#	ARTICLE	IF	CITATIONS
1	Aerobic or resistance training improves autonomic control of circulation in oophorectomized rats with cardiometabolic dysfunctions: Impact on renal oxidative stress. <i>Experimental Gerontology</i> , 2021, 145, 111181.	2.8	2
2	Characterization of the Oxidative Stress in Renal Ischemia/Reperfusion-Induced Cardiorenal Syndrome Type 3. <i>BioMed Research International</i> , 2020, 2020, 1-11.	1.9	14
3	Hypoglycemic effect and hepato protective role of <i>Saccharomyces boulardii</i> THT 500101 strain in a murine model of streptozotocin-induced diabetes. <i>FASEB Journal</i> , 2020, 34, 1-1.	0.5	1
4	SEDENTARY LIFESTYLE IN ADOLESCENTS IS ASSOCIATED WITH IMPAIRMENT IN AUTONOMIC CARDIOVASCULAR MODULATION. <i>Revista Brasileira De Medicina Do Esporte</i> , 2019, 25, 191-195.	0.2	4
5	Exercise training initiated at old stage of lifespan attenuates aging-and ovariectomy-induced cardiac and renal oxidative stress: Role of baroreflex. <i>Experimental Gerontology</i> , 2019, 124, 110635.	2.8	8
6	The association of family history of hypertension and overweight induced early impairment in markers of oxidative stress and in heart rate variability. <i>FASEB Journal</i> , 2019, 33, 691.11.	0.5	0
7	Combined Aerobic and Resistance Exercise Training Improve Hypertension Associated With Menopause. <i>Frontiers in Physiology</i> , 2018, 9, 1471.	2.8	24
8	Combined aerobic and resistance exercise training attenuates cardiac dysfunctions in a model of diabetes and menopause. <i>PLoS ONE</i> , 2018, 13, e0202731.	2.5	15
9	Baroreflex Impairment Precedes Cardiometabolic Dysfunction in an Experimental Model of Metabolic Syndrome: Role of Inflammation and Oxidative Stress. <i>Scientific Reports</i> , 2018, 8, 8578.	3.3	16
10	Excessive consumption of fructose causes cardiometabolic dysfunctions through oxidative stress and inflammation. <i>Canadian Journal of Physiology and Pharmacology</i> , 2017, 95, 1078-1090.	1.4	17
11	Vitamin C mitigates oxidative/nitrosative stress and inflammation in doxorubicin-induced cardiomyopathy. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2017, 313, H795-H809.	3.2	93
12	Influence of Estimated Training Status on Anti and Pro-Oxidant Activity, Nitrite Concentration, and Blood Pressure in Middle-Aged and Older Women. <i>Frontiers in Physiology</i> , 2017, 8, 122.	2.8	7
13	Association between Diastolic Dysfunction with Inflammation and Oxidative Stress in Females ob/ob Mice. <i>Frontiers in Physiology</i> , 2017, 8, 572.	2.8	12
14	Training Status as a Marker of the Relationship between Nitric Oxide, Oxidative Stress, and Blood Pressure in Older Adult Women. <i>Oxidative Medicine and Cellular Longevity</i> , 2016, 2016, 1-9.	4.0	6
15	Impact of aging on cardiac function in a female rat model of menopause: role of autonomic control, inflammation, and oxidative stress. <i>Clinical Interventions in Aging</i> , 2016, 11, 341.	2.9	32
16	Red and Infrared Low-Level Laser Therapy Prior to Injury with or without Administration after Injury Modulate Oxidative Stress during the Muscle Repair Process. <i>PLoS ONE</i> , 2016, 11, e0153618.	2.5	24
17	Resistance or aerobic training decreases blood pressure and improves cardiovascular autonomic control and oxidative stress in hypertensive menopausal rats. <i>Journal of Applied Physiology</i> , 2016, 121, 1032-1038.	2.5	31
18	Insulin resistance: an additional risk factor in the pathogenesis of cardiovascular disease in type 2 diabetes. <i>Heart Failure Reviews</i> , 2016, 21, 11-23.	3.9	156

#	ARTICLE	IF	CITATIONS
19	Exercise Training Prevents Cardiovascular Derangements Induced by Fructose Overload in Developing Rats. PLoS ONE, 2016, 11, e0167291.	2.5	13
20	Aerobic exercise training promotes additional cardiac benefits better than resistance exercise training in postmenopausal rats with diabetes. Menopause, 2015, 22, 534-541.	2.0	24
21	Positive effect of combined exercise training in a model of metabolic syndrome and menopause: autonomic, inflammatory, and oxidative stress evaluations. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2015, 309, R1532-R1539.	1.8	46
22	Cardiovascular autonomic dysfunction and oxidative stress induced by fructose overload in an experimental model of hypertension and menopause. BMC Cardiovascular Disorders, 2014, 14, 185.	1.7	26
23	Dynamic Aerobic Exercise Induces Baroreflex Improvement in Diabetic Rats. Experimental Diabetes Research, 2012, 2012, 1-5.	3.8	9
24	Cardiometabolic benefits of exercise training in an experimental model of metabolic syndrome and menopause. Menopause, 2012, 19, 562-568.	2.0	31
