

Norman R Morris

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/9122392/norman-r-morris-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
103	Physiotherapist perspectives of airway clearance techniques in bronchiectasis.. <i>Physiotherapy Theory and Practice</i> , 2022 , 1-9	1.5	0
102	PatientsTexperiences with rehabilitation care: a qualitative study to inform patient-centred outcomes.. <i>Disability and Rehabilitation</i> , 2022 , 1-8	2.4	
101	Optimising the Dyspnoea Challenge: exertional dyspnoea responses to changing treadmill gradients.. <i>Respiratory Physiology and Neurobiology</i> , 2022 , 103915	2.8	0
100	Impact of exercise training program attendance and physical activity participation on six minute walk distance in patients with heart failure. <i>Physiotherapy Theory and Practice</i> , 2021 , 37, 1051-1059	1.5	2
99	Examining the repeatability of a novel test to measure exertional dyspnoea in chronic obstructive pulmonary disease. <i>Respiratory Physiology and Neurobiology</i> , 2021 , 296, 103826	2.8	1
98	High intensity interval training versus moderate intensity continuous training for people with interstitial lung disease: protocol for a randomised controlled trial. <i>BMC Pulmonary Medicine</i> , 2021 , 21, 361	3.5	0
97	Exercise Intolerance, Benefits, and Prescription for People Living With a Fontan Circulation: The Fontan Fitness Intervention Trial (F-FIT)-Rationale and Design.. <i>Frontiers in Pediatrics</i> , 2021 , 9, 799125	3.4	3
96	Attenuation of exertional desaturation and preference for interval exercise compared to continuous exercise in people with interstitial lung disease. <i>Respirology</i> , 2021 , 26, 1076-1079	3.6	1
95	The safety and efficacy of prolonged use of one-way speaking valves. <i>Australian Critical Care</i> , 2021 , 34, 319-326	2.9	0
94	Use of supplemental oxygen during exercise testing and training for people with chronic obstructive pulmonary disease: a survey of Australian pulmonary rehabilitation programs. <i>Brazilian Journal of Physical Therapy</i> , 2021 , 25, 97-102	3.7	2
93	Exercise & Sports Science Australia (ESSA) position statement on exercise and chronic obstructive pulmonary disease. <i>Journal of Science and Medicine in Sport</i> , 2021 , 24, 52-59	4.4	5
92	Assessment of oxygenation after balloon pulmonary angioplasty for patients with inoperable chronic thromboembolic pulmonary hypertension. <i>International Journal of Cardiology</i> , 2021 , 337, 104	3.2	2
91	Home-based and remote functional exercise testing in cardiac conditions, during the covid-19 pandemic and beyond: a systematic review.. <i>Physiotherapy</i> , 2021 , 115, 27-35	3	1
90	Measuring airway clearance outcomes in bronchiectasis: a review. <i>European Respiratory Review</i> , 2020 , 29,	9.8	5
89	Myocardial adaptability in young and older-aged sea-level habitants sojourning at Mt Kilimanjaro: are cardiac compensatory limits reached in older trekkers?. <i>European Journal of Applied Physiology</i> , 2020 , 120, 799-809	3.4	1
88	Exercise Intolerance in Heart Failure: Central Role for the Pulmonary System. <i>Exercise and Sport Sciences Reviews</i> , 2020 , 48, 11-19	6.7	8
87	Increased physical activity post-exacerbation is associated with decreased systemic inflammation in cystic fibrosis - An observational study. <i>Physiotherapy Theory and Practice</i> , 2020 , 36, 1457-1465	1.5	0

86	Comparing the Performance Characteristics of Different Positive Expiratory Pressure Devices. <i>Respiratory Care</i> , 2019 , 64, 434-444	2.1	5
85	Practical approach to establishing pulmonary rehabilitation for people with non-COPD diagnoses. <i>Respirology</i> , 2019 , 24, 879-888	3.6	10
84	Oxygen compared to air during exercise training in COPD with exercise-induced desaturation. <i>European Respiratory Journal</i> , 2019 , 53,	13.6	24
83	Experimental modulation of mood by acoustic stimulation and its effect on exertional dyspnoea. <i>Thorax</i> , 2019 , 74, 707-710	7.3	1
82	Exercise-Based Rehabilitation to Improve Exercise Capacity and Quality of Life in Pulmonary Arterial Hypertension. <i>Physical Therapy</i> , 2019 , 99, 1126-1131	3.3	1
81	Relating exercise-induced desaturation and gas-exchange in pulmonary artery hypertension. <i>Respiratory Physiology and Neurobiology</i> , 2019 , 259, 58-62	2.8	2
80	Can Older Women Self-Select Walking Speeds Congruent With Optimal Health Outcomes?. <i>Bioengineered</i> , 2019 , 8, 13-20	5.7	
79	Longevity of pulmonary rehabilitation benefit for chronic obstructive pulmonary disease-health care utilisation in the subsequent 2 years. <i>BMJ Open Respiratory Research</i> , 2019 , 6, e000500	5.6	0
78	Exercise training in COPD with exercise-induced desaturation does improve exercise capacity, irrespective of whether supplemental oxygen or air is provided during training. <i>European Respiratory Journal</i> , 2019 , 54,	13.6	2
77	Quadriceps Muscle Strength and Body Mass Index Are Associated With Estimates of Physical Activity Postheart Transplantation. <i>Transplantation</i> , 2019 , 103, 1253-1259	1.8	2
76	Motivators and barriers for participation in aquatic and land-based exercise training programs for people with stable heart failure: A mixed methods approach. <i>Heart and Lung: Journal of Acute and Critical Care</i> , 2019 , 48, 287-293	2.6	1
75	Cost-Utility Analysis of Home-Based Telerehabilitation Compared With Centre-Based Rehabilitation in Patients With Heart Failure. <i>Heart Lung and Circulation</i> , 2019 , 28, 1795-1803	1.8	19
74	Physiological and clinical outcomes associated with use of one-way speaking valves on tracheostomised patients: A systematic review. <i>Heart and Lung: Journal of Acute and Critical Care</i> , 2019 , 48, 356-364	2.6	8
73	Using Smart Socks to Detect Step-count at Slow Walking Speeds in Healthy Adults. <i>International Journal of Sports Medicine</i> , 2019 , 40, 133-138	3.6	5
72	Quantification of biventricular strain and assessment of ventriculo-ventricular interaction in pulmonary arterial hypertension using exercise cardiac magnetic resonance imaging and myocardial feature tracking. <i>Journal of Magnetic Resonance Imaging</i> , 2019 , 49, 1427-1436	5.6	11
71	Study protocol for a randomised controlled trial of exercise training in pulmonary hypertension (ExTra_PH). <i>BMC Pulmonary Medicine</i> , 2018 , 18, 40	3.5	5
70	Thermoeffector Responses at a Fixed Rate of Heat Production in Heart Failure Patients. <i>Medicine and Science in Sports and Exercise</i> , 2018 , 50, 417-426	1.2	7
69	Shuttle walk tests in people with COPD who demonstrate exercise-induced oxygen desaturation: An analysis of test repeatability and cardiorespiratory responses. <i>Chronic Respiratory Disease</i> , 2018 , 15, 131-137	3	2

68	Breathing With Heart Failure. <i>Medicine and Science in Sports and Exercise</i> , 2018 , 50, 497-498	1.2	
67	Folic Acid Improves Vascular Function, But Not Skin Blood Flow, In Heart Failure Patients. <i>Medicine and Science in Sports and Exercise</i> , 2018 , 50, 346	1.2	
66	Aging and Thermoregulatory Control: The Clinical Implications of Exercising under Heat Stress in Older Individuals. <i>BioMed Research International</i> , 2018 , 2018, 8306154	3	34
65	Folic acid supplementation improves vascular endothelial function, yet not skin blood flow during exercise in the heat, in patients with heart failure. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2018 , 315, R810-R819	3.2	3
64	Exercise-based evaluations and interventions for pulmonary hypertension with connective tissue disorders. <i>Expert Review of Respiratory Medicine</i> , 2018 , 12, 615-622	3.8	1
63	Assessing functional exercise capacity using telehealth: Is it valid and reliable in patients with chronic heart failure?. <i>Journal of Telemedicine and Telecare</i> , 2017 , 23, 225-232	6.8	17
62	Exercise-based rehabilitation programmes for pulmonary hypertension. <i>The Cochrane Library</i> , 2017 , 1, CD011285	5.2	31
61	Exploring patient experiences and perspectives of a heart failure telerehabilitation program: A mixed methods approach. <i>Heart and Lung: Journal of Acute and Critical Care</i> , 2017 , 46, 320-327	2.6	17
60	Heart Failure and Thermoregulatory Control: Can Patients With Heart Failure Handle the Heat?. <i>Journal of Cardiac Failure</i> , 2017 , 23, 621-627	3.3	12
59	Aquatic Exercise Training is Effective in Maintaining Exercise Performance in Trained Heart Failure Patients: A Randomised Crossover Pilot Trial. <i>Heart Lung and Circulation</i> , 2017 , 26, 572-579	1.8	4
58	Home-based telerehabilitation is not inferior to a centre-based program in patients with chronic heart failure: a randomised trial. <i>Journal of Physiotherapy</i> , 2017 , 63, 101-107	2.9	71
57	Evidence on Exercise Training in Pulmonary Hypertension. <i>Advances in Experimental Medicine and Biology</i> , 2017 , 1000, 153-172	3.6	9
56	Exertional dyspnea associated with chest wall strapping is reduced when external dead space substitutes for part of the exercise stimulus to ventilation. <i>Journal of Applied Physiology</i> , 2017 , 122, 1179-1187 ¹	3.7	1187 ¹
55	Gas exchange responses during 6-min walk test in patients with pulmonary arterial hypertension. <i>Respirology</i> , 2017 , 22, 165-171	3.6	6
54	Timed Up and Go Test: A Reliable and Valid Test in Patients With Chronic Heart Failure. <i>Journal of Cardiac Failure</i> , 2016 , 22, 646-50	3.3	28
53	Exercise training in COPD: What is it about intensity?. <i>Respirology</i> , 2016 , 21, 1185-92	3.6	27
52	The effects of chronic obstructive pulmonary disease self-management interventions on improvement of quality of life in COPD patients: A meta-analysis. <i>Respiratory Medicine</i> , 2016 , 121, 81-90 ^{4.6}	4.6	41
51	Fast-track equivalent to traditional cardiac rehabilitation? Pilot study outcome. <i>European Journal of Physiotherapy</i> , 2016 , 18, 126-136	0.5	1

50	Effect of experimental modulation of mood on perception of exertional dyspnea in healthy subjects. <i>Journal of Applied Physiology</i> , 2016 , 120, 114-20	3.7	11
49	Poor mobility in hospitalized adults of all ages. <i>Journal of Hospital Medicine</i> , 2016 , 11, 289-91	2.7	48
48	Altered thermoregulatory responses in heart failure patients exercising in the heat. <i>Physiological Reports</i> , 2016 , 4, e13022	2.6	16
47	Exercise cardiac MRI-derived right ventriculo-arterial coupling ratio detects early right ventricular maladaptation in PAH. <i>European Respiratory Journal</i> , 2016 , 48, 1797-1800	13.6	13
46	Low levels of physical activity predict worse survival to lung transplantation and poor early post-operative outcomes. <i>Journal of Heart and Lung Transplantation</i> , 2016 , 35, 1041-3	5.8	7
45	Prognostic value of right ventricular free wall strain in pulmonary hypertension patients with pseudo-normalized tricuspid annular plane systolic excursion values. <i>International Journal of Cardiovascular Imaging</i> , 2016 , 32, 905-12	2.5	33
44	A randomised controlled trial of supplemental oxygen versus medical air during exercise training in people with chronic obstructive pulmonary disease: supplemental oxygen in pulmonary rehabilitation trial (SuppORT) (Protocol). <i>BMC Pulmonary Medicine</i> , 2016 , 16, 25	3.5	13
43	The effect of different exercise modalities on dyspnea and leg fatigue in healthy subjects. <i>Respiratory Physiology and Neurobiology</i> , 2015 , 210, 44-50	2.8	3
42	Aquatic exercise training and stable heart failure: A systematic review and meta-analysis. <i>International Journal of Cardiology</i> , 2015 , 186, 22-8	3.2	21
41	Serious adverse events during a 6-min walk test in patients with pulmonary hypertension. <i>European Respiratory Journal</i> , 2015 , 45, 1179-82	13.6	11
40	Effect of induced leg muscle fatigue on exertional dyspnea in healthy subjects. <i>Journal of Applied Physiology</i> , 2015 , 118, 48-54	3.7	13
39	A Systematic Review of the Effects of Telerehabilitation in Patients With Cardiopulmonary Diseases. <i>Journal of Cardiopulmonary Rehabilitation and Prevention</i> , 2015 , 35, 380-9	3.6	48
38	Six-Minute Walk Test Distances in Fast-Track and Traditional Cardiac Rehabilitation: A 3-YEAR DATABASE REVIEW. <i>Journal of Cardiopulmonary Rehabilitation and Prevention</i> , 2015 , 35, 417-22	3.6	3
37	The effects of multimodal exercise on cognitive and physical functioning and brain-derived neurotrophic factor in older women: a randomised controlled trial. <i>Age and Ageing</i> , 2014 , 43, 623-9	3	124
36	Swing kinematics of male and female skilled golfers following prolonged putting practice. <i>Journal of Sports Sciences</i> , 2014 , 32, 810-6	3.6	5
35	A simple clinical measure of quadriceps muscle strength identifies responders to pulmonary rehabilitation. <i>Pulmonary Medicine</i> , 2014 , 2014, 782702	5.3	12
34	Impaired exercise capacity after lung transplantation is related to delayed recovery of muscle strength. <i>Clinical Transplantation</i> , 2013 , 27, E504-11	3.8	29
33	An Automated Activity Monitoring System for Rehabilitation. <i>Procedia Engineering</i> , 2013 , 60, 232-237		4

32	Timed Up and Go Tests in cardiac rehabilitation: reliability and comparison with the 6-Minute Walk Test. <i>Journal of Cardiopulmonary Rehabilitation and Prevention</i> , 2013 , 33, 99-105	3.6	17
31	Metabolic disease and participant age are independent predictors of response to pulmonary rehabilitation. <i>Journal of Cardiopulmonary Rehabilitation and Prevention</i> , 2013 , 33, 249-56	3.6	19
30	Simulation can contribute a part of cardiorespiratory physiotherapy clinical education: two randomized trials. <i>Simulation in Healthcare</i> , 2013 , 8, 32-42	2.8	61
29	Performance-based criteria are used in participant selection for pulmonary rehabilitation programs. <i>Australian Health Review</i> , 2013 , 37, 331-6	1.8	2
28	Can simulation replace part of clinical time? Two parallel randomised controlled trials. <i>Medical Education</i> , 2012 , 46, 657-67	3.7	115
27	Evidence of break-points in breathing pattern at the gas-exchange thresholds during incremental cycling in young, healthy subjects. <i>European Journal of Applied Physiology</i> , 2012 , 112, 1067-76	3.4	6
26	The 6-minute walk test in outpatient cardiac rehabilitation: validity, reliability and responsiveness--a systematic review. <i>Physiotherapy</i> , 2012 , 98, 277-86	3	143
25	Effects and Adherence of Mirror Therapy in People with Chronic Upper Limb Hemiparesis: A Preliminary Study. <i>ISRN Rehabilitation</i> , 2012 , 2012, 1-9		1
24	The resistive and elastic work of breathing during exercise in patients with chronic heart failure. <i>European Respiratory Journal</i> , 2012 , 39, 1449-57	13.6	43
23	Does the mode of exercise influence recovery of functional capacity in the early postoperative period after coronary artery bypass graft surgery? A randomized controlled trial. <i>Interactive Cardiovascular and Thoracic Surgery</i> , 2012 , 15, 995-1003	1.8	32
22	Repeated six-minute walk tests for outcome measurement and exercise prescription in outpatient cardiac rehabilitation: a longitudinal study. <i>Archives of Physical Medicine and Rehabilitation</i> , 2011 , 92, 1388-94	2.8	29
21	Influence of bronchial blood flow and conductance on pulmonary function in stable systolic heart failure. <i>Respiratory Physiology and Neurobiology</i> , 2011 , 177, 256-64	2.8	14
20	Effect of supine posture on airway blood flow and pulmonary function in stable heart failure. <i>Respiratory Physiology and Neurobiology</i> , 2011 , 178, 269-74	2.8	15
19	Exercise testing in patients with cystic fibrosis: why and which?. <i>Journal of Cystic Fibrosis</i> , 2010 , 9, 299-304	4.1	5
18	The influence of breathing mechanics on the development of the slow component of O ₂ uptake. <i>Respiratory Physiology and Neurobiology</i> , 2010 , 173, 125-31	2.8	6
17	Thorax and pelvis kinematics during the downswing of male and female skilled golfers. <i>Journal of Biomechanics</i> , 2010 , 43, 1456-62	2.9	61
16	Lung-to-lung circulation times during exercise in heart failure. <i>European Journal of Applied Physiology</i> , 2009 , 106, 621-7	3.4	6
15	Self-selected Walking Intensity Of Healthy Older Women (65-74yr) During Treadmill And Over-ground Walking. <i>Medicine and Science in Sports and Exercise</i> , 2009 , 41, 362	1.2	2

14	Exercise-related change in airway blood flow in humans: relationship to changes in cardiac output and ventilation. <i>Respiratory Physiology and Neurobiology</i> , 2008 , 162, 204-9	2.8	6
13	Supervised moderate intensity exercise improves distance walked at hospital discharge following coronary artery bypass graft surgery--a randomised controlled trial. <i>Heart Lung and Circulation</i> , 2008 , 17, 129-38	1.8	47
12	The relationship between resting lung-to-lung circulation time and peak exercise capacity in chronic heart failure patients. <i>Journal of Cardiac Failure</i> , 2007 , 13, 389-94	3.3	6
11	High-intensity training improves plasma glucose and acid-base regulation during intermittent maximal exercise in type 1 diabetes. <i>Diabetes Care</i> , 2007 , 30, 1269-71	14.6	44
10	Verbal numerical scales are as reliable and sensitive as visual analog scales for rating dyspnea in young and older subjects. <i>Respiratory Physiology and Neurobiology</i> , 2007 , 157, 360-5	2.8	34
9	Effects of sprint training on extrarenal potassium regulation with intense exercise in Type 1 diabetes. <i>Journal of Applied Physiology</i> , 2006 , 100, 26-34	3.7	24
8	The VO ₂ slow component: relationship between plasma ammonia and EMG activity. <i>Medicine and Science in Sports and Exercise</i> , 2005 , 37, 1502-9	1.2	18
7	Comparison of thermoregulatory responses to exercise in dry heat among prepubertal boys, young adults and older males. <i>Experimental Physiology</i> , 2004 , 89, 691-700	2.4	111
6	Oxygen uptake kinetics during severe exercise: a comparison between young and older men. <i>Respiratory Physiology and Neurobiology</i> , 2004 , 139, 203-13	2.8	14
5	Rate and amplitude of adaptation to two intensities of exercise in men aged 65-75 yr. <i>Medicine and Science in Sports and Exercise</i> , 2004 , 36, 1811-8	1.2	14
4	Physiological responses to intermittent and continuous exercise at the same relative intensity in older men. <i>European Journal of Applied Physiology</i> , 2003 , 90, 620-5	3.4	17
3	Oxygen uptake and heart rate kinetics during heavy exercise: a comparison between arm cranking and leg cycling. <i>European Journal of Applied Physiology</i> , 2002 , 88, 100-6	3.4	34
2	Rate and amplitude of adaptation to intermittent and continuous exercise in older men. <i>Medicine and Science in Sports and Exercise</i> , 2002 , 34, 471-7	1.2	32
1	Exercise Limitations and Cardiopulmonary Exercise Testing in COPD40-62		1
