#	ARTICLE	IF	CITATIONS
1	Vertical variation of tropical cyclone size in the western North Pacific. <i>International Journal of Climatology</i> , 2022, 42, 4424-4444.	3.5	3
2	How Does Air–Sea Wave Interaction Affect Tropical Cyclone Intensity? An Atmosphere–Wave–Ocean Coupled Model Study Based on Super Typhoon Mangkhut (2018). <i>Earth and Space Science</i> , 2022, 9, .	2.6	10
3	Surface Layer Drag Coefficient at Different Radius Ranges in Tropical Cyclones. <i>Atmosphere</i> , 2022, 13, 280.	2.3	1
4	Extreme Rainfall Indices Prediction with Atmospheric Parameters and Ocean–Atmospheric Teleconnections Using a Random Forest Model. <i>Journal of Applied Meteorology and Climatology</i> , 2022, 61, 651-667.	1.5	5
5	Effects of Learning Rates and Optimization Algorithms on Forecasting Accuracy of Hourly Typhoon Rainfall: Experiments With Convolutional Neural Network. <i>Earth and Space Science</i> , 2022, 9, .	2.6	7
6	An Improved Cluster–Wise Typhoon Rainfall Forecasting Model Based on Machine Learning and Deep Learning Models Over the Northwestern Pacific Ocean. <i>Journal of Geophysical Research D: Atmospheres</i> , 2022, 127, .	3.3	2
7	Drivers of the rapid rise and daily-based accumulation in PM ₁ . <i>Science of the Total Environment</i> , 2021, 760, 143394.	8.0	4
8	Evaluation of the Effect of Stability Schemes on the Simulation of Land Surface Processes at a Western Tibetan Site. <i>Land</i> , 2021, 10, 253.	2.9	0
9	Dual Effects of Synoptic Weather Patterns and Urbanization on Summer Diurnal Temperature Range in an Urban Agglomeration of East China. <i>Frontiers in Environmental Science</i> , 2021, 9, .	3.3	6
10	Synergistic Influence of Local Climate Zones and Wind Speeds on the Urban Heat Island and Heat Waves in the Megacity of Beijing, China. <i>Frontiers in Earth Science</i> , 2021, 9, .	1.8	29
11	Storm–Scale and Fine–Scale Boundary Layer Structures of Tropical Cyclones Simulated With the WRF–LES Framework. <i>Journal of Geophysical Research D: Atmospheres</i> , 2021, 126, e2021JD035511.	3.3	10
12	PM _{2.5} Pollution Modulates Wintertime Urban Heat Island Intensity in the Beijing–Tianjin–Hebei Megalopolis, China. <i>Geophysical Research Letters</i> , 2020, 47, e2019GL084288.	4.0	88
13	Diurnal and Seasonal Variations of Surface Energy and CO ₂ Fluxes over a Site in Western Tibetan Plateau. <i>Atmosphere</i> , 2020, 11, 260.	2.3	5
14	Diurnal Evolution of the Wintertime Boundary Layer in Urban Beijing, China: Insights from Doppler Lidar and a 325-m Meteorological Tower. <i>Remote Sensing</i> , 2020, 12, 3935.	4.0	31
15	Improvement of Drag Coefficient Calculation Under Near–Neutral Conditions in Light Winds Over land. <i>Journal of Geophysical Research D: Atmospheres</i> , 2020, 125, e2020JD033472.	3.3	6
16	Modulations of surface thermal environment and agricultural activity on intraseasonal variations of summer diurnal temperature range in the Yangtze River Delta of China. <i>Science of the Total Environment</i> , 2020, 736, 139445.	8.0	39
17	Measurements of turbulence transfer in the near-surface layer over the Antarctic sea-ice surface from April through November in 2016. <i>Annals of Glaciology</i> , 2020, 61, 12-23.	1.4	6
18	Vertical Gradient Variations in Radiation Budget and Heat Fluxes in the Urban Boundary Layer: A Comparison Study Between Polluted and Clean Air Episodes in Beijing During Winter. <i>Journal of Geophysical Research D: Atmospheres</i> , 2020, 125, e2020JD032478.	3.3	10

#	ARTICLE	IF	CITATIONS
19	Connections Between Daily Surface Temperature Contrast and CO ₂ Flux Over a Tibetan Lake: A Case Study of Ngoring Lake. <i>Journal of Geophysical Research D: Atmospheres</i> , 2020, 125, e2019JD032277.	3.3	12
20	Parabolic dependence of the drag coefficient on wind speed from aircraft eddy-covariance measurements over the tropical Eastern Pacific. <i>Scientific Reports</i> , 2020, 10, 1805.	3.3	6
21	Spatiotemporal variability in long-term population exposure to PM _{2.5} and lung cancer mortality attributable to PM _{2.5} across the Yangtze River Delta (YRD) region over 2010–2016: A multistage approach. <i>Chemosphere</i> , 2020, 257, 127153.	8.2	14
22	Basin-wide responses of the South China Sea environment to Super Typhoon Mangkhut (2018). <i>Science of the Total Environment</i> , 2020, 731, 139093.	8.0	34
23	Radiosonde-Observed Vertical Profiles and Increasing Trends of Temperature and Humidity during 2005–2018 at the South Pole. <i>Atmosphere</i> , 2019, 10, 365.	2.3	4
24	Tropical cyclone damages in Mainland China over 2005–2016: losses analysis and implications. <i>Environment, Development and Sustainability</i> , 2019, 21, 3077-3092.	5.0	31
25	Vertical observations of the atmospheric boundary layer structure over Beijing urban area during air pollution episodes. <i>Atmospheric Chemistry and Physics</i> , 2019, 19, 6949-6967.	4.9	48
26	Re-evaluating the variation in trend of haze days in the urban areas of Beijing during a recent 36-year period. <i>Atmospheric Science Letters</i> , 2019, 20, e878.	1.9	19
27	Impacts of the near-surface urban boundary layer structure on PM _{2.5} concentrations in Beijing during winter. <i>Science of the Total Environment</i> , 2019, 669, 493-504.	8.0	28
28	The two-way feedback mechanism between unfavorable meteorological conditions and cumulative aerosol pollution in various haze regions of China. <i>Atmospheric Chemistry and Physics</i> , 2019, 19, 3287-3306.	4.9	97
29	Tornado-scale vortices in the tropical cyclone boundary layer: numerical simulation with the WRF–LES framework. <i>Atmospheric Chemistry and Physics</i> , 2019, 19, 2477-2487.	4.9	20
30	Surface Energy Budget Observed for Winter Wheat in the North China Plain During a Fog–Haze Event. <i>Boundary-Layer Meteorology</i> , 2019, 170, 489-505.	2.3	7
31	Estimate of boundary-layer depth in Nanjing city using aerosol lidar data during 2016–2017 winter. <i>Atmospheric Environment</i> , 2019, 205, 67-77.	4.1	12
32	High-Spatial-Resolution Population Exposure to PM _{2.5} Pollution Based on Multi-Satellite Retrievals: A Case Study of Seasonal Variation in the Yangtze River Delta, China in 2013. <i>Remote Sensing</i> , 2019, 11, 2724.	4.0	17
33	Rainfall Contribution of Tropical Cyclones in the Bay of Bengal between 1998 and 2016 using TRMM Satellite Data. <i>Atmosphere</i> , 2019, 10, 699.	2.3	21
34	An urban-rural and sex differences in cancer incidence and mortality and the relationship with PM _{2.5} exposure: An ecological study in the southeastern side of Hu line. <i>Chemosphere</i> , 2019, 216, 766-773.	8.2	47
35	Assessment of urban surface thermal environment using MODIS with a population-weighted method: a case study. <i>Journal of Spatial Science</i> , 2019, 64, 287-300.	1.5	11
36	On the surface fluxes characteristics and roughness lengths at Zhongshan station, Antarctica. <i>International Journal of Digital Earth</i> , 2019, 12, 878-892.	3.9	13

#	ARTICLE	IF	CITATIONS
37	The impact of urbanization on wind speed and surface aerodynamic characteristics in Beijing during 1991–2011. <i>Meteorology and Atmospheric Physics</i> , 2018, 130, 311-324.	2.0	33
38	Evaluation of the Regional Climate Model over the Loess Plateau of China. <i>International Journal of Climatology</i> , 2018, 38, 35-54.	3.5	8
39	Features of Extreme Precipitation at Progress Station, Antarctica. <i>Journal of Climate</i> , 2018, 31, 9087-9105.	3.2	19
40	Long-Term Trends of Persistent Synoptic Circulation Events in Planetary Boundary Layer and Their Relationships With Haze Pollution in Winter Half Year Over Eastern China. <i>Journal of Geophysical Research D: Atmospheres</i> , 2018, 123, 10,991.	3.3	75
41	Prevalence of tornado-scale vortices in the tropical cyclone eyewall. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2018, 115, 8307-8310.	7.1	35
42	Relationship Between Fine-Particle Pollution and the Urban Heat Island in Beijing, China: Observational Evidence. <i>Boundary-Layer Meteorology</i> , 2018, 169, 93-113.	2.3	69
43	Determination of Desert Soil Apparent Thermal Diffusivity Using a Conduction–Convection Algorithm. <i>Journal of Geophysical Research D: Atmospheres</i> , 2017, 122, 9569-9578.	3.3	10
44	Comparison of Sensible Heat Fluxes Measured by a Large Aperture Scintillometer and Eddy Covariance System over a Heterogeneous Farmland in East China. <i>Atmosphere</i> , 2017, 8, 101.	2.3	11
45	An Empirical Model for Estimating Soil Thermal Conductivity from Soil Water Content and Porosity. <i>Journal of Hydrometeorology</i> , 2016, 17, 601-613.	1.9	30
46	An Update of Non-iterative Solutions for Surface Fluxes Under Unstable Conditions. <i>Boundary-Layer Meteorology</i> , 2015, 156, 501-511.	2.3	6
47	An Improved Approach for Parameterizing Surface-Layer Turbulent Transfer Coefficients in Numerical Models. <i>Boundary-Layer Meteorology</i> , 2010, 137, 153-165.	2.3	38
48	The sensitivity of parameterization schemes in thermodynamic modeling of the landfast sea ice in Prydz Bay, East Antarctica. <i>Journal of Glaciology</i> , 0, , 1-16.	2.2	4
