| #  | ARTICLE   | IF  | CITATIONS |
|----|---|-----|-----------|
| 1  | Maternal caffeine consumption and pregnancy outcomes: a narrative review with implications for advice to mothers and mothers-to-be. <i>BMJ Evidence-Based Medicine</i> , 2021, 26, 114-115.   | 1.7 | 41        |
| 2  | Adolescent caffeine consumption and aggressive behavior: A longitudinal assessment. <i>Substance Abuse</i> , 2021, 42, 1-10.  | 1.1 | 4         |
| 3  | Generational lifespan convergence and the longevity revolution: Are people truly living longer?. <i>European Journal of Clinical Investigation</i> , 2020, 50, e13185.  | 1.7 | 0         |
| 4  | Disclosing conflict of interest does not mitigate healthcare bias and harm: It is time to sever industry ties. <i>European Journal of Clinical Investigation</i> , 2020, 50, e13344.  | 1.7 | 0         |
| 5  | Pirate open access as electronic civil disobedience: Is it ethical to breach the paywalls of monetized academic publishing?. <i>Journal of the Association for Information Science and Technology</i> , 2020, 71, 1500-1504.            | 1.5 | 7         |
| 6  | Can public financing of the private sector defeat antimicrobial resistance?. <i>Journal of Public Health</i> , 2019, 41, 422-426.   | 1.0 | 5         |
| 7  | Adolescent habitual caffeine consumption and hemodynamic reactivity during rest, psychosocial stress, and recovery. <i>Journal of Psychosomatic Research</i> , 2018, 110, 16-23.  | 1.2 | 9         |
| 8  | Does early exposure to caffeine promote smoking and alcohol use behavior? A prospective analysis of middle school students. <i>Addiction</i> , 2018, 113, 1706-1713.  | 1.7 | 18        |
| 9  | Sleep restriction undermines cardiovascular adaptation during stress, contingent on emotional stability. <i>Biological Psychology</i> , 2018, 132, 125-132.   | 1.1 | 9         |
| 10 | The Alleged Health-Protective Effects of Coffee. <i>JAMA Internal Medicine</i> , 2018, 178, 1723.   | 2.6 | 0         |
| 11 | Are coffee's alleged health protective effects real or artifact? The enduring disjunction between relevant experimental and observational evidence. <i>Journal of Psychopharmacology</i> , 2018, 32, 850-854.                           | 2.0 | 5         |
| 12 | Hypertension control and cardiovascular disease. <i>Lancet</i> , 2017, 389, 154.  | 6.3 | 10        |
| 13 | Stress among Parents of Children with and without Autism Spectrum Disorder: A Comparison Involving Physiological Indicators and Parent Self-Reports. <i>Journal of Developmental and Physical Disabilities</i> , 2017, 29, 567-586.     | 1.0 | 101       |
| 14 | Free to publish, free to read, or both? Cost, equality of access, and integrity in science publishing. <i>Journal of the Association for Information Science and Technology</i> , 2017, 68, 1584-1589.                                  | 1.5 | 7         |
| 15 | Reviving Cochrane's contribution to evidence-based medicine: bridging the gap between evidence of efficacy and evidence of effectiveness and cost-effectiveness. <i>European Journal of Clinical Investigation</i> , 2017, 47, 617-621. | 1.7 | 8         |
| 16 | The Charms and Harms of Personalized Medicine11A shorter version of the text of this chapter was published in the <i>European Journal of Epidemiology</i> (James, 2014).. , 2016, , 245-281.  |     | 0         |
| 17 | Review: higher caffeine intake during pregnancy increases risk of low birth weight. <i>Evidence-based Nursing</i> , 2015, 18, 111-111.  | 0.1 | 1         |
| 18 | A Gender-Specific Analysis of Adolescent Dietary Caffeine, Alcohol Consumption, Anger, and Violent Behavior. <i>Substance Use and Misuse</i> , 2015, 50, 257-267.   | 0.7 | 15        |

| #  | ARTICLE  | IF  | CITATIONS |
|----|--|-----|-----------|
| 19 | Parenting Stress, Salivary Biomarkers, and Ambulatory Blood Pressure: A Comparison Between Mothers and Fathers of Children with Autism Spectrum Disorders. <i>Journal of Autism and Developmental Disorders</i> , 2015, 45, 1084-1095. | 1.7 | 72        |
| 20 | Salivary $\alpha$ -Amylase Reactivity to Laboratory Social Stress With and Without Acute Sleep Restriction. <i>Journal of Psychophysiology</i> , 2015, 29, 55-63.  | 0.3 | 9         |
| 21 | Caffeine and Cognitive Performance: In Search of Balance in Scientific Opinion and Debate. <i>Journal of Caffeine Research</i> , 2014, 4, 107-108.   | 1.0 | 1         |
| 22 | Parenting stress, salivary biomarkers, and ambulatory blood pressure in mothers of children with Autism Spectrum Disorders. <i>Research in Autism Spectrum Disorders</i> , 2014, 8, 99-110.  | 0.8 | 23        |
| 23 | Personalised medicine, disease prevention, and the inverse care law: more harm than benefit?. <i>European Journal of Epidemiology</i> , 2014, 29, 383-390.   | 2.5 | 20        |
| 24 | Caffeine and cognitive performance: Persistent methodological challenges in caffeine research. <i>Pharmacology Biochemistry and Behavior</i> , 2014, 124, 117-122.   | 1.3 | 32        |
| 25 | Dietary caffeine: "unnatural" exposure requiring precaution?. <i>Journal of Substance Use</i> , 2014, 19, 394-397.   | 0.3 | 1         |
| 26 | Adolescent Caffeine Consumption and Self-Reported Violence and Conduct Disorder. <i>Journal of Youth and Adolescence</i> , 2013, 42, 1053-1062.  | 1.9 | 46        |
| 27 | An experimental test of blunting using sleep-restriction as an acute stressor in Type D and non-Type D women. <i>International Journal of Psychophysiology</i> , 2013, 90, 37-43.  | 0.5 | 23        |
| 28 | Coffee and Mortality: Urgent Need for Clinical Trials to Assess Putative Benefits and Harms. <i>Journal of Caffeine Research</i> , 2012, 2, 53-54.   | 1.0 | 5         |
| 29 | Death By Caffeine: How Many Caffeine-Related Fatalities and Near-Misses Must There Be Before We Regulate?. <i>Journal of Caffeine Research</i> , 2012, 2, 149-152.   | 1.0 | 11        |
| 30 | Behavioral Pharmacology of Caffeine and Withdrawal Reversal. <i>Journal of Caffeine Research</i> , 2012, 2, 3-14.  | 1.0 | 0         |
| 31 | Stress reactivity and the Hemodynamic Profile "Compensation Deficit (HP"CD) Model of blood pressure regulation. <i>Biological Psychology</i> , 2012, 90, 161-170.  | 1.1 | 29        |
| 32 | Caffeine Psychopharmacology and Effects on Cognitive Performance and Mood. , 2012, , 270-301.  |     | 3         |
| 33 | Caffeine and Physical Performance. <i>Journal of Caffeine Research</i> , 2011, 1, 145-151.   | 1.0 | 4         |
| 34 | Caffeine, Alcohol, and Youth: A Toxic Mix. <i>Journal of Caffeine Research</i> , 2011, 1, 15-21.   | 1.0 | 14        |
| 35 | Adolescent Caffeine Consumption, Daytime Sleepiness, and Anger. <i>Journal of Caffeine Research</i> , 2011, 1, 75-82.  | 1.0 | 37        |
| 36 | Adolescent substance use, sleep, and academic achievement: Evidence of harm due to caffeine. <i>Journal of Adolescence</i> , 2011, 34, 665-673.  | 1.2 | 103       |

| #  | ARTICLE  | IF  | CITATIONS |
|----|--|-----|-----------|
| 37 | Individual differences in adaptation of cardiovascular responses to stress. <i>Biological Psychology</i> , 2011, 86, 129-136.  | 1.1 | 76        |
| 38 | Type D personality and hemodynamic reactivity to laboratory stress in women. <i>International Journal of Psychophysiology</i> , 2011, 80, 96-102.                      | 0.5 | 44        |
| 39 | Caffeine, sleep and wakefulness: implications of new understanding about withdrawal reversal. <i>Human Psychopharmacology</i> , 2007, 22, 549-558.                     | 0.7 | 45        |
| 40 | Hemodynamic profile, compensation deficit, and ambulatory blood pressure. <i>Psychophysiology</i> , 2006, 43, 46-56.   | 1.2 | 23        |
| 41 | Caffeine-induced enhancement of cognitive performance: Confounding due to reversal of withdrawal effects. <i>Australian Journal of Psychology</i> , 2005, 57, 197-200. | 1.4 | 7         |
| 42 | Effects of caffeine on performance and mood: withdrawal reversal is the most plausible explanation. <i>Psychopharmacology</i> , 2005, 182, 1-8.                        | 1.5 | 185       |
| 43 | Association Between Hemodynamic Profile During Laboratory Stress and Ambulatory Pulse Pressure. <i>Journal of Behavioral Medicine</i> , 2005, 28, 573-579.             | 1.1 | 10        |
| 44 | Dietary Caffeine, Performance and Mood: Enhancing and Restorative Effects after Controlling for Withdrawal Reversal. <i>Neuropsychobiology</i> , 2005, 52, 1-10.       | 0.9 | 35        |
| 45 | Hemodynamic effects of dietary caffeine, sleep restriction, and laboratory stress. <i>Psychophysiology</i> , 2004, 41, 914-923.  | 1.2 | 47        |
| 46 | Effects of dietary caffeine on mood when rested and sleep restricted. <i>Human Psychopharmacology</i> , 2004, 19, 333-341.   | 0.7 | 56        |
| 47 | Critical Review of Dietary Caffeine and Blood Pressure: A Relationship That Should Be Taken More Seriously. <i>Psychosomatic Medicine</i> , 2004, 66, 63-71.           | 1.3 | 174       |
| 48 | “Third-party” threats to research integrity in public-private partnerships. <i>Addiction</i> , 2002, 97, 1251-1255.  | 1.7 | 15        |
| 49 | A new model of individual differences in hemodynamic profile and blood pressure reactivity. <i>Psychophysiology</i> , 2002, 39, 64-72.                                 | 1.2 | 54        |
| 50 | Influence of attention focus and trait anxiety on tolerance of acute pain. <i>British Journal of Health Psychology</i> , 2002, 7, 149-162.                             | 1.9 | 74        |
| 51 | Hemodynamic profile of stress-induced anticipation and recovery. <i>International Journal of Psychophysiology</i> , 1999, 34, 147-162.                                 | 0.5 | 80        |
| 52 | Acute and Chronic Effects of Caffeine on Performance, Mood, Headache, and Sleep. <i>Neuropsychobiology</i> , 1998, 38, 32-41.  | 0.9 | 130       |
| 53 | Is habitual caffeine use a preventable cardiovascular risk factor?. <i>Lancet, The</i> , 1997, 349, 279-281.   | 6.3 | 86        |
| 54 | Caffeine, psychomotor performance and commercial interests: a reply to Smith. <i>Addiction</i> , 1995, 90, 1262-1265.  | 1.7 | 2         |

| #  | ARTICLE  | IF  | CITATIONS |
|----|--|-----|-----------|
| 55 | Sleep hygiene practices and sleep duration in rotating-shift shiftworkers. <i>Work and Stress</i> , 1995, 9, 262-271.  | 2.8 | 11        |
| 56 | Chronic Effects of Habitual Caffeine Consumption on Laboratory and Ambulatory Blood Pressure Levels. <i>European Journal of Cardiovascular Prevention and Rehabilitation</i> , 1994, 1, 159-164.   | 3.1 | 42        |
| 57 | Psychophysiological effects of habitual caffeine consumption. <i>International Journal of Behavioral Medicine</i> , 1994, 1, 247-263.  | 0.8 | 16        |
| 58 | Caffeine, health and commercial interests. <i>Addiction</i> , 1994, 89, 1595-1599.   | 1.7 | 21        |
| 59 | Does Caffeine Enhance or Merely Restore Degraded Psychomotor Performance?. <i>Neuropsychobiology</i> , 1994, 30, 124-125.  | 0.9 | 98        |
| 60 | Pressor effects of caffeine and cigarette smoking. <i>British Journal of Clinical Psychology</i> , 1991, 30, 276-278.  | 1.7 | 27        |
| 61 | Biochemical validation of self-reported caffeine consumption during caffeine fading. <i>Journal of Behavioral Medicine</i> , 1988, 11, 15-30.  | 1.1 | 41        |
| 62 | Risk and Resilience Pathways, Community Adversity, Decision Making, and Alcohol Use among Appalachian Adolescents: Protocol for the Longitudinal Young Mountaineer Health Study Cohort (Preprint). <i>JMIR Research Protocols</i> , 0, , . | 0.5 | 0         |
