|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Omega-3 fatty acid supplementation attenuates oxidative stress, inflammation, and tubulointerstitial fibrosis in the remnant kidney. <i>American Journal of Physiology - Renal Physiology</i> , 2009, 297, F895-F903.                                                | 2.7 | 123       |
| 2  | New clinical criteria for septic shock: serum lactate level as new emerging vital sign. <i>Journal of Thoracic Disease</i> , 2016, 8, 1388-1390.                                                                                                                     | 1.4 | 102       |
| 3  | Effect of Sodium Bicarbonate Administration on Mortality in Patients with Lactic Acidosis: A Retrospective Analysis. <i>PLoS ONE</i> , 2013, 8, e65283.                                                                                                              | 2.5 | 66        |
| 4  | Omega-3 fatty acid supplementation increases 1,25-dihydroxyvitamin D and fetuin-A levels in dialysis patients. <i>Nutrition Research</i> , 2012, 32, 495-502.                                                                                                        | 2.9 | 41        |
| 5  | Lactate Clearance and Vasopressor Seem to Be Predictors for Mortality in Severe Sepsis Patients with Lactic Acidosis Supplementing Sodium Bicarbonate: A Retrospective Analysis. <i>PLoS ONE</i> , 2015, 10, e0145181.                                               | 2.5 | 40        |
| 6  | The Effects of Omega-3 Fatty Acid on Vitamin D Activation in Hemodialysis Patients: A Pilot Study. <i>Marine Drugs</i> , 2015, 13, 741-755.                                                                                                                          | 4.6 | 28        |
| 7  | Vascular calcification score on plain radiographs of the feet as a predictor of peripheral arterial disease in patients with chronic kidney disease. <i>International Urology and Nephrology</i> , 2010, 42, 773-780.                                                | 1.4 | 24        |
| 8  | Impact of Blood or Erythrocyte Membrane Fatty Acids for Disease Risk Prediction: Focusing on Cardiovascular Disease and Chronic Kidney Disease. <i>Nutrients</i> , 2018, 10, 1454.                                                                                   | 4.1 | 22        |
| 9  | Cardioprotective Effects of $\omega$ -3 PUFAs in Chronic Kidney Disease. <i>BioMed Research International</i> , 2013, 2013, 1-8.                                                                                                                                     | 1.9 | 20        |
| 10 | Effects of low-dose niacin on dyslipidemia and serum phosphorus in patients with chronic kidney disease. <i>Kidney Research and Clinical Practice</i> , 2013, 32, 21-26.                                                                                             | 2.2 | 18        |
| 11 | Omega-3 Fatty Acids Upregulate SIRT1/3, Activate PGC-1 $\alpha$ via Deacetylation, and Induce Nrf1 Production in 5/6 Nephrectomy Rat Model. <i>Marine Drugs</i> , 2021, 19, 182.                                                                                     | 4.6 | 18        |
| 12 | Early technical complications and long-term survival of urgent peritoneal dialysis according to break-in periods. <i>PLoS ONE</i> , 2018, 13, e0206426.                                                                                                              | 2.5 | 17        |
| 13 | Serum myostatin levels are associated with abdominal aortic calcification in dialysis patients. <i>Kidney Research and Clinical Practice</i> , 2019, 38, 481-489.                                                                                                    | 2.2 | 17        |
| 14 | Associations between Oxidized LDL to LDL Ratio, HDL and Vascular Calcification in the Feet of Hemodialysis Patients. <i>Journal of Korean Medical Science</i> , 2009, 24, S115.                                                                                      | 2.5 | 16        |
| 15 | The Effect of Mycophenolate Mofetil versus Cyclosporine as Combination Therapy with Low Dose Corticosteroids in High-risk Patients with Idiopathic Membranous Nephropathy: a Multicenter Randomized Trial. <i>Journal of Korean Medical Science</i> , 2018, 33, e74. | 2.5 | 16        |
| 16 | Supplementary nutrients for prevention of vascular calcification in patients with chronic kidney disease. <i>Korean Journal of Internal Medicine</i> , 2019, 34, 459-469.                                                                                            | 1.7 | 13        |
| 17 | Clinical Outcomes of Peritoneal Dialysis in End-Stage Renal Disease Patients with Liver Cirrhosis: A Propensity Score Matching Study. <i>Peritoneal Dialysis International</i> , 2017, 37, 314-320.                                                                  | 2.3 | 12        |
| 18 | Comparison of the Efficacy and Safety of Tacrolimus and Low-Dose Corticosteroid with High-Dose Corticosteroid for Minimal Change Nephrotic Syndrome in Adults. <i>Journal of the American Society of Nephrology: JASN</i> , 2021, 32, 199-210.                       | 6.1 | 12        |

| #  | ARTICLE                                                                                                                                                                                                                                                              | IF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Vascular calcification on plain radiographs is associated with carotid intima media thickness, malnutrition and cardiovascular events in dialysis patients: a prospective observational study. <i>BMC Nephrology</i> , 2013, 14, 27.                                 | 1.8 | 11        |
| 20 | Effect of Omega-3 Fatty Acid on the Fatty Acid Content of the Erythrocyte Membrane and Proteinuria in Patients with Diabetic Nephropathy. <i>International Journal of Endocrinology</i> , 2015, 2015, 1-8.                                                           | 1.5 | 11        |
| 21 | Resistive index as a predictor of renal progression in patients with moderate renal dysfunction regardless of angiotensin converting enzyme inhibitor or angiotensin receptor antagonist medication. <i>Kidney Research and Clinical Practice</i> , 2017, 36, 58-67. | 2.2 | 11        |
| 22 | Minimal change glomerulonephritis following the second dose of the Moderna COVID-19 vaccine. <i>QJM - Monthly Journal of the Association of Physicians</i> , 2022, 115, 490-491.                                                                                     | 0.5 | 9         |
| 23 | Vascular Calcification on Plain Radiographs Is Related with the Severity of Lesions Detected by Coronary Angiography in Dialysis Patients. <i>Tohoku Journal of Experimental Medicine</i> , 2015, 235, 135-144.                                                      | 1.2 | 8         |
| 24 | Effect of Omega-3 Fatty Acid on STAMP2 Expression in the Heart and Kidney of 5/6 Nephrectomy Rat Model. <i>Marine Drugs</i> , 2018, 16, 398.                                                                                                                         | 4.6 | 8         |
| 25 | Abdominal aortic calcification score among several vascular calcification scores of plain radiograph is the most reliable predictor of severe coronary artery calcification in dialysis patients. <i>Renal Failure</i> , 2017, 39, 729-735.                          | 2.1 | 7         |
| 26 | Combined Treatment with Omega-3 Fatty Acid and Cholecalciferol Increases 1,25-Dihydroxyvitamin D Levels by Modulating Dysregulation of Vitamin D Metabolism in 5/6 Nephrectomy Rats. <i>Nutrients</i> , 2019, 11, 2903.                                              | 4.1 | 7         |
| 27 | Myostatin/Appendicular Skeletal Muscle Mass (ASM) Ratio, Not Myostatin, Is Associated with Low Handgrip Strength in Community-Dwelling Older Women. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 7344.                       | 2.6 | 6         |
| 28 | Omega-3 fatty acid decreases oleic acid by decreasing SCD-1 expression in the liver and kidney of a cyclosporine-induced nephropathy rat model. <i>Renal Failure</i> , 2019, 41, 211-219.                                                                            | 2.1 | 5         |
| 29 | Comparison of clinical outcome between incremental peritoneal dialysis and conventional peritoneal dialysis: a propensity score matching study. <i>Renal Failure</i> , 2021, 43, 1222-1228.                                                                          | 2.1 | 5         |
| 30 | Efficacy and safety of CKD-11101 (darbepoetin-alfa proposed biosimilar) compared with NESP in anaemic chronic kidney disease patients not on dialysis. <i>Current Medical Research and Opinion</i> , 2019, 35, 1111-1118.                                            | 1.9 | 3         |
| 31 | SP452EARLY TECHNICAL COMPLICATIONS AND LONG TERM SURVIVAL OF URGENT PERITONEAL DIALYSIS ACCORDING TO BREAK-IN PERIOD. <i>Nephrology Dialysis Transplantation</i> , 2016, 31, i243-i243.                                                                              | 0.7 | 2         |
| 32 | Factors Influencing Survival According to Elapsed Time in Peritoneal Dialysis Patients. <i>Renal Failure</i> , 2012, 34, 559-565.                                                                                                                                    | 2.1 | 1         |
| 33 | A Case of Condyloma Acuminata in a Virgin Systemic Lupus Erythematosus Patient. <i>Journal of Rheumatic Diseases</i> , 2014, 21, 87.                                                                                                                                 | 1.1 | 1         |
| 34 | FP384EFFECT OF OMEGA-3 FATTY ACID AND MENAQUINONE-7 ON OSTEOPENIA AND SARCOPENIA IN ADENINE AND LOW PROTEIN DIET INDUCED UREMIC RATS. <i>Nephrology Dialysis Transplantation</i> , 2018, 33, i162-i163.                                                              | 0.7 | 1         |
| 35 | Aluminum Clearance by Hemodialysis in Chronic Renal Failure. <i>Korean Journal of Occupational and Environmental Medicine</i> , 2002, 14, 78.                                                                                                                        | 0.4 | 1         |
| 36 | Sex hormones impact vascular calcification and fracture in dialysis patients. <i>Kidney Research and Clinical Practice</i> , 2020, 39, 236-238.                                                                                                                      | 2.2 | 1         |

| #  | ARTICLE                                                                                                                                                                                                               | IF  | CITATIONS |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | SP361EFFECT OF OMEGA-3 FATTY ACIDS AND VITAMIN D ON ELONGASE-6 EXPRESSION AND OLEIC ACID CONTENT IN 5/6 NEPHRECTOMY RAT MODEL. Nephrology Dialysis Transplantation, 2016, 31, i209-i209.                              | 0.7 | 0         |
| 38 | MP255RESISTIVE INDEX AS A PREDICTOR OF RENAL PROGRESSION IN PATIENTS WITH MODERATE RENAL DYSFUNCTION REGARDLESS OF ACEI OR ARB MEDICATION. Nephrology Dialysis Transplantation, 2016, 31, i425-i425.                  | 0.7 | 0         |
| 39 | SP566RELATIONSHIP BETWEEN BLOOD MYOSTATIN LEVELS AND VASCULAR CALCIFICATION IN PATIENTS WITH DIALYSIS PATIENTS. Nephrology Dialysis Transplantation, 2018, 33, i538-i539.                                             | 0.7 | 0         |
| 40 | P0326EFFECT OF PRAVASTATIN ON ERYTHROCYTE MEMBRANE FATTY ACID CONTENTS IN PATIENTS WITH CHRONIC KIDNEY DISEASE. Nephrology Dialysis Transplantation, 2020, 35, .                                                      | 0.7 | 0         |
| 41 | Effect of pravastatin on erythrocyte membrane fatty acid contents in patients with chronic kidney disease. Kidney Research and Clinical Practice, 2021, 40, 392-400.                                                  | 2.2 | 0         |
| 42 | MO606: Indoxyl Sulfate is Predictor for Sarcopenia but Myostatin is Indicator For Muscle Mass in Patients with Chronic Kidney Disease: Analysis From Recovery Study. Nephrology Dialysis Transplantation, 2022, 37, . | 0.7 | 0         |
