| #  | ARTICLE                                                                                                                                                                                                                                                                                                 | IF  | CITATIONS |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Gardnerella vaginalis in Recurrent Urinary Tract Infection Is Associated with Dysbiosis of the Bladder Microbiome. <i>Journal of Clinical Medicine</i> , 2022, 11, 2295.                                                                                                                                | 1.0 | 8         |
| 2  | Long-term outcomes of ulcerative interstitial cystitis after complete transurethral resection with therapeutic hydrodistention. <i>International Urology and Nephrology</i> , 2021, 53, 219-227.                                                                                                        | 0.6 | 4         |
| 3  | Urinary Microbiome Characteristics in Female Patients with Acute Uncomplicated Cystitis and Recurrent Cystitis. <i>Journal of Clinical Medicine</i> , 2021, 10, 1097.                                                                                                                                   | 1.0 | 22        |
| 4  | The Microbiome's Function in Disorders of the Urinary Bladder. <i>Applied Microbiology</i> , 2021, 1, 445-459.                                                                                                                                                                                          | 0.7 | 3         |
| 5  | Î²-Defensin 2, an Antimicrobial Peptide, as a Novel Biomarker for Ulcerative Interstitial Cystitis; Can Î²-Defensin 2 Suspect the Dysbiosis of Urine Microbiota?. <i>Diagnostics</i> , 2021, 11, 2082.                                                                                                  | 1.3 | 3         |
| 6  | Robot-Assisted Laparoscopic Paravaginal Repair and Sacrocolpopexy in Patients With Pelvic Organ Prolapse. <i>Urology</i> , 2021, , .                                                                                                                                                                    | 0.5 | 0         |
| 7  | The microbiome in urological diseases. <i>Investigative and Clinical Urology</i> , 2020, 61, 338.                                                                                                                                                                                                       | 1.0 | 21        |
| 8  | Clinical Characteristics and Antimicrobial Susceptibility of Elderly Women with Acute Pyelonephritis. <i>Urogenital Tract Infection</i> , 2020, 15, 71-78.                                                                                                                                              | 0.1 | 0         |
| 9  | Treatment Satisfaction with Flexible-dose Fesoterodine in Patients with Overactive Bladder who were Dissatisfied with Previous Anticholinergic Therapy: A Multicenter Single-Arm Clinical Study. <i>Urology Journal</i> , 2020, 17, 97-101.                                                             | 0.3 | 1         |
| 10 | Hunner lesion versus non-Hunner lesion interstitial cystitis/bladder pain syndrome. <i>International Journal of Urology</i> , 2019, 26, 26-34.                                                                                                                                                          | 0.5 | 61        |
| 11 | Classification of nocturia by analyzing frequency volume chart and relations with international prostate symptom score in male patients with lower urinary tract symptoms in Korea. <i>Investigative and Clinical Urology</i> , 2019, 60, 267.                                                          | 1.0 | 2         |
| 12 | Readjustable midurethral sling (REMEEEX system) in obese women. <i>Investigative and Clinical Urology</i> , 2019, 60, 488.                                                                                                                                                                              | 1.0 | 4         |
| 13 | How Women Evaluate Syndromic Recurrent Urinary Tract Infections. <i>Urogenital Tract Infection</i> , 2019, 14, 46.                                                                                                                                                                                      | 0.1 | 0         |
| 14 | Clinical Efficacy of Solifenacin in the Management of Diabetes Mellitus-Associated Versus Idiopathic Overactive Bladder Symptoms: A Multicenter Prospective Study. <i>International Neurourology Journal</i> , 2018, 22, 51-57.                                                                         | 0.5 | 9         |
| 15 | A multicenter real-life study of the efficacy of an alpha-blocker with or without anticholinergic agent (imidafenacin) treatment in patients with lower urinary tract symptoms/benign prostatic hyperplasia and storage symptoms. <i>International Journal of Clinical Practice</i> , 2017, 71, e12938. | 0.8 | 6         |
| 16 | Transurethral Resection Alone Vs Resection Combined With Therapeutic Hydrodistention as Treatment for Ulcerative Interstitial Cystitis: Initial Experience With Propensity Score Matching Studies. <i>Urology</i> , 2017, 99, 62-68.                                                                    | 0.5 | 8         |
| 17 | Recent Antimicrobial Susceptibilities for Uropathogenic <i>Escherichia coli</i> in Patients with Community Acquired Urinary Tract Infections: A Multicenter Study. <i>Urogenital Tract Infection</i> , 2017, 12, 28.                                                                                    | 0.1 | 19        |
| 18 | New Era of Post Urinary Tract Infection Pain Syndrome. <i>Urogenital Tract Infection</i> , 2016, 11, 49.                                                                                                                                                                                                | 0.1 | 0         |

| #  | ARTICLE                                                                                                                                                                                                              | IF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Uropathogens Based on Antibiotic Susceptibility. Urogenital Tract Infection, 2015, 10, 67.                                                                                                                           | 0.1 | 1         |
| 20 | Midterm Efficacy and Complications of Adjustable Midurethral Sling (Remeex System) in Female Stress Urinary Incontinence With Recurrence or Intrinsic Sphincter Deficiency. Urology, 2015, 85, 79-84.                | 0.5 | 22        |
| 21 | A Prospective Korean Multicenter Study for Infectious Complications in Patients Undergoing Prostate Surgery: Risk Factors and Efficacy of Antibiotic Prophylaxis. Journal of Korean Medical Science, 2014, 29, 1271. | 1.1 | 17        |
| 22 | Risk Factors for De Novo Mixed Urinary Incontinence and Stress Urinary Incontinence Following Surgical Removal of a Urethral Diverticulum. LUTS: Lower Urinary Tract Symptoms, 2013, 5, 154-158.                     | 0.6 | 3         |
| 23 | Development of a Korean Version of the Urinary Tract Infection Symptoms Assessment Questionnaire. Korean Journal of Urology, 2009, 50, 361.                                                                          | 1.2 | 4         |
| 24 | Giant Fibroepithelial Polyp of the Glans Penis. Korean Journal of Urology, 2009, 50, 619.                                                                                                                            | 1.2 | 8         |
| 25 | Diagnosis and Management of Interstitial Cystitis/ Painful Bladder Syndrome. Journal of the Korean Continence Society, 2008, 12, 99.                                                                                 | 0.1 | 2         |
| 26 | Ureteral Endometriosis. Korean Journal of Urology, 2007, 48, 1179.                                                                                                                                                   | 0.2 | 0         |
| 27 | Urinary Survivin Test Compared to the Nuclear Matrix Protein (NMP)-22 Test and Urine Cytology for the Diagnosis of Bladder Cancer. Korean Journal of Urology, 2006, 47, 1041.                                        | 0.2 | 3         |
| 28 | The Prevalence of Overactive Bladder Syndrome and Urinary Incontinence in Young and Middle Aged Women. Journal of the Korean Continence Society, 2003, 7, 9.                                                         | 0.1 | 10        |
| 29 | Overactive Bladder and Urinary Incontinence in Adult Women: Prevalence and Effects on Daily Life and Sexual Activity. Korean Journal of Women Health Nursing, 2002, 8, 529.                                          | 0.2 | 2         |
| 30 | Treatment of the Complete Separation of Acromioclavicular Joint by Coracoclavicular Wiring. Journal of the Korean Fracture Society, 1990, 3, 119.                                                                    | 0.1 | 0         |
