#	ARTICLE	IF	CITATIONS
1	Effects of rice straw and nitrogen fertilization on greenhouse gas emissions and carbon storage in tropical flooded soil planted with rice. <i>Soil and Tillage Research</i> , 2012, 124, 119-130.	5.6	237
2	Variation of functional diversity of soil microbial community in sub-humid tropical rice-rice cropping system under long-term organic and inorganic fertilization. <i>Ecological Indicators</i> , 2017, 73, 536-543.	6.3	139
3	Soil aggregation and distribution of carbon and nitrogen in different fractions after 41 years long-term fertilizer experiment in tropical rice-rice system. <i>Geoderma</i> , 2014, 213, 280-286.	5.1	136
4	Effect of fly ash application on soil microbial response and heavy metal accumulation in soil and rice plant. <i>Ecotoxicology and Environmental Safety</i> , 2015, 114, 257-262.	6.0	101
5	Carbon and nitrogen mineralization kinetics in soil of rice-rice system under long term application of chemical fertilizers and farmyard manure. <i>European Journal of Soil Biology</i> , 2013, 58, 113-121.	3.2	94
6	Impact of elevated CO <sub>2</sub> and temperature on soil C and N dynamics in relation to CH <sub>4</sub> and N <sub>2</sub> O emissions from tropical flooded rice ( <i>Oryza sativa</i> L.). <i>Science of the Total Environment</i> , 2013, 461-462, 601-611.	8.0	93
7	Greenhouse gas emission in relation to labile soil C, N pools and functional microbial diversity as influenced by 39 years long-term fertilizer management in tropical rice. <i>Soil and Tillage Research</i> , 2013, 129, 93-105.	5.6	85
8	Characterization of rice straw from major cultivars for best alternative industrial uses to cutoff the menace of straw burning. <i>Industrial Crops and Products</i> , 2020, 143, 111919.	5.2	85
9	Tropical low land rice ecosystem is a net carbon sink. <i>Agriculture, Ecosystems and Environment</i> , 2014, 189, 127-135.	5.3	83
10	Combined effect of elevated CO <sub>2</sub> and temperature on dry matter production, net assimilation rate, C and N allocations in tropical rice ( <i>Oryza sativa</i> L.). <i>Field Crops Research</i> , 2012, 139, 71-79.	5.1	77
11	Elucidation of rice rhizosphere metagenome in relation to methane and nitrogen metabolism under elevated carbon dioxide and temperature using whole genome metagenomic approach. <i>Science of the Total Environment</i> , 2016, 542, 886-898.	8.0	73
12	Turn the wheel from waste to wealth: Economic and environmental gain of sustainable rice straw management practices over field burning in reference to India. <i>Science of the Total Environment</i> , 2021, 775, 145896.	8.0	73
13	Carbon and nitrogen fractions and stocks under 41 years of chemical and organic fertilization in a sub-humid tropical rice soil. <i>Soil and Tillage Research</i> , 2017, 170, 136-146.	5.6	70
14	Long-term effects of fertilizer and manure applications on soil quality and yields in a sub-humid tropical rice-rice system. <i>Soil Use and Management</i> , 2013, 29, 322-332.	4.9	66
15	Micronutrients (Fe, Mn, Zn and Cu) balance under long-term application of fertilizer and manure in a tropical rice-rice system. <i>Journal of Soils and Sediments</i> , 2016, 16, 737-747.	3.0	60
16	Comparative assessment of urea briquette applicators on greenhouse gas emission, nitrogen loss and soil enzymatic activities in tropical lowland rice. <i>Agriculture, Ecosystems and Environment</i> , 2018, 252, 178-190.	5.3	58
17	Effects of 42-year long-term fertilizer management on soil phosphorus availability, fractionation, adsorption-desorption isotherm and plant uptake in flooded tropical rice. <i>Crop Journal</i> , 2015, 3, 387-395.	5.2	57
18	Effect of long-term application of organic amendment on C storage in relation to global warming potential and biological activities in tropical flooded soil planted to rice. <i>Nutrient Cycling in Agroecosystems</i> , 2012, 94, 273-285.	2.2	56

#	ARTICLE	IF	CITATIONS
19	Effect of fish species on methane and nitrous oxide emission in relation to soil C, N pools and enzymatic activities in rainfed shallow lowland rice-fish farming system. <i>Agriculture, Ecosystems and Environment</i> , 2013, 176, 53-62.	5.3	55
20	Influence of elevated carbon dioxide and temperature on belowground carbon allocation and enzyme activities in tropical flooded soil planted with rice. <i>Environmental Monitoring and Assessment</i> , 2013, 185, 8659-8671.	2.7	50
21	Dynamics of soil organic carbon mineralization and C fractions in paddy soil on application of rice husk biochar. <i>Biomass and Bioenergy</i> , 2018, 115, 1-9.	5.7	46
22	Novel <i>Trichoderma</i> strains isolated from tree barks as potential biocontrol agents and biofertilizers for direct seeded rice. <i>Microbiological Research</i> , 2018, 214, 83-90.	5.3	46
23	Mechanism of plant mediated methane emission in tropical lowland rice. <i>Science of the Total Environment</i> , 2019, 651, 84-92.	8.0	44
24	Effect of elevated carbon dioxide and temperature on phosphorus uptake in tropical flooded rice ( <i>Oryza sativa</i> L.). <i>European Journal of Agronomy</i> , 2014, 53, 28-37.	4.1	40
25	Net ecosystem CO <sub>2</sub> exchange and carbon cycling in tropical lowland flooded rice ecosystem. <i>Nutrient Cycling in Agroecosystems</i> , 2013, 95, 133-144.	2.2	39
26	Combined application of rice husk biochar and fly ash improved the yield of lowland rice. <i>Soil Research</i> , 2016, 54, 451.	1.1	39
27	Seasonal fluctuation in three mode of greenhouse gases emission in relation to soil labile carbon pools in degraded mangrove, Sundarban, India. <i>Science of the Total Environment</i> , 2020, 705, 135909.	8.0	38
28	Interaction effects of elevated CO <sub>2</sub> and temperature on microbial biomass and enzyme activities in tropical rice soils. <i>Environmental Monitoring and Assessment</i> , 2011, 182, 555-569.	2.7	37
29	Carbon fractions and productivity under changed climate scenario in soybean-wheat system. <i>Field Crops Research</i> , 2013, 145, 10-20.	5.1	37
30	Effect of Fly Ash Deposition on Photosynthesis, Growth and Yield of Rice. <i>Bulletin of Environmental Contamination and Toxicology</i> , 2014, 93, 106-112.	2.7	37
31	Submergence tolerance in relation to application time of nitrogen and phosphorus in rice ( <i>Oryza</i> ) Tj ETQq1 1 0.784314 rgBT /Overloc	4.2	35
32	Root Exudates of Rice Cultivars Affect Rhizospheric Phosphorus Dynamics in Soils with Different Phosphorus Statuses. <i>Communications in Soil Science and Plant Analysis</i> , 2013, 44, 1643-1658.	1.4	34
33	Metagenomic assessment of methane production-oxidation and nitrogen metabolism of long term manured systems in lowland rice paddy. <i>Science of the Total Environment</i> , 2017, 586, 1245-1253.	8.0	32
34	Soil respiration, labile carbon pools, and enzyme activities as affected by tillage practices in a tropical rice-maize-cowpea cropping system. <i>Environmental Monitoring and Assessment</i> , 2014, 186, 4223-4236.	2.7	31
35	Assessment of ecosystem services of rice farms in eastern India. <i>Ecological Processes</i> , 2019, 8, .	3.9	29
36	A unique bacterial and archaeal diversity make mangrove a green production system compared to rice in wetland ecology: A metagenomic approach. <i>Science of the Total Environment</i> , 2021, 781, 146713.	8.0	27

#	ARTICLE	IF	CITATIONS
37	Soil loss tolerance limits for planning of soil conservation measures in Shivalikâ€“Himalayan region of India. <i>Catena</i> , 2008, 73, 117-124.	5.0	24
38	Ecosystem services in different agro-climatic zones in eastern India: impact of land use and land cover change. <i>Environmental Monitoring and Assessment</i> , 2019, 191, 98.	2.7	24
39	Seed Biopriming With <i>Trichoderma</i> Strains Isolated From Tree Bark Improves Plant Growth, Antioxidative Defense System in Rice and Enhance Straw Degradation Capacity. <i>Frontiers in Microbiology</i> , 2021, 12, 633881.	3.5	24
40	Postâ€“flood nitrogen and basal phosphorus management affects survival, metabolic changes and anti-oxidant enzyme activities of submerged rice ( <i>Oryza sativa</i> ). <i>Functional Plant Biology</i> , 2014, 41, 1284.	2.1	23
41	Net ecosystem methane and carbon dioxide exchange in relation to heat and carbon balance in lowland tropical rice. <i>Ecological Engineering</i> , 2016, 95, 364-374.	3.6	23
42	Impact of elevated CO <sub>2</sub> , flooding, and temperature interaction on heterotrophic nitrogen fixation in tropical rice soils. <i>Biology and Fertility of Soils</i> , 2011, 47, 25-30.	4.3	22
43	Long-term organic nutrient managements foster the biological properties and carbon sequestering capability of a wetland rice soil. <i>Archives of Agronomy and Soil Science</i> , 2013, 59, 1607-1624.	2.6	21
44	Environmental constraintsâ€™ sensitivity of soil organic carbon decomposition to temperature, management practices and climate change. <i>Ecological Indicators</i> , 2019, 107, 105644.	6.3	21
45	Effect of Nutrient Application on Growth, Metabolic and Enzymatic Activities of Rice Seedlings During Flooding Stress and Subsequent Reâ€“Aeration. <i>Journal of Agronomy and Crop Science</i> , 2015, 201, 138-151.	3.5	19
46	Nitrate leaching, nitrous oxide emission and N use efficiency of aerobic rice under different N application strategy. <i>Archives of Agronomy and Soil Science</i> , 2018, 64, 465-479.	2.6	19
47	Interrelationship of pH, Organic Acids, and Phosphorus Concentration in Soil Solution of Rhizosphere and Non-rhizosphere of Wheat and Rice Crops. <i>Communications in Soil Science and Plant Analysis</i> , 2003, 34, 231-245.	1.4	18
48	Soil quality in mangrove ecosystem deteriorates due to rice cultivation. <i>Ecological Engineering</i> , 2016, 90, 163-169.	3.6	17
49	Enhanced labile carbon flow in soil-microbes-plant-atmospheric continuum in rice under elevated CO <sub>2</sub> and temperature leads to positive climate change feed-back. <i>Applied Soil Ecology</i> , 2020, 155, 103657.	4.3	16
50	Low carbon resource conservation techniques for energy savings, carbon gain and lowering GHGs emission in lowland transplanted rice. <i>Soil and Tillage Research</i> , 2017, 174, 45-57.	5.6	15
51	Greenhouse gas emissions and energy exchange in wet and dry season rice: eddy covariance-based approach. <i>Environmental Monitoring and Assessment</i> , 2018, 190, 423.	2.7	15
52	<i>Trichoderma</i> -mediated rice straw compost promotes plant growth and imparts stress tolerance. <i>Environmental Science and Pollution Research</i> , 2021, 28, 44014-44027.	5.3	15
53	Crop Residue Management and Greenhouse Gases Emissions in Tropical Rice Lands. , 2018, , 323-335.		14
54	Characterization of land surface energy fluxes in a tropical lowland rice paddy. <i>Theoretical and Applied Climatology</i> , 2019, 136, 157-168.	2.8	14

#	ARTICLE	IF	CITATIONS
55	Fly Ash Addition Affects Microbial Biomass and Carbon Mineralization in Agricultural Soils. Bulletin of Environmental Contamination and Toxicology, 2014, 92, 160-164.	2.7	13
56	Effect of nitrogen fertilization on methane and carbon dioxide production potential in relation to labile carbon pools in tropical flooded rice soils in eastern India. Archives of Agronomy and Soil Science, 2014, 60, 1329-1344.	2.6	13
57	Long-term effect of rice-based farming systems on soil health. Environmental Monitoring and Assessment, 2015, 187, 296.	2.7	13
58	Elevated carbon dioxide and temperature imparted intrinsic drought tolerance in aerobic rice system through enhanced exopolysaccharide production and rhizospheric activation. Agriculture, Ecosystems and Environment, 2018, 268, 52-60.	5.3	13
59	Long-term manure application for crop yield stability and carbon sequestration in subtropical region. Soil Use and Management, 2021, 37, 264-276.	4.9	13
60	Climate Smart Agriculture. Green Energy and Technology, 2020, , .	0.6	13
61	Growth and nitrogen allocation of dry season tropical rice as a result of carbon dioxide fertilization and elevated night time temperature. Nutrient Cycling in Agroecosystems, 2015, 103, 293-309.	2.2	12
62	Elucidation of dominant energy metabolic pathways of methane, sulphur and nitrogen in respect to mangrove-degradation for climate change mitigation. Journal of Environmental Management, 2022, 303, 114151.	7.8	11
63	Weed community composition after 43 years of long-term fertilization in tropical rice-rice system. Agriculture, Ecosystems and Environment, 2014, 197, 301-308.	5.3	10
64	Combined application of silica and nitrogen alleviates the damage of flooding stress in rice. Crop and Pasture Science, 2015, 66, 679.	1.5	10
65	Partitioning of eddy covariance-measured net ecosystem exchange of CO <sub>2</sub> in tropical lowland paddy. Paddy and Water Environment, 2020, 18, 623-636.	1.8	9
66	Carbon and nutrient dynamics under long-term nutrient management in tropical rice-wheat-jute system. Archives of Agronomy and Soil Science, 2018, 64, 1595-1607.	2.6	8
67	Gaseous carbon emission in relation to soil carbon fractions and microbial diversities as affected by organic amendments in tropical rice soil. Archives of Agronomy and Soil Science, 2014, 60, 1345-1361.	2.6	7
68	Dynamics of net ecosystem methane exchanges on temporal scale in tropical lowland rice. Atmospheric Environment, 2018, 191, 291-301.	4.1	7
69	Effect of nutrient application and water turbidity on submergence tolerance of rice (<i>Oryza</i> Tj ETQq1 1 0.784314 rgBT /Overlock 101	2.5	6
70	Temporal Variation of Energy Fluxes During Dry Season in Tropical Lowland Rice. Mapan - Journal of Metrology Society of India, 2018, 33, 241-251.	1.5	6
71	Carbon Pools and Associated Soil Enzymatic Activities as Influenced by Long-term Application of Fertilizers and Manure in Lowland Rice Soil. Journal of the Indian Society of Soil Science, 2015, 63, 310.	0.2	6
72	A Quantitative Methodology for Estimating Soil Loss Tolerance Limits for Three States of Northern India. Agroecology and Sustainable Food Systems, 2011, 35, 276-292.	0.9	5

#	ARTICLE	IF	CITATIONS
73	APPLICATION TIME OF NITROGEN AND PHOSPHORUS FERTILIZATION MITIGATES THE ADVERSE EFFECT OF SUBMERGENCE IN RICE ( <i>ORYZA SATIVA</i> L.). <i>Experimental Agriculture</i> , 2015, 51, 522-539.	0.9	5
74	Key Metabolic Pathways of Sulfur Metabolism and Bacterial Diversity under Elevated CO <sub>2</sub> and Temperature in Lowland Rice: A Metagenomic Approach. <i>Geomicrobiology Journal</i> , 2020, 37, 13-21.	2.0	5
75	Partitioning of total soil respiration into root, rhizosphere and basal-soil CO <sub>2</sub> fluxes in contrasting rice production systems. <i>Soil Research</i> , 2020, 58, 592.	1.1	4
76	Challenges, opportunities, and climate change adaptation strategies of mangrove-agriculture ecosystem in the Sundarbans, India: a review. <i>Wetlands Ecology and Management</i> , 2022, 30, 191-206.	1.5	4
77	Modification of Phosphate Uptake Model Considering Changing Buffering Capacity of Soil and Release Threshold Limit of Phosphorus in Soil due to Rhizosphere Effect. <i>Communications in Soil Science and Plant Analysis</i> , 2005, 35, 1773-1792.	1.4	3
78	Characterization of carbon dioxide fluxes in tropical lowland flooded rice ecology. <i>Paddy and Water Environment</i> , 2021, 19, 539.	1.8	3
79	Efficient Lignin Decomposing Microbial Consortium to Hasten Rice-Straw Composting with Moderate GHGs Fluxes. <i>Waste and Biomass Valorization</i> , 2022, 13, 481-496.	3.4	3
80	Soil carbon dynamics and enzymatic activities under different resource conservation technologies in rice-green gram cropping system. <i>Oryza</i> , 2018, 55, 292.	0.4	3
81	Mitigation of greenhouse gases emission through value-added straw amendments in rice-green gram system. <i>International Journal of Environmental Science and Technology</i> , 2023, 20, 1019-1036.	3.5	3
82	Trade-off between soil aggregate stability and carbon decomposition under 44 years long-term integrated nutrient management in rice-wheat-jute system. <i>Archives of Agronomy and Soil Science</i> , 2023, 69, 417-430.	2.6	3
83	Soil Metagenome Revealed Contrasting Anammox Bacterial Diversity in Coastal Mangrove and Rice Ecology. <i>Geomicrobiology Journal</i> , 0, , 1-10.	2.0	3
84	Changes in Soil-Plant-Microbes Interactions in Anticipated Climatic Change Conditions. , 2017, , 261-275.		2
85	Carbon Dynamics in Soil-Plant-Environment System on Climate Change Perspective: Special Reference to Rice. , 2018, , 3-23.		2
86	Structural diversity and efficacy of culturable cellulose decomposing bacteria isolated from rice-pulse resource conservation practices. <i>Journal of Basic Microbiology</i> , 2019, 59, 963-978.	3.3	2
87	Modification of Phosphate Uptake Model Considering Changing Buffering Capacity of Soil and Release Threshold Limit of Phosphorus in Soil due to Rhizosphere Effect#. <i>Communications in Soil Science and Plant Analysis</i> , 2004, 35, 1773-1792.	1.4	1
88	Crop Management for Climate-Smart Agriculture. <i>Green Energy and Technology</i> , 2020, , 85-111.	0.6	1
89	Seasonal quantification of carbonate dissolution and CO <sub>2</sub> emission dynamics in the Indian Sundarbans estuaries. <i>Regional Studies in Marine Science</i> , 2022, 53, 102413.	0.7	1
90	Soil quality assessment using soil organic carbon, total nitrogen and microbial properties in hilly agro-ecosystem. <i>Applied Biological Research</i> , 2018, 20, 1.	0.2	0

#	ARTICLE	IF	CITATIONS
91	Soil Carbon Dynamics in Different Land-Use and Management Systems in Tropical Coastal Regions of India. , 2020, , 89-102.		0
92	Mitigation of Greenhouse Gases Emission and Low Carbon Technologies. Green Energy and Technology, 2020, , 129-153.	0.6	0
