craton Margin.) Tj ETQq1 1 0.784314 rgBT / Overlock Geoscience, 2018, 350, 236-244.	1.2	10
8	High-P amphibolite-facies metamorphism in the Adrar-Souttoug Metamafic Complex, Oulad Dlim Massif (West African Craton margin, Morocco). Comptes Rendus - Geoscience, 2018, 350, 245-254.	1.2	9
9	Oblique collision and deformation partitioning in the SW Iberian Variscides. Solid Earth, 2016, 7, 857-872.	2.8	21
10	Comment on "The Late Devonian Variscan suture of the Iberian Massif: A correlation of high-pressure belts in NW and SW Iberia. Tectonophysics 654, 96-100" by R. Fernandez and R. Arenas. Tectonophysics, 2016, 666, 281-284.	2.2	10
11	SHRIMP U-Pb geochronological constraints on the timing of the intra-Alcudian (Cadomian) angular unconformity in the Central Iberian Zone (Iberian Massif, Spain). International Journal of Earth Sciences, 2015, 104, 1739-1757.	1.8	36
12	U-Pb Zircon geochronology of the Cambro-Ordovician metagranites and metavolcanic rocks of central and NW Iberia. International Journal of Earth Sciences, 2013, 102, 1-23.	1.8	59
13	A seismic geotraverse across the Iberian Variscides: Orogenic shortening, collisional magmatism, and orocline development. Tectonics, 2013, 32, 417-432.	2.8	47
14	Imaging the crustal structure of the Central Iberian Zone (Variscan Belt): The ALCUDIA deep seismic reflection transect. Tectonics, 2012, 31, .	2.8	42
15	Crustal thickness variations in northern Morocco. Journal of Geophysical Research, 2012, 117, .	3.3	19
16	Late Variscan magmatism in the Nevado-Filıbride Complex: U-Pb geochronologic evidence for the pre-Mesozoic nature of the deepest Betic complex (SE Spain). Lithos, 2012, 146-147, 93-111.	1.4	57
17	Geophysical model of the lithosphere across the Variscan Belt of SW-Iberia: Multidisciplinary assessment. Tectonophysics, 2011, 508, 42-51.	2.2	34
18	Geoheritage in Morocco: The Neoproterozoic Ophiolite of Bou Azzer (Central Anti-Atlas). Geoheritage, 2011, 3, 89-96.	2.8	32

#	ARTICLE	IF	CITATIONS
19	Geochronological data on the Rabat-Tiflet granitoids: Their bearing on the tectonics of the Moroccan Variscides. <i>Journal of African Earth Sciences</i> , 2010, 57, 1-13.	2.0	67
20	Reply to the comment by Michard et al. on "Tectonic relationships of Southwest Iberia with the allochthons of Northwest Iberia and the Moroccan Variscides". <i>Comptes Rendus - Geoscience</i> , 2010, 342, 175-177.	1.2	6
21	Structural and geochronological constraints on the evolution of the Bou Azzer Neoproterozoic ophiolite (Anti-Atlas, Morocco). <i>Precambrian Research</i> , 2010, 182, 1-14.	2.7	114
22	Spatial analysis of stream power using GIS: SLk anomaly maps. <i>Earth Surface Processes and Landforms</i> , 2009, 34, 16-25.	2.5	126
23	Tectonic relationships of Southwest Iberia with the allochthons of Northwest Iberia and the Moroccan Variscides. <i>Comptes Rendus - Geoscience</i> , 2009, 341, 103-113.	1.2	91
24	Seismic imaging and modelling of the lithosphere of SW-Iberia. <i>Tectonophysics</i> , 2009, 472, 148-157.	2.2	20
25	Nature of the lithosphere across the Variscan orogen of SW Iberia: Dense wide-angle seismic reflection data. <i>Journal of Geophysical Research</i> , 2009, 114, .	3.3	54
26	Reply to comment by C. Pin and J. Rodr�guez on "Rheic Ocean ophiolitic remnants in southern Iberia questioned by SHRIMP U-Pb zircon ages on the Beja-Acebuches amphibolites". <i>Tectonics</i> , 2009, 28, .	2.8	15
27	Zircon Geochronology of the Ollo de Sapo Formation and the Age of the Cambro-Ordovician Rifting in Iberia. <i>Journal of Geology</i> , 2009, 117, 174-191.	1.4	79
28	Rheic Ocean ophiolitic remnants in southern Iberia questioned by SHRIMP U-Pb zircon ages on the Beja-Acebuches amphibolites. <i>Tectonics</i> , 2008, 27, .	2.8	109
29	Zircon Inheritance Reveals Exceptionally Fast Crustal Magma Generation Processes in Central Iberia during the Cambro-Ordovician. <i>Journal of Petrology</i> , 2007, 48, 2327-2339.	2.8	150
30	Zircon ages of the metavolcanic rocks and metagranites of the Ollo de Sapo Domain in central Spain: implications for the Neoproterozoic to Early Palaeozoic evolution of Iberia. <i>Geological Magazine</i> , 2007, 144, 963-976.	1.5	82
31	Structure of the Mal�guide Complex near V�lez Rubio (Eastern Betic Cordillera, SE Spain). <i>Tectonics</i> , 2007, 26, .	2.8	15
32	A cross section of the eastern Betic Cordillera (SE Spain) according field data and a seismic reflection profile. <i>Tectonophysics</i> , 2007, 433, 97-126.	2.2	17
33	Emplacement of ellipsoid-shaped (diapiric?) granite: Structural and gravimetric analysis of the Oulm�s granite (Variscan Meseta, Morocco). <i>Journal of African Earth Sciences</i> , 2007, 48, 301-313.	2.0	17
34	Comparative review of the Variscan granitoids of Morocco and Iberia: proposal of a broad zonation. <i>Geodinamica Acta</i> , 2006, 19, 103-116.	2.2	40
35	Un exemple de volcanisme calco-alcalin de type orog�nique mis en place en contexte de rifting (Cambrien de l'oued Rhebar, Meseta occidentale, Maroc). <i>Comptes Rendus - Geoscience</i> , 2006, 338, 229-236.	1.2	29
36	HP-LT Variscan metamorphism in the Cubito-Moura schists (Ossa-Morena Zone, southern Iberia). <i>Comptes Rendus - Geoscience</i> , 2006, 338, 1260-1267.	1.2	24

#	ARTICLE	IF	CITATIONS
37	Transpressional collision tectonics and mantle plume dynamics: the Variscides of southwestern Iberia. <i>Geological Society Memoir</i> , 2006, 32, 345-354.	1.7	31
38	Zircon thermometry and Uâ€Pb ion-microprobe dating of the gabbros and associated migmatites of the Variscan Toledo Anatectic Complex, Central Iberia. <i>Journal of the Geological Society</i> , 2006, 163, 847-855.	2.1	67
39	The Puente Gelnave-Castelo de Vide shear zone (southern Central Iberian Zone, Iberian Massif): geometry, kinematics and regional implications. <i>Bulletin - Societie Geologique De France</i> , 2006, 177, 191-202.	2.2	19
40	The tectonic frame of the Variscanâ€Alleghanian orogen in Southern Europe and Northern Africa. <i>Tectonophysics</i> , 2005, 398, 181-198.	2.2	151
41	Lower Miocene deformation in the hanging wall of the Internal-External Zone boundary of the Betic Cordillera: deformation at the edges of vertical-axis rotation domains in oblique convergent margins. <i>Geological Society Special Publication</i> , 2004, 227, 249-277.	1.3	1
42	Faulted hybrid joints: an example from the Campo de Dalias (Betic Cordilleras, Spain). <i>Journal of Structural Geology</i> , 2004, 26, 2025-2037.	2.3	16
43	Geophysical evidence of a mantle derived intrusion in SW Iberia. <i>Geophysical Research Letters</i> , 2004, 31, n/a-n/a.	4.0	64
44	Repeated palaeoseismic activity of the Ventas de Zafarraya fault (S Spain) and its relation with the 1884 Andalusian earthquake. <i>International Journal of Earth Sciences</i> , 2003, 92, 912-922.	1.8	36
45	Metamorphic and deformational imprint of Cambrianâ€Lower Ordovician rifting in the Ossa-Morena Zone (Iberian Massif, Spain). <i>Journal of Structural Geology</i> , 2003, 25, 2077-2087.	2.3	38
46	Crustal structure of the transpressional Variscan orogen of SW Iberia: SW Iberia deep seismic reflection profile (IBERSEIS). <i>Tectonics</i> , 2003, 22, n/a-n/a.	2.8	228
47	Active faulting in the internal zones of the central Betic Cordilleras (SE, Spain). <i>Journal of Geodynamics</i> , 2003, 36, 239-250.	1.6	86
48	Middle Jurassic to Cretaceous extensional tectonics and sedimentation in the eastern external zone of the Betic Cordillera. <i>Geological Society Special Publication</i> , 2003, 208, 29-53.	1.3	5
49	Opposite subduction polarities connected by transform faults in the Iberian Massif and western European Variscides. , 2002, , .		15
50	Palaeostress evolution of the Iberian Peninsula (Late Carboniferous to present-day). <i>Tectonophysics</i> , 2002, 357, 159-186.	2.2	38
51	The structure of a major suture zone in the SW Iberian Massif: the Ossa-Morena/Central Iberian contact. <i>Tectonophysics</i> , 2001, 332, 295-308.	2.2	98
52	Active continental subduction beneath the Betic Cordillera and the AlborÃn Sea. <i>Geology</i> , 1999, 27, 735.	4.4	123
53	Recent and present-day stresses in the Granada Basin (Betic Cordilleras): Example of a late Miocene-present-day extensional basin in a convergent plate boundary. <i>Tectonics</i> , 1999, 18, 686-702.	2.8	93
54	Models of magnetic and Bouguer gravity anomalies for the deep structure of the central Alboran Sea basin. <i>Geo-Marine Letters</i> , 1998, 18, 10-18.	1.1	18

#	ARTICLE	IF	CITATIONS
55	Crustal structure of the central sector of the Betic Cordillera (SE Spain). <i>Tectonics</i> , 1997, 16, 18-37.	2.8	58
56	Deformation of garnets in a low-grade shear zone. <i>Journal of Structural Geology</i> , 1997, 19, 1137-1148.	2.3	20
57	Seismic structure of the northern continental margin of Spain from ESCIN deep seismic profiles. <i>Tectonophysics</i> , 1996, 264, 153-174.	2.2	65
58	Superposition of extensional detachments during the Neogene in the internal zones of the Betic cordilleras. <i>Geologische Rundschau: Zeitschrift Fur Allgemeine Geologie</i> , 1996, 85, 350-362.	1.3	19
59	Superposition of extensional detachments during the Neogene in the internal zones of the Betic cordilleras. <i>Geologische Rundschau: Zeitschrift Fur Allgemeine Geologie</i> , 1996, 85, 350-362.	1.3	0
60	Geochronological constraints on the evolution of a suture: the Ossa-Morena/Central Iberian contact (Variscan Belt, south-west Iberian Peninsula). <i>Geologische Rundschau: Zeitschrift Fur Allgemeine Geologie</i> , 1995, 84, 375.	1.3	14
61	Tectonic evolution of the boundary between the Central Iberian and Ossa-Morena zones (Variscan) <i>Tj ETQq1 1 0.784314 rgBT /Overlock</i>	2.8	117
62	A deep seismic reflection survey across the Betic Chain (southern Spain): first results. <i>Tectonophysics</i> , 1994, 232, 77-89.	2.2	48
63	Regional significance of kilometric-scale north-east vergent recumbent folds associated with east to south-east directed shear on the southern border of the Central Iberian Zone (Hornachos-Oliva) <i>Tj ETQq1 1 0.784314 rgBT /Overlock</i>	2.8	117
64	The Alpujarride-Nevalo-Filabride extensional shear zone, Betic Cordillera, SE Spain. <i>Journal of Structural Geology</i> , 1993, 15, 555-569.	2.3	109
65	Cadomian subduction/collision and Variscan transpression in the Badajoz-C�rdoba Shear Belt, southwest Spain: a discussion on the age of the main tectonometamorphic events. <i>Tectonophysics</i> , 1993, 217, 343-346.	2.2	23
66	Stress and palaeostress in the Betic-Rif cordilleras (Miocene to the present). <i>Tectonophysics</i> , 1993, 227, 105-126.	2.2	111
67	The Mecina Extensional System: Its relation with the post-Aquitania piggy-back Basins and the palaeostresses evolution (Betic Cordilleras, Spain). <i>Geo-Marine Letters</i> , 1992, 12, 96-103.	1.1	46
68	Lower Paleozoic extensional tectonics in the limit between the West Asturian-Leonese and Central Iberian Zones of the Variscan Fold-Belt in NW Spain. <i>Geologische Rundschau: Zeitschrift Fur Allgemeine Geologie</i> , 1992, 81, 545-560.	1.3	56
69	Continuous deformation, ductile thrusting and backfolding of cover and basement in the Sierra de Guadarrama, Hercynian orogen of central Spain. <i>Tectonophysics</i> , 1991, 191, 291-309.	2.2	38
70	The movement across the Nevado-Filabride shear zones and the convergence of Europe and Africa (Betic orogen). <i>Tectonophysics</i> , 1991, 191, 420.	2.2	0
71	<sup>40</sup> Ar / <sup>39</sup> Ar geochronology of Alpine tectonism in the Betic Cordilleras (southern Spain). <i>Journal of the Geological Society</i> , 1991, 148, 289-297.	2.1	148
72	Progressive extensional shear structures in a detachment contact in the Western Sierra Nevada (Betic) <i>Tj ETQq0 0 0 rgBT /Overlock</i>	2.2	135

#	ARTICLE	IF	CITATIONS
73	Crustal thickness and images of the lithospheric discontinuities in the Gibraltar arc and surrounding areas. <i>Geophysical Journal International</i> , 0, , .	2.4	5
