#	ARTICLE	IF	CITATIONS
1	Symmetry-Induced Emergence of a Pseudo-Qutrit in the Dipolar Coupling of Two Qubits. Entropy, 2022, 24, 223.	1.1	2
2	Superposition Principle for Qubit States in the Spin-Projection Mean Representation. Journal of Russian Laser Research, 2022, 43, 82-89.	0.3	0
3	Even and Odd Schrödinger Cat States in the Probability Representation of Quantum Mechanics. Journal of Russian Laser Research, 2022, 43, 1-17.	0.3	2
4	Entangled Qubit States and Linear Entropy in the Probability Representation of Quantum Mechanics. Entropy, 2022, 24, 527.	1.1	4
5	Symplectic tomographic probability distribution of crystallized Schrödinger cat states. Physics Letters, Section A: General, Atomic and Solid State Physics, 2022, 434, 128044.	0.9	5
6	Properties of Quantizer and Dequantizer Operators for Qudit States and Parametric Down-Conversion. Symmetry, 2021, 13, 131.	1.1	9
7	Qubit state vector in probability representation of quantum mechanics. AIP Conference Proceedings, 2021, , .	0.3	0
8	Nonlinear differential dynamics of Gaussian States. AIP Conference Proceedings, 2021, , .	0.3	1
9	New Gabor quasi-probability based on the integral transform. AIP Conference Proceedings, 2021, , .	0.3	0
10	Non-stationary qubit states evolution in probability representation of quantum mechanics. AIP Conference Proceedings, 2021, , .	0.3	0
11	Probability Representation of Quantum States. Entropy, 2021, 23, 549.	1.1	31
12	Tomographic Description of a Quantum Wave Packet in an Accelerated Frame. Entropy, 2021, 23, 636.	1.1	2
13	Measurement of the Temperature Using the Tomographic Representation of Thermal States for Quadratic Hamiltonians. Entropy, 2021, 23, 1445.	1.1	8
14	Quantum correlations for two coupled oscillators interacting with two heat baths. Canadian Journal of Physics, 2020, 98, 327-331.	0.4	1
15	Dynamics of a harmonic oscillator coupled with a Glauber amplifier. Physica Scripta, 2020, 95, 024004.	1.2	14
16	Conditions for Quantum and Classical Tomogram-Like Functions to Describe System States and to Retain Normalizations During Time Evolution. International Journal of Theoretical Physics, 2020, 59, 574-595.	0.5	2
17	The Discrete Center-of-Mass Tomogram. International Journal of Theoretical Physics, 2020, 59, 2404-2424.	0.5	2
18	Quantized-Energy Equation for N-Level Atom in the Probability Representation of Quantum Mechanics. Journal of Russian Laser Research, 2020, 41, 576-583.	0.3	3

#	ARTICLE	IF	CITATIONS
19	SU(2) Symmetry of Qubit States and Heisenberg-Weyl Symmetry of Systems with Continuous Variables in the Probability Representation of Quantum Mechanics. <i>Symmetry</i> , 2020, 12, 1099.	1.1	14
20	PT -Symmetric Qubit-System States in the Probability Representation of Quantum Mechanics. <i>Symmetry</i> , 2020, 12, 1702.	1.1	5
21	Integral transforms between tomogram and quasi-probability functions based on quantizer-dequantizer operators formalism. <i>Journal of Mathematical Physics</i> , 2020, 61, .	0.5	4
22	Conventional Quantum Statistics with a Probability Distribution Describing Quantum System States. <i>Physics of Particles and Nuclei</i> , 2020, 51, 772-780.	0.2	2
23	Schrödinger Equation for Energy Levels as a Linear Equation for Probability Distributions Identified with Quantum States. <i>Journal of Russian Laser Research</i> , 2020, 41, 441-450.	0.3	6
24	Probability Representation of Quantum Mechanics and the Quantizer-Dequantizer Formalism. <i>Journal of Physics: Conference Series</i> , 2020, 1612, 012009.	0.3	2
25	Star-Product Formalism for the Probability and Mean-Value Representations of Qudits. <i>Journal of Russian Laser Research</i> , 2020, 41, 470-483.	0.3	10
26	Observables, interference phenomenon and Born's rule in the probability representation of quantum mechanics. <i>International Journal of Quantum Information</i> , 2020, 18, 1941021.	0.6	10
27	Differential Parametric Formalism for the Evolution of Gaussian States: Nonunitary Evolution and Invariant States. <i>Entropy</i> , 2020, 22, 586.	1.1	12
28	Quantizer-dequantizer operators as a tool for formulating the quantization procedure. <i>Physics Letters, Section A: General, Atomic and Solid State Physics</i> , 2020, 384, 126349.	0.9	11
29	Probability Representation of Quantum Mechanics Where System States Are Identified with Probability Distributions. <i>Quantum Reports</i> , 2020, 2, 64-79.	0.6	3
30	A New Mechanism of Open System Evolution and Its Entropy Using Unitary Transformations in Noncomposite Qudit Systems. <i>Entropy</i> , 2019, 21, 736.	1.1	9
31	Statistical properties of qutrit in probability representation of quantum mechanics. <i>Physica A: Statistical Mechanics and Its Applications</i> , 2019, 533, 121898.	1.2	6
32	SU(2) and SU(1,1) group parametrizations via qubit induced correlated probabilities. <i>Journal of Physics A: Mathematical and Theoretical</i> , 2019, 52, 425201.	0.7	2
33	Probability Representation of Quantum Channels. <i>Lobachevskii Journal of Mathematics</i> , 2019, 40, 1444-1449.	0.1	2
34	Correlations in a system of classical-like coins simulating spin-1/2 states in the probability representation of quantum mechanics. <i>European Physical Journal D</i> , 2019, 73, 1.	0.6	13
35	Qubit representation of qudit states: correlations and state reconstruction. <i>Quantum Information Processing</i> , 2019, 18, 1.	1.0	7
36	Professor Viktor V. Dodonov: on the Occasion of His 70th Birthday. <i>Journal of Russian Laser Research</i> , 2019, 40, 105-106.	0.3	1

#	ARTICLE	IF	CITATIONS
37	Probability Representation of Quantum States as a Renaissance of Hidden Variablesâ€” God Plays Coins. Journal of Russian Laser Research, 2019, 40, 107-120.	0.3	10
38	Triangle Geometry of Spin States and Nonlinear Superposition of Probabilities Describing These Statesâ€”. Journal of Russian Laser Research, 2019, 40, 6-18.	0.3	6
39	Quantum Tomography of Time-Dependent Nonlinear Hamiltonian Systems. Reports on Mathematical Physics, 2019, 83, 87-106.	0.4	3
40	Interference of Quantum States and Superposition Principle in Probability Representation of Quantum Mechanics. Open Systems and Information Dynamics, 2019, 26, 1950016.	0.5	2
41	Malevichâ€™s Suprematist Composition Picture for Spin States. Entropy, 2019, 21, 870.	1.1	1
42	New Entropic Inequalities for Qudit (Spin $j = 9/2$ ). Journal of Russian Laser Research, 2019, 40, 522-529.	0.3	2
43	Probability Representation of Photon States and Tomographyâ€”. Journal of Russian Laser Research, 2019, 40, 503-514.	0.3	0
44	Probability representation of quantum mechanics and star product quantization. Journal of Physics: Conference Series, 2019, 1348, 012101.	0.3	8
45	Spin Kinetic Equations in the Probability Representation of Quantum Mechanics. Journal of Russian Laser Research, 2019, 40, 496-502.	0.3	3
46	Quadratic Tomography Star Product Algebra and its Classical Limit. International Journal of Theoretical Physics, 2019, 58, 543-557.	0.5	0
47	Hermite Polynomial Representation of Qubit States in Quantum Suprematism Picture. Springer Proceedings in Physics, 2019, , 289-303.	0.1	1
48	Entropic bounds between two thermal equilibrium states. Physical Review E, 2018, 97, 022128.	0.8	3
49	Center-of-Mass Tomography and Wigner Function for Multimode Photon States. International Journal of Theoretical Physics, 2018, 57, 1631-1644.	0.5	6
50	Separability and Entanglement in the Hilbert Space Reference Frames Related Through the Generic Unitary Transform for Four Level System. International Journal of Theoretical Physics, 2018, 57, 1285-1303.	0.5	1
51	Hidden Correlations and Entanglement in Single-Qudit Statesâ€”. Journal of Russian Laser Research, 2018, 39, 1-11.	0.3	9
52	Optimal Nonlinear Filtering of Quantum State. IEEE Transactions on Information Theory, 2018, 64, 4784-4791.	1.5	1
53	New entropic inequalities for qubit and unimodal Gaussian states. Physica A: Statistical Mechanics and Its Applications, 2018, 491, 64-70.	1.2	8
54	Unnormalized Tomograms and Quasidistributions of Quantum States. Theoretical and Mathematical Physics(Russian Federation), 2018, 197, 1677-1689.	0.3	1

#	ARTICLE	IF	CITATIONS
55	Characterization of the nonlinear qubit map using the probability parametrization. Europhysics Letters, 2018, 123, 50004.	0.7	0
56	Quantum suprematism picture of Triada of Malevich's squares for spin states and the parametric oscillator evolution in the probability representation of quantum mechanics. Journal of Physics: Conference Series, 2018, 1071, 012008.	0.3	20
57	New Entropic Inequalities and Hidden Correlations in Quantum Suprematism Picture of Qudit States. Entropy, 2018, 20, 692.	1.1	26
58	Symbols of Multiqubit States Admitting a Physical Interpretation*. Journal of Russian Laser Research, 2018, 39, 360-375.	0.3	5
59	Geometry and Entanglement of Two-Qubit States in the Quantum Probabilistic Representation. Entropy, 2018, 20, 630.	1.1	26
60	Tomographic Representation of Electrocardiogram Signals. Journal of Russian Laser Research, 2018, 39, 302-313.	0.3	2
61	God Plays Coins or Superposition Principle for Classical Probabilities in Quantum Suprematism Representation of Qubit States. Journal of Russian Laser Research, 2018, 39, 128-139.	0.3	20
62	From quantum carpets to quantum suprematism—the probability representation of qudit states and hidden correlations. Physica Scripta, 2018, 93, 084002.	1.2	22
63	Observables, Evolution Equation, and Stationary States Equation in the Joint Probability Representation of Quantum Mechanics. International Journal of Theoretical Physics, 2017, 56, 1183-1197.	0.5	1
64	Triangle Geometry of the Qubit State in the Probability Representation Expressed in Terms of the Triada of Malevich's Squares. Journal of Russian Laser Research, 2017, 38, 141-149.	0.3	45
65	Entropy-Energy Inequality for a Qutrit on the Example of a Three-Level Atom. Russian Physics Journal, 2017, 59, 1937-1941.	0.2	0
66	Gauge transformation of quantum states in probability representation. Journal of Physics A: Mathematical and Theoretical, 2017, 50, 155302.	0.7	6
67	Dissipative Evolution of the Qubit State in the Tomographic-Probability Representation. Journal of Russian Laser Research, 2017, 38, 311-323.	0.3	4
68	Probability Representation of Quantum Observables and Quantum States. Journal of Russian Laser Research, 2017, 38, 324-333.	0.3	37
69	Minimal sets of dequantizers and quantizers for finite-dimensional quantum systems. Physics Letters, Section A: General, Atomic and Solid State Physics, 2017, 381, 2778-2782.	0.9	8
70	Metric on the space of quantum states from relative entropy. Tomographic reconstruction. Journal of Physics A: Mathematical and Theoretical, 2017, 50, 335302.	0.7	53
71	Symplectic Tomography of De Broglie Wave. Journal of Russian Laser Research, 2017, 38, 507-515.	0.3	4
72	Tomography on oscillators. Physica Scripta, 2017, 92, 115101.	1.2	4
