in descending order

203 papers	3,337 citations	147566 31 h-index	253896 43 g-index
208 all docs	208 docs citations	208 times ranked	1530 citing authors

#	Article	IF	Citations
1	A branch-and-price approach for the continuous multifacility monotone ordered median problem. European Journal of Operational Research, 2023, 306, 105-126.	3.5	5
2	A branch-and-price procedure for clustering data that are graph connected. European Journal of Operational Research, 2022, 297, 817-830.	3.5	10
3	Routing for unmanned aerial vehicles: Touring dimensional sets. European Journal of Operational Research, 2022, 298, 118-136.	3.5	12
4	The effect of consolidated periods in heterogeneous lot-sizing games. Top, 2022, 30, 380-404.	1.1	1
5	Robust optimal classification trees under noisy labels. Advances in Data Analysis and Classification, 2022, 16, 155-179.	0.9	7
6	The soft-margin Support Vector Machine with ordered weighted average. Knowledge-Based Systems, 2022, 237, 107705.	4.0	9
7	Segmentation of scanning-transmission electron microscopy images using the ordered median problem. European Journal of Operational Research, 2022, 302, 671-687.	3.5	5
8	A combinatorial optimization approach to scenario filtering in portfolio selection. Computers and Operations Research, 2022, 142, 105701.	2.4	4
9	A mathematical programming approach to overlapping community detection. Physica A: Statistical Mechanics and Its Applications, 2022, 602, 127628.	1.2	5
10	A local analysis to determine all optimal solutions of p-k-max location problems on networks. Discrete Applied Mathematics, 2021, 296, 217-234.	0.5	2
11	Covering problems with polyellipsoids: A location analysis perspective. European Journal of Operational Research, 2021, 289, 44-58.	3.5	4
12	Computational comparisons of different formulations for the Stackelberg minimum spanning tree game. International Transactions in Operational Research, 2021, 28, 48-69.	1.8	6
13	A comparative study of different formulations for the capacitated discrete ordered median problem. Computers and Operations Research, 2021, 125, 105067.	2.4	5
14	Locating a discrete subtree of minimum variance on trees: New strategies to tackle a very hard problem. Discrete Applied Mathematics, 2021, 289, 78-92.	0.5	0
15	On the multisource hyperplanes location problem to fitting set of points. Computers and Operations Research, 2021, 128, 105124.	2.4	10
16	Global optimization for bilevel portfolio design: Economic insights from the Dow Jones index. Omega, 2021, 102, 102353.	3.6	8
17	The ordered median tree of hubs location problem. Top, 2021, 29, 78-105.	1.1	1
18	Unitary Owen Points in Cooperative Lot-Sizing Models with Backlogging. Mathematics, 2021, 9, 869.	1.1	4

#	ARTICLE	IF	CITATIONS
19	Enforcing fair cooperation in production-inventory settings with heterogeneous agents. Annals of Operations Research, 2021, 305, 59-80.	2.6	4
20	Coordinating drones with mothership vehicles: The mothership and drone routing problem with graphs. Computers and Operations Research, 2021, 136, 105445.	2.4	17
21	A market regulation bilevel problem: A case study of the Mexican petrochemical industry. Omega, 2020, 97, 102105.	3.6	5
22	Optimal arrangements of hyperplanes for SVM-based multiclass classification. Advances in Data Analysis and Classification, 2020, 14, 175-199.	0.9	22
23	A Branch-Price-and-Cut Procedure for the Discrete Ordered Median Problem. INFORMS Journal on Computing, 2020, 32, 582-599.	1.0	13
24	An exact completely positive programming formulation for the discrete ordered median problem: an extended version. Journal of Global Optimization, 2020, 77, 341-359.	1.1	4
25	An optimization model for line planning and timetabling in automated urban metro subway networks. A case study. Omega, 2020, 92, 102165.	3.6	23
26	A fresh view on the Discrete Ordered Median Problem based on partial monotonicity. European Journal of Operational Research, 2020, 286, 839-848.	3.5	5
27	A Risk-Aversion Approach for the Multiobjective Stochastic Programming Problem. Mathematics, 2020, 8, 2026.	1.1	3
28	Clustering and portfolio selection problems: A unified framework. Computers and Operations Research, 2020, 117, 104891.	2.4	29
29	Portfolio problems with two levels decision-makers: Optimal portfolio selection with pricing decisions on transaction costs. European Journal of Operational Research, 2020, 284, 712-727.	3.5	16
30	Exact algorithms for handling outliers in center location problems on networks using k-max functions. European Journal of Operational Research, 2019, 273, 441-451.	3.5	5
31	A heuristic procedure for computing the nucleolus. Computers and Operations Research, 2019, 112, 104764.	2.4	10
32	On Location-Allocation Problems for Dimensional Facilities. Journal of Optimization Theory and Applications, 2019, 182, 730-767.	0.8	6
33	A stochastic approach to approximate values in cooperative games. European Journal of Operational Research, 2019, 279, 93-106.	3.5	9
34	New models for the location of controversial facilities: A bilevel programming approach. Computers and Operations Research, 2019, 107, 95-106.	2.4	12
35	New algorithmic framework for conditional value at risk: Application to stochastic fixed-charge transportation. European Journal of Operational Research, 2019, 277, 215-226.	3.5	15
36	Location Problems with Multiple Criteria. , 2019, , 215-260.		2

#	Article	IF	Citations
37	Ordered Median Location Problems. , 2019, , 261-302.		1
38	A minmax regret version of the time-dependent shortest path problem. European Journal of Operational Research, 2018, 270, 968-981.	3.5	9
39	Extensive facility location problems on networks: an updated review. Top, 2018, 26, 187-226.	1.1	26
40	Rejoinder on: Extensive facility location problems on networks: an updated review. Top, 2018, 26, 236-238.	1.1	0
41	On minimax and Pareto optimal security payoffs in multicriteria games. Journal of Mathematical Analysis and Applications, 2018, 457, 1634-1648.	0.5	11
42	A discretization result for some optimization problems in framework spaces with polyhedral obstacles and the Manhattan metric. Electronic Notes in Discrete Mathematics, 2018, 68, 161-165.	0.4	0
43	On-Line Timetable Rescheduling in a Transit Line. Transportation Science, 2018, 52, 1106-1121.	2.6	17
44	Uniform and most uniform partitions of trees. Discrete Optimization, 2018, 30, 96-107.	0.6	3
45	Locating hyperplanes to fitting set of points: A general framework. Computers and Operations Research, 2018, 95, 172-193.	2.4	13
46	Mixed integer linear programming and heuristic methods for feature selection in clustering. Journal of the Operational Research Society, 2018, 69, 1379-1395.	2.1	12
47	Mathematical programming formulations for the efficient solution of the k-sum approval voting problem. Computers and Operations Research, 2018, 98, 127-136.	2.4	10
48	The geometry of optimal partitions in location problems. Optimization Letters, 2018, 12, 203-220.	0.9	6
49	Railway traffic disturbance management by means of control strategies applied to operations in the transit system. International Journal of Transport Development and Integration, 2018, 2, 362-372.	0.6	1
50	Continuous location under the effect of 'refraction'. Mathematical Programming, 2017, 161, 33-72.	1.6	4
51	Multi-objective integration of timetables, vehicle schedules and user routings in a transit network. Transportation Research Part B: Methodological, 2017, 98, 94-112.	2.8	45
52	Clustering data that are graph connected. European Journal of Operational Research, 2017, 261, 43-53.	3.5	22
53	Revisiting k-sum optimization. Mathematical Programming, 2017, 165, 579-604.	1.6	14
54	Minimum Spanning Trees with neighborhoods: Mathematical programming formulations and solution methods. European Journal of Operational Research, 2017, 262, 863-878.	3.5	14

#	Article	IF	Citations
55	Rank aggregation in cyclic sequences. Optimization Letters, 2017, 11, 667-678.	0.9	6
56	Ordered Weighted Average optimization in Multiobjective Spanning Tree Problem. European Journal of Operational Research, 2017, 260, 886-903.	3.5	13
57	A comparative study of formulations and solution methods for the discrete ordered p-median problem. Computers and Operations Research, 2017, 78, 230-242.	2.4	14
58	Algorithms for uniform centered partitions of trees. Electronic Notes in Discrete Mathematics, 2016, 55, 37-40.	0.4	2
59	Partitioning a graph into connected components with fixed centers and optimizing cost€based objective functions or equipartition criteria. Networks, 2016, 67, 69-81.	1.6	12
60	Continuous multifacility ordered median location problems. European Journal of Operational Research, 2016, 250, 56-64.	3.5	18
61	Ordered median hub location problems with capacity constraints. Transportation Research Part C: Emerging Technologies, 2016, 70, 142-156.	3.9	31
62	Location Problems with Multiple Criteria. , 2015, , 205-247.		2
63	Modelling and planning public cultural schedules for efficient use of resources. Computers and Operations Research, 2015, 58, 9-23.	2.4	2
64	The reliable p -median problem with at-facility service. European Journal of Operational Research, 2015, 245, 656-666.	3.5	17
65	An improved test set approach to nonlinear integer problems with applications to engineering design. Computational Optimization and Applications, 2015, 62, 565-588.	0.9	0
66	When centers can fail: A close second opportunity. Computers and Operations Research, 2015, 62, 145-156.	2.4	19
67	Several 2€facility location problems on networks with equity objectives. Networks, 2015, 65, 1-9.	1.6	12
68	Short rational generating functions for solving some families of fuzzy integer programming problems. Fuzzy Sets and Systems, 2015, 272, 30-46.	1.6	2
69	Ordered Median Location Problems. , 2015, , 249-288.		6
70	Rescheduling Railway Timetables in Presence of Passenger Transfers Between Lines Within a Transportation Network. Advances in Intelligent Systems and Computing, 2014, , 347-360.	0.5	1
71	Revisiting several problems and algorithms in continuous location with $$\ell _au $$ â," Ï„ norms. Computational Optimization and Applications, 2014, 58, 563-595.	0.9	38
72	Reliability problems in multiple path-shaped facility location on networks. Discrete Optimization, 2014, 12, 61-72.	0.6	11

#	ARTICLE	IF	CITATIONS
73	The multicriteria p-facility median location problem on networks. European Journal of Operational Research, 2014, 235, 484-493.	3.5	14
74	Unreliable point facility location problems on networks. Discrete Applied Mathematics, 2014, 166, 188-203.	0.5	3
75	An overview of ORP ^{3} 3 -OR for young researchers and practitioners. Annals of Operations Research, 2014, 222, 1-3.	2.6	0
76	A two-stage stochastic transportation problem with fixed handling costs and a priori selection of the distribution channels. Top, 2014, 22, 1123-1147.	1.1	10
77	Ordered weighted average combinatorial optimization: Formulations and their properties. Discrete Applied Mathematics, 2014, 169, 97-118.	0.5	21
78	A modified variable neighborhood search for the discrete ordered median problem. European Journal of Operational Research, 2014, 234, 61-76.	3.5	18
79	A Semidefinite Programming approach for solving Multiobjective Linear Programming. Journal of Global Optimization, 2014, 58, 465-480.	1.1	6
80	Robust mean absolute deviation problems on networks with linear vertex weights. Networks, 2013, 61, 76-85.	1.6	10
81	On discrete optimization with ordering. Annals of Operations Research, 2013, 207, 83-96.	2.6	9
82	Exact cost minimization of a series-parallel reliable system with multiple component choices using an algebraic method. Computers and Operations Research, 2013, 40, 2752-2759.	2.4	11
83	Finding the nucleolus of any n-person cooperative game by a single linear program. Computers and Operations Research, 2013, 40, 2308-2313.	2.4	17
84	Revisiting a game theoretic framework for the robust railway network design against intentional attacks. European Journal of Operational Research, 2013, 226, 286-292.	3.5	43
85	A specialized branch & bound & cut for Single-Allocation Ordered Median Hub Location problems. Discrete Applied Mathematics, 2013, 161, 2624-2646.	0.5	30
86	Minimizing ordered weighted averaging of rational functions with applications to continuous location. Computers and Operations Research, 2013, 40, 1448-1460.	2.4	14
87	An Application of Integer Programming to the Decomposition of Numerical Semigroups. SIAM Journal on Discrete Mathematics, 2012, 26, 1210-1237.	0.4	7
88	The minimum cost shortest-path tree game. Annals of Operations Research, 2012, 199, 23-32.	2.6	3
89	Range minimization problems in path-facility location on trees. Discrete Applied Mathematics, 2012, 160, 2294-2305.	0.5	8
90	A new complexity result on multiobjective linear integer programming using short rational generating functions. Optimization Letters, 2012, 6, 537-543.	0.9	9

#	Article	IF	Citations
91	Cooperative location games based on the minimum diameter spanning Steiner subgraph problem. Discrete Applied Mathematics, 2012, 160, 970-979.	0.5	8
92	Avoiding unfairness of Owen allocations in linear production processes. European Journal of Operational Research, 2012, 220, 125-131.	3.5	8
93	Optimizing ordered median functions with applications to single facility location. Operations Research Proceedings: Papers of the Annual Meeting = Vorträge Der Jahrestagung / DGOR, 2012, , 329-334.	0.1	0
94	Expanding the Spanish high-speed railway network. Omega, 2011, 39, 138-150.	3.6	27
95	COUNTING NUMERICAL SEMIGROUPS WITH SHORT GENERATING FUNCTIONS. International Journal of Algebra and Computation, 2011, 21, 1217-1235.	0.4	20
96	On the structure of the solution set for the single facility location problem with average distances. Mathematical Programming, 2011, 128, 373-401.	1.6	20
97	Minimax regret path location on trees. Networks, 2011, 58, 147-158.	1.6	13
98	Single-allocation ordered median hub location problems. Computers and Operations Research, 2011, 38, 559-570.	2.4	43
99	An algebraic approach to integer portfolio problems. European Journal of Operational Research, 2011, 210, 647-659.	3.5	17
100	A cooperative location game based on the 1-center location problem. European Journal of Operational Research, 2011, 214, 317-330.	3.5	11
101	Pareto-optimal security strategies in matrix games with fuzzy payoffs. Fuzzy Sets and Systems, 2011, 176, 36-45.	1.6	20
102	Some algebraic methods for solving multiobjective polynomial integer programs. Journal of Symbolic Computation, 2011, 46, 511-533.	0.5	6
103	Distribution systems design with role dependent objectives. European Journal of Operational Research, 2010, 202, 491-501.	3.5	20
104	On the Planar Piecewise Quadratic 1-Center Problem. Algorithmica, 2010, 57, 252-283.	1.0	2
105	The ordered capacitated facility location problem. Top, 2010, 18, 203-222.	1.1	34
106	The Single Period Coverage Facility Location Problem: Lagrangean heuristic and column generation approaches. Top, 2010, 18, 43-61.	1.1	4
107	A model and two heuristic approaches for a forage harvester planning problem: a case study. Top, 2010, 18, 122-139.	1.1	12
108	Planning for Agricultural Forage Harvesters and Trucks: Model, Heuristics, and Case Study. Networks and Spatial Economics, 2010, 10, 321-343.	0.7	21

#	Article	IF	Citations
109	Avoiding unfairness of Owen solutions in linear production games. , 2010, , .		0
110	Some new cooperative coverage facility location games. , 2010, , .		0
111	Determining the Pareto set in a bicriteria two-echelon inventory/distribution system. Optimization, 2010, 59, 253-271.	1.0	2
112	Minimax Regret Single-Facility Ordered Median Location Problems on Networks. INFORMS Journal on Computing, 2009, 21, 77-87.	1.0	33
113	The continuous and discrete pathâ€variance problems on trees. Networks, 2009, 53, 221-228.	1.6	11
114	Opportune moment strategies for a cost spanning tree game. Mathematical Methods of Operations Research, 2009, 70, 451-463.	0.4	2
115	Modeling cooperation on a class of distribution problems. European Journal of Operational Research, 2009, 198, 726-733.	3.5	18
116	The multi-period incremental service facility location problem. Computers and Operations Research, 2009, 36, 1356-1375.	2.4	69
117	A comparison of formulations and solution methods for the minimum-envy location problem. Computers and Operations Research, 2009, 36, 1966-1981.	2.4	36
118	A flexible model and efficient solution strategies for discrete location problems. Discrete Applied Mathematics, 2009, 157, 1128-1145.	0.5	61
119	Extensive facility location problems on networks with equity measures. Discrete Applied Mathematics, 2009, 157, 1069-1085.	0.5	20
120	The use of relative priorities in optimizing the performance of a queueing system. European Journal of Operational Research, 2009, 193, 476-483.	3.5	16
121	Production-inventory games: A new class of totally balanced combinatorial optimization games. Games and Economic Behavior, 2009, 65, 205-219.	0.4	49
122	Partial GrÃ¶bner Bases for Multiobjective Integer Linear Optimization. SIAM Journal on Discrete Mathematics, 2009, 23, 571-595.	0.4	10
123	Center location problems on tree graphs with subtree-shaped customers. Discrete Applied Mathematics, 2008, 156, 2890-2910.	0.5	9
124	Cooperation in Markovian queueing models. European Journal of Operational Research, 2008, 188, 485-495.	3.5	27
125	Dynamic realization games in newsvendor inventory centralization. International Journal of Game Theory, 2008, 37, 139-153.	0.5	14
126	The path player game. Mathematical Methods of Operations Research, 2008, 68, 1-20.	0.4	2

#	Article	IF	Citations
127	Partially ordered cooperative games: extended core and Shapley value. Annals of Operations Research, 2008, 158, 143-159.	2.6	18
