#	ARTICLE	IF	CITATIONS
1	Stable Early Maternal Report of Behavioral Inhibition Predicts Lifetime Social Anxiety Disorder in Adolescence. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2009, 48, 928-935.	0.3	440
2	Attention biases to threat and behavioral inhibition in early childhood shape adolescent social withdrawal.. <i>Emotion</i> , 2010, 10, 349-357.	1.5	257
3	Impact of Behavioral Inhibition and Parenting Style on Internalizing and Externalizing Problems from Early Childhood through Adolescence. <i>Journal of Abnormal Child Psychology</i> , 2009, 37, 1063-1075.	3.5	248
4	Attention Biases to Threat Link Behavioral Inhibition to Social Withdrawal over Time in Very Young Children. <i>Journal of Abnormal Child Psychology</i> , 2011, 39, 885-895.	3.5	222
5	A History of Childhood Behavioral Inhibition and Enhanced Response Monitoring in Adolescence Are Linked to Clinical Anxiety. <i>Biological Psychiatry</i> , 2009, 65, 445-448.	0.7	209
6	Striatal Functional Alteration in Adolescents Characterized by Early Childhood Behavioral Inhibition. <i>Journal of Neuroscience</i> , 2006, 26, 6399-6405.	1.7	206
7	Temperament and Anxiety Disorders. <i>Child and Adolescent Psychiatric Clinics of North America</i> , 2005, 14, 681-706.	1.0	194
8	Attention Bias Modification Treatment for Pediatric Anxiety Disorders: A Randomized Controlled Trial. <i>American Journal of Psychiatry</i> , 2012, 169, 213-230.	4.0	194
9	Attention biases, anxiety, and development: toward or away from threats or rewards?. <i>Depression and Anxiety</i> , 2012, 29, 282-294.	2.0	192
10	Attention alters neural responses to evocative faces in behaviorally inhibited adolescents. <i>NeuroImage</i> , 2007, 35, 1538-1546.	2.1	188
11	Variations in the serotonin-transporter gene are associated with attention bias patterns to positive and negative emotion faces. <i>Biological Psychology</i> , 2010, 83, 269-271.	1.1	150
12	Striatal Functional Alteration During Incentive Anticipation in Pediatric Anxiety Disorders. <i>American Journal of Psychiatry</i> , 2012, 169, 205-212.	4.0	148
13	Neural Correlates of Reward Processing in Adolescents With a History of Inhibited Temperament. <i>Psychological Science</i> , 2009, 20, 1009-1018.	1.8	137
14	A developmental neuroscience perspective on affect-biased attention. <i>Developmental Cognitive Neuroscience</i> , 2016, 21, 26-41.	1.9	114
15	The Impact of Reward, Punishment, and Frustration on Attention in Pediatric Bipolar Disorder. <i>Biological Psychiatry</i> , 2005, 58, 532-539.	0.7	105
16	Digital disruption? Maternal mobile device use is related to infant social-emotional functioning. <i>Developmental Science</i> , 2018, 21, e12610.	1.3	100
17	The relation between electroencephalogram asymmetry and attention biases to threat at baseline and under stress. <i>Brain and Cognition</i> , 2013, 82, 337-343.	0.8	95
18	Maternal anxiety predicts attentional bias towards threat in infancy.. <i>Emotion</i> , 2017, 17, 874-883.	1.5	94

#	ARTICLE	IF	CITATIONS
19	Patterns of Neural Connectivity During an Attention Bias Task Moderate Associations Between Early Childhood Temperament and Internalizing Symptoms in Young Adulthood. <i>Biological Psychiatry</i> , 2013, 74, 273-279.	0.7	87
20	Individual differences in children's performance during an emotional Stroop task: A behavioral and electrophysiological study. <i>Brain and Cognition</i> , 2003, 52, 33-51.	0.8	81
21	Developmental Relations Among Behavioral Inhibition, Anxiety, and Attention Biases to Threat and Positive Information. <i>Child Development</i> , 2017, 88, 141-155.	1.7	81
22	Neural correlates of attention biases, behavioral inhibition, and social anxiety in children: An ERP study. <i>Developmental Cognitive Neuroscience</i> , 2016, 19, 200-210.	1.9	77
23	Lasting associations between early-childhood temperament and late-adolescent reward-circuitry response to peer feedback. <i>Development and Psychopathology</i> , 2014, 26, 229-243.	1.4	76
24	Frontolimbic functioning during threat-related attention: Relations to early behavioral inhibition and anxiety in children. <i>Biological Psychology</i> , 2017, 122, 98-109.	1.1	74
25	Striatal responses to negative monetary outcomes differ between temperamentally inhibited and non-inhibited adolescents. <i>Neuropsychologia</i> , 2011, 49, 479-485.	0.7	73
26	Variations of the flanker paradigm: Assessing selective attention in young children. <i>Behavior Research Methods</i> , 2007, 39, 62-70.	2.3	72
27	Association between attention bias to threat and anxiety symptoms in children and adolescents. <i>Depression and Anxiety</i> , 2018, 35, 229-238.	2.0	72
28	A Behavioral and Electrophysiological Study of Children's Selective Attention Under Neutral and Affective Conditions. <i>Journal of Cognition and Development</i> , 2005, 6, 89-118.	0.6	68
29	Association of DRD4 with attention problems in normal childhood development. <i>Psychiatric Genetics</i> , 2001, 11, 25-29.	0.6	67
30	Startle Response in Behaviorally Inhibited Adolescents With a Lifetime Occurrence of Anxiety Disorders. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2009, 48, 610-617.	0.3	67
31	Patterns of sustained attention in infancy shape the developmental trajectory of social behavior from toddlerhood through adolescence.. <i>Developmental Psychology</i> , 2010, 46, 1723-1730.	1.2	67
32	Attention Biases Towards and Away from Threat Mark the Relation between Early Dysregulated Fear and the Later Emergence of Social Withdrawal. <i>Journal of Abnormal Child Psychology</i> , 2015, 43, 1067-1078.	3.5	67
33	Can't stop believing: inhibitory control and resistance to misleading testimony. <i>Developmental Science</i> , 2014, 17, 965-976.	1.3	65
34	Behavioral and Electrophysiological Markers of Selective Attention in Children of Parents with a History of Depression. <i>Biological Psychiatry</i> , 2006, 60, 1131-1138.	0.7	64
35	Salivary cortisol levels and infant temperament shape developmental trajectories in boys at risk for behavioral maladjustment. <i>Psychoneuroendocrinology</i> , 2008, 33, 916-925.	1.3	64
36	Attention to novelty in behaviorally inhibited adolescents moderates risk for anxiety. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2009, 50, 1365-1372.	3.1	60

#	ARTICLE	IF	CITATIONS
37	The role of classroom quality in ameliorating the academic and social risks associated with difficult temperament.. <i>School Psychology Quarterly</i> , 2011, 26, 175-188.	2.4	60
38	Sensitivity to social and non-social threats in temperamentally shy children at risk for anxiety. <i>Developmental Science</i> , 2014, 17, 239-247.	1.3	58
39	Threat-related attention bias in socioemotional development: A critical review and methodological considerations. <i>Developmental Review</i> , 2019, 51, 31-57.	2.6	57
40	Linking Gene, Brain, and Behavior. <i>Psychological Science</i> , 2009, 20, 831-837.	1.8	54
41	Longitudinal study of striatal activation to reward and loss anticipation from mid-adolescence into late adolescence/early adulthood. <i>Brain and Cognition</i> , 2014, 89, 51-60.	0.8	53
42	Patterns of attention to threat across tasks in behaviorally inhibited children at risk for anxiety. <i>Developmental Science</i> , 2017, 20, e12391.	1.3	48
43	Temperament and Parenting Styles in Early Childhood Differentially Influence Neural Response to Peer Evaluation in Adolescence. <i>Journal of Abnormal Child Psychology</i> , 2015, 43, 863-874.	3.5	45
44	Developmental Differences in Infants' Attention to Social and Nonsocial Threats. <i>Infancy</i> , 2017, 22, 403-415.	0.9	42
45	Alterations in amygdala functional connectivity reflect early temperament. <i>Biological Psychology</i> , 2014, 103, 248-254.	1.1	40
46	Navigating Through the Experienced Environment: Insights From Mobile Eye Tracking. <i>Current Directions in Psychological Science</i> , 2020, 29, 286-292.	2.8	40
47	Temperamental contributions to children's performance in an emotion-word processing task: A behavioral and electrophysiological study. <i>Brain and Cognition</i> , 2007, 65, 22-35.	0.8	39
48	DRD4 and striatal modulation of the link between childhood behavioral inhibition and adolescent anxiety. <i>Social Cognitive and Affective Neuroscience</i> , 2014, 9, 445-453.	1.5	38
49	Application of Cognitive Neuroscience Techniques to the Study of Anxiety-Related Processing Biases in Children. , 0, , 183-205.		37
50	Temperament and Attention as Core Mechanisms in the Early Emergence of Anxiety. <i>Contributions To Human Development</i> , 2014, 26, 42-56.	0.7	37
51	Biobehavioral Markers of Attention Bias Modification in Temperamental Risk for Anxiety: A Randomized Control Trial. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2018, 57, 103-110.	0.3	37
52	Through the Looking Glass: Temperament and Emotion as Separate and Interwoven Constructs. , 2019, , 139-168.		37
53	Longitudinal relations among exuberance, externalizing behaviors, and attentional bias to reward: the mediating role of effortful control. <i>Developmental Science</i> , 2016, 19, 853-862.	1.3	36
54	The impact of negative affect on attention patterns to threat across the first 2 years of life.. <i>Developmental Psychology</i> , 2017, 53, 2219-2232.	1.2	36

#	ARTICLE	IF	CITATIONS
55	Emerging Adulthood Brain Development. , 2014, , .		35
56	Speech presentation cues moderate frontal EEG asymmetry in socially withdrawn young adults. Brain and Cognition, 2012, 78, 156-162.	0.8	34
57	Impact of attention biases to threat and effortful control on individual variations in negative affect and social withdrawal in very young children. Journal of Experimental Child Psychology, 2016, 141, 210-221.	0.7	34
58	Reward and punishment sensitivity in shy and non-shy adults: Relations between social and motivated behavior. Personality and Individual Differences, 2006, 40, 699-711.	1.6	33
59	Early temperament, propensity for risk-taking and adolescent substance-related problems: A prospective multi-method investigation. Addictive Behaviors, 2010, 35, 1148-1151.	1.7	33
60	ENDURING INFLUENCE OF EARLY TEMPERAMENT ON NEURAL MECHANISMS MEDIATING ATTENTION-EMOTION CONFLICT IN ADULTS. Depression and Anxiety, 2014, 31, 53-62.	2.0	33
61	Early childhood temperament predicts substance use in young adults. Translational Psychiatry, 2012, 2, e157-e157.	2.4	29
62	Trajectories of Infants's™ Biobehavioral Development: Timing and Rate of Aâ€œNotâ€œ Performance Gains and EEG Maturation. Child Development, 2018, 89, 711-724.	1.7	28
63	Opportunities for Neurodevelopmental Plasticity From Infancy Through Early Adulthood. Child Development, 2018, 89, 687-697.	1.7	27
64	A Methodological Case Study with Mobile Eye-Tracking of Child Interaction in a Science Museum. TechTrends, 2018, 62, 509-517.	1.4	27
65	Identification of emotional facial expressions among behaviorally inhibited adolescents with lifetime anxiety disorders. Cognition and Emotion, 2015, 29, 372-382.	1.2	26
66	Young Children's Affective Responses to Acceptance and Rejection From Peers: A Computerâ€œbased Task Sensitive to Variation in Temperamental Shyness and Gender. Social Development, 2013, 22, 146-162.	0.8	25
67	ALTERED TOPOGRAPHY OF INTRINSIC FUNCTIONAL CONNECTIVITY IN CHILDHOOD RISK FOR SOCIAL ANXIETY. Depression and Anxiety, 2016, 33, 995-1004.	2.0	25
68	The importance of using multiple outcome measures in infant research. Infancy, 2020, 25, 420-437.	0.9	25
69	Deficits in inhibitory force control in young adults with ADHD. Neuropsychologia, 2017, 99, 172-178.	0.7	24
70	Developmental patterns of anger from infancy to middle childhood predict problem behaviors at age 8.. Developmental Psychology, 2018, 54, 2090-2100.	1.2	24
71	Intergenerational transmission of attentional bias and anxiety. Developmental Science, 2019, 22, e12772.	1.3	23
72	Biased attention to threat and anxiety: On taking a developmental approach. Journal of Experimental Psychopathology, 2019, 10, 204380871986071.	0.4	22

#	ARTICLE	IF	CITATIONS
73	Stationary and ambulatory attention patterns are differentially associated with early temperamental risk for socioemotional problems: Preliminary evidence from a multimodal eye-tracking investigation. <i>Development and Psychopathology</i> , 2019, 31, 971-988.	1.4	21
74	Personality development in the context of individual traits and parenting dynamics. <i>New Ideas in Psychology</i> , 2019, 53, 37-46.	1.2	18
75	Temperament moderates developmental changes in vigilance to emotional faces in infants: Evidence from an eye-tracking study. <i>Developmental Psychobiology</i> , 2020, 62, 339-352.	0.9	17
76	Variable- and person-centered approaches to affect-biased attention in infancy reveal unique relations with infant negative affect and maternal anxiety. <i>Scientific Reports</i> , 2021, 11, 1719.	1.6	17
77	Neural correlates of attention bias to masked facial threat cues: Examining children at-risk for social anxiety disorder. <i>NeuroImage: Clinical</i> , 2018, 19, 202-212.	1.4	14
78	Biased Attention to Threat: Answering Old Questions With Young Infants. <i>Current Directions in Psychological Science</i> , 2019, 28, 534-539.	2.8	13
79	Attention Mechanisms in Behavioral Inhibition: Exploring and Exploiting the Environment. , 2018, , 237-261.		12
80	Individual differences in infancy research: Letting the baby stand out from the crowd. <i>Infancy</i> , 2020, 25, 438-457.	0.9	12
81	Individual dynamics of delta-beta coupling: using a multilevel framework to examine inter- and intraindividual differences in relation to social anxiety and behavioral inhibition. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2021, 62, 771-779.	3.1	12
82	Dyadic behavioral synchrony between behaviorally inhibited and non-inhibited peers is associated with concordance in EEG frontal Alpha asymmetry and Delta-Beta coupling. <i>Biological Psychology</i> , 2021, 159, 108018.	1.1	12
83	Temperament Development, Theories of. , 2015, , 191-198.		10
84	Parent-to-Child Anxiety Transmission Through Dyadic Social Dynamics: A Dynamic Developmental Model. <i>Clinical Child and Family Psychology Review</i> , 2022, 25, 110-129.	2.3	10
85	Effortful Control in Adolescence: Individual Differences within a Unique Developmental Window. , 2015, , 78-100.		9
86	Dopaminergic associations between behavioral inhibition, executive functioning, and anxiety in development. <i>Developmental Review</i> , 2021, 60, 100966.	2.6	9
87	Profiles of Naturalistic Attentional Trajectories Associated with Internalizing Behaviors in School-Age Children: A Mobile Eye Tracking Study. <i>Research on Child and Adolescent Psychopathology</i> , 2022, 50, 637-648.	1.4	9
88	Representation of response alternatives in human presupplementary motor area: Multi-voxel pattern analysis in a go/no-go task. <i>Neuropsychologia</i> , 2014, 56, 110-118.	0.7	8
89	Integrating high-density ERP and fMRI measures of face-elicited brain activity in 9-12-year-old children: An ERP source localization study. <i>NeuroImage</i> , 2019, 184, 599-608.	2.1	8
90	Do you see what I mean?: Using mobile eye tracking to capture parent-child dynamics in the context of anxiety risk. <i>Development and Psychopathology</i> , 2022, 34, 997-1012.	1.4	8

#	ARTICLE	IF	CITATIONS
91	Mobile Eye Tracking Captures Changes in Attention Over Time During a Naturalistic Threat Paradigm in Behaviorally Inhibited Children. <i>Affective Science</i> , 2021, 2, 495-505.	1.5	8
92	The role of temperament in somatic complaints among young female adults. <i>Journal of Health Psychology</i> , 2012, 17, 26-35.	1.3	7
93	Young children's neural processing of their mother's voice: An fMRI study. <i>Neuropsychologia</i> , 2019, 122, 11-19.	0.7	7
94	Moderating effects of environmental stressors on the development of attention to threat in infancy. <i>Developmental Psychobiology</i> , 2022, 64, e22241.	0.9	7
95	From parents to children and back again: Bidirectional processes in the transmission and development of depression and anxiety. <i>Depression and Anxiety</i> , 2021, 38, 1198-1200.	2.0	7
96	The impact of prenatal maternal stress due to potentially traumatic events on child temperament: A systematic review. <i>Developmental Psychobiology</i> , 2021, 63, e22195.	0.9	6
97	Attention Biases to Threat in Infants and Parents: Links to Parental and Infant Anxiety Dispositions. <i>Research on Child and Adolescent Psychopathology</i> , 2022, 50, 387-402.	1.4	6
98	Pupil responses to dynamic negative facial expressions of emotion in infants and parents. <i>Developmental Psychobiology</i> , 2021, 63, e22190.	0.9	6
99	Young children's behavioral and neural responses to peer feedback relate to internalizing problems. <i>Developmental Cognitive Neuroscience</i> , 2019, 36, 100610.	1.9	5
100	The emergence of childhood bipolar disorder: a prospective study from 4 months to 7 years of age. <i>Journal of Applied Developmental Psychology</i> , 2002, 23, 431-450.	0.8	4
101	Implementation of the diffusion model on dot-probe task performance in children with behavioral inhibition. <i>Psychological Research</i> , 2022, 86, 831-843.	1.0	4
102	Psychometric properties of infant electroencephalography: Developmental stability, reliability, and construct validity of frontal alpha asymmetry and delta-beta coupling. <i>Developmental Psychobiology</i> , 2021, 63, e22178.	0.9	4
103	Infant Emotion Development and Temperament. , 2020, , 715-741.		3
104	Sharing in the Family System: Contributions of Parental Emotional Expressiveness and Children's Physiological Regulation. <i>Parenting</i> , 2021, 21, 332-356.	1.0	3
105	Next Steps: Behavioral Inhibition as a Model System. , 2018, , 357-372.		3
106	The social learning of threat and safety in the family: Parent-child transmission of social fears via verbal information. <i>Developmental Psychobiology</i> , 2022, 64, e22257.	0.9	3
107	Relations between social attention, expressed positive affect and behavioral inhibition during play.. <i>Developmental Psychology</i> , 2022, 58, 2036-2048.	1.2	3
108	Seeing Eye to Eye With Threat: Atypical Threat Bias in Children With 22q11.2 Deletion Syndrome. <i>American Journal on Intellectual and Developmental Disabilities</i> , 2019, 124, 549-567.	0.8	2
