#	ARTICLE	IF	CITATIONS
1	Study progression and degree completion of autistic students in higher education: a longitudinal study. <i>Higher Education</i> , 2023, 85, 1-26.	4.4	5
2	Intracranial and subcortical volumes in adolescents with <scp>earlyâ€onset</scp> psychosis: A multisite <scp>megaâ€analysis</scp> from the <scp>ENIGMA</scp> consortium. <i>Human Brain Mapping</i> , 2022, 43, 373-384.	3.6	27
3	Is it painful? Playing violent video games affects brain responses to painful pictures: An event-related potential study.. <i>Psychology of Popular Media</i> , 2022, 11, 13-23.	1.4	6
4	Exploring the association between social behaviour, trust, and its neural correlates in first episode psychosis patients and in individuals at clinical high risk for psychosis. <i>British Journal of Clinical Psychology</i> , 2022, 61, 629-646.	3.5	3
5	Development of the neural correlates of self- and other-referential processing across adolescence. <i>NeuroImage</i> , 2022, 252, 119032.	4.2	8
6	Emotion Recognition and Inhibitory Control in Adolescent Players of Violent Video Games. <i>Journal of Research on Adolescence</i> , 2022, 32, 1404-1420.	3.7	2
7	Understanding urbanicity: how interdisciplinary methods help to unravel the effects of the city on mental health. <i>Psychological Medicine</i> , 2021, 51, 1099-1110.	4.5	44
8	Where to draw the line: honor mindset increases retaliation in response to unfair behavior. <i>Culture and Brain</i> , 2021, 9, 63-78.	0.5	0
9	Individual differences in adolescentsâ€™ willingness to invest cognitive effort: Relation to need for cognition, motivation and cognitive capacity. <i>Cognitive Development</i> , 2021, 57, 100978.	1.3	18
10	Insensitive Players? A Relationship Between Violent Video Game Exposure and Recognition of Negative Emotions. <i>Frontiers in Psychology</i> , 2021, 12, 651759.	2.1	6
11	Viewing Nature Lets Your Mind Run Free: Three Experiments about the Influence of Viewing a Nature Video on Cognitive Coping with Psychological Distress. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 8842.	2.6	5
12	Intrinsic network interactions explain individual differences in mentalizing ability in adolescents. <i>Neuropsychologia</i> , 2021, 151, 107737.	1.6	8
13	The Value of Nature During Psychotherapy: A Qualitative Study of Client Experiences. <i>Frontiers in Psychology</i> , 2021, 12, 765177.	2.1	1
14	Integrating Cognitive Developmental Neuroscience in Society: Lessons Learned From a Multidisciplinary Research Project on Education and Social Safety of Youth. <i>Frontiers in Integrative Neuroscience</i> , 2021, 15, 756640.	2.1	3
15	Trust and Demographics. , 2021, , 269-292.		0
16	Benefits of Social Contact in Individuals With Psychotic Symptoms: Do Closeness of the Contact and Empathic Skills Make the Difference?. <i>Frontiers in Psychology</i> , 2021, 12, 769091.	2.1	4
17	Neural responses to affective stimuli across culturally similar and dissimilar situations. <i>Culture and Brain</i> , 2020, 8, 1-26.	0.5	0
18	Trust and the city: Linking urban upbringing to neural mechanisms of trust in psychosis. <i>Australian and New Zealand Journal of Psychiatry</i> , 2020, 54, 138-149.	2.3	9

#	ARTICLE	IF	CITATIONS
19	Social and non-social reward learning reduced and related to a familial vulnerability in schizophrenia spectrum disorders. <i>Schizophrenia Research</i> , 2020, 215, 256-262.	2.0	19
20	First-Year Progression and Retention of Autistic Students in Higher Education: A Propensity Score-Weighted Population Study. <i>Autism in Adulthood</i> , 2020, 2, 307-316.	6.9	11
21	The effect of social feedback from peers on adolescent cognitive control. <i>Journal of Adolescence</i> , 2020, 85, 12-20.	2.4	2
22	Neural correlates of self- and other-referential processing in young adolescents and the effects of testosterone and peer similarity. <i>NeuroImage</i> , 2020, 219, 117060.	4.2	18
23	Classroom peer preferences and the development of sharing behavior with friends and others. <i>International Journal of Behavioral Development</i> , 2020, 44, 412-423.	2.4	7
24	Social Cognition and Friendships in Adolescents With Autistic-Like Experiences and Psychotic-Like Experiences. <i>Frontiers in Psychiatry</i> , 2020, 11, 589824.	2.6	6
25	Learning to trust: social feedback normalizes trust behavior in first-episode psychosis and clinical high risk. <i>Psychological Medicine</i> , 2019, 49, 780-790.	4.5	21
26	Background and enrollment characteristics of students with autism in higher education. <i>Research in Autism Spectrum Disorders</i> , 2019, 67, 101424.	1.5	46
27	Girls-Boys: An Investigation of Gender Differences in the Behavioral and Neural Mechanisms of Trust and Reciprocity in Adolescence. <i>Frontiers in Human Neuroscience</i> , 2019, 13, 257.	2.0	18
28	Heightened neural sensitivity to social exclusion in boys with a history of low peer preference during primary school. <i>Developmental Cognitive Neuroscience</i> , 2019, 38, 100673.	4.0	9
29	The neural mechanisms of social reward in early psychosis. <i>Social Cognitive and Affective Neuroscience</i> , 2019, 14, 861-870.	3.0	18
30	Neural Correlates of Self-Construal Priming in the Ultimatum Game. <i>Frontiers in Neuroscience</i> , 2019, 13, 994.	2.8	3
31	Agency and Time Representation in English and Dutch Speakers. <i>Journal of Language and Social Psychology</i> , 2019, 38, 353-375.	2.3	3
32	The Association Between Familial Risk and Brain Abnormalities Is Disease Specific: An ENIGMA-Relatives Study of Schizophrenia and Bipolar Disorder. <i>Biological Psychiatry</i> , 2019, 86, 545-556.	1.3	67
33	Social Mindfulness and Psychosis: Neural Response to Socially Mindful Behavior in First-Episode Psychosis and Patients at Clinical High-Risk. <i>Frontiers in Human Neuroscience</i> , 2019, 13, 47.	2.0	4
34	Cross-Cultural Mental State Reading Ability in Antillean Dutch, Moroccan Dutch, and Dutch Young Adults. <i>Journal of Cross-Cultural Psychology</i> , 2019, 50, 419-440.	1.6	6
35	Psychosis and urbanicity. <i>Current Opinion in Psychiatry</i> , 2019, 32, 232-241.	6.3	79
36	The Teenage Brain: Public Perceptions of Neurocognitive Development during Adolescence. <i>Journal of Cognitive Neuroscience</i> , 2019, 31, 339-359.	2.3	9

#	ARTICLE	IF	CITATIONS
37	Differences in adolescents'™ motivations for indirect, direct, and hybrid peer defending. <i>Social Development</i> , 2019, 28, 414-429.	1.3	26
38	Neural substrates of the influence of emotional cues on cognitive control in risk-taking adolescents. <i>Developmental Cognitive Neuroscience</i> , 2018, 31, 20-34.	4.0	11
39	Metacognitive training in patients recovering from a first psychosis: an experience sampling study testing treatment effects. <i>European Archives of Psychiatry and Clinical Neuroscience</i> , 2018, 268, 57-64.	3.2	9
40	Giving others the option of choice: An fMRI study on low-cost cooperation. <i>Neuropsychologia</i> , 2018, 109, 1-9.	1.6	21
41	Neuroimaging of learning and development: improving ecological validity. <i>Frontline Learning Research</i> , 2018, 6, 186-203.	0.8	27
42	Integrating educational knowledge: reactivation of prior knowledge during educational learning enhances memory integration. <i>Npj Science of Learning</i> , 2018, 3, 11.	2.8	28
43	Brief Report: Gender Identity Differences in Autistic Adults: Associations with Perceptual and Socio-cognitive Profiles. <i>Journal of Autism and Developmental Disorders</i> , 2018, 48, 4070-4078.	2.7	64
44	Elementary school children's associations of antisocial behaviour with risk-taking across 7-11 years. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2018, 59, 1052-1060.	5.2	12
45	The Content-based Media Exposure Scale (C-ME): Development and Validation. <i>Computers in Human Behavior</i> , 2017, 72, 549-557.	8.5	24
46	Boys vs. girls: Gender differences in the neural development of trust and reciprocity depend on social context. <i>Developmental Cognitive Neuroscience</i> , 2017, 25, 235-245.	4.0	52
47	How social norms affect psychiatric approaches to gender incongruence. <i>Lancet Psychiatry</i> , 2017, 4, 98.	7.4	4
48	Gender Moderates the Influence of Self-Construal Priming on Fairness Considerations. <i>Frontiers in Psychology</i> , 2017, 8, 503.	2.1	55
49	A Comparison of Children's Ability to Read Children's and Adults' Mental States in an Adaptation of the Reading the Mind in the Eyes Task. <i>Frontiers in Psychology</i> , 2017, 8, 594.	2.1	9
50	Teacher Mindsets Concerning the Malleability of Intelligence and the Appraisal of Achievement in the Context of Feedback. <i>Frontiers in Psychology</i> , 2017, 8, 1594.	2.1	23
51	Do individualism and collectivism on three levels (country, individual, and situation) influence theory-of-mind efficiency? A cross-country study. <i>PLoS ONE</i> , 2017, 12, e0183011.	2.5	15
52	Mending the Levee: How Supernaturally Anchored Conceptions of the Person Impact on Trauma Perception and Healing among Children (Cases from Madagascar and Nepal). <i>Children and Society</i> , 2016, 30, 423-433.	1.7	3
53	Letter to the Editor: Should we focus on quality or quantity in meta-analyses?. <i>Psychological Medicine</i> , 2016, 46, 2003-2005.	4.5	8
54	Individual differences in social cognition as predictors of secondary school performance. <i>Trends in Neuroscience and Education</i> , 2016, 5, 166-172.	3.1	5

#	ARTICLE	IF	CITATIONS
55	Metacognitive training for schizophrenia spectrum patients: a meta-analysis on outcome studies. <i>Psychological Medicine</i> , 2016, 46, 47-57.	4.5	63
56	Learning to trust: trust and attachment in early psychosis. <i>Psychological Medicine</i> , 2016, 46, 1437-1447.	4.5	44
57	Are teacher beliefs gender-related?. <i>Learning and Individual Differences</i> , 2016, 51, 333-340.	2.7	13
58	The effect of childhood trauma and Five-Factor Model personality traits on exposure to adult life events in patients with psychotic disorders. <i>Cognitive Neuropsychiatry</i> , 2016, 21, 462-474.	1.3	16
59	Neural Correlates of Performance Monitoring During the Transition to Young Adulthood. <i>Mind, Brain, and Education</i> , 2016, 10, 81-90.	1.9	0
60	Social information influences trust behaviour in adolescents. <i>Journal of Adolescence</i> , 2016, 46, 66-75.	2.4	26
61	Neural correlates of reward processing in healthy siblings of patients with schizophrenia. <i>Frontiers in Human Neuroscience</i> , 2015, 9, 504.	2.0	23
62	Researching children's individual empathic abilities in the context of their daily lives: the importance of mixed methods. <i>Frontiers in Neuroscience</i> , 2015, 9, 261.	2.8	5
63	Cognitive Alexithymia Is Associated with the Degree of Risk for Psychosis. <i>PLoS ONE</i> , 2015, 10, e0124803.	2.5	27
64	Trust and mindreading in adolescents: the moderating role of social value orientation. <i>Frontiers in Psychology</i> , 2015, 6, 965.	2.1	14
65	Social Relations Model Analyses of Perceived Self-Control and Trust in Families. <i>Journal of Marriage and Family</i> , 2015, 77, 209-223.	2.6	23
66	I spy with my little eye – the detection of intentional contingency in early psychosis. <i>Cognitive Neuropsychiatry</i> , 2015, 20, 473-481.	1.3	1
67	Emotion processing in schizophrenia is state and trait dependent. <i>Schizophrenia Research</i> , 2015, 161, 392-398.	2.0	26
68	Cognitive flexibility in healthy students is affected by fatigue: An experimental study. <i>Learning and Individual Differences</i> , 2015, 38, 18-25.	2.7	16
69	Grey matter, an endophenotype for schizophrenia? A voxel-based morphometry study in siblings of patients with schizophrenia. <i>Journal of Psychiatry and Neuroscience</i> , 2015, 40, 207-213.	2.4	9
70	Honor and I: Differential relationships between honor and self-esteem in three cultural groups. <i>Personality and Individual Differences</i> , 2015, 86, 161-163.	2.9	8
71	Educational Neuroscience: Its Position, Aims and Expectations. <i>British Journal of Educational Studies</i> , 2015, 63, 229-243.	1.3	11
72	Brain-Based Learning and Educational Neuroscience: Boundary Work. <i>Mind, Brain, and Education</i> , 2015, 9, 40-49.	1.9	20

#	ARTICLE	IF	CITATIONS
73	Social neuroscience in psychiatry: unravelling the neural mechanisms of social dysfunction. <i>Psychological Medicine</i> , 2015, 45, 1145-1165.	4.5	38
74	Alexithymia influences brain activation during emotion perception but not regulation. <i>Social Cognitive and Affective Neuroscience</i> , 2015, 10, 285-293.	3.0	39
75	Sorting Test, Tower Test, and BRIEF-SR do not predict school performance of healthy adolescents in preuniversity education. <i>Frontiers in Psychology</i> , 2014, 5, 287.	2.1	12
76	Sex Differences in COMT Polymorphism Effects on Prefrontal Inhibitory Control in Adolescence. <i>Neuropsychopharmacology</i> , 2014, 39, 2560-2569.	5.4	53
77	The potential adverse effect of energy drinks on executive functions in early adolescence. <i>Frontiers in Psychology</i> , 2014, 5, 457.	2.1	29
78	Insight change in psychosis: relationship with neurocognition, social cognition, clinical symptoms and phase of illness. <i>Acta Psychiatrica Scandinavica</i> , 2014, 129, 126-133.	4.5	23
79	Sex differences in the neural bases of social appraisals. <i>Social Cognitive and Affective Neuroscience</i> , 2014, 9, 513-519.	3.0	29
80	Reduced brain reward response during cooperation in first-degree relatives of patients with psychosis: an fMRI study. <i>Psychological Medicine</i> , 2014, 44, 3445-3454.	4.5	28
81	Neural Effects of the Social Environment. <i>Schizophrenia Bulletin</i> , 2014, 40, 248-251.	4.3	20
82	Metacognitive group training for schizophrenia spectrum patients with delusions: a randomized controlled trial. <i>Psychological Medicine</i> , 2014, 44, 3025-3035.	4.5	58
83	Trust and social reciprocity in adolescence – A matter of perspective-taking. <i>Journal of Adolescence</i> , 2014, 37, 175-184.	2.4	80
84	Dissociable morphometric profiles of the affective and cognitive dimensions of alexithymia. <i>Cortex</i> , 2014, 54, 190-199.	2.4	35
85	Default distrust? An fMRI investigation of the neural development of trust and cooperation. <i>Social Cognitive and Affective Neuroscience</i> , 2014, 9, 395-402.	3.0	89
86	Adolescent trust and trustworthiness: Role of gender and social value orientation. <i>Journal of Adolescence</i> , 2014, 37, 1379-1386.	2.4	38
87	Integrating culture-as-situated-cognition and neuroscience prediction models. <i>Culture and Brain</i> , 2014, 2, 1-26.	0.5	64
88	Sociale cognitie en psychose. <i>Tijdschrift Voor Neuropsychiatrie En Gedragsneurologie</i> , 2014, 2, 21-30.	0.1	0
89	Sex differences in goal orientation in adolescents aged 10–19: The older boys adopt work-avoidant goals twice as often as girls. <i>Learning and Individual Differences</i> , 2013, 26, 196-200.	2.7	31
90	Changes in neural mechanisms of cognitive control during the transition from late adolescence to young adulthood. <i>Developmental Cognitive Neuroscience</i> , 2013, 5, 63-70.	4.0	59

#	ARTICLE	IF	CITATIONS
91	Theory of mind, insecure attachment and paranoia in adolescents with early psychosis and healthy controls. Australian and New Zealand Journal of Psychiatry, 2013, 47, 737-745.	2.3	36
92	Trust versus paranoia: abnormal response to social reward in psychotic illness. Brain, 2013, 136, 1968-1975.	7.6	78
93	Do natural landscapes reduce future discounting in humans?. Proceedings of the Royal Society B: Biological Sciences, 2013, 280, 20132295.	2.6	61
94	Substance use in a large sample of patients with schizophrenia or related disorders and co-morbid obsessive-compulsive symptoms. Australian and New Zealand Journal of Psychiatry, 2013, 47, 868-874.	2.3	6
95	Self-perception but not peer reputation of bullying victimization is associated with non-clinical psychotic experiences in adolescents. Psychological Medicine, 2013, 43, 781-787.	4.5	32
96	Metacognitive beliefs, beliefs about voices and affective symptoms in patients with severe auditory verbal hallucinations. British Journal of Clinical Psychology, 2013, 52, 235-248.	3.5	22
97	Do you see what I see? Sex differences in the discrimination of facial emotions during adolescence.. Emotion, 2013, 13, 1030-1040.	1.8	24
98	Subjective Sleepiness and Sleep Quality in Adolescents are Related to Objective and Subjective Measures of School Performance. Frontiers in Psychology, 2013, 4, 38.	2.1	12
99	Coding task performance in early adolescence: a large-scale controlled study into boy-girl differences. Frontiers in Psychology, 2013, 4, 550.	2.1	15
100	Age and educational track influence adolescent discounting of delayed rewards. Frontiers in Psychology, 2013, 4, 993.	2.1	24
101	The effect of perspective and content on brain activation during mentalizing in young females. Journal of Clinical and Experimental Neuropsychology, 2012, 34, 227-234.	1.3	6
102	Differences in craving for cannabis between schizophrenia patients using risperidone, olanzapine or clozapine. Journal of Psychopharmacology, 2012, 26, 189-195.	4.0	30
103	To trust or not to trust: the dynamics of social interaction in psychosis. Brain, 2012, 135, 976-984.	7.6	101
104	Self-monitoring as a familial vulnerability marker for psychosis: an analysis of patients, unaffected siblings and healthy controls. Psychological Medicine, 2012, 42, 235-245.	4.5	15
105	Age at onset of non-affective psychosis in relation to cannabis use, other drug use and gender. Psychological Medicine, 2012, 42, 1903-1911.	4.5	29
106	Examining frontotemporal connectivity and rTMS in healthy controls: Implications for auditory hallucinations in schizophrenia.. Neuropsychology, 2012, 26, 127-132.	1.3	28
107	Cognitive processes and attitudes in bipolar disorder: A study into personality, dysfunctional attitudes and attention bias in patients with bipolar disorder and their relatives. Journal of Affective Disorders, 2012, 143, 265-268.	4.1	31
108	Electrophysiological correlates of automatic spreading of activation in patients with psychotic disorder and first-degree relatives. International Journal of Psychophysiology, 2012, 84, 102-112.	1.0	8

#	ARTICLE	IF	CITATIONS
109	Academic motivation mediates the influence of temporal discounting on academic achievement during adolescence. <i>Trends in Neuroscience and Education</i> , 2012, 1, 43-48.	3.1	59
110	Association between genetic variation in a region on chromosome 11 and schizophrenia in large samples from Europe. <i>Molecular Psychiatry</i> , 2012, 17, 906-917.	7.9	105
111	The Relation Between Breakfast Skipping and School Performance in Adolescents. <i>Mind, Brain, and Education</i> , 2012, 6, 81-88.	1.9	37
112	Auditory P300 and N100 components as intermediate phenotypes for psychotic disorder: Familial liability and reliability. <i>Clinical Neurophysiology</i> , 2011, 122, 1984-1990.	1.5	27
113	A 2-year naturalistic study on cognitive functioning in bipolar disorder. <i>Acta Psychiatrica Scandinavica</i> , 2011, 123, 190-205.	4.5	94
114	Can obsessions drive you mad? Longitudinal evidence that obsessive-compulsive symptoms worsen the outcome of early psychotic experiences. <i>Acta Psychiatrica Scandinavica</i> , 2011, 123, 136-146.	4.5	40
115	An fMRI study of prefrontal dysfunction and symptomatic recovery in schizophrenia. <i>Acta Psychiatrica Scandinavica</i> , 2011, 123, 440-450.	4.5	12
116	The relationship between neurocognition and social cognition with functional outcomes in schizophrenia: A meta-analysis. <i>Neuroscience and Biobehavioral Reviews</i> , 2011, 35, 573-588.	6.1	1,489
117	Childhood Trauma and Psychosis: A Case-Control and Case-Sibling Comparison Across Different Levels of Genetic Liability, Psychopathology, and Type of Trauma. <i>American Journal of Psychiatry</i> , 2011, 168, 1286-1294.	7.2	170
118	Insight in Psychosis: Relationship With Neurocognition, Social Cognition and Clinical Symptoms Depends on Phase of Illness. <i>Schizophrenia Bulletin</i> , 2011, 37, 29-37.	4.3	86
119	Letter to the Editor: Comments on "Bullying victimization in youths and mental health problems: much ado about nothing?" TM . <i>Psychological Medicine</i> , 2011, 41, 2236-2237.	4.5	3
120	Evidence that bipolar disorder is the poor outcome fraction of a common developmental phenotype: an 8-year cohort study in young people. <i>Psychological Medicine</i> , 2010, 40, 289-299.	4.5	57
121	A cognitive intermediate phenotype study confirming possible gene×early adversity interaction in psychosis outcome: A general population twin study. <i>Psychosis</i> , 2010, 2, 1-11.	0.8	17
122	Functional Magnetic Resonance Imaging of Inner Speech in Schizophrenia. <i>Biological Psychiatry</i> , 2010, 67, 232-237.	1.3	80
123	Cognitive deficits in nonaffective functional psychoses: A study in the Democratic Republic of Congo. <i>Psychiatry Research</i> , 2010, 180, 86-92.	3.3	11
124	Neurocognitive Functioning as Intermediary Phenotype and Predictor of Psychosocial Functioning Across the Psychosis Continuum. <i>Journal of Clinical Psychiatry</i> , 2010, 71, 764-774.	2.2	79
125	Subjective Experience of Cognitive Failures as Possible Risk Factor for Negative Symptoms of Psychosis in the General Population. <i>Schizophrenia Bulletin</i> , 2009, 35, 766-774.	4.3	25
