

Timothy D Warner

List of Publications by Citations

Source: <https://exaly.com/author-pdf/9090591/timothy-d-warner-publications-by-citations.pdf>

Version: 2024-04-24

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
248	Nonsteroid drug selectivities for cyclo-oxygenase-1 rather than cyclo-oxygenase-2 are associated with human gastrointestinal toxicity: a full in vitro analysis. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 1999 , 96, 7563-8	11.5	1251
247	Pressor effects of circulating endothelin are limited by its removal in the pulmonary circulation and by the release of prostacyclin and endothelium-derived relaxing factor. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 1988 , 85, 9797-800	11.5	1144
246	Purification and characterization of particulate endothelium-derived relaxing factor synthase from cultured and native bovine aortic endothelial cells. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 1991 , 88, 10480-4	11.5	822
245	Isoforms of nitric oxide synthase. Characterization and purification from different cell types. <i>Biochemical Pharmacology</i> , 1991 , 42, 1849-57	6	759
244	Cyclooxygenases: new forms, new inhibitors, and lessons from the clinic. <i>FASEB Journal</i> , 2004 , 18, 790-804	9	482
243	Insulin secretion from pancreatic B cells caused by L-arginine-derived nitrogen oxides. <i>Science</i> , 1992 , 255, 721-3	33.3	380
242	Circulating microRNAs as novel biomarkers for platelet activation. <i>Circulation Research</i> , 2013 , 112, 595-607	9.7	285
241	Co-induction of nitric oxide synthase and cyclo-oxygenase: interactions between nitric oxide and prostanoids. <i>British Journal of Pharmacology</i> , 1995 , 114, 1335-42	8.6	260
240	Endothelin-1 and endothelin-3 release EDRF from isolated perfused arterial vessels of the rat and rabbit. <i>Journal of Cardiovascular Pharmacology</i> , 1989 , 13 Suppl 5, S85-8; discussion S102	3.1	245
239	Effects of low-dose aspirin on acute inflammatory responses in humans. <i>Journal of Immunology</i> , 2009 , 183, 2089-96	5.3	228
238	Rat endothelin is a vasodilator in the isolated perfused mesentery of the rat. <i>European Journal of Pharmacology</i> , 1989 , 159, 325-6	5.3	225
237	Receptor-mediated release of endothelium-derived relaxing factor and prostacyclin from bovine aortic endothelial cells is coupled. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 1988 , 85, 2334-8	11.5	224
236	Cyclooxygenase-3 (COX-3): filling in the gaps toward a COX continuum?. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2002 , 99, 13371-3	11.5	205
235	Cyclo-oxygenase-2: pharmacology, physiology, biochemistry and relevance to NSAID therapy. <i>British Journal of Pharmacology</i> , 1999 , 128, 1121-32	8.6	202
234	Activation of PPARbeta/delta induces endothelial cell proliferation and angiogenesis. <i>Arteriosclerosis, Thrombosis, and Vascular Biology</i> , 2007 , 27, 63-9	9.4	201
233	COX isoforms in the cardiovascular system: understanding the activities of non-steroidal anti-inflammatory drugs. <i>Nature Reviews Drug Discovery</i> , 2006 , 5, 75-86	64.1	196
232	Regulation and subcellular location of nitrogen oxide synthases in RAW264.7 macrophages. <i>Molecular Pharmacology</i> , 1992 , 41, 615-24	4.3	194

231	Expression and activation of the farnesoid X receptor in the vasculature. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2004 , 101, 3668-73	11.5	172
230	Use of the endothelin antagonists BQ-123 and PD 142893 to reveal three endothelin receptors mediating smooth muscle contraction and the release of EDRF. <i>British Journal of Pharmacology</i> , 1993 , 110, 777-82	8.6	148
229	The farnesoid X receptor is expressed in breast cancer and regulates apoptosis and aromatase expression. <i>Cancer Research</i> , 2006 , 66, 10120-6	10.1	139
228	Anti-platelet therapy: cyclo-oxygenase inhibition and the use of aspirin with particular regard to dual anti-platelet therapy. <i>British Journal of Clinical Pharmacology</i> , 2011 , 72, 619-33	3.8	135
227	Endothelin-1 release from endothelial cells in culture is elevated both acutely and chronically by short periods of mechanical stretch. <i>Biochemical and Biophysical Research Communications</i> , 1994 , 200, 395-400	3.4	134
226	Association of MicroRNAs and YRNAs With Platelet Function. <i>Circulation Research</i> , 2016 , 118, 420-432	15.7	125
225	Farnesoid x receptor ligands inhibit vascular smooth muscle cell inflammation and migration. <i>Arteriosclerosis, Thrombosis, and Vascular Biology</i> , 2007 , 27, 2606-11	9.4	124
224	COX-2 selectivity alone does not define the cardiovascular risks associated with non-steroidal anti-inflammatory drugs. <i>Lancet, The</i> , 2008 , 371, 270-3	4.0	123
223	In the presence of strong P2Y12 receptor blockade, aspirin provides little additional inhibition of platelet aggregation. <i>Journal of Thrombosis and Haemostasis</i> , 2011 , 9, 552-61	15.4	119
222	Sputum and plasma endothelin-1 levels in exacerbations of chronic obstructive pulmonary disease. <i>Thorax</i> , 2001 , 56, 30-5	7.3	118
221	Mediation via different receptors of the vasoconstrictor effects of endothelins and sarafotoxins in the systemic circulation and renal vasculature of the anaesthetized rat. <i>British Journal of Pharmacology</i> , 1993 , 108, 776-9	8.6	111
220	Induction by endotoxin of nitric oxide synthase in the rat mesentery: lack of effect on action of vasoconstrictors. <i>British Journal of Pharmacology</i> , 1993 , 109, 265-70	8.6	106
219	Role of nuclear receptor signaling in platelets: antithrombotic effects of PPARbeta. <i>FASEB Journal</i> , 2006 , 20, 326-8	0.9	96
218	Antiplatelet actions of statins and fibrates are mediated by PPARs. <i>Arteriosclerosis, Thrombosis, and Vascular Biology</i> , 2009 , 29, 706-11	9.4	95
217	Cellular mechanisms of acetaminophen: role of cyclo-oxygenase. <i>FASEB Journal</i> , 2005 , 19, 635-7	0.9	94
216	Endothelin-1 is induced by cytokines in human vascular smooth muscle cells: evidence for intracellular endothelin-converting enzyme. <i>Molecular Pharmacology</i> , 1999 , 55, 902-9	4.3	90
215	Effects of cyclic GMP on smooth muscle relaxation. <i>Advances in Pharmacology</i> , 1994 , 26, 171-94	5.7	88
214	Cyclooxygenase-1, not cyclooxygenase-2, is responsible for physiological production of prostacyclin in the cardiovascular system. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2012 , 109, 17597-602	11.5	87

213	Origins of prostaglandin E2: involvements of cyclooxygenase (COX)-1 and COX-2 in human and rat systems. <i>Journal of Pharmacology and Experimental Therapeutics</i> , 2002 , 303, 1001-6	4.7	82
212	Characterization of the induction of nitric oxide synthase and cyclo-oxygenase in rat aorta in organ culture. <i>British Journal of Pharmacology</i> , 1997 , 121, 125-33	8.6	81
211	Aspirin blocks formation of metastatic intravascular niches by inhibiting platelet-derived COX-1/thromboxane A2. <i>Journal of Clinical Investigation</i> , 2019 , 129, 1845-1862	15.9	76
210	Role of prostacyclin versus peroxisome proliferator-activated receptor beta receptors in prostacyclin sensing by lung fibroblasts. <i>American Journal of Respiratory Cell and Molecular Biology</i> , 2006 , 34, 242-6	5.7	75
209	Endothelin 1 mediates ex vivo coronary vasoconstriction caused by exogenous and endogenous cytokines. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 1995 , 92, 2691-5	11.5	75
208	Endogenously released endothelin-1 from human pulmonary artery smooth muscle promotes cellular proliferation: relevance to pathogenesis of pulmonary hypertension and vascular remodeling. <i>American Journal of Respiratory Cell and Molecular Biology</i> , 2001 , 25, 104-10	5.7	73
207	Nongenomic signaling of the retinoid X receptor through binding and inhibiting Gq in human platelets. <i>Blood</i> , 2007 , 109, 3741-4	2.2	69
206	The flavonoid quercetin induces apoptosis and inhibits JNK activation in intimal vascular smooth muscle cells. <i>Biochemical and Biophysical Research Communications</i> , 2006 , 346, 919-25	3.4	68
205	Ex vivo assay to determine the cyclooxygenase selectivity of non-steroidal anti-inflammatory drugs. <i>British Journal of Pharmacology</i> , 1999 , 126, 1824-30	8.6	67
204	Simultaneous perfusion of rat isolated superior mesenteric arterial and venous beds: comparison of their vasoconstrictor and vasodilator responses to agonists. <i>British Journal of Pharmacology</i> , 1990 , 99, 427-33	8.6	63
203	Endogenous epoxygenases are modulators of monocyte/macrophage activity. <i>PLoS ONE</i> , 2011 , 6, e26593	3.7	62
202	PPARgamma ligands induce prostaglandin production in vascular smooth muscle cells: indomethacin acts as a peroxisome proliferator-activated receptor-gamma antagonist. <i>FASEB Journal</i> , 2003 , 17, 1925-7	0.9	61
201	Evidence that links loss of cyclooxygenase-2 with increased asymmetric dimethylarginine: novel explanation of cardiovascular side effects associated with anti-inflammatory drugs. <i>Circulation</i> , 2015 , 131, 633-42	16.7	60
200	Role of shear stress in endothelial cell morphology and expression of cyclooxygenase isoforms. <i>Arteriosclerosis, Thrombosis, and Vascular Biology</i> , 2011 , 31, 384-91	9.4	60
199	Stronger inhibition by nonsteroid anti-inflammatory drugs of cyclooxygenase-1 in endothelial cells than platelets offers an explanation for increased risk of thrombotic events. <i>FASEB Journal</i> , 2006 , 20, 2468-75	0.9	60
198	Activation of peroxisome proliferator-activated receptor-gamma by troglitazone (TGZ) inhibits human lung cell growth. <i>Journal of Cellular Biochemistry</i> , 2005 , 96, 760-74	4.7	59
197	A771726, the active metabolite of leflunomide, directly inhibits the activity of cyclo-oxygenase-2 in vitro and in vivo in a substrate-sensitive manner. <i>British Journal of Pharmacology</i> , 1999 , 127, 1589-96	8.6	59
196	Aspirin and the in vitro linear relationship between thromboxane A2-mediated platelet aggregation and platelet production of thromboxane A2. <i>Journal of Thrombosis and Haemostasis</i> , 2008 , 6, 1933-43	15.4	57

195	Evidence from receptor antagonists of an important role for ETB receptor-mediated vasoconstrictor effects of endothelin-1 in the rat kidney. <i>British Journal of Pharmacology</i> , 1994 , 111, 515-20	8.6	57
194	Reduction of platelet thromboxane A2 production ex vivo and in vivo by clopidogrel therapy. <i>Journal of Thrombosis and Haemostasis</i> , 2010 , 8, 613-5	15.4	56
193	Role for nuclear factor-kappaB and signal transducer and activator of transcription 1/interferon regulatory factor-1 in cytokine-induced endothelin-1 release in human vascular smooth muscle cells. <i>Molecular Pharmacology</i> , 2003 , 64, 923-31	4.3	55
192	Intimal smooth muscle cells as a target for peroxisome proliferator-activated receptor-gamma ligand therapy. <i>Circulation Research</i> , 2002 , 91, 210-7	15.7	55
191	Selective COX-2 inhibitors and human inflammatory bowel disease. <i>Alimentary Pharmacology and Therapeutics</i> , 1999 , 13, 1115-7	6.1	55
190	Antiplatelet effects of aspirin vary with level of P2Y ₁ receptor blockade supplied by either ticagrelor or prasugrel. <i>Journal of Thrombosis and Haemostasis</i> , 2011 , 9, 2103-5	15.4	54
189	Relationships between the endothelin and nitric oxide pathways. <i>Clinical and Experimental Pharmacology and Physiology</i> , 1999 , 26, 247-52	3	54
188	Role of Toll-like receptors 2 and 4 in the induction of cyclooxygenase-2 in vascular smooth muscle. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2005 , 102, 4637-42	11.5	53
187	Reversal of established responses to endothelin-1 in vivo and in vitro by the endothelin receptor antagonists, BQ-123 and PD 145065. <i>British Journal of Pharmacology</i> , 1994 , 112, 207-13	8.6	52
186	Neurokinins produce selective venoconstriction via NK-3 receptors in the rat mesenteric vascular bed. <i>European Journal of Pharmacology</i> , 1991 , 204, 329-34	5.3	51
185	Characterization of multiple platelet activation pathways in patients with bleeding as a high-throughput screening option: use of 96-well Optimul assay. <i>Blood</i> , 2014 , 123, e11-22	2.2	50
184	Trapping of palindromic ligands within native transthyretin prevents amyloid formation. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2010 , 107, 20483-8	11.5	50
183	Bisphenol A diglycidyl ether (BADGE) is a PPARgamma agonist in an ECV304 cell line. <i>British Journal of Pharmacology</i> , 2000 , 131, 651-4	8.6	50
182	Hydrogen sulphide pathway contributes to the enhanced human platelet aggregation in hyperhomocysteinemia. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2013 , 110, 15812-7	11.5	49
181	Clopidogrel withdrawal: is there a "rebound" phenomenon?. <i>Thrombosis and Haemostasis</i> , 2011 , 105, 211-20	7	49
180	Intravascular big endothelin increases circulating levels of endothelin-1 and prostanoids in the rabbit. <i>Biochemical Pharmacology</i> , 1990 , 39, R21-2	6	49
179	The epoxygenases CYP2J2 activates the nuclear receptor PPARalpha in vitro and in vivo. <i>PLoS ONE</i> , 2009 , 4, e7421	3.7	47
178	Characterization of ETB receptors mediating contractions induced by endothelin-1 or IRL 1620 in guinea-pig isolated airways: effects of BQ-123, FR139317 or PD 145065. <i>British Journal of Pharmacology</i> , 1994 , 111, 1009-16	8.6	47

177	LC-MS/MS confirms that COX-1 drives vascular prostacyclin whilst gene expression pattern reveals non-vascular sites of COX-2 expression. <i>PLoS ONE</i> , 2013 , 8, e69524	3.7	47
176	COX-1, and not COX-2 activity, regulates airway function: relevance to aspirin-sensitive asthma. <i>FASEB Journal</i> , 2008 , 22, 4005-10	0.9	46
175	COX-2 in cardiovascular disease. <i>Arteriosclerosis, Thrombosis, and Vascular Biology</i> , 2006 , 26, 956-8	9.4	46
174	Nitric oxide, and not vasoactive intestinal peptide, as the main neurotransmitter of vagally induced relaxation of the guinea pig stomach. <i>British Journal of Pharmacology</i> , 1994 , 113, 1197-202	8.6	46
173	Newly Formed Reticulated Platelets Undermine Pharmacokinetically Short-Lived Antiplatelet Therapies. <i>Arteriosclerosis, Thrombosis, and Vascular Biology</i> , 2017 , 37, 949-956	9.4	45
172	Cryptogenic multifocal ulcerating stenosing enteritis associated with homozygous deletion mutations in cytosolic phospholipase A2- β . <i>Gut</i> , 2014 , 63, 96-104	19.2	45
171	Comparative studies with the endothelin receptor antagonists BQ-123 and PD 142893 indicate at least three endothelin receptors. <i>Journal of Cardiovascular Pharmacology</i> , 1993 , 22 Suppl 8, S117-20	3.1	45
170	Interactions between inducible isoforms of nitric oxide synthase and cyclo-oxygenase in vivo: investigations using the selective inhibitors, 1400W and celecoxib. <i>British Journal of Pharmacology</i> , 1998 , 125, 335-40	8.6	44
169	Blockade of the purinergic P2Y ₁₂ receptor greatly increases the platelet inhibitory actions of nitric oxide. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2013 , 110, 15782-7	11.5	43
168	The contribution of tumour necrosis factor-alpha and endothelin-1 to the increase of coronary resistance in hearts from rats treated with endotoxin. <i>British Journal of Pharmacology</i> , 1995 , 116, 3309-15	8.6	43
167	Optical multichannel (optimul) platelet aggregometry in 96-well plates as an additional method of platelet reactivity testing. <i>Platelets</i> , 2011 , 22, 485-94	3.6	42
166	4-Methylnitrosamino-1-3-pyridyl-1-butanone (NNK) promotes lung cancer cell survival by stimulating thromboxane A ₂ and its receptor. <i>Oncogene</i> , 2011 , 30, 106-16	9.2	42
165	Comparison of effects of chronic and acute administration of NG-nitro-L-arginine methyl ester to the rat on inhibition of nitric oxide-mediated responses. <i>British Journal of Pharmacology</i> , 1995 , 114, 1673-9	8.6	42
164	Effects of non-steroidal anti-inflammatory drugs on cyclo-oxygenase and lipoxygenase activity in whole blood from aspirin-sensitive asthmatics vs healthy donors. <i>British Journal of Pharmacology</i> , 2002 , 137, 1031-8	8.6	41
163	Synergy between cyclo-oxygenase-2 induction and arachidonic acid supply in vivo: consequences for nonsteroidal antiinflammatory drug efficacy. <i>FASEB Journal</i> , 1999 , 13, 245-51	0.9	41
162	Cyclooxygenases 1, 2, and 3 and the production of prostaglandin I ₂ : investigating the activities of acetaminophen and cyclooxygenase-2-selective inhibitors in rat tissues. <i>Journal of Pharmacology and Experimental Therapeutics</i> , 2004 , 310, 642-7	4.7	40
161	Nomenclature for COX-2 inhibitors. <i>Lancet, The</i> , 2000 , 356, 1373-4	40	40
160	Endothelial cells have a particulate enzyme system responsible for EDRF formation: measurement by vascular relaxation. <i>Biochemical and Biophysical Research Communications</i> , 1991 , 176, 1417-23	3.4	40

159	COX-2 protects against atherosclerosis independently of local vascular prostacyclin: identification of COX-2 associated pathways implicate Rgl1 and lymphocyte networks. <i>PLoS ONE</i> , 2014 , 9, e98165	3.7	39
158	PPARbeta/delta agonists modulate platelet function via a mechanism involving PPAR receptors and specific association/repression of PKCalpha--brief report. <i>Arteriosclerosis, Thrombosis, and Vascular Biology</i> , 2009 , 29, 1871-3	9.4	39
157	Pregnane X receptor regulates drug metabolism and transport in the vasculature and protects from oxidative stress. <i>Cardiovascular Research</i> , 2012 , 93, 674-81	9.9	39
156	Endothelin receptor antagonists: actions and rationale for their development. <i>Biochemical Pharmacology</i> , 1994 , 48, 625-35	6	39
155	Influence of plasma protein on the potencies of inhibitors of cyclooxygenase-1 and -2. <i>FASEB Journal</i> , 2006 , 20, 542-4	0.9	38
154	Characterization of receptors for endothelins in the perfused arterial and venous mesenteric vasculatures of the rat. <i>British Journal of Pharmacology</i> , 1993 , 110, 687-92	8.6	38
153	Placentally derived prostaglandin E2 acts via the EP4 receptor to inhibit IL-2-dependent proliferation of CTLL-2 T cells. <i>Clinical and Experimental Immunology</i> , 2002 , 127, 263-9	6.2	36
152	Aspirin inhibits the production of proangiogenic 15(S)-HETE by platelet cyclooxygenase-1. <i>FASEB Journal</i> , 2016 , 30, 4256-4266	0.9	35
151	Histone H4 induces platelet ballooning and microparticle release during trauma hemorrhage. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2019 , 116, 17444-17449 ^{11.5}		35
150	Utility of 96-well plate aggregometry and measurement of thrombi adhesion to determine aspirin and clopidogrel effectiveness. <i>Thrombosis and Haemostasis</i> , 2009 , 102, 772-8	7	35
149	Induction of NADPH-dependent diaphorase and nitric oxide synthase activity in aortic smooth muscle and cultured macrophages. <i>Molecular Pharmacology</i> , 1992 , 41, 1163-8	4.3	35
148	Regulation of cyclo-oxygenase gene expression in rat smooth muscle cells by catalase. <i>Biochemical Pharmacology</i> , 1998 , 55, 1621-31	6	34
147	Endothelin ETA and ETB receptors mediate vasoconstriction and prostanoid release in the isolated kidney of the rat. <i>European Journal of Pharmacology</i> , 1993 , 250, 447-53	5.3	34
146	Dual antiplatelet therapy in cardiovascular disease: does aspirin increase clinical risk in the presence of potent P2Y12 receptor antagonists?. <i>Heart</i> , 2010 , 96, 1693-4	5.1	33
145	Interleukin-1beta, but not interleukin-6, enhances renal and systemic endothelin production in vivo. <i>American Journal of Physiology - Renal Physiology</i> , 2008 , 295, F446-53	4.3	33
144	A simple and sensitive bioassay method for detection of EDRF with RFL-6 rat lung fibroblasts. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 1991 , 261, H598-603	5.2	33
143	Eicosanoids in platelets and the effect of their modulation by aspirin in the cardiovascular system (and beyond). <i>British Journal of Pharmacology</i> , 2019 , 176, 988-999	8.6	33
142	Roles of endothelin receptors in the regional and systemic vascular responses to ET-1 in the anaesthetized ganglion-blocked rat: use of selective antagonists. <i>British Journal of Pharmacology</i> , 1995 , 116, 2482-6	8.6	32

141	What turns on the endothelins?. <i>Inflammation Research</i> , 1996 , 45, 51-3	7.2	32
140	Characterization of endothelin receptors mediating the effects of the endothelin/sarafotoxin peptides on autonomic neurotransmission in the rat vas deferens and guinea-pig ileum. <i>British Journal of Pharmacology</i> , 1993 , 110, 783-9	8.6	32
139	Endothelin Receptor Antagonists. <i>Cardiovascular Drug Reviews</i> , 1994 , 12, 105-122		32
138	Cytokine and lipopolysaccharide stimulation of endothelin-1 release from human internal mammary artery and saphenous vein smooth-muscle cells. <i>Journal of Cardiovascular Pharmacology</i> , 1998 , 31 Suppl 1, S348-50	3.1	32
137	Differential COX-2 induction by viral and bacterial PAMPs: Consequences for cytokine and interferon responses and implications for anti-viral COX-2 directed therapies. <i>Biochemical and Biophysical Research Communications</i> , 2013 , 438, 249-56	3.4	30
136	Thrombosis is reduced by inhibition of COX-1, but unaffected by inhibition of COX-2, in an acute model of platelet activation in the mouse. <i>PLoS ONE</i> , 2011 , 6, e20062	3.7	30
135	Expression of cyclooxygenase-2 in rat vascular smooth muscle cells is unrelated to nuclear factor-kappaB activation. <i>Life Sciences</i> , 1999 , 64, 1231-42	6.8	29
134	Effects of high flavanol dark chocolate on cardiovascular function and platelet aggregation. <i>Vascular Pharmacology</i> , 2015 , 71, 70-8	5.9	28
133	Different patterns of release of endothelium-derived relaxing factor and prostacyclin. <i>British Journal of Pharmacology</i> , 1992 , 105, 485-9	8.6	28
132	Effect of clopidogrel withdrawal on platelet reactivity and vascular inflammatory biomarkers 1 year after drug-eluting stent implantation: results of the prospective, single-centre CESSATION study. <i>Heart</i> , 2011 , 97, 1661-7	5.1	27
131	Characterization of endothelin (ET) receptors in the isolated gall bladder of the guinea-pig: evidence for an additional ET receptor subtype. <i>British Journal of Pharmacology</i> , 1994 , 112, 1244-50	8.6	27
130	Cyclooxygenase-2 acts as an endogenous brake on endothelin-1 release by human pulmonary artery smooth muscle cells: implications for pulmonary hypertension. <i>Molecular Pharmacology</i> , 2002 , 62, 1147-53	4.3	26
129	The prostacyclin-mimetic cicaprost inhibits endogenous endothelin-1 release from human pulmonary artery smooth muscle cells. <i>Journal of Cardiovascular Pharmacology</i> , 2000 , 36, S410-3	3.1	26
128	Aspirin has little additional anti-platelet effect in healthy volunteers receiving prasugrel. <i>Journal of Thrombosis and Haemostasis</i> , 2011 , 9, 2050-6	15.4	25
127	Characterization of receptors for kinins and neurokinins in the arterial and venous mesenteric vasculatures of the guinea-pig. <i>British Journal of Pharmacology</i> , 1995 , 115, 1319-25	8.6	25
126	Endothelin increases cyclic GMP levels in LLC-PK1 porcine kidney epithelial cells via formation of an endothelium-derived relaxing factor-like substance. <i>Journal of Pharmacology and Experimental Therapeutics</i> , 1991 , 259, 1102-8	4.7	25
