

Natalia Restrepo-Coupe

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/9058279/natalia-restrepo-coupe-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
66	Understanding water and energy fluxes in the Amazonia: Lessons from an observation-model intercomparison. <i>Global Change Biology</i> , 2021 , 27, 1802-1819	11.4	0
65	Improvement of modeling plant responses to low soil moisture in JULESv4.9 and evaluation against flux tower measurements. <i>Geoscientific Model Development</i> , 2021 , 14, 3269-3294	6.3	6
64	Accurate Simulation of Both Sensitivity and Variability for Amazonian Photosynthesis: Is It Too Much to Ask?. <i>Journal of Advances in Modeling Earth Systems</i> , 2021 , 13, e2021MS002555	7.1	0
63	Empirical evidence for resilience of tropical forest photosynthesis in a warmer world. <i>Nature Plants</i> , 2020 , 6, 1225-1230	11.5	22
62	The FLUXNET2015 dataset and the ONEFlux processing pipeline for eddy covariance data. <i>Scientific Data</i> , 2020 , 7, 225	8.2	256
61	Surface conductance for evapotranspiration of tropical forests: Calculations, variations, and controls. <i>Agricultural and Forest Meteorology</i> , 2019 , 275, 317-328	5.8	15
60	Hydraulic traits explain differential responses of Amazonian forests to the 2015 El Niño-induced drought. <i>New Phytologist</i> , 2019 , 223, 1253-1266	9.8	29
59	. <i>IEEE Journal of Selected Topics in Applied Earth Observations and Remote Sensing</i> , 2019 , 12, 2236-2243	4.7	2
58	Seasonal and drought-related changes in leaf area profiles depend on height and light environment in an Amazon forest. <i>New Phytologist</i> , 2019 , 222, 1284-1297	9.8	44
57	Estimation of latent heat flux using satellite land surface temperature and a variational data assimilation scheme over a eucalypt forest savanna in Northern Australia. <i>Agricultural and Forest Meteorology</i> , 2019 , 268, 341-353	5.8	6
56	Multi-Scale Phenology of Temperate Grasslands: Improving Monitoring and Management With Near-Surface Phenocams. <i>Frontiers in Environmental Science</i> , 2019 , 7,	4.8	12
55	Cryptic phenology in plants: Case studies, implications, and recommendations. <i>Global Change Biology</i> , 2019 , 25, 3591-3608	11.4	8
54	Age-dependent leaf physiology and consequences for crown-scale carbon uptake during the dry season in an Amazon evergreen forest. <i>New Phytologist</i> , 2018 , 219, 870-884	9.8	43
53	Comparison of the performance of latent heat flux products over southern hemisphere forest ecosystems: estimating latent heat flux error structure using in situ measurements and the triple collocation method. <i>International Journal of Remote Sensing</i> , 2018 , 39, 6300-6315	3.1	1
52	Enhanced canopy growth precedes senescence in 2005 and 2010 Amazonian droughts. <i>Remote Sensing of Environment</i> , 2018 , 211, 26-37	13.2	22
51	Biological processes dominate seasonality of remotely sensed canopy greenness in an Amazon evergreen forest. <i>New Phytologist</i> , 2018 , 217, 1507-1520	9.8	42
50	Carbon, water and energy exchange dynamics of a young pine plantation forest during the initial fourteen years of growth. <i>Forest Ecology and Management</i> , 2018 , 410, 12-26	3.9	13

49	Carbon exchange in an Amazon forest: from hours to years. <i>Biogeosciences</i> , 2018 , 15, 4833-4848	4.6	11
48	Ecosystem heterogeneity and diversity mitigate Amazon forest resilience to frequent extreme droughts. <i>New Phytologist</i> , 2018 , 219, 914-931	9.8	36
47	Optimum air temperature for tropical forest photosynthesis: mechanisms involved and implications for climate warming. <i>Environmental Research Letters</i> , 2017 , 12, 054022	6.2	35
46	Simulation of the Unexpected Photosynthetic Seasonality in Amazonian Evergreen Forests by Using an Improved Diffuse Fraction-Based Light Use Efficiency Model. <i>Journal of Geophysical Research G: Biogeosciences</i> , 2017 , 122, 3014-3030	3.7	8
45	Estimation of latent heat flux over savannah vegetation across the North Australian Tropical Transect from multiple sensors and global meteorological data. <i>Agricultural and Forest Meteorology</i> , 2017 , 232, 689-703	5.8	15
44	Partitioning controls on Amazon forest photosynthesis between environmental and biotic factors at hourly to interannual timescales. <i>Global Change Biology</i> , 2017 , 23, 1240-1257	11.4	66
43	Do dynamic global vegetation models capture the seasonality of carbon fluxes in the Amazon basin? A data-model intercomparison. <i>Global Change Biology</i> , 2017 , 23, 191-208	11.4	77
42	Ecosystem Atmosphere Exchanges of CO ₂ in Dense and Open Terra Firme Rainforests in Brazilian Amazonia. <i>Ecological Studies</i> , 2016 , 149-169	1.1	3
41	Landsat and GRACE observations of arid wetland dynamics in a dryland river system under multi-decadal hydroclimatic extremes. <i>Journal of Hydrology</i> , 2016 , 543, 818-831	6	15
40	Soil moisture controls on phenology and productivity in a semi-arid critical zone. <i>Science of the Total Environment</i> , 2016 , 568, 1227-1237	10.2	56
39	Dry-season greening of Amazon forests. <i>Nature</i> , 2016 , 531, E4-5	50.4	94
38	Leaf development and demography explain photosynthetic seasonality in Amazon evergreen forests. <i>Science</i> , 2016 , 351, 972-6	33.3	252
37	Reviews and syntheses: Australian vegetation phenology: new insights from satellite remote sensing and digital repeat photography. <i>Biogeosciences</i> , 2016 , 13, 5085-5102	4.6	55
36	MODIS vegetation products as proxies of photosynthetic potential along a gradient of meteorologically and biologically driven ecosystem productivity. <i>Biogeosciences</i> , 2016 , 13, 5587-5608	4.6	24
35	An introduction to the Australian and New Zealand flux tower network OzFlux. <i>Biogeosciences</i> , 2016 , 13, 5895-5916	4.6	119
34	Spatial partitioning and temporal evolution of Australia's total water storage under extreme hydroclimatic impacts. <i>Remote Sensing of Environment</i> , 2016 , 183, 43-52	13.2	35
33	The importance of interacting climate modes on Australia's contribution to global carbon cycle extremes. <i>Scientific Reports</i> , 2016 , 6, 23113	4.9	50
32	Productivity and evapotranspiration of two contrasting semiarid ecosystems following the 2011 global carbon land sink anomaly. <i>Agricultural and Forest Meteorology</i> , 2016 , 220, 151-159	5.8	49

31	Passive microwave and optical index approaches for estimating surface conductance and evapotranspiration in forest ecosystems. <i>Agricultural and Forest Meteorology</i> , 2015 , 213, 126-137	5.8	20
30	A spatially explicit land surface phenology data product for science, monitoring and natural resources management applications. <i>Environmental Modelling and Software</i> , 2015 , 64, 191-204	5.2	55
29	Fires increase Amazon forest productivity through increases in diffuse radiation. <i>Geophysical Research Letters</i> , 2015 , 42, 4654-4662	4.9	65
28	Parameterization of an ecosystem light-use-efficiency model for predicting savanna GPP using MODIS EVI. <i>Remote Sensing of Environment</i> , 2014 , 154, 253-271	13.2	45
27	Mechanisms of water supply and vegetation demand govern the seasonality and magnitude of evapotranspiration in Amazonia and Cerrado. <i>Agricultural and Forest Meteorology</i> , 2014 , 191, 33-50	5.8	81
26	Behavior of multitemporal and multisensor passive microwave indices in Southern Hemisphere ecosystems. <i>Journal of Geophysical Research G: Biogeosciences</i> , 2014 , 119, 2231-2244	3.7	7
25	Land surface phenological response to decadal climate variability across Australia using satellite remote sensing. <i>Biogeosciences</i> , 2014 , 11, 5181-5198	4.6	70
24	Carbon and greenhouse gas balances in an age sequence of temperate pine plantations. <i>Biogeosciences</i> , 2014 , 11, 5399-5410	4.6	14
23	Spatial patterns and temporal dynamics in savanna vegetation phenology across the North Australian Tropical Transect. <i>Remote Sensing of Environment</i> , 2013 , 139, 97-115	13.2	141
22	Surface ecophysiological behavior across vegetation and moisture gradients in tropical South America. <i>Agricultural and Forest Meteorology</i> , 2013 , 182-183, 177-188	5.8	27
21	What drives the seasonality of photosynthesis across the Amazon basin? A cross-site analysis of eddy flux tower measurements from the Brasil flux network. <i>Agricultural and Forest Meteorology</i> , 2013 , 182-183, 128-144	5.8	205
20	Overview of the Large-Scale Biosphere-Atmosphere Experiment in Amazonia Data Model Intercomparison Project (LBA-DMIP). <i>Agricultural and Forest Meteorology</i> , 2013 , 182-183, 111-127	5.8	49
19	Inter-annual variability of carbon and water fluxes in Amazonian forest, Cerrado and pasture sites, as simulated by terrestrial biosphere models. <i>Agricultural and Forest Meteorology</i> , 2013 , 182-183, 145-155	5.8	27
18	Hyperspectral assessments of condition and species composition of Australian grasslands 2013 ,		1
17	Simulating forest productivity along a neotropical elevational transect: temperature variation and carbon use efficiency. <i>Global Change Biology</i> , 2012 , 18, 2882-98	11.4	30
16	Natural and drought scenarios in an east central Amazon forest: Fidelity of the Community Land Model 3.5 with three biogeochemical models. <i>Journal of Geophysical Research</i> , 2011 , 116,		23
15	Variations in Amazon forest productivity correlated with foliar nutrients and modelled rates of photosynthetic carbon supply. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2011 , 366, 3316-29	5.8	61
14	Robust dynamics of Amazon dieback to climate change with perturbed ecosystem model parameters. <i>Global Change Biology</i> , 2010 , 16, 2476	11.4	37

13	Relative contributions of soil, foliar, and woody tissue respiration to total ecosystem respiration in four pine forests of different ages. <i>Journal of Geophysical Research</i> , 2010 , 115,		18
12	Do plant species influence soil CO ₂ and N ₂ O fluxes in a diverse tropical forest?. <i>Journal of Geophysical Research</i> , 2010 , 115,		19
11	Patterns of water and heat flux across a biome gradient from tropical forest to savanna in Brazil. <i>Journal of Geophysical Research</i> , 2009 , 114,		179
10	Multiple site tower flux and remote sensing comparisons of tropical forest dynamics in Monsoon Asia. <i>Agricultural and Forest Meteorology</i> , 2008 , 148, 748-760	5.8	72
9	Resolving systematic errors in estimates of net ecosystem exchange of CO ₂ and ecosystem respiration in a tropical forest biome. <i>Agricultural and Forest Meteorology</i> , 2008 , 148, 1266-1279	5.8	43
8	Potential Natural Environments Based on Pedological Properties in the Coastal Conurbation of Subtropical Southeast Florida. <i>Journal of Coastal Research</i> , 2007 , 232, 319-351	0.6	3
7	Simulation of Water Levels and Water Diversions in a Subtropical Coastal Wetland. <i>Journal of Coastal Research</i> , 2006 , 222, 339-349	0.6	4
6	Net ecosystem production in a temperate pine plantation in southeastern Canada. <i>Agricultural and Forest Meteorology</i> , 2005 , 128, 223-241	5.8	99
5	Energy and water exchanges from a temperate pine plantation forest. <i>Hydrological Processes</i> , 2005 , 19, 27-49	3.3	27
4	An introduction to the Australian and New Zealand flux tower network \mathbb{D} zFlux		8
3	Land surface phenological response to decadal climate variability across Australia using satellite remote sensing		4
2	MODIS vegetation products as proxies of photosynthetic potential: a look across meteorological and biologic driven ecosystem productivity		6
1	Improvement of modelling plant responses to low soil moisture in JULESvn4.9 and evaluation against flux tower measurements		2
