

# Will K Cornwell

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/9134758/will-k-cornwell-publications-by-year.pdf>

**Version:** 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

127  
papers

16,892  
citations

#	Paper	IF	Citations
127	Rainforest bird communities threatened by extreme fire. <i>Global Ecology and Conservation</i> , <b>2022</b> , 33, e01985	11.5	0
126	Reply to Robinson et al.: Data integration will form the basis of future abundance estimates.. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2022</b> , 119, e2117920119	11.5	0
125	Urban tolerance of birds changes throughout the full annual cycle. <i>Journal of Biogeography</i> , <b>2021</b> , 48, 1503-1517	4.1	2
124	Frequent consumption of sap suggests that omnivory is widespread among Australian geckos. <i>Die Naturwissenschaften</i> , <b>2021</b> , 108, 14	2	
123	Global abundance estimates for 9,700 bird species. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2021</b> , 118,	11.5	15
122	Rapidly mapping fire effects on biodiversity at a large-scale using citizen science. <i>Science of the Total Environment</i> , <b>2021</b> , 755, 142348	10.2	15
121	Conservation birding: A quantitative conceptual framework for prioritizing citizen science observations. <i>Biological Conservation</i> , <b>2021</b> , 253, 108912	6.2	7
120	How to build a biodiverse city: environmental determinants of bird diversity within and among 1581 cities. <i>Biodiversity and Conservation</i> , <b>2021</b> , 30, 217-234	3.4	4
119	Shifts in fine root traits within and among species along a fine-scale hydrological gradient. <i>Annals of Botany</i> , <b>2021</b> , 127, 473-481	4.1	2
118	Is color data from citizen science photographs reliable for biodiversity research?. <i>Ecology and Evolution</i> , <b>2021</b> , 11, 4071-4083	2.8	4
117	Lichens buffer tundra microclimate more than the expanding shrub <i>Betula nana</i> . <i>Annals of Botany</i> , <b>2021</b> , 128, 407-418	4.1	5
116	Tissue chemistry of biocrust species along an aridity gradient and comparison to vascular plant leaves. <i>Functional Ecology</i> , <b>2021</b> , 35, 2604	5.6	0
115	AusTraits, a curated plant trait database for the Australian flora. <i>Scientific Data</i> , <b>2021</b> , 8, 254	8.2	6
114	When and where soil is important to modify the carbon and water economy of leaves. <i>New Phytologist</i> , <b>2020</b> , 228, 121-135	9.8	6
113	The Role of Climate Niche, Geofloristic History, Habitat Preference, and Allometry on Wood Density within a California Plant Community. <i>Forests</i> , <b>2020</b> , 11, 105	2.8	3
112	Environmental cues for dispersal in a filamentous fungus in simulated islands. <i>Oikos</i> , <b>2020</b> , 129, 1084-1092	4	0
111	Sexual dimorphism in trait variability and its eco-evolutionary and statistical implications. <i>ELife</i> , <b>2020</b> , 9,	8.9	20

110	A global database for metacommunity ecology, integrating species, traits, environment and space. <i>Scientific Data</i> , <b>2020</b> , 7, 6	8.2	10
109	Finding fungal ecological strategies: Is recycling an option?. <i>Fungal Ecology</i> , <b>2020</b> , 46, 100902	4.1	5
108	TRY plant trait database - enhanced coverage and open access. <i>Global Change Biology</i> , <b>2020</b> , 26, 119-188	11.4	399
107	Fungal functional ecology: bringing a trait-based approach to plant-associated fungi. <i>Biological Reviews</i> , <b>2020</b> , 95, 409-433	13.5	79
106	A continental measure of urbanness predicts avian response to local urbanization. <i>Ecography</i> , <b>2020</b> , 43, 528-538	6.5	8
105	Widespread short-term persistence of frog species after the 2019-2020 bushfires in eastern Australia revealed by citizen science. <i>Conservation Science and Practice</i> , <b>2020</b> , 2, e287	2.2	6
104	Three Frontiers for the Future of Biodiversity Research Using Citizen Science Data. <i>BioScience</i> , <b>2020</b> , ,	5.7	5
103	Optimizing future biodiversity sampling by citizen scientists. <i>Proceedings of the Royal Society B: Biological Sciences</i> , <b>2019</b> , 286, 20191487	4.4	22
102	Pelagic citizen science data reveal declines of seabirds off south-eastern Australia. <i>Biological Conservation</i> , <b>2019</b> , 235, 226-235	6.2	8
101	Good neighbors aplenty: fungal endophytes rarely exhibit competitive exclusion patterns across a span of woody habitats. <i>Ecology</i> , <b>2019</b> , 100, e02790	4.6	11
100	Using citizen science data to define and track restoration targets in urban areas. <i>Journal of Applied Ecology</i> , <b>2019</b> , 56, 1998	5.8	15
99	When to cut your losses: Dispersal allocation in an asexual filamentous fungus in response to competition. <i>Ecology and Evolution</i> , <b>2019</b> , 9, 4129-4137	2.8	3
98	Natural and Regenerated Saltmarshes Exhibit Similar Soil and Belowground Organic Carbon Stocks, Root Production and Soil Respiration. <i>Ecosystems</i> , <b>2019</b> , 22, 1803-1822	3.9	9
97	Datatorr: a workflow and package for delivering successive versions of 'evolving data' directly into R. <i>GigaScience</i> , <b>2019</b> , 8,	7.6	3
96	Strong restrictions on the trait range of co-occurring species in the newly created riparian zone of the Three Gorges Reservoir Area, China. <i>Journal of Plant Ecology</i> , <b>2019</b> , 12, 825-833	1.7	4
95	What we (don't) know about global plant diversity. <i>Ecography</i> , <b>2019</b> , 42, 1819-1831	6.5	41
94	Improving big citizen science data: Moving beyond haphazard sampling. <i>PLoS Biology</i> , <b>2019</b> , 17, e3000357	7.7	55
93	From dangerous branches to urban banyan: Facilitating aerial root growth of <i>Ficus rubiginosa</i> . <i>PLoS ONE</i> , <b>2019</b> , 14, e0226845	3.7	3

92	Bridging reproductive and microbial ecology: a case study in arbuscular mycorrhizal fungi. <i>ISME Journal</i> , <b>2019</b> , 13, 873-884	11.9	21
91	Traditional plant functional groups explain variation in economic but not size-related traits across the tundra biome. <i>Global Ecology and Biogeography</i> , <b>2019</b> , 28, 78-95	6.1	24
90	Hungry and thirsty: Effects of CO <sub>2</sub> and limited water availability on plant performance. <i>Flora: Morphology, Distribution, Functional Ecology of Plants</i> , <b>2019</b> , 254, 188-193	1.9	11
89	Generalists are the most urban-tolerant of birds: a phylogenetically controlled analysis of ecological and life history traits using a novel continuous measure of bird responses to urbanization. <i>Oikos</i> , <b>2019</b> , 128, 845-858	4	57
88	A global growth-form database for 143,616 vascular plant species. <i>Ecology</i> , <b>2019</b> , 100, e02614	4.6	9
87	Dam Effect on Soil Nutrients and Potentially Toxic Metals in a Reservoir Riparian Zone. <i>Clean - Soil, Air, Water</i> , <b>2019</b> , 47, 1700497	1.6	5
86	Functional biogeography of angiosperms: life at the extremes. <i>New Phytologist</i> , <b>2018</b> , 218, 1697-1709	9.8	34
85	Symbiont switching and alternative resource acquisition strategies drive mutualism breakdown. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2018</b> , 115, 5229-5234	11.5	52
84	Contest competition and men's facial hair: beards may not provide advantages in combat. <i>Evolution and Human Behavior</i> , <b>2018</b> , 39, 147-153	4	24
83	Plant functional trait change across a warming tundra biome. <i>Nature</i> , <b>2018</b> , 562, 57-62	50.4	264
82	Climate and soils together regulate photosynthetic carbon isotope discrimination within C3 plants worldwide. <i>Global Ecology and Biogeography</i> , <b>2018</b> , 27, 1056-1067	6.1	45
81	Plants show more flesh in the tropics: variation in fruit type along latitudinal and climatic gradients. <i>Ecography</i> , <b>2017</b> , 40, 531-538	6.5	38
80	A new metric to assess the predictive accuracy of multinomial land cover models. <i>Journal of Biogeography</i> , <b>2017</b> , 44, 1212-1224	4.1	1
79	Modelling the distribution of fish around an artificial reef. <i>Marine and Freshwater Research</i> , <b>2017</b> , 68, 1955	2.2	18
78	Phylogenetic comparative methods. <i>Current Biology</i> , <b>2017</b> , 27, R333-R336	6.3	42
77	Intraspecific leaf trait variability along a boreal-to-tropical community diversity gradient. <i>PLoS ONE</i> , <b>2017</b> , 12, e0172495	3.7	17
76	Are litter decomposition and fire linked through plant species traits?. <i>New Phytologist</i> , <b>2017</b> , 216, 653-669	9.8	25
75	Relationships between mycorrhizal type and leaf flammability in the Australian flora. <i>Pedobiologia</i> , <b>2017</b> , 65, 43-49	1.7	7

74	A global method for calculating plant CSR ecological strategies applied across biomes world-wide. <i>Functional Ecology</i> , <b>2017</b> , 31, 444-457	5.6	191
73	Increases in CO <sub>2</sub> from past low to future high levels result in Blower strategies on the leaf economic spectrum. <i>Perspectives in Plant Ecology, Evolution and Systematics</i> , <b>2017</b> , 29, 41-50	3	9
72	Towards a universal model for carbon dioxide uptake by plants. <i>Nature Plants</i> , <b>2017</b> , 3, 734-741	11.5	139
71	A simple approach for maximizing the overlap of phylogenetic and comparative data. <i>Methods in Ecology and Evolution</i> , <b>2016</b> , 7, 751-758	7.7	28
70	Strong but diverging clonality - climate relationships of different plant clades explain weak overall pattern across China. <i>Scientific Reports</i> , <b>2016</b> , 6, 26850	4.9	4
69	Does plant size affect growth responses to water availability at glacial, modern and future CO <sub>2</sub> concentrations?. <i>Ecological Research</i> , <b>2016</b> , 31, 213-227	1.9	7
68	Species mixture effects on flammability across plant phylogeny: the importance of litter particle size and the special role for non- Pinaceae. <i>Ecology and Evolution</i> , <b>2016</b> , 6, 8223-8234	2.8	15
67	Mutualism Persistence and Abandonment during the Evolution of the Mycorrhizal Symbiosis. <i>American Naturalist</i> , <b>2016</b> , 188, E113-E125	3.7	67
66	Global patterns of plant root colonization intensity by mycorrhizal fungi explained by climate and soil chemistry. <i>Global Ecology and Biogeography</i> , <b>2015</b> , 24, 371-382	6.1	126
65	Decomposition of 51 semidesert species from wide-ranging phylogeny is faster in standing and sand-buried than in surface leaf litters: implications for carbon and nutrient dynamics. <i>Plant and Soil</i> , <b>2015</b> , 396, 175-187	4.2	18
64	Flammability across the gymnosperm phylogeny: the importance of litter particle size. <i>New Phytologist</i> , <b>2015</b> , 206, 672-81	9.8	42
63	Burn or rot: leaf traits explain why flammability and decomposability are decoupled across species. <i>Functional Ecology</i> , <b>2015</b> , 29, 1486-1497	5.6	65
62	Global effects of soil and climate on leaf photosynthetic traits and rates. <i>Global Ecology and Biogeography</i> , <b>2015</b> , 24, 706-717	6.1	179
61	Topographic, latitudinal and climatic distribution of <i>Pinus coulteri</i> : geographic range limits are not at the edge of the climate envelope. <i>Ecography</i> , <b>2015</b> , 38, 590-601	6.5	24
60	Trees, branches and (square) roots: why evolutionary relatedness is not linearly related to functional distance. <i>Methods in Ecology and Evolution</i> , <b>2015</b> , 6, 439-444	7.7	45
59	Toward a better understanding of variation in the amount of leaf area in vegetation. <i>Journal of Vegetation Science</i> , <b>2015</b> , 26, 1028-1029	3.1	
58	Functional traits drive the contribution of solar radiation to leaf litter decomposition among multiple arid-zone species. <i>Scientific Reports</i> , <b>2015</b> , 5, 13217	4.9	18
57	Termites amplify the effects of wood traits on decomposition rates among multiple bamboo and dicot woody species. <i>Journal of Ecology</i> , <b>2015</b> , 103, 1214-1223	6	27

56	A Geographic Mosaic of Climate Change Impacts on Terrestrial Vegetation: Which Areas Are Most at Risk?. <i>PLoS ONE</i> , <b>2015</b> , 10, e0130629	3.7	31
55	Divergence of above- and belowground C and N pool within predominant plant species along two precipitation gradients in North China. <i>Biogeosciences</i> , <b>2015</b> , 12, 457-465	4.6	7
54	Evolutionary signals of symbiotic persistence in the legume-rhizobia mutualism. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , <b>2015</b> , 112, 10262-9	11.5	36
53	Zanne et al. reply. <i>Nature</i> , <b>2015</b> , 521, E6-7	50.4	3
52	Model Adequacy and the Macroevolution of Angiosperm Functional Traits. <i>American Naturalist</i> , <b>2015</b> , 186, E33-50	3.7	109
51	Winners always win: growth of a wide range of plant species from low to future high CO <sub>2</sub> . <i>Ecology and Evolution</i> , <b>2015</b> , 5, 4949-61	2.8	31
50	Impact of land-use on carbon storage as dependent on soil texture: evidence from a desertified dryland using repeated paired sampling design. <i>Journal of Environmental Management</i> , <b>2015</b> , 150, 489-498	7.9	6
49	How much of the world is woody?. <i>Journal of Ecology</i> , <b>2014</b> , 102, 1266-1272	6	63
48	The Tree of Life in ecosystems: evolution of plant effects on carbon and nutrient cycling. <i>Journal of Ecology</i> , <b>2014</b> , 102, 269-274	6	20
47	Weak phylogenetic signal in physiological traits of methane-oxidizing bacteria. <i>Journal of Evolutionary Biology</i> , <b>2014</b> , 27, 1240-7	2.3	12
46	Which is a better predictor of plant traits: temperature or precipitation?. <i>Journal of Vegetation Science</i> , <b>2014</b> , 25, 1167-1180	3.1	217
45	Three keys to the radiation of angiosperms into freezing environments. <i>Nature</i> , <b>2014</b> , 506, 89-92	50.4	896
44	A single evolutionary innovation drives the deep evolution of symbiotic N <sub>2</sub> -fixation in angiosperms. <i>Nature Communications</i> , <b>2014</b> , 5, 4087	17.4	173
43	The effects of phenotypic plasticity and local adaptation on forecasts of species range shifts under climate change. <i>Ecology Letters</i> , <b>2014</b> , 17, 1351-64	10	583
42	Global relationship of wood and leaf litter decomposability: the role of functional traits within and across plant organs. <i>Global Ecology and Biogeography</i> , <b>2014</b> , 23, 1046-1057	6.1	100
41	Interactions between Fine Wood Decomposition and Flammability. <i>Forests</i> , <b>2014</b> , 5, 827-846	2.8	13
40	Decomposition trajectories of diverse litter types: a model selection analysis. <i>Methods in Ecology and Evolution</i> , <b>2014</b> , 5, 173-182	7.7	37
39	Functional distinctiveness of major plant lineages. <i>Journal of Ecology</i> , <b>2014</b> , 102, 345-356	6	87

38	Understanding the ecosystem implications of the angiosperm rise to dominance: leaf litter decomposability among magnoliids and other basal angiosperms. <i>Journal of Ecology</i> , <b>2014</b> , 102, 337-344 <sup>6</sup>	12
37	Experimental evidence that the Ornstein-Uhlenbeck model best describes the evolution of leaf litter decomposability. <i>Ecology and Evolution</i> , <b>2014</b> , 4, 3339-49	2.8 13
36	Effects of growth form and functional traits on response of woody plants to clearing and fragmentation of subtropical rainforest. <i>Conservation Biology</i> , <b>2013</b> , 27, 1468-77	6 9
35	Meta-analysis reveals profound responses of plant traits to glacial CO <sub>2</sub> levels. <i>Ecology and Evolution</i> , <b>2013</b> , 3, 4525-35	2.8 22
34	Linking litter decomposition of above- and below-ground organs to plant-soil feedbacks worldwide. <i>Journal of Ecology</i> , <b>2013</b> , 101, 943-952	6 265
33	Abundance, rarity and invasion debt among exotic species in a patchy ecosystem. <i>Biological Invasions</i> , <b>2013</b> , 15, 707-716	2.7 34
32	A broader perspective on plant domestication and nutrient and carbon cycling. <i>New Phytologist</i> , <b>2013</b> , 198, 331-333	9.8 10
31	Correlations between physical and chemical defences in plants: tradeoffs, syndromes, or just many different ways to skin a herbivorous cat?. <i>New Phytologist</i> , <b>2013</b> , 198, 252-263	9.8 94
30	Leaf traits within communities: context may affect the mapping of traits to function. <i>Ecology</i> , <b>2013</b> , 94, 1893-7	4.6 73
29	Australian Tropical and Subtropical Rain Forest Community Assembly: Phylogeny, Functional Biogeography, and Environmental Gradients. <i>Biotropica</i> , <b>2012</b> , 44, 668-679	2.3 23
28	An evolutionary attractor model for sapwood cross section in relation to leaf area. <i>Journal of Theoretical Biology</i> , <b>2012</b> , 303, 98-109	2.3 7
27	A rediscovered treasure: mycorrhizal intensity database for 3000 vascular plant species across the former Soviet Union. <i>Ecology</i> , <b>2012</b> , 93, 689-690	4.6 76
26	Species composition and fire: non-additive mixture effects on ground fuel flammability. <i>Frontiers in Plant Science</i> , <b>2012</b> , 3, 63	6.2 29
25	Plant-driven variation in decomposition rates improves projections of global litter stock distribution. <i>Biogeosciences</i> , <b>2012</b> , 9, 565-576	4.6 92
24	Phylogenetic tests of community assembly across regional to continental scales in tropical and subtropical rain forests. <i>Global Ecology and Biogeography</i> , <b>2011</b> , 20, 707-716	6.1 79
23	Global to community scale differences in the prevalence of convergent over divergent leaf trait distributions in plant assemblages. <i>Global Ecology and Biogeography</i> , <b>2011</b> , 20, 755-765	6.1 92
22	Taller and larger: shifts in Arctic tundra leaf traits after 16 years of experimental warming. <i>Global Change Biology</i> , <b>2011</b> , 17, 1013-1021	11.4 135
21	TRY: a global database of plant traits. <i>Global Change Biology</i> , <b>2011</b> , 17, 2905-2935	11.4 1623

20	Putting plant resistance traits on the map: a test of the idea that plants are better defended at lower latitudes. <i>New Phytologist</i> , <b>2011</b> , 191, 777-788	9.8	126
19	The geography of climate change: implications for conservation biogeography. <i>Diversity and Distributions</i> , <b>2010</b> , 16, 476-487	5	383
18	Plant functional traits in Australian subtropical rain forest: partitioning within-community from cross-landscape variation. <i>Journal of Ecology</i> , <b>2010</b> , 98, 517-525	6	34
17	A link between plant traits and abundance: evidence from coastal California woody plants. <i>Journal of Ecology</i> , <b>2010</b> , 98, 814-821	6	110
16	Picante: R tools for integrating phylogenies and ecology. <i>Bioinformatics</i> , <b>2010</b> , 26, 1463-4	7.2	3021
15	A unique web resource for physiology, ecology and the environmental sciences: PrometheusWiki. <i>Functional Plant Biology</i> , <b>2010</b> , 37, 687	2.7	13
14	Plant traits and wood fates across the globe: rotted, burned, or consumed?. <i>Global Change Biology</i> , <b>2009</b> , 15, 2431-2449	11.4	244
13	Global meta-analysis of wood decomposition rates: a role for trait variation among tree species?. <i>Ecology Letters</i> , <b>2009</b> , 12, 45-56	10	313
12	Community assembly and shifts in plant trait distributions across an environmental gradient in coastal California. <i>Ecological Monographs</i> , <b>2009</b> , 79, 109-126	9	767
11	Why are non-photosynthetic tissues generally C enriched compared with leaves in C plants? Review and synthesis of current hypotheses. <i>Functional Plant Biology</i> , <b>2009</b> , 36, 199-213	2.7	304
10	Plant species traits are the predominant control on litter decomposition rates within biomes worldwide. <i>Ecology Letters</i> , <b>2008</b> , 11, 1065-71	10	1605
9	A trait-based approach to community assembly: partitioning of species trait values into within- and among-community components. <i>Ecology Letters</i> , <b>2007</b> , 10, 135-45	10	534
8	Trait evolution, community assembly, and the phylogenetic structure of ecological communities. <i>American Naturalist</i> , <b>2007</b> , 170, 271-83	3.7	512
7	A trait-based test for habitat filtering: convex hull volume. <i>Ecology</i> , <b>2006</b> , 87, 1465-71	4.6	766
6	Wood density and vessel traits as distinct correlates of ecological strategy in 51 California coast range angiosperms. <i>New Phytologist</i> , <b>2006</b> , 170, 807-18	9.8	320
5	Regional and local patterns in plant species richness with respect to resource availability. <i>Oikos</i> , <b>2003</b> , 100, 417-428	4	144
4	Occurrence of arbuscular mycorrhizal fungi in a phosphorus-poor wetland and mycorrhizal response to phosphorus fertilization. <i>American Journal of Botany</i> , <b>2001</b> , 88, 1824-1829	2.7	80
3	What we (don't) know about global plant diversity		3

- 2 AusTraits  curated plant trait database for the Australian flora 1
- 1 Using citizen science to measure recolonisation of birds after the Australian 2019–2020 mega-fires. *Austral Ecology*, 1.5 2
