citing authors

#	ARTICLE	IF	CITATIONS
1	Seismic evidence for a thermochemical mantle plume underplating the lithosphere of the Ontong Java Plateau. <i>Communications Earth &amp; Environment</i> , 2021, 2, .	6.8	19
2	Interrelation of the stagnant slab, Ontong Java Plateau, and intraplate volcanism as inferred from seismic tomography. <i>Scientific Reports</i> , 2021, 11, 20966.	3.3	9
3	Persistent Long-Period Signals Recorded by an OBS Array in the Western-Central Pacific: Activity of Ambrym Volcano in Vanuatu. <i>Geophysical Research Letters</i> , 2020, 47, e2020GL089108.	4.0	7
4	Characterization of Crustal and Uppermost-Mantle Seismic Discontinuities in the Ontong Java Plateau. <i>Journal of Geophysical Research: Solid Earth</i> , 2019, 124, 7155-7170.	3.4	17
5	High QScS beneath the Ontong Java Plateau. <i>Earth, Planets and Space</i> , 2019, 71, .	2.5	6
6	The OJP array: seismological and electromagnetic observation on seafloor and islands in the Ontong Java Plateau. <i>JAMSTEC Report of Research and Development</i> , 2018, 26, 54-64.	0.2	11
7	Mantle transition zone beneath a normal seafloor in the northwestern Pacific: Electrical conductivity, seismic thickness, and water content. <i>Earth and Planetary Science Letters</i> , 2017, 462, 189-198.	4.4	12
8	Unusually deep Bonin earthquake of 30 May 2015: A precursory signal to slab penetration?. <i>Earth and Planetary Science Letters</i> , 2017, 459, 221-226.	4.4	15
9	Mantle seismic anisotropy beneath NE China and implications for the lithospheric delamination hypothesis beneath the southern Great Xing'an range. <i>Earth and Planetary Science Letters</i> , 2017, 471, 32-41.	4.4	27
10	Effects of shallow-layer reverberation on measurement of teleseismic P-wave travel times for ocean bottom seismograph data. <i>Earth, Planets and Space</i> , 2017, 69, .	2.5	5
11	A database of global seismic travel times. <i>JAMSTEC Report of Research and Development</i> , 2017, 24, 23-29.	0.2	3
12	Adjoint tomography of the crust and upper mantle structure beneath the Kanto region using broadband seismograms. <i>Progress in Earth and Planetary Science</i> , 2017, 4, .	3.0	8
13	Mantle plumes beneath the South Pacific superswell revealed by finite frequency $P$ tomography using regional seafloor and island data. <i>Geophysical Research Letters</i> , 2016, 43, 11,628.	4.0	16
14	CSMAP: Cross Section Selector and Tomogram Generator. <i>JAMSTEC Report of Research and Development</i> , 2016, 22, 31-38.	0.2	1
15	Deep Earth Structure - Subduction Zone Structure in the Mantle Transition Zone. , 2015, , 641-654.		21
16	Receiver function images of the mantle transition zone beneath NE China: New constraints on intraplate volcanism, deep subduction and their potential link. <i>Earth and Planetary Science Letters</i> , 2015, 412, 101-111.	4.4	60
17	High resolution 3-D crustal structure beneath NE China from joint inversion of ambient noise and receiver functions using NECESSArray data. <i>Earth and Planetary Science Letters</i> , 2015, 416, 1-11.	4.4	70
18	Rapid lateral variation of P-wave velocity at the base of the mantle near the edge of the Large-Low Shear Velocity Province beneath the western Pacific. <i>Geophysical Journal International</i> , 2015, 200, 1052-1065.	2.4	7

#	ARTICLE	IF	CITATIONS
19	Lg attenuation in northeast China using NECESSArray data. <i>Geophysical Journal International</i> , 2015, 200, 67-76.	2.4	13
20	Changbaishan volcanism in northeast China linked to subduction-induced mantle upwelling. <i>Nature Geoscience</i> , 2014, 7, 470-475.	12.9	230
21	Crustal structure beneath NE China imaged by NECESSArray receiver function data. <i>Earth and Planetary Science Letters</i> , 2014, 398, 48-57.	4.4	92
22	Upper mantle tomography in the northwestern Pacific region using triplicated <i>P</i> waves. <i>Journal of Geophysical Research: Solid Earth</i> , 2014, 119, 7667-7685.	3.4	33
23	Towards Mapping the Three-Dimensional Distribution of Water in the Transition Zone from P-Velocity Tomography and 660-Km Discontinuity Depths. <i>Geophysical Monograph Series</i> , 2013, , 237-249.	0.1	23
24	Melting of dehydrated oceanic crust from the stagnant slab and of the hydrated mantle transition zone: Constraints from Cenozoic alkaline basalts in eastern China. <i>Chemical Geology</i> , 2013, 359, 32-48.	3.3	117
25	Subducted slabs stagnant above, penetrating through, and trapped below the 660 km discontinuity. <i>Journal of Geophysical Research: Solid Earth</i> , 2013, 118, 5920-5938.	3.4	411
26	Finite frequency whole mantle <i>P</i> wave tomography: Improvement of subducted slab images. <i>Geophysical Research Letters</i> , 2013, 40, 5652-5657.	4.0	167
27	Visualization of geoscience data on Google Earth: Development of a data converter system for seismic tomographic models. <i>Computers and Geosciences</i> , 2010, 36, 373-382.	4.2	40
28	Very broadband analysis of a swarm of very low frequency earthquakes and tremors beneath Kii Peninsula, SW Japan. <i>Geophysical Research Letters</i> , 2010, 37, .	4.0	20
29	Fast P- and S-wave velocities associated with the "cold" stagnant slab beneath the northern Philippine Sea. <i>Physics of the Earth and Planetary Interiors</i> , 2010, 179, 1-6.	1.9	6
30	Three-dimensional imaging of electrical conductivity in the mantle transition zone beneath the North Pacific Ocean by a semi-global induction study. <i>Physics of the Earth and Planetary Interiors</i> , 2010, 183, 252-269.	1.9	38
31	Seismic discontinuities in the mantle transition zone and at the top of the lower mantle beneath eastern China and Korea: Influence of the stagnant Pacific slab. <i>Physics of the Earth and Planetary Interiors</i> , 2010, 183, 288-295.	1.9	30
32	Depths of the 410-km and 660-km discontinuities in and around the stagnant slab beneath the Philippine Sea: Is water stored in the stagnant slab?. <i>Physics of the Earth and Planetary Interiors</i> , 2010, 183, 270-279.	1.9	41
33	Tearing of Stagnant Slab. <i>Science</i> , 2009, 324, 1173-1175.	12.6	83
34	Seismological evidence for compositional variations at the base of the mantle transition zone under Japan Islands. <i>Gondwana Research</i> , 2009, 16, 482-490.	6.0	13
35	Stagnant Slab: A Review. <i>Annual Review of Earth and Planetary Sciences</i> , 2009, 37, 19-46.	11.0	314
36	A joint interpretation of electromagnetic and seismic tomography models suggests the mantle transition zone below Europe is dry. <i>Earth and Planetary Science Letters</i> , 2009, 281, 249-257.	4.4	57

#	ARTICLE	IF	CITATIONS
37	P-wave tomography of the mantle beneath the South Pacific Superswell revealed by joint ocean floor and islands broadband seismic experiments. <i>Physics of the Earth and Planetary Interiors</i> , 2009, 172, 268-277.	1.9	21
38	South Pacific mantle plumes imaged by seismic observation on islands and seafloor. <i>Geochemistry, Geophysics, Geosystems</i> , 2009, 10, .	2.5	68
39	Multiscale waveform tomography with two-step model parameterization. <i>Journal of Geophysical Research</i> , 2009, 114, .	3.3	9
40	Development of the global seismic travel time database at JAMSTEC/IFREE. <i>JAMSTEC Report of Research and Development</i> , 2009, 2009, 163-172.	0.2	0
41	High temperature anomalies oceanward of subducting slabs at the 410-km discontinuity. <i>Earth and Planetary Science Letters</i> , 2006, 243, 149-158.	4.4	91
42	Water content and geotherm in the upper mantle above the stagnant slab: Interpretation of electrical conductivity and seismic P-wave velocity models. <i>Physics of the Earth and Planetary Interiors</i> , 2006, 155, 1-15.	1.9	97
43	Mapping the subducting Pacific slab beneath southwest Japan with Hi-net receiver functions. <i>Earth and Planetary Science Letters</i> , 2005, 239, 9-17.	4.4	76
44	PP-Pdifferential travelttime measurement with crustal correction. <i>Geophysical Journal International</i> , 2004, 157, 1152-1162.	2.4	25
45	Reference frequency of teleseismic body waves. <i>Journal of Geophysical Research</i> , 2004, 109, .	3.3	11
46	Trans-Pacific temperature field in the mantle transition region derived from seismic and electromagnetic tomography. <i>Earth and Planetary Science Letters</i> , 2004, 217, 425-434.	4.4	56
47	Whole mantle P-wave tomography using Pand PP-P data. <i>Journal of Geophysical Research</i> , 2003, 108, ESE 8-1-ESE 8-14.	3.3	48
48	Stagnant slabs in the upper and lower mantle transition region. <i>Reviews of Geophysics</i> , 2001, 39, 291-323.	23.0	573
49	Evaluation of slab images in the northwestern Pacific. <i>Earth, Planets and Space</i> , 1998, 50, 953-964.	2.5	14
50	Pand PcP travel time tomography for the core-mantle boundary. <i>Journal of Geophysical Research</i> , 1997, 102, 17825-17841.	3.3	79
51	The 3D Structure of the Mantle from Travel Time Inversion.. <i>Journal of Geography (Chigaku Zasshi)</i> , 1995, 104, 934-940.	0.3	2
52	Geologic implication of the whole mantle P-wave tomography.. <i>Journal of the Geological Society of Japan</i> , 1994, 100, 4-23.	0.6	89
53	Subducting slabs stagnant in the mantle transition zone. <i>Journal of Geophysical Research</i> , 1992, 97, 4809-4822.	3.3	596
