#	ARTICLE	IF	CITATIONS
1	Effects of functional electrical stimulation on muscle health after spinal cord injury. <i>Current Opinion in Pharmacology</i> , 2021, 60, 226-231.	1.7	16
2	Exploring the uptake and implementation of tele-monitored home-exercise programmes in adults with Parkinson's disease: A mixed-methods pilot study. <i>Journal of Telemedicine and Telecare</i> , 2020, 26, 53-63.	1.4	46
3	Multi-Level Factors Associated with Social Participation among Stroke Survivors: China's Health and Retirement Longitudinal Study (2011-2015). <i>International Journal of Environmental Research and Public Health</i> , 2019, 16, 5121.	1.2	20
4	Sustainability of exercise intervention outcomes among people with disabilities: a secondary review. <i>Disability and Rehabilitation</i> , 2019, 41, 1584-1595.	0.9	31
5	Teleexercise for Persons With Spinal Cord Injury: A Mixed-Methods Feasibility Case Series. <i>JMIR Rehabilitation and Assistive Technologies</i> , 2016, 3, e8.	1.1	43
6	Neuromuscular Electrical Stimulation-Induced Resistance Training After SCI: A Review of the Dudley Protocol. <i>Topics in Spinal Cord Injury Rehabilitation</i> , 2015, 21, 294-302.	0.8	25
7	Arterial Elasticity, Strength, Fatigue, and Endurance in Older Women. <i>BioMed Research International</i> , 2014, 2014, 1-8.	0.9	5
8	Skeletal muscle signaling associated with impaired glucose tolerance in spinal cord-injured men and the effects of contractile activity. <i>Journal of Applied Physiology</i> , 2013, 115, 756-764.	1.2	33
9	Recruitment Patterns in Human Skeletal Muscle During Electrical Stimulation. <i>Physical Therapy</i> , 2005, 85, 358-364.	1.1	452
10	Changes in Skeletal Muscle Size and Glucose Tolerance With Electrically Stimulated Resistance Training in Subjects With Chronic Spinal Cord Injury. <i>Archives of Physical Medicine and Rehabilitation</i> , 2005, 86, 1502-1504.	0.5	134
11	Long-term spinal cord injury increases susceptibility to isometric contraction-induced muscle injury. <i>European Journal of Applied Physiology</i> , 2004, 91, 308-313.	1.2	51
12	Acute molecular responses of skeletal muscle to resistance exercise in able-bodied and spinal cord-injured subjects. <i>Journal of Applied Physiology</i> , 2003, 94, 2255-2262.	1.2	89
13	Fatigability and Variable-Frequency Train Stimulation of Human Skeletal Muscles. <i>Physical Therapy</i> , 2003, 83, 366-373.	1.1	28
14	Fatigability and variable-frequency train stimulation of human skeletal muscles. <i>Physical Therapy</i> , 2003, 83, 366-73.	1.1	14
