#	ARTICLE	IF	CITATIONS
1	Single Conical Nanopores Displaying pH-Tunable Rectifying Characteristics. Manipulating Ionic Transport With Zwitterionic Polymer Brushes. <i>Journal of the American Chemical Society</i> , 2009, 131, 2070-2071.	6.6	341
2	A pH-Tunable Nanofluidic Diode with a Broad Range of Rectifying Properties. <i>ACS Nano</i> , 2009, 3, 603-608.	7.3	309
3	Synthetic Proton-Gated Ion Channels via Single Solid-State Nanochannels Modified with Responsive Polymer Brushes. <i>Nano Letters</i> , 2009, 9, 2788-2793.	4.5	299
4	Biosensing and Supramolecular Bioconjugation in Single Conical Polymer Nanochannels. Facile Incorporation of Biorecognition Elements into Nanoconfined Geometries. <i>Journal of the American Chemical Society</i> , 2008, 130, 16351-16357.	6.6	270
5	Layer-by-Layer Assembly of Polyelectrolytes into Ionic Current Rectifying Solid-State Nanopores: Insights from Theory and Experiment. <i>Journal of the American Chemical Society</i> , 2010, 132, 8338-8348.	6.6	265
6	Ionic Transport Through Single Solid-State Nanopores Controlled with Thermally Nanoactuated Macromolecular Gates. <i>Small</i> , 2009, 5, 1287-1291.	5.2	244
7	Morphological evolution of Au nanowires controlled by Rayleigh instability. <i>Nanotechnology</i> , 2006, 17, 5954-5959.	1.3	240
8	Low energy ion assist during deposition "an effective tool for controlling thin film microstructure. <i>Nuclear Instruments & Methods in Physics Research B</i> , 1997, 127-128, 796-808.	0.6	168
9	Highly-Ordered Supportless Three-Dimensional Nanowire Networks with Tunable Complexity and Interwire Connectivity for Device Integration. <i>Nano Letters</i> , 2011, 11, 2304-2310.	4.5	168
10	Hydrogen Peroxide Sensing with Horseradish Peroxidase-Modified Polymer Single Conical Nanochannels. <i>Analytical Chemistry</i> , 2011, 83, 1673-1680.	3.2	168
11	Sequence-Specific Recognition of DNA Oligomer Using Peptide Nucleic Acid (PNA)-Modified Synthetic Ion Channels: PNA/DNA Hybridization in Nanoconfined Environment. <i>ACS Nano</i> , 2010, 4, 7267-7274.	7.3	161
12	Single Cigar-Shaped Nanopores Functionalized with Amphoteric Amino Acid Chains: Experimental and Theoretical Characterization. <i>ACS Nano</i> , 2012, 6, 3631-3640.	7.3	132
13	Metal Ion Affinity-based Biomolecular Recognition and Conjugation inside Synthetic Polymer Nanopores Modified with Iron-Terpyridine Complexes. <i>Journal of the American Chemical Society</i> , 2011, 133, 17307-17314.	6.6	120
14	Logic Gates Using Nanofluidic Diodes Based on Conical Nanopores Functionalized with Polyprotic Acid Chains. <i>Langmuir</i> , 2009, 25, 11993-11997.	1.6	116
15	Proton-regulated rectified ionic transport through solid-state conical nanopores modified with phosphate-bearing polymer brushes. <i>Chemical Communications</i> , 2010, 46, 1908-1910.	2.2	111
16	Calcium Binding and Ionic Conduction in Single Conical Nanopores with Polyacid Chains: Model and Experiments. <i>ACS Nano</i> , 2012, 6, 9247-9257.	7.3	106
17	Modifying the surface charge of single track-etched conical nanopores in polyimide. <i>Nanotechnology</i> , 2008, 19, 085713.	1.3	102
18	Multilayer Al ₂ O ₃ /TiO ₂ Atomic Layer Deposition coatings for the corrosion protection of stainless steel. <i>Thin Solid Films</i> , 2012, 522, 283-288.	0.8	96

#	ARTICLE	IF	CITATIONS
19	Synthesis of gold nanowires with controlled crystallographic characteristics. Applied Physics A: Materials Science and Processing, 2006, 84, 403-407.	1.1	95
20	Biosensing with Functionalized Single Asymmetric Polymer Nanochannels. Macromolecular Bioscience, 2010, 10, 28-32.	2.1	85
21	Electroless synthesis of nanostructured nickel and nickel-boron tubes and their performance as unsupported ethanol electrooxidation catalysts. Journal of Power Sources, 2013, 222, 243-252.	4.0	82
22	Biomolecular conjugation inside synthetic polymer nanopores via glycoprotein-lectin interactions. Nanoscale, 2011, 3, 1894.	2.8	78
23	Bioconjugation-induced ionic current rectification in aptamer-modified single cylindrical nanopores. Chemical Communications, 2015, 51, 3454-3457.	2.2	78
24	Ion-beam-assisted coatings for corrosion protection studies. Materials Science & Engineering A: Structural Materials: Properties, Microstructure and Processing, 1989, 116, 1-14.	2.6	76
25	Influence of crystallinity on the Rayleigh instability of gold nanowires. Journal Physics D: Applied Physics, 2007, 40, 3767-3770.	1.3	68
26	Growth of thin films with preferential crystallographic orientation by ion bombardment during deposition. Surface and Coatings Technology, 1994, 65, 90-105.	2.2	67
27	Optical Gating of Photosensitive Synthetic Ion Channels. Advanced Functional Materials, 2012, 22, 390-396.	7.8	65
28	Preparation and antibacterial properties of Ag-containing diamond-like carbon films prepared by a combination of magnetron sputtering and plasma source ion implantation. Vacuum, 2013, 89, 179-184.	1.6	64
29	Analytical investigations concerning the wear behaviour of cutting tools used for the machining of compacted graphite iron and grey cast iron. International Journal of Refractory Metals and Hard Materials, 2008, 26, 197-206.	1.7	62
30	On the mechanism of crystal growth orientation of ion beam assisted deposited thin films. Nuclear Instruments & Methods in Physics Research B, 1995, 106, 142-146.	0.6	60
31	5217-5233.	0.6	59
32	A facile route for the preparation of azide-terminated polymers. "Clicking" polyelectrolyte brushes on planar surfaces and nanochannels. Polymer Chemistry, 2010, 1, 183-192.	1.9	59
33	Carbohydrate-Mediated Biomolecular Recognition and Gating of Synthetic Ion Channels. Journal of Physical Chemistry C, 2013, 117, 18234-18242.	1.5	59
34	Ion bombardment during thin film deposition and its influence on mechanical and chemical surface properties. Nuclear Instruments & Methods in Physics Research B, 1991, 59-60, 173-181.	0.6	58
35	Formation of titanium oxide films on titanium and Ti6Al4V by O ₂ -plasma immersion ion implantation. Surface and Coatings Technology, 2000, 132, 111-116.	2.2	56
36	Lithium Ion Recognition with Nanofluidic Diodes through Host-Guest Complexation in Confined Geometries. Analytical Chemistry, 2018, 90, 6820-6826.	3.2	56

#	ARTICLE	IF	CITATIONS
37	Plasma and ion-beam-assisted deposition of multilayers for tribological and corrosion protection. <i>Surface and Coatings Technology</i> , 1993, 60, 561-565.	2.2	55
38	Fabrication of Single Cylindrical Au-Coated Nanopores with Non-Homogeneous Fixed Charge Distribution Exhibiting High Current Rectifications. <i>ACS Applied Materials & Interfaces</i> , 2014, 6, 12486-12494.	4.0	55
39	Ion bombardment effects during deposition of nitride and metal films. <i>Surface and Coatings Technology</i> , 1998, 99, 1-13.	2.2	54
40	Mixed Phase Anatase/rutile Titanium Dioxide Nanotubes for Enhanced Photocatalytic Degradation of Methylene-blue. <i>Nano-Micro Letters</i> , 2011, 3, 236-241.	14.4	53
41	Thermally controlled permeation of ionic molecules through synthetic nanopores functionalized with amine-terminated polymer brushes. <i>Nanotechnology</i> , 2012, 23, 225502.	1.3	53
42	In Situ Derivatization/Solid-Phase Microextraction: Determination of Polar Aromatic Amines. <i>Analytical Chemistry</i> , 2004, 76, 1028-1038.	3.2	52
43	A comparison of the corrosion behaviour and hardness of steel samples (100Cr6) coated with titanium nitride and chromium nitride by different institutions using different deposition techniques. <i>Materials Science & Engineering A: Structural Materials: Properties, Microstructure and Processing</i> , 1991, 140, 625-630.	2.6	51
44	Fabrication and functionalization of single asymmetric nanochannels for electrostatic/hydrophobic association of protein molecules. <i>Nanotechnology</i> , 2008, 19, 485711.	1.3	51
45	Ligand-optimized electroless synthesis of silver nanotubes and their activity in the reduction of 4-nitrophenol. <i>Nanotechnology</i> , 2011, 22, 415602.	1.3	51
46	Low-temperature formation of metastable cubic tantalum nitride by metal condensation under ion irradiation. <i>Journal of Applied Physics</i> , 1995, 77, 6630-6635.	1.1	49
47	Combined in situ infrared and mass spectrometric analysis of high-energy heavy ion induced degradation of polyvinyl polymers. <i>Polymer Chemistry</i> , 2014, 5, 1001-1012.	1.9	49
48	Label-Free Pyrophosphate Recognition with Functionalized Asymmetric Nanopores. <i>Small</i> , 2016, 12, 2014-2021.	5.2	49
49	Highly Efficient Permeation and Separation of Gases with Metal-Organic Frameworks Confined in Polymeric Nanochannels. <i>ACS Applied Materials & Interfaces</i> , 2020, 12, 49992-50001.	4.0	49
50	Degradation of polyimide under irradiation with swift heavy ions. <i>Nuclear Instruments & Methods in Physics Research B</i> , 2005, 236, 456-460.	0.6	47
51	Ionic Transport through Chemically Functionalized Hydrogen Peroxide-Sensitive Asymmetric Nanopores. <i>ACS Applied Materials & Interfaces</i> , 2015, 7, 19541-19545.	4.0	47
52	Microstructural investigations on titanium nitride films formed by medium energy ion beam assisted deposition. <i>Nuclear Instruments & Methods in Physics Research B</i> , 1993, 80-81, 1409-1414.	0.6	45
53	Chemical and mechanical characterization of TiO ₂ /Al ₂ O ₃ atomic layer depositions on AISI 316 L stainless steel. <i>Surface and Coatings Technology</i> , 2012, 211, 84-88.	2.2	45
54	Are coatings produced by ion-beam-assisted deposition superior? A comparison of chemical and mechanical properties of steel coated using different deposition techniques. <i>Surface and Coatings Technology</i> , 1992, 51, 217-221.	2.2	43

#	ARTICLE	IF	CITATIONS
55	Equipment for ion beam assisted deposition. Nuclear Instruments & Methods in Physics Research B, 1987, 21, 570-573.	0.6	42
56	Surface modification and corrosion properties of implanted and DLC coated stainless steel by plasma based ion implantation and deposition. Surface and Coatings Technology, 2014, 256, 23-29.	2.2	42
57	A comparison of IBAD films for wear and corrosion protection with other PVD coatings. Nuclear Instruments & Methods in Physics Research B, 1993, 80-81, 445-454.	0.6	41
58	Free-Standing Networks of Core-Shell Metal and Metal Oxide Nanotubes for Glucose Sensing. ACS Applied Materials & Interfaces, 2017, 9, 771-781.	4.0	41
59	Modification of mechanical and chemical surface properties of metals by plasma immersion ion implantation. Surface and Coatings Technology, 1998, 100-101, 341-352.	2.2	40
60	ATP-modulated ionic transport through synthetic nanochannels. Chemical Communications, 2010, 46, 6690.	2.2	40
61	Corrosion behavior of steel coated with thin film TiN/Ti composites. Journal of Vacuum Science and Technology A: Vacuum, Surfaces and Films, 1993, 11, 451-453.	0.9	38
62	Effects of plasma immersion ion implantation of oxygen on mechanical properties and microstructure of Ti6Al4V. Surface and Coatings Technology, 1998, 103-104, 262-267.	2.2	38
63	Saccharide/glycoprotein recognition inside synthetic ion channels modified with boronic acid. Sensors and Actuators B: Chemical, 2012, 162, 216-222.	4.0	38
64	Label-free histamine detection with nanofluidic diodes through metal ion displacement mechanism. Colloids and Surfaces B: Biointerfaces, 2017, 150, 201-208.	2.5	38
65	Investigation of size effects in the electrical resistivity of single electrochemically fabricated gold nanowires. Physica E: Low-Dimensional Systems and Nanostructures, 2008, 40, 3173-3178.	1.3	37
66	Multiple activation of ion track etched polycarbonate for the electroless synthesis of metal nanotubes. Applied Physics A: Materials Science and Processing, 2011, 105, 847-854.	1.1	37
67	An apparatus for sputter coating the inner walls of tubes. Review of Scientific Instruments, 1996, 67, 318-321.	0.6	36
68	4-(Dimethylamino)pyridine as a Powerful Auxiliary Reagent in the Electroless Synthesis of Gold Nanotubes. Langmuir, 2011, 27, 430-435.	1.6	36
69	Preparation and Properties of Ag-Containing Diamond-Like Carbon Films by Magnetron Plasma Source Ion Implantation. Advances in Materials Science and Engineering, 2012, 2012, 1-5.	1.0	36
70	Hierarchical pipe cactus-like Ni/NiCo-LDH core-shell nanotube networks as a self-supported battery-type electrode for supercapacitors with high volumetric energy density. Journal of Materials Chemistry A, 2022, 10, 12473-12488.	5.2	36
71	Electroless synthesis of platinum and platinum-ruthenium nanotubes and their application in methanol oxidation. Journal of Materials Chemistry, 2011, 21, 6286.	6.7	35
72	Thermal stability of electrodeposited platinum nanowires and morphological transformations at elevated temperatures. Nanotechnology, 2012, 23, 475710.	1.3	35

#	ARTICLE	IF	CITATIONS
73	Stereoselective detection of amino acids with protein-modified single asymmetric nanopores. <i>Electrochimica Acta</i> , 2016, 215, 231-237.	2.6	35
74	3D NiCo-Layered double Hydroxide@Ni nanotube networks as integrated free-standing electrodes for nonenzymatic glucose sensing. <i>Journal of Colloid and Interface Science</i> , 2021, 591, 384-395.	5.0	35
75	Charge-selective transport of organic and protein analytes through synthetic nanochannels. <i>Nanotechnology</i> , 2010, 21, 365701.	1.3	34
76	Long-range superconducting proximity effect in polycrystalline Co nanowires. <i>Applied Physics Letters</i> , 2014, 104, .	1.5	34
77	Temperature dependent properties of silicon containing diamondlike carbon films prepared by plasma source ion implantation. <i>Journal of Applied Physics</i> , 2010, 107, .	1.1	33
78	Nanopore charge inversion and current-voltage curves in mixtures of asymmetric electrolytes. <i>Journal of Membrane Science</i> , 2018, 563, 633-642.	4.1	33
79	Deposition of silicon-containing diamond-like carbon films by plasma-enhanced chemical vapour deposition. <i>Surface and Coatings Technology</i> , 2009, 203, 2747-2750.	2.2	32
80	Transport properties of track-etched membranes having variable effective pore-lengths. <i>Nanotechnology</i> , 2015, 26, 485502.	1.3	32
81	Cesium-Induced Ionic Conduction through a Single Nanofluidic Pore Modified with Calixcrown Moieties. <i>Langmuir</i> , 2017, 33, 9170-9177.	1.6	32
82	A simple and effective method for the accurate extraction of kinetic parameters using differential Tafel plots. <i>Scientific Reports</i> , 2021, 11, 8974.	1.6	32
83	Synergistic effect of adsorption photocatalysis by GO/CeO_2 nanocomposites for photodegradation of doxorubicin. <i>Journal of Applied Physics</i> , 2019, 121, 124301.	3.3	32
84	Ion beam assisted deposition for metal finishing. <i>Nuclear Instruments & Methods in Physics Research B</i> , 1989, 37-38, 682-687.	0.6	31
85	Energy conversion from external fluctuating signals based on asymmetric nanopores. <i>Nano Energy</i> , 2015, 16, 375-382.	8.2	30
86	Electrodeposition and electroless plating of hierarchical metal superstructures composed of 1D nano- and microscale building blocks. <i>Electrochimica Acta</i> , 2016, 202, 47-54.	2.6	30
87	Ionic circuitry with nanofluidic diodes. <i>Soft Matter</i> , 2019, 15, 9682-9689.	1.2	30
88	Characteristic features of an apparatus for plasma immersion ion implantation and physical vapour deposition. <i>Surface and Coatings Technology</i> , 1997, 93, 175-180.	2.2	29
89	Sr/Y separation by supported liquid membranes based on nuclear track micro filters. <i>Radiation Measurements</i> , 2003, 36, 761-766.	0.7	29
90	Template-Free Electroless Plating of Gold Nanowires: Direct Surface Functionalization with Shape-Selective Nanostructures for Electrochemical Applications. <i>ACS Applied Materials & Interfaces</i> , 2017, 9, 31142-31152.	4.0	29

#	ARTICLE	IF	CITATIONS
91	Characterization of Ti-6Al-4V modified by nitrogen plasma immersion ion implantation. Surface and Coatings Technology, 1997, 93, 305-308.	2.2	28
92	Semiconductor processing by plasma immersion ion implantation. Materials Science & Engineering A: Structural Materials: Properties, Microstructure and Processing, 1998, 253, 258-268.	2.6	28
93	Diameter dependent failure current density of gold nanowires. Journal Physics D: Applied Physics, 2009, 42, 185403.	1.3	28
94	Template-based synthesis of metallic Pd nanotubes by electroless deposition and their use as catalysts in the 4-nitrophenol model reaction. Green Chemistry, 2016, 18, 558-564.	4.6	28
95	Dielectric constant, AC conductivity and impedance spectroscopy of zinc-containing diamond-like carbon film UV photodetector. Journal of Alloys and Compounds, 2018, 758, 194-205.	2.8	28
96	Ion bombardment effects in conducting polymers. Nuclear Instruments & Methods in Physics Research B, 1994, 91, 473-477.	0.6	27
97	Cubic nitrides of the sixth group of transition metals formed by nitrogen ion irradiation during metal condensation. Surface and Coatings Technology, 1996, 84, 425-428.	2.2	27
98	The influence of boron ion implantation on hydrogen blister formation in n-type silicon. Journal of Applied Physics, 1999, 86, 4176-4183.	1.1	27
99	Correlations between process parameters and film properties of diamond-like carbon films formed by hydrocarbon plasma immersion ion implantation. Surface and Coatings Technology, 2009, 203, 2721-2726.	2.2	27
100	On-line and post irradiation analysis of swift heavy ion induced modification of PMMA (polymethyl-methacrylate). Nuclear Instruments & Methods in Physics Research B, 2014, 326, 135-139.	0.6	27
101	ALLIGATOR [®] An apparatus for ion beam assisted deposition with a broad beam ion source. Review of Scientific Instruments, 1992, 63, 2411-2413.	0.6	26
102	Structural investigations of chromium nitride films formed by ion beam-assisted deposition. Surface and Coatings Technology, 1998, 108-109, 303-307.	2.2	26
103	Fabrication of porous rhodium nanotube catalysts by electroless plating. Journal of Materials Chemistry, 2012, 22, 12784.	6.7	26
104	Polymer activation by reducing agent absorption as a flexible tool for the creation of metal films and nanostructures by electroless plating. Surface and Coatings Technology, 2014, 242, 100-108.	2.2	26
105	Electroless decoration of macroscale foam with nickel nano-spikes: A scalable route toward efficient catalyst electrodes. Electrochemistry Communications, 2016, 65, 39-43.	2.3	26
106	The influence of ion irradiation during film growth on the chemical stability of film/substrate systems. Surface and Coatings Technology, 1996, 80, 35-48.	2.2	25
107	Information processing with a single multifunctional nanofluidic diode. Applied Physics Letters, 2012, 101, .	1.5	25
108	DLC coating of interior surfaces of steel tubes by low energy plasma source ion implantation and deposition. Applied Surface Science, 2014, 310, 262-265.	3.1	25

#	ARTICLE	IF	CITATIONS
109	Plasma immersion ion implantation for metallurgical and semiconductor research and development. Nuclear Instruments & Methods in Physics Research B, 1996, 120, 270-281.	0.6	24
110	Chemical character of BC _x N _y layers grown by CVD with trimethylamine borane. X-Ray Spectrometry, 2009, 38, 68-73.	0.9	24
111	Logic Functions with Stimuli-Responsive Single Nanopores. ChemElectroChem, 2014, 1, 698-705.	1.7	24
112	Preparation of Ag-containing diamond-like carbon films on the interior surface of tubes by a combined method of plasma source ion implantation and DC sputtering. Applied Surface Science, 2014, 310, 257-261.	3.1	24
113	NiCo nanotubes plated on Pd seeds as a designed magnetically recollectable catalyst with high noble metal utilisation. RSC Advances, 2016, 6, 70033-70039.	1.7	24
114	Hybrid Circuits with Nanofluidic Diodes and Load Capacitors. Physical Review Applied, 2017, 7, .	1.5	24
115	Stress and adhesion of chromium and boron films deposited under ion bombardment. Nuclear Instruments & Methods in Physics Research B, 1991, 59-60, 254-258.	0.6	23
116	Heteroepitaxial growth of 3C-SiC on (100) silicon by C60 and Si molecular beam epitaxy. Materials Science & Engineering A: Structural Materials: Properties, Microstructure and Processing, 2000, 289, 255-264.	2.6	23
117	Gross alpha determination in drinking water using a highly specific resin and LSC. Applied Radiation and Isotopes, 2004, 61, 339-344.	0.7	23
118	Metal Nanotubes and Nanowires with Rhombohedral Cross-Section Electrolessly Deposited in Mica Templates. Langmuir, 2014, 30, 10878-10885.	1.6	23
119	Microporosity and adhesion of ion bombarded thin silicon surface films. Nuclear Instruments & Methods in Physics Research B, 1988, 32, 104-110.	0.6	22
120	Ion-beam sputter coating of tantalum tube inner walls for protection against hydrogen embrittlement. Surface and Coatings Technology, 1996, 84, 434-438.	2.2	22
121	Analysis of polynitrophenols and hexyl by liquid chromatography-mass spectrometry using atmospheric pressure ionisation methods and a volatile ion-pairing reagent. Journal of Chromatography A, 2002, 943, 47-54.	1.8	22
122	Depletion solid-phase microextraction for the evaluation of fiber-sample partition coefficients of pesticides. Journal of Chromatography A, 2006, 1102, 51-59.	1.8	22
123	Effect of etching conditions on pore shape in etched ion-track polycarbonate membranes. Radiation Measurements, 2009, 44, 779-782.	0.7	22
124	Silicatein conjugation inside nanoconfined geometries through immobilized NTA-Ni(ii) chelates. Chemical Communications, 2013, 49, 2210.	2.2	22
125	Zinc ion driven ionic conduction through single asymmetric nanochannels functionalized with nanocomposites. Electrochimica Acta, 2020, 337, 135810.	2.6	22
126	An apparatus for in-situ or sequential plasma immersion ion beam treatment in combination with r.f. sputter deposition or triode d.c. sputter deposition. Surface and Coatings Technology, 1999, 120-121, 343-346.	2.2	21

#	ARTICLE	IF	CITATIONS
127	Nernst-Planck model of photo-triggered, <i>in situ</i> tunable ionic transport through nanopores functionalized with ϵ -lysine chains. <i>Journal of Chemical Physics</i> , 2013, 138, 034709.	1.2	21
128	Green plating of high aspect ratio gold nanotubes and their morphology-dependent performance in enzyme-free peroxide sensing. <i>RSC Advances</i> , 2014, 4, 24504.	1.7	21
129	A multipurpose implanter with various target chambers for basic studies on the influence of ion bombardment on material properties. <i>Nuclear Instruments & Methods in Physics Research B</i> , 1992, 68, 402-407.	0.6	20
130	Lateral implantation dose measurements of plasma immersion ion implanted non-planar samples. <i>Nuclear Instruments & Methods in Physics Research B</i> , 1996, 112, 255-258.	0.6	20
131	First results studying the transmutation of ^{129}I , ^{237}Np , ^{238}Pu , and ^{239}Pu in the irradiation of an extended natU/Pb-assembly with 2.52 GeV deuterons. <i>Journal of Radioanalytical and Nuclear Chemistry</i> , 2009, 279, 567-584.	0.7	20
132	Segmented All-Platinum Nanowires with Controlled Morphology through Manipulation of the Local Electrolyte Distribution in Fluidic Nanochannels during Electrodeposition. <i>Journal of Physical Chemistry C</i> , 2010, 114, 22502-22507.	1.5	20
