Version: 2024-04-09

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

21 papers	179 citations	8 h-index	13 g-index
22 ext. papers	228 ext. citations	1.7 avg, IF	2.81 L-index

#	Paper	IF	Citations
21	Species of the <i>Colletotrichum acutatum</i> complex associated with anthracnose diseases of fruit in Brazil. <i>Fungal Biology</i> , 2016 , 120, 547-561	2.8	52
20	Phylogeny and variability of <i>Colletotrichum truncatum</i> associated with soybean anthracnose in Brazil. <i>Journal of Applied Microbiology</i> , 2017 , 122, 402-415	4.7	22
19	First Report of <i>Colletotrichum fructicola</i> Causing Anthracnose in Cassava (<i>Manihot esculenta</i>) in Brazil. <i>Plant Disease</i> , 2016 , 100, 857	1.5	16
18	Genetic structure of <i>Fusarium oxysporum</i> f. sp. <i>cubense</i> in different regions from Brazil. <i>Plant Pathology</i> , 2015 , 64, 137-146	2.8	15
17	Genetic Structure of the Population of <i>Alternaria solani</i> in Brazil. <i>Journal of Phytopathology</i> , 2011 , 159, 233-240	1.8	12
16	Edible coatings in post-harvest papaya: impact on physical-chemical and sensory characteristics. <i>Journal of Food Science and Technology</i> , 2020 , 57, 274-281	3.3	11
15	First Report of <i>Colletotrichum tropicale</i> Causing Anthracnose on the Wild Cassava Species <i>Manihot dichotoma</i> and <i>M. epruinosa</i> in Brazil. <i>Plant Disease</i> , 2016 , 100, 2171	1.5	9
14	Survey of fungi associated with cassava root rot from different producing regions in Brazil. <i>Scientia Agricola</i> , 2017 , 74, 60-67	2.5	8
13	Identification of Botryosphaeriaceae species that cause styler-end rot of guavas and characterisation of the disease monocyclus. <i>European Journal of Plant Pathology</i> , 2016 , 144, 271-287	2.1	7
12	Phylogenetic placement of the genus <i>Anhellia</i> and the description of <i>A. nectandrae</i> sp. nov. <i>Mycologia</i> , 2012 , 104, 1291-8	2.4	6
11	Estimation of genetic structure of a <i>Mycosphaerella musicola</i> population using inter-simple sequence repeat markers. <i>Genetics and Molecular Research</i> , 2015 , 14, 8046-57	1.2	5
10	Development of a thematic collection of <i>Musa</i> spp accessions using SCAR markers for preventive breeding against <i>Fusarium oxysporum</i> f. sp. <i>cubense</i> tropical race 4. <i>Genetics and Molecular Research</i> , 2016 , 15, 15017765	1.2	5
9	First Report of Anthracnose Caused by <i>Colletotrichum theobromicola</i> on Barbados Cherry (<i>Malpighia emarginata</i>) in Brazil. <i>Plant Disease</i> , 2014 , 98, 1272	1.5	5
8	Differentiation of lineages within <i>Colletotrichum gloeosporioides</i> s.l. associated with cassava anthracnose disease by BOX- and ERIC-PCRs. <i>Journal of Phytopathology</i> , 2019 , 167, 218-229	1.8	2
7	First Report of Black Sigatoka of Banana Caused by <i>Mycosphaerella fijiensis</i> in Bahia, Brazil. <i>Plant Disease</i> , 2018 , PDIS12171998PDN	1.5	2
6	Variation in Aggressiveness Components in the <i>Hemileia vastatrix</i> Population in Brazil. <i>Journal of Phytopathology</i> , 2017 , 165, 174-188	1.8	1
5	Improvement of the specific detection of <i>Xanthomonas phaseoli</i> pv. <i>manihotis</i> based on the pthB gene. <i>Acta Scientiarum - Agronomy</i> , 2019 , 41, e42708	0.6	1

4	First report of <i>Phytophthora melonis</i> causing cassava wilt and root rot in Bahia State, Brazil. <i>Summa Phytopathologica</i> , 2016 , 42, 107-107	0.4	o
3	Biocontrole da antracnose em frutos de mamoeiro por bactérias epifíticas formadoras de biofilme. <i>Summa Phytopathologica</i> , 2021 , 47, 45-53	0.4	o
2	Primeiro relato da ferrugem (<i>Olivea tectonae</i>) em plantas de teca no estado da Bahia. <i>Summa Phytopathologica</i> , 2020 , 46, 274-275	0.4	
1	First Report of Sudden Death of Clove Trees Caused by <i>Cytospora eugeniae</i> in Brazil. <i>Plant Disease</i> , 2020 , 104, 1868	1.5
