Version: 2024-02-01

46 papers	4,333 citations	218677 26 h-index	243625 44 g-index
46 all docs	46 docs citations	46 times ranked	1302 citing authors

#	Article	IF	Citations
1	Neurally adjusted ventilatory assist as a weaning mode for adults with invasive mechanical ventilation: a systematic review and meta-analysis. Critical Care, 2021, 25, 222.	5.8	11
2	Spontaneous breathing during high-frequency oscillation revealed by diaphragm electrical activity. Pediatrics and Neonatology, 2021, , .	0.9	0
3	Duration of diaphragmatic inactivity after endotracheal intubation of critically ill patients. Critical Care, 2021, 25, 26.	5.8	14
4	Neurally Adjusted Ventilatory Assist in Newborns. Clinics in Perinatology, 2021, 48, 783-811.	2.1	15
5	Use of High-Rate Ventilation Results in Enhanced Recellularization of Bioengineered Lung Scaffolds. Tissue Engineering - Part C: Methods, 2021, 27, 661-671.	2.1	1
6	Feasibility of neurally synchronized and proportional negative pressure ventilation in a small animal model. Physiological Reports, 2020, 8, e14499.	1.7	3
7	Continuous neurally adjusted ventilation: a feasibility study in preterm infants. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2020, 105, 640-645.	2.8	8
8	A novel non-invasive method to detect excessively high respiratory effort and dynamic transpulmonary driving pressure during mechanical ventilation. Critical Care, 2019, 23, 346.	5.8	104
9	Effects of levosimendan on respiratory muscle function in patients weaning from mechanical ventilation. Intensive Care Medicine, 2019, 45, 1372-1381.	8.2	20
10	Control of respiratory drive by extracorporeal CO2 removal in acute exacerbation of COPD breathing on non-invasive NAVA. Critical Care, 2019, 23, 135.	5.8	24
11	A diaphragmatic electrical activity-based optimization strategy during pressure support ventilation improves synchronization but does not impact work of breathing. Critical Care, 2017, 21, 21.	5.8	20
12	How to compare clinical outcome of complementary modes of mechanical ventilation?. Intensive Care Medicine, 2017, 43, 293-295.	8.2	0
13	Neural control of ventilation prevents both over-distension and de-recruitment of experimentally injured lungs. Respiratory Physiology and Neurobiology, 2017, 237, 57-67.	1.6	10
14	Patientâ€“ventilator asynchrony during conventional mechanical ventilation in children. Annals of Intensive Care, 2017, 7, 122.	4.6	29
15	Feasibility of neurally adjusted positive end-expiratory pressure in rabbits with early experimental lung injury. BMC Anesthesiology, 2015, 15, 124.	1.8	8
16	Neural versus pneumatic control of pressure support in patients with chronic obstructive pulmonary diseases at different levels of positive end expiratory pressure: a physiological study. Critical Care, 2015, 19, 244.	5.8	22
17	Assessment of patient-ventilator breath contribution during neurally adjusted ventilatory assist in patients with acute respiratory failure. Critical Care, 2015, 19, 43.	5.8	13
18	Heartâ€“lung interactions during neurally adjusted ventilatory assist. Critical Care, 2014, 18, 499.	5.8	14

#	Article	IF	Citations
19	Neurally adjusted ventilatory assist: First indications of clinical outcomes. Journal of Critical Care, 2014, 29, 666-667.	2.2	3
20	Diaphragmatic neuromechanical coupling and mechanisms of hypercapnia during inspiratory loading. Respiratory Physiology and Neurobiology, 2014, 198, 32-41.	1.6	47
21	Lung protection during non-invasive synchronized assist versus volume control in rabbits. Critical Care, 2014, 18, R22.	5.8	13
22	An automated and standardized neural index to quantify patient-ventilator interaction. Critical Care, 2013, 17, R239.	5.8	88
23	Neuroventilatory efficiency and extubation readiness in critically ill patients. Critical Care, 2012, 16, R143.	5.8	86
24	Assessment of patientâ€“ventilator breath contribution during neurally adjusted ventilatory assist. Intensive Care Medicine, 2012, 38, 1224-1232.	8.2	26
25	Neurally adjusted ventilatory assist in patients with critical illness-associated polyneuromyopathy. Intensive Care Medicine, 2011, 37, 1951-1961.	8.2	31
26	Patient-ventilator interaction during pressure support ventilation and neurally adjusted ventilatory assist*. Critical Care Medicine, 2010, 38, 518-526.	0.9	194
27	Neurally Adjusted Ventilatory Assist and Pressure Support Ventilation in Small Species and the Impact of Instrumental Dead Space. Neonatology, 2010, 97, 279-285.	2.0	11
28	Physiologic Response to Changing Positive End-Expiratory Pressure During Neurally Adjusted Ventilatory Assist in Sedated, Critically Ill Adults. Chest, 2010, 138, 578-587.	0.8	52
29	Patient-Ventilator Interaction During Neurally Adjusted Ventilatory Assist in Low Birth Weight Infants. Pediatric Research, 2009, 65, 663-668.	2.3	195
30	Physiological response to increasing levels of neurally adjusted ventilatory assist (NAVA). Respiratory Physiology and Neurobiology, 2009, 166, 117-124.	1.6	58
31	Neurally adjusted ventilatory assist decreases ventilator-induced lung injury and non-pulmonary organ dysfunction in rabbits with acute lung injury. Intensive Care Medicine, 2009, 35, 1979-89.	8.2	70
32	Titration and Implementation of Neurally Adjusted Ventilatory Assist in Critically Ill Patients. Chest, 2009, 135, 695-703.	0.8	736
33	Non-invasive neurally adjusted ventilatory assist in rabbits with acute lung injury. Intensive Care Medicine, 2008, 34, 316-323.	8.2	64
34	Proportional Assist Ventilation and Neurally Adjusted Ventilatory Assistâ€"Better Approaches to Patient Ventilator Synchrony?. Clinics in Chest Medicine, 2008, 29, 329-342.	2.1	81
35	Inspiratory Muscle Unloading by Neurally Adjusted Ventilatory Assist During Maximal Inspiratory Efforts in Healthy Subjects. Chest, 2007, 131, 711-717.	0.8	729
36	Improved Synchrony and Respiratory Unloading by Neurally Adjusted Ventilatory Assist (NAVA) in Lung-Injured Rabbits. Pediatric Research, 2007, 61, 289-294.	2.3	92

#	Article	IF	Citations
37	Diaphragm Electrical Activity During Expiration in Mechanically Ventilated Infants. Pediatric Research, 2006, 59, 705-710.	2.3	72
38	Diaphragm Activation during Exercise in Chronic Obstructive Pulmonary Disease. American Journal of Respiratory and Critical Care Medicine, 2001, 163, 1637-1641.	5.6	160
39	Electrical Activity of the Diaphragm during Pressure Support Ventilation in Acute Respiratory Failure. American Journal of Respiratory and Critical Care Medicine, 2001, 164, 419-424.	5.6	179
40	Changes in Respiratory Effort Sensation Over Time Are Linked to the Frequency Content of Diaphragm Electrical Activity. American Journal of Respiratory and Critical Care Medicine, 2001, 163, 905-910.	5.6	32
41	Neural control of mechanical ventilation in respiratory failure. Nature Medicine, 1999, 5, 1433-1436.	30.7	573
42	Voluntary activation of the human diaphragm in health and disease. Journal of Applied Physiology, 1998, 85, 2146-2158.	2.5	192
43	Effects of lung volume on diaphragm EMG signal strength during voluntary contractions. Journal of Applied Physiology, 1998, 85, 1123-1134.	2.5	139
44	Crural diaphragm activation during dynamic contractions at various inspiratory flow rates. Journal of Applied Physiology, 1998, 85, 451-458.	2.5	45
45	Diaphragm interference pattern EMG and compound muscle action potentials: effects of chest wall configuration. Journal of Applied Physiology, 1997, 82, 520-530.	2.5	37
46	Electromyographical evidence for exercise-induced diaphragm fatigue in patients with chronic cervical cord injury or prior poliomyelitis infection. Spinal Cord, 1996, 34, 594-601.	1.9	12
