#	Paper	IF	Citations
267	2019 ESC/EAS Guidelines for the management of dyslipidaemias: lipid modification to reduce cardiovascular risk. *European Heart Journal*, **2020**, 41, 111-188	9.5	2236
266	Adipose tissue dysfunction in obesity, diabetes, and vascular diseases. *European Heart Journal*, **2008**, 29, 2959-71	9.5	980
265	Obesity and cancer: the role of dysfunctional adipose tissue. *Cancer Epidemiology Biomarkers and Prevention*, **2009**, 18, 2569-78	4	515
264	Inclisiran in Patients at High Cardiovascular Risk with Elevated LDL Cholesterol. *New England Journal of Medicine*, **2017**, 376, 1430-1440	59.2	507
263	Torcetrapib and carotid intima-media thickness in mixed dyslipidaemia (RADIANCE 2 study): a randomised, double-blind trial. *Lancet, The*, **2007**, 370, 153-160	40	385
262	2021 ESC Guidelines on cardiovascular disease prevention in clinical practice. *European Heart Journal*, **2021**, 42, 3227-3337	9.5	358
261	Dementia and cognitive decline in type 2 diabetes and prediabetic stages: towards targeted interventions. *Lancet Diabetes and Endocrinology,the*, **2014**, 2, 246-55	18.1	331
260	2019 ESC/EAS guidelines for the management of dyslipidaemias: Lipid modification to reduce cardiovascular risk. *Atherosclerosis*, **2019**, 290, 140-205	3.1	259
259	Metabolic and additional vascular effects of thiazolidinediones. *Drugs*, **2002**, 62, 1463-80	12.1	222
258	Relation of epicardial and pericoronary fat to coronary atherosclerosis and coronary artery calcium in patients undergoing coronary angiography. *American Journal of Cardiology*, **2008**, 102, 380-5	3	206
257	Quantification of epicardial and peri-coronary fat using cardiac computed tomography; reproducibility and relation with obesity and metabolic syndrome in patients suspected of coronary artery disease. *Atherosclerosis*, **2008**, 197, 896-903	3.1	194
256	Perivascular adipose tissue as a cause of atherosclerosis. *Atherosclerosis*, **2011**, 214, 3-10	3.1	178
255	The metabolic syndrome is associated with advanced vascular damage in patients with coronary heart disease, stroke, peripheral arterial disease or abdominal aortic aneurysm. *European Heart Journal*, **2004**, 25, 342-8	9.5	178
254	Asymptomatic carotid artery stenosis and the risk of new vascular events in patients with manifest arterial disease: the SMART study. *Stroke*, **2007**, 38, 1470-5	6.7	174
253	Prevalence of the metabolic syndrome in patients with coronary heart disease, cerebrovascular disease, peripheral arterial disease or abdominal aortic aneurysm. *Atherosclerosis*, **2004**, 173, 363-9	3.1	138
252	Hypertension and longitudinal changes in cerebral blood flow: the SMART-MR study. *Annals of Neurology*, **2012**, 71, 825-33	9.4	118
251	Distribution of Estimated 10-Year Risk of Recurrent Vascular Events and Residual Risk in a Secondary Prevention Population. *Circulation*, **2016**, 134, 1419-1429	16.7	104

250	Development and validation of a prediction rule for recurrent vascular events based on a cohort study of patients with arterial disease: the SMART risk score. *Heart*, **2013**, 99, 866-72	5.1	103
249	Human adipocyte extracellular vesicles in reciprocal signaling between adipocytes and macrophages. *Obesity*, **2014**, 22, 1296-308	8	102
248	Relation between blood pressure and vascular events and mortality in patients with manifest vascular disease: J-curve revisited. *Hypertension*, **2012**, 59, 14-21	8.5	101
247	Short-term pioglitazone treatment improves vascular function irrespective of metabolic changes in patients with type 2 diabetes. *Journal of Cardiovascular Pharmacology*, **2005**, 46, 773-8	3.1	99
246	Effect of extracellular vesicles of human adipose tissue on insulin signaling in liver and muscle cells. *Obesity*, **2014**, 22, 2216-23	8	97
245	Estimating treatment effects for individual patients based on the results of randomised clinical trials. *BMJ, The*, **2011**, 343, d5888	5.9	94
244	Carotid Intima-Media Thickness Progression as Surrogate Marker for Cardiovascular Risk: Meta-Analysis of 119 Clinical Trials Involving 100 667 Patients. *Circulation*, **2020**, 142, 621-642	16.7	88
243	Adiposity and risk of decline in glomerular filtration rate: meta-analysis of individual participant data in a global consortium. *BMJ, The*, **2019**, 364, k5301	5.9	85
242	Extracellular vesicle markers in relation to obesity and metabolic complications in patients with manifest cardiovascular disease. *Cardiovascular Diabetology*, **2014**, 13, 37	8.7	78
241	Bisphosphonates for cardiovascular risk reduction: A systematic review and meta-analysis. *Atherosclerosis*, **2016**, 252, 106-115	3.1	75
240	Asymptomatic carotid artery stenosis and the risk of ischemic stroke according to subtype in patients with clinical manifest arterial disease. *Stroke*, **2013**, 44, 1002-7	6.7	74
239	Measures of chronic kidney disease and risk of incident peripheral artery disease: a collaborative meta-analysis of individual participant data. *Lancet Diabetes and Endocrinology,the*, **2017**, 5, 718-728	18.1	68
238	Predicting timing of clinical outcomes in patients with chronic kidney disease and severely decreased glomerular filtration rate. *Kidney International*, **2018**, 93, 1442-1451	9.9	67
237	Microvesicle protein levels are associated with increased risk for future vascular events and mortality in patients with clinically manifest vascular disease. *International Journal of Cardiology*, **2013**, 168, 2358-63	3.2	65
236	TNF-alpha induces endothelial dysfunction in diabetic adults, an effect reversible by the PPAR-gamma agonist pioglitazone. *European Heart Journal*, **2006**, 27, 1605-9	9.5	65
235	Etidronate for Prevention of Ectopic Mineralization in Patients With Pseudoxanthoma Elasticum. *Journal of the American College of Cardiology*, **2018**, 71, 1117-1126	15.1	63
234	Pioglitazone and the secondary prevention of cardiovascular disease. A meta-analysis of randomized-controlled trials. *Cardiovascular Diabetology*, **2017**, 16, 134	8.7	62
233	SCORE2 risk prediction algorithms: new models to estimate 10-year risk of cardiovascular disease in Europe. *European Heart Journal*, **2021**, 42, 2439-2454	9.5	58

232	Inflammatory characteristics of distinct abdominal adipose tissue depots relate differently to metabolic risk factors for cardiovascular disease: distinct fat depots and vascular risk factors. *Atherosclerosis*, **2015**, 239, 419-27	3.1	55
231	Adiponectin and incident coronary heart disease and stroke. A systematic review and meta-analysis of prospective studies. *Obesity Reviews*, **2013**, 14, 555-67	10.6	54
230	Coronary perivascular adipose tissue characteristics are related to atherosclerotic plaque size and composition. A post-mortem study. *Atherosclerosis*, **2012**, 225, 99-104	3.1	53
229	Blood pressure, cerebral blood flow, and brain volumes. The SMART-MR study. *Journal of Hypertension*, **2010**, 28, 1498-505	1.9	53
228	Metabolic syndrome and the risk of new vascular events and all-cause mortality in patients with coronary artery disease, cerebrovascular disease, peripheral arterial disease or abdominal aortic aneurysm. *European Heart Journal*, **2008**, 29, 213-23	9.5	52
227	The effect of self-efficacy on cardiovascular lifestyle. *European Journal of Cardiovascular Nursing*, **2011**, 10, 180-6	3.3	49
226	Increased visceral adipose tissue mass is associated with increased C-reactive protein in patients with manifest vascular diseases. *Atherosclerosis*, **2010**, 212, 274-80	3.1	46
225	Novel Biomarkers to Improve the Prediction of Cardiovascular Event Risk in Type 2 Diabetes Mellitus. *Journal of the American Heart Association*, **2016**, 5,	6	44
224	Homocysteine and progression of generalized small-vessel disease: the SMART-MR Study. *Neurology*, **2014**, 82, 777-83	6.5	44
223	Personalized cardiovascular disease prevention by applying individualized prediction of treatment effects. *European Heart Journal*, **2014**, 35, 837-43	9.5	43
222	Intracellular labile iron modulates adhesion of human monocytes to human endothelial cells. *Arteriosclerosis, Thrombosis, and Vascular Biology*, **2004**, 24, 2257-62	9.4	42
221	Relation between brown adipose tissue and measures of obesity and metabolic dysfunction in patients with cardiovascular disease. *Journal of Magnetic Resonance Imaging*, **2017**, 46, 497-504	5.6	39
220	Familial dysbetalipoproteinemia: an underdiagnosed lipid disorder. *Current Opinion in Endocrinology, Diabetes and Obesity*, **2017**, 24, 133-139	4	39
219	Iron chelation and hydroxyl radical scavenging reduce the inflammatory response of endothelial cells after infection with Chlamydia pneumoniae or influenza A. *European Journal of Clinical Investigation*, **2002**, 32 Suppl 1, 84-90	4.6	39
218	The combined use of aspirin, a statin, and blood pressure-lowering agents (polypill components) and the risk of vascular morbidity and mortality in patients with coronary artery disease. *American Heart Journal*, **2013**, 166, 282-289.e1	4.9	38
217	Cancer risk in patients with manifest vascular disease: effects of smoking, obesity, and metabolic syndrome. *Cancer Epidemiology Biomarkers and Prevention*, **2013**, 22, 1267-77	4	38
216	Prevalence of Subclinical Coronary Artery Disease Assessed by Coronary Computed Tomography Angiography in 45- to 55-Year-Old Women With a History of Preeclampsia. *Circulation*, **2018**, 137, 877-879	16.7	37
215	Differential effects of renin-angiotensin-aldosterone system inhibition, sympathoinhibition and diuretic therapy on endothelial function and blood pressure in obesity-related hypertension: a double-blind, placebo-controlled cross-over trial. *Journal of Hypertension*, **2013**, 31, 393-403	1.9	37

214	The association between breastfeeding and the cardiovascular system in early childhood. *American Journal of Clinical Nutrition*, **2011**, 93, 712-8	7	37
213	The effects of low-dose simvastatin and ezetimibe compared to high-dose simvastatin alone on post-fat load endothelial function in patients with metabolic syndrome: a randomized double-blind crossover trial. *Journal of Cardiovascular Pharmacology*, **2008**, 52, 145-50	3.1	37
212	Individualised prediction of alternate-day aspirin treatment effects on the combined risk of cancer, cardiovascular disease and gastrointestinal bleeding in healthy women. *Heart*, **2015**, 101, 369-76	5.1	36
211	The effect of statin alone or in combination with ezetimibe on postprandial lipoprotein composition in obese metabolic syndrome patients. *Atherosclerosis*, **2009**, 202, 216-24	3.1	35
210	Low high-density lipoprotein cholesterol is not a risk factor for recurrent vascular events in patients with vascular disease on intensive lipid-lowering medication. *Journal of the American College of Cardiology*, **2013**, 62, 1834-41	15.1	34
209	Relation between cardiovascular disease risk factors and epicardial adipose tissue density on cardiac computed tomography in patients at high risk of cardiovascular events. *European Journal of Preventive Cardiology*, **2017**, 24, 660-670	3.9	34
208	High-dose statin therapy in patients with stable coronary artery disease: treating the right patients based on individualized prediction of treatment effect. *Circulation*, **2013**, 127, 2485-93	16.7	34
207	Patients with coronary, cerebrovascular or peripheral arterial obstructive disease differ in risk for new vascular events and mortality: the SMART study. *European Journal of Cardiovascular Prevention and Rehabilitation*, **2010**, 17, 424-30		34
206	Estimated Life Expectancy Without Recurrent Cardiovascular Events in Patients With Vascular Disease: The SMART-REACH Model. *Journal of the American Heart Association*, **2018**, 7, e009217	6	34
205	Risk prediction tools in cardiovascular disease prevention: A report from the ESC Prevention of CVD Programme led by the European Association of Preventive Cardiology (EAPC) in collaboration with the Acute Cardiovascular Care Association (ACCA) and the Association of Cardiovascular Nursing and Allied Professions (ACNAP). *European Journal of Preventive Cardiology*, **2019**, 26, 1534-1544	3.9	33
204	Blood pressure and progression of brain atrophy: the SMART-MR Study. *JAMA Neurology*, **2013**, 70, 1046-53	11.2	33
203	Prediction of individualized lifetime benefit from cholesterol lowering, blood pressure lowering, antithrombotic therapy, and smoking cessation in apparently healthy people. *European Heart Journal*, **2020**, 41, 1190-1199	9.5	33
202	The course of vascular risk factors and the occurrence of vascular events in patients with symptomatic peripheral arterial disease. *Journal of Vascular Surgery*, **2007**, 45, 47-54	3.5	32
201	Vascular risk factors, vascular disease, lipids and lipid targets in patients with familial dysbetalipoproteinemia: a European cross-sectional study. *Atherosclerosis*, **2015**, 240, 90-7	3.1	31
200	How to translate clinical trial results into gain in healthy life expectancy for individual patients. *BMJ, The*, **2016**, 352, i1548	5.9	31
199	Excess early postnatal weight gain leads to thicker and stiffer arteries in young children. *Journal of Clinical Endocrinology and Metabolism*, **2013**, 98, 794-801	5.6	31
198	Aspirin for primary prevention of vascular events in women: individualized prediction of treatment effects. *European Heart Journal*, **2011**, 32, 2962-9	9.5	31
197	SCORE2-OP risk prediction algorithms: estimating incident cardiovascular event risk in older persons in four geographical risk regions. *European Heart Journal*, **2021**, 42, 2455-2467	9.5	31

196	2021 ESC Guidelines on cardiovascular disease prevention in clinical practice. *European Journal of Preventive Cardiology*, **2021**,	3.9	31
195	Carotid Intima Media Thickness in Mainly Female HIV-Infected Subjects in Rural South Africa: Association With Cardiovascular but Not HIV-Related Factors. *Clinical Infectious Diseases*, **2015**, 61, 1606-14	11.6	29
194	A randomized, controlled trial for risk factor reduction in patients with symptomatic vascular disease: the multidisciplinary Vascular Prevention by Nurses Study (VENUS). *European Journal of Cardiovascular Prevention and Rehabilitation*, **2006**, 13, 996-1003		29
193	Secretion of adipocytokines by perivascular adipose tissue near stenotic and non-stenotic coronary artery segments in patients undergoing CABG. *Atherosclerosis*, **2014**, 233, 242-7	3.1	28
192	High-dose statin monotherapy versus low-dose statin/ezetimibe combination on fasting and postprandial lipids and endothelial function in obese patients with the metabolic syndrome: The PANACEA study. *Atherosclerosis*, **2013**, 227, 118-24	3.1	28
191	Prediction of individual life-years gained without cardiovascular events from lipid, blood pressure, glucose, and aspirin treatment based on data of more than 500 000 patients with Type 2 diabetes mellitus. *European Heart Journal*, **2019**, 40, 2899-2906	9.5	28
190	Incremental value of a genetic risk score for the prediction of new vascular events in patients with clinically manifest vascular disease. *Atherosclerosis*, **2015**, 239, 451-8	3.1	27
189	Random measurement error: Why worry? An example of cardiovascular risk factors. *PLoS ONE*, **2018**, 13, e0192298	3.7	27
188	The relation between HbA1c and cardiovascular events in patients with type 2 diabetes with and without vascular disease. *Diabetes Care*, **2015**, 38, 1930-6	14.6	26
187	The relation between systemic inflammation and incident cancer in patients with stable cardiovascular disease: a cohort study. *European Heart Journal*, **2019**, 40, 3901-3909	9.5	25
186	Hypertensive target organ damage and the risk for vascular events and all-cause mortality in patients with vascular disease. *Journal of Hypertension*, **2013**, 31, 492-99; discussion 499-500	1.9	25
185	HDL Cholesterol as a Residual Risk Factor for Vascular Events and All-Cause Mortality in Patients With Type 2 Diabetes. *Diabetes Care*, **2016**, 39, 1424-30	14.6	25
184	Relationship of Estimated GFR and Albuminuria to Concurrent Laboratory Abnormalities: An Individual Participant Data Meta-analysis in a Global Consortium. *American Journal of Kidney Diseases*, **2019**, 73, 206-217	7.4	25
183	Relation of Epicardial Adipose Tissue Radiodensity to Coronary Artery Calcium on Cardiac Computed Tomography in Patients at High Risk for Cardiovascular Disease. *American Journal of Cardiology*, **2017**, 119, 1359-1365	3	24
182	Insulin resistance increases the occurrence of new cardiovascular events in patients with manifest arterial disease without known diabetes. the SMART study. *Cardiovascular Diabetology*, **2011**, 10, 100	8.7	24
181	Identification of vascular patients at very high risk for recurrent cardiovascular events: validation of the current ACC/AHA very high risk criteria. *European Heart Journal*, **2017**, 38, 3211-3218	9.5	23
180	Low plasma levels of adiponectin are associated with low risk for future cardiovascular events in patients with clinical evident vascular disease. *American Heart Journal*, **2007**, 154, 750.e1-7	4.9	23
179	Comorbidity in patients with cardiovascular disease in primary care: a cohort study with routine healthcare data. *British Journal of General Practice*, **2019**, 69, e398-e406	1.6	22

178	The risk of resting heart rate on vascular events and mortality in vascular patients. *International Journal of Cardiology*, **2013**, 168, 1410-5	3.2	22
177	The effect of leisure-time physical activity on the presence of metabolic syndrome in patients with manifest arterial disease. The SMART study. *American Heart Journal*, **2007**, 154, 1146-52	4.9	22
176	Prevalence and severity of arterial calcifications in pseudoxanthoma elasticum (PXE) compared to hospital controls. Novel insights into the vascular phenotype of PXE. *Atherosclerosis*, **2017**, 256, 7-14	3.1	21
175	Predicting the effects of blood pressure-lowering treatment on major cardiovascular events for individual patients with type 2 diabetes mellitus: results from Action in Diabetes and Vascular Disease: Preterax and Diamicron MR Controlled Evaluation. *Hypertension*, **2015**, 65, 115-21	8.5	21
174	The relation between body fat distribution, plasma concentrations of adipokines and the metabolic syndrome in patients with clinically manifest vascular disease. *European Journal of Preventive Cardiology*, **2018**, 25, 1548-1557	3.9	21
173	Metabolic syndrome and incidence of type 2 diabetes in patients with manifest vascular disease. *Diabetes and Vascular Disease Research*, **2008**, 5, 114-22	3.3	21
172	Autosomal dominant familial dysbetalipoproteinemia: A pathophysiological framework and practical approach to diagnosis and therapy. *Journal of Clinical Lipidology*, **2017**, 11, 12-23.e1	4.9	20
171	The effect of computerized decision support systems on cardiovascular risk factors: a systematic review and meta-analysis. *BMC Medical Informatics and Decision Making*, **2019**, 19, 108	3.6	20
170	Paternal or maternal history of cardiovascular disease and the risk of cardiovascular disease in offspring. A systematic review and meta-analysis. *International Journal of Cardiology*, **2015**, 179, 409-16	3.2	20
169	Incidence of cardiovascular events and vascular interventions in patients with type 2 diabetes. *International Journal of Cardiology*, **2017**, 248, 301-307	3.2	20
168	Impact of Selection Bias on Estimation of Subsequent Event Risk. *Circulation: Cardiovascular Genetics*, **2017**, 10,		19
167	Estimating individual lifetime benefit and bleeding risk of adding rivaroxaban to aspirin for patients with stable cardiovascular disease: results from the COMPASS trial. *European Heart Journal*, **2019**, 40, 3771-3778a	9.5	19
166	Hypertensive Target Organ Damage and Longitudinal Changes in Brain Structure and Function: The Second Manifestations of Arterial Disease-Magnetic Resonance Study. *Hypertension*, **2015**, 66, 1152-8	8.5	19
165	Trends in comorbidity in patients hospitalised for cardiovascular disease. *International Journal of Cardiology*, **2017**, 248, 382-388	3.2	19
164	Relationship between leptin and lung function in young healthy children. *European Respiratory Journal*, **2014**, 43, 1189-92	13.6	19
163	Cost-effectiveness of PCSK9 inhibition in addition to standard lipid-lowering therapy in patients at high risk for vascular disease. *International Journal of Cardiology*, **2018**, 253, 148-154	3.2	18
162	Relationship between myocardial bridges and reduced coronary atherosclerosis in patients with angina pectoris. *International Journal of Cardiology*, **2013**, 167, 883-8	3.2	18
161	Relation between thyroid-stimulating hormone and the occurrence of cardiovascular events and mortality in patients with manifest vascular diseases. *European Journal of Preventive Cardiology*, **2012**, 19, 864-73	3.9	18

160	Inter-arm systolic blood pressure differences, relations with future vascular events and mortality in patients with and without manifest vascular disease. *International Journal of Cardiology*, **2017**, 244, 271-276	3.2	17
159	Smoking cessation and risk of recurrent cardiovascular events and mortality after a first manifestation of arterial disease. *American Heart Journal*, **2019**, 213, 112-122	4.9	17
158	Reliability and agreement of adipose tissue fat fraction measurements with water-fat MRI in patients with manifest cardiovascular disease. *NMR in Biomedicine*, **2016**, 29, 48-56	4.4	17
157	The relation between apolipoprotein E (APOE) genotype and peripheral artery disease in patients at high risk for cardiovascular disease. *Atherosclerosis*, **2016**, 246, 187-92	3.1	17
156	The role of T cells in the development of cardiovascular disease in HIV-infected patients. *Atherosclerosis*, **2014**, 237, 92-8	3.1	17
155	Personalized absolute benefit of statin treatment for primary or secondary prevention of vascular disease in individual elderly patients. *Clinical Research in Cardiology*, **2017**, 106, 58-68	6.1	17
154	Extracellular vesicle protein levels are related to brain atrophy and cerebral white matter lesions in patients with manifest vascular disease: the SMART-MR study. *BMJ Open*, **2014**, 4, e003824	3	17
153	The relation between resting heart rate and cancer incidence, cancer mortality and all-cause mortality in patients with manifest vascular disease. *Cancer Epidemiology*, **2014**, 38, 715-21	2.8	17
152	The relation between thyroid-stimulating hormone and measures of adiposity in patients with manifest vascular disease. *European Journal of Clinical Investigation*, **2011**, 41, 159-66	4.6	17
151	Effect of Type 2 Diabetes on Recurrent Major Cardiovascular Events for Patients With Symptomatic Vascular Disease at Different Locations. *Diabetes Care*, **2015**, 38, 1528-35	14.6	16
150	Increased visceral adipose tissue is associated with increased resting heart rate in patients with manifest vascular disease. *Obesity*, **2012**, 20, 834-41	8	16
149	Lipid-lowering therapy does not affect the postprandial drop in high density lipoprotein-cholesterol (HDL-c) plasma levels in obese men with metabolic syndrome: a randomized double blind crossover trial. *Clinical Endocrinology*, **2008**, 69, 870-7	3.4	16
148	Impact of switching from different treatment regimens to a fixed-dose combination pill (polypill) in patients with cardiovascular disease or similarly high risk. *European Journal of Preventive Cardiology* , **2017**, 24, 951-961	3.9	15
147	Body weight, metabolic dysfunction, and risk of type 2 diabetes in patients at high risk for cardiovascular events or with manifest cardiovascular disease: a cohort study. *Diabetes Care*, **2015**, 38, 1945-51	14.6	15
146	Low-Density Lipoprotein Cholesterol, Non-High-Density Lipoprotein Cholesterol, Triglycerides, and Apolipoprotein B and Cardiovascular Risk in Patients With Manifest Arterial Disease. *American Journal of Cardiology*, **2016**, 118, 804-810	3	15
145	Plasma triglyceride levels increase the risk for recurrent vascular events independent of LDL-cholesterol or nonHDL-cholesterol. *International Journal of Cardiology*, **2013**, 167, 403-8	3.2	15
144	Effect of statin therapy on incident type 2 diabetes mellitus in patients with clinically manifest vascular disease. *American Journal of Cardiology*, **2015**, 115, 441-6	3	15
143	Rs964184 (APOA5-A4-C3-A1) is related to elevated plasma triglyceride levels, but not to an increased risk for vascular events in patients with clinically manifest vascular disease. *PLoS ONE*, **2014**, 9, e101082	3.7	15

142	The influence of baseline risk on the relation between HbA1c and risk for new cardiovascular events and mortality in patients with type 2 diabetes and symptomatic cardiovascular disease. *Cardiovascular Diabetology*, **2016**, 15, 101	8.7	15
141	Risk prediction tools in cardiovascular disease prevention: A report from the ESC Prevention of CVD Programme led by the European Association of Preventive Cardiology (EAPC) in collaboration with the Acute Cardiovascular Care Association (ACCA) and the Association of Cardiovascular Nursing and Allied Professions (ACNAP). *European Heart Journal: Acute Cardiovascular Care*, **2020**, 9, 522-532	4.3	15
140	The prediction of therapy-benefit for individual cardiovascular disease prevention: rationale, implications, and implementation. *Current Opinion in Lipidology*, **2018**, 29, 436-444	4.4	15
139	Cerebral disease in a nationwide Dutch pseudoxanthoma elasticum cohort with a systematic review of the literature. *Journal of the Neurological Sciences*, **2017**, 373, 167-172	3.2	14
138	Association of Chromosome 9p21 With Subsequent Coronary Heart Disease Events. *Circulation Genomic and Precision Medicine*, **2019**, 12, e002471	5.2	14
137	The prevalence of pseudoxanthoma elasticum: Revised estimations based on genotyping in a high vascular risk cohort. *European Journal of Medical Genetics*, **2019**, 62, 90-92	2.6	14
136	Cost-Effectiveness of Intensifying Lipid-Lowering Therapy With Statins Based on Individual Absolute Benefit in Coronary Artery Disease Patients. *Journal of the American Heart Association*, **2017**, 6,	6	13
135	Safety of Temporary Discontinuation of Antihypertensive Medication in Patients With Difficult-to-Control Hypertension. *Hypertension*, **2017**, 69, 927-932	8.5	13
