

# Paul L Goethals

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/9086280/paul-l-goethals-publications-by-year.pdf>

**Version:** 2024-04-26

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

25  
papers

149  
citations

#	Paper	IF	Citations
25	A Model for and Inventory of Cybersecurity Values: Metrics and Best Practices <b>2020</b> , 305-330		1
24	A review of scientific research in defensive cyberspace operation tools and technologies. <i>Journal of Cyber Security Technology</i> , <b>2019</b> , 3, 1-46	1.3	6
23	Risk and the Five Hard Problems of Cybersecurity. <i>Risk Analysis</i> , <b>2019</b> , 39, 2119-2126	3.9	11
22	A comparative analysis of contemporary 155 mm artillery projectiles. <i>Journal of Defense Analytics and Logistics</i> , <b>2019</b> , 3, 171-192	0.4	1
21	Eliminating the Weakest Link Approach to Army Unit Readiness. <i>Decision Analysis</i> , <b>2018</b> , 15, 110-130	1.2	2
20	The development of target-based posterior process capability indices and confidence intervals. <i>International Journal of Quality Engineering and Technology</i> , <b>2017</b> , 6, 269	0.1	0
19	Integrating Customer Perception into Process Capability Measures. <i>Quality and Reliability Engineering International</i> , <b>2016</b> , 32, 1331-1345	2.6	2
18	Robust design modeling and optimization of a multi-response time series for a pharmaceutical process. <i>International Journal of Advanced Manufacturing Technology</i> , <b>2014</b> , 74, 1017-1031	3.2	4
17	Investigating estimation error reduction strategies in complex engineering systems. <i>International Journal of Data Analysis Techniques and Strategies</i> , <b>2014</b> , 6, 43	0.5	
16	Robust parameter design in resource-constrained environments: An investigation of trade-offs between costs and precision within variable processes. <i>Applied Mathematical Modelling</i> , <b>2013</b> , 37, 2394-2416	4.5	7
15	Higher-order response surface methods for nanomanufacturing process optimisation. <i>International Journal of Quality Engineering and Technology</i> , <b>2013</b> , 3, 181	0.1	1
14	Designing the optimal process mean vector for mixed multiple quality characteristics. <i>IIE Transactions</i> , <b>2012</b> , 44, 1002-1021		8
13	Solving the optimal process target problem using computer-generated experimental designs. <i>European Journal of Industrial Engineering</i> , <b>2012</b> , 6, 234	1.1	3
12	Solving multi-response optimisation problems with enhanced precision. <i>International Journal of Industrial and Systems Engineering</i> , <b>2012</b> , 11, 250	0.4	3
11	Designing the optimal mean for an asymmetrically distributed process. <i>International Journal of Productivity and Quality Management</i> , <b>2012</b> , 9, 82	0.3	1
10	A case study: applying Lean Six Sigma concepts to design a more efficient airfoil extrusion shimming process. <i>International Journal of Six Sigma and Competitive Advantage</i> , <b>2011</b> , 6, 173	1.6	11
9	The development of multi-response experimental designs for process parameter optimization. <i>International Journal of Quality and Reliability Management</i> , <b>2011</b> , 28, 628-648	2	6

8	Analysing the effects of variability measure selection on process and product optimisation. <i>International Journal of Quality Engineering and Technology</i> , <b>2011</b> , 2, 254	0.1	1
7	Reverse programming the optimal process mean problem to identify a factor space profile. <i>European Journal of Operational Research</i> , <b>2011</b> , 215, 204-217	5.6	10
6	Using higher precision-based response surface designs to determine the optimal process target. <i>International Journal of Advanced Manufacturing Technology</i> , <b>2011</b> , 56, 13-30	3.2	6
5	The development of a target-focused process capability index with multiple characteristics. <i>Quality and Reliability Engineering International</i> , <b>2011</b> , 27, 297-311	2.6	15
4	The development of a robust design methodology for time-oriented dynamic quality characteristics with a target profile. <i>Quality and Reliability Engineering International</i> , <b>2011</b> , 27, 403-414	2.6	20
3	Solving the optimal process target problem using response surface designs in heteroscedastic conditions. <i>International Journal of Production Research</i> , <b>2011</b> , 49, 3455-3478	7.8	18
2	Achieving cost robustness in processes with mixed multiple quality characteristics and dynamic variability. <i>International Journal of Experimental Design and Process Optimisation</i> , <b>2011</b> , 2, 243	0.1	1
1	Experimental investigations of estimated response surface functions with different variability measures. <i>International Journal of Experimental Design and Process Optimisation</i> , <b>2009</b> , 1, 123	0.1	10
