

Huailong Chang

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/9093548/huailong-chang-publications-by-year.pdf>

Version: 2024-04-10

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

14 papers	548 citations	12 h-index	14 g-index
14 ext. papers	623 ext. citations	5.6 avg, IF	3.05 L-index

#	Paper	IF	Citations
14	Urinary metabolomics reveals novel interactions between metal exposure and amino acid metabolic stress during pregnancy. <i>Toxicology Research</i> , 2018 , 7, 1164-1172	2.6	8
13	Prenatal exposure to bisphenol A and risk of allergic diseases in early life. <i>Pediatric Research</i> , 2017 , 81, 851-856	3.2	30
12	Pancreatic impairment and Igf2 hypermethylation induced by developmental exposure to bisphenol A can be counteracted by maternal folate supplementation. <i>Journal of Applied Toxicology</i> , 2017 , 37, 825-835	4.1	12
11	Maternal urinary cadmium concentrations in relation to preterm birth in the Healthy Baby Cohort Study in China. <i>Environment International</i> , 2016 , 94, 300-306	12.9	69
10	Epigenetic disruption and glucose homeostasis changes following low-dose maternal bisphenol A exposure. <i>Toxicology Research</i> , 2016 , 5, 1400-1409	2.6	19
9	Free and total urinary phthalate metabolite concentrations among pregnant women from the Healthy Baby Cohort (HBC), China. <i>Environment International</i> , 2016 , 88, 67-73	12.9	37
8	Perinatal exposure to low-dose bisphenol A disrupts learning/memory and DNA methylation of estrogen receptor alpha in the hippocampus. <i>Toxicology Research</i> , 2016 , 5, 828-835	2.6	10
7	Maternal urinary bisphenol A levels and infant low birth weight: A nested case-control study of the Health Baby Cohort in China. <i>Environment International</i> , 2015 , 85, 96-103	12.9	66
6	Paternal BPA exposure in early life alters Igf2 epigenetic status in sperm and induces pancreatic impairment in rat offspring. <i>Toxicology Letters</i> , 2015 , 238, 30-8	4.4	49
5	BPA-induced DNA hypermethylation of the master mitochondrial gene PGC-1 α contributes to cardiomyopathy in male rats. <i>Toxicology</i> , 2015 , 329, 21-31	4.4	43
4	F0 maternal BPA exposure induced glucose intolerance of F2 generation through DNA methylation change in Gck. <i>Toxicology Letters</i> , 2014 , 228, 192-9	4.4	73
3	Mitochondrial dysfunction in early life resulted from perinatal bisphenol A exposure contributes to hepatic steatosis in rat offspring. <i>Toxicology Letters</i> , 2014 , 228, 85-92	4.4	57
2	Early-life exposure to bisphenol a induces liver injury in rats involvement of mitochondria-mediated apoptosis. <i>PLoS ONE</i> , 2014 , 9, e90443	3.7	51
1	Prenatal exposure to bisphenol A at the reference dose impairs mitochondria in the heart of neonatal rats. <i>Journal of Applied Toxicology</i> , 2014 , 34, 1012-22	4.1	24
