#	ARTICLE	IF	CITATIONS
1	Regenerating and repairing degenerative intervertebral discs by regulating the micro/nano environment of degenerative bony endplates based on low-tension mechanics. BMC Musculoskeletal Disorders, 2022, 23, 462.	0.8	2
2	Low energy extracorporeal shock wave therapy combined with low tension traction can better reshape the microenvironment in degenerated intervertebral disc regeneration and repair. Spine Journal, 2021, 21, 160-177.	0.6	11
3	Early degeneration of the meniscus revealed by microbiomechanical alteration in a rabbit anterior cruciate ligament transection model. Journal of Orthopaedic Translation, 2020, 21, 146-152.	1.9	5
4	<i>In vivo</i> live imaging of bone using shortwave infrared fluorescent quantum dots. Nanoscale, 2020, 12, 22022-22029.	2.8	16
5	Microanatomy of the lumbar vertebral bony endplate of rats using scanning electron microscopy. Orthopaedics and Traumatology: Surgery and Research, 2020, 106, 731-734.	0.9	2
6	Stable mechanical environments created by a low-tension traction device is beneficial for the regeneration and repair of degenerated intervertebral discs. Spine Journal, 2020, 20, 1503-1516.	0.6	9
7	Controlled immobilization-traction based on intervertebral stability is conducive to the regeneration or repair of the degenerative disc: an <i>in vivo</i> study on the rat coccygeal model. Spine Journal, 2019, 19, 920-930.	0.6	11
8	Nano and micro biomechanical alterations of annulus fibrosus after <i>in situ</i> immobilization revealed by atomic force microscopy. Journal of Orthopaedic Research, 2019, 37, 232-238.	1.2	13
9	Assessment of changes in the micro-nano environment of intervertebral disc degeneration based on Pfirrmann grade. Spine Journal, 2019, 19, 1242-1253.	0.6	34
10	Intervertebral disc degeneration induced by long-segment <i>in-situ</i> immobilization: a macro, micro, and nanoscale analysis. BMC Musculoskeletal Disorders, 2018, 19, 308.	0.8	8
