#	ARTICLE	IF	CITATIONS
1	Tropos: An Agent-Oriented Software Development Methodology. <i>Autonomous Agents and Multi-Agent Systems</i> , 2004, 8, 203-236.	1.3	1,175
2	SECURE TROPOS: A SECURITY-ORIENTED EXTENSION OF THE TROPOS METHODOLOGY. <i>International Journal of Software Engineering and Knowledge Engineering</i> , 2007, 17, 285-309.	0.6	294
3	A goal-based framework for contextual requirements modeling and analysis. <i>Requirements Engineering</i> , 2010, 15, 439-458.	2.1	173
4	GRAnD: A goal-oriented approach to requirement analysis in data warehouses. <i>Decision Support Systems</i> , 2008, 45, 4-21.	3.5	160
5	Goal-oriented requirements analysis and reasoning in the Tropos methodology. <i>Engineering Applications of Artificial Intelligence</i> , 2005, 18, 159-171.	4.3	158
6	Reasoning with Goal Models. <i>Lecture Notes in Computer Science</i> , 2002, , 167-181.	1.0	144
7	Goal-oriented requirement analysis for data warehouse design. , 2005, , .		126
8	Adaptive socio-technical systems: a requirements-based approach. <i>Requirements Engineering</i> , 2013, 18, 1-24.	2.1	112
9	Goal-oriented requirements engineering: an extended systematic mapping study. <i>Requirements Engineering</i> , 2019, 24, 133-160.	2.1	107
10	When security meets software engineering: a case of modelling secure information systems. <i>Information Systems</i> , 2005, 30, 609-629.	2.4	93
11	A knowledge level software engineering methodology for agent oriented programming. , 2001, , .		83
12	Requirements engineering for trust management: model, methodology, and reasoning. <i>International Journal of Information Security</i> , 2006, 5, 257-274.	2.3	80
13	Goal-driven risk assessment in requirements engineering. <i>Requirements Engineering</i> , 2011, 16, 101-116.	2.1	80
14	Formal Reasoning Techniques for Goal Models. <i>Lecture Notes in Computer Science</i> , 2003, , 1-20.	1.0	78
15	Multi-Agent Architectures as Organizational Structures. <i>Autonomous Agents and Multi-Agent Systems</i> , 2006, 13, 3-25.	1.3	75
16	Simple and Minimum-Cost Satisfiability for Goal Models. <i>Notes on Numerical Fluid Mechanics and Multidisciplinary Design</i> , 2004, , 20-35.	0.2	71
17	Reasoning with contextual requirements: Detecting inconsistency and conflicts. <i>Information and Software Technology</i> , 2013, 55, 35-57.	3.0	58
18	Organizational Patterns for Early Requirements Analysis. <i>Notes on Numerical Fluid Mechanics and Multidisciplinary Design</i> , 2003, , 617-632.	0.2	46

#	ARTICLE	IF	CITATIONS
19	From Trust to Dependability through Risk Analysis. , 2007, , .		45
20	Designing socio-technical systems: from stakeholder goals to social networks. Requirements Engineering, 2009, 14, 47-70.	2.1	43
21	Modelling and reasoning about security requirements in socio-technical systems. Data and Knowledge Engineering, 2015, 98, 123-143.	2.1	42
22	A Goal-Based Organizational Perspective on Multi-agent Architectures. Lecture Notes in Computer Science, 2002, , 128-140.	1.0	41
23	Multi-objective reasoning with constrained goal models. Requirements Engineering, 2018, 23, 189-225.	2.1	39
24	Requirements Engineering Meets Trust Management. Lecture Notes in Computer Science, 2004, , 176-190.	1.0	39
25	Improving Web Service Discovery with Usage Data. IEEE Software, 2007, 24, 47-54.	2.1	37
26	Security and Trust Requirements Engineering. Lecture Notes in Computer Science, 2005, , 237-272.	1.0	36
27	Security Attack Testing (SAT)â€™testing the security of information systems at design time. Information Systems, 2007, 32, 1166-1183.	2.4	36
28	Modeling and Verifying Security Policies in Business Processes. Lecture Notes in Business Information Processing, 2014, , 200-214.	0.8	36
29	Goal-Oriented Requirements Engineering: A Systematic Literature Map. , 2016, , .		36
30	Modelling secure multiagent systems. , 2003, , .		35
31	MODELING SECURE SYSTEMS USING AN AGENT-ORIENTED APPROACH AND SECURITY PATTERNS. International Journal of Software Engineering and Knowledge Engineering, 2006, 16, 471-498.	0.6	34
32	Implicit. , 2005, , .		32
33	Requirement Engineering Meets Security: A Case Study on Modelling Secure Electronic Transactions by VISA and Mastercard. Lecture Notes in Computer Science, 2003, , 263-276.	1.0	30
34	Lung ultrasonography for early management of patients with respiratory symptoms during COVID-19 pandemic. Journal of Ultrasound, 2020, 23, 449-456.	0.7	29
35	An Architecture for Requirements-Driven Self-reconfiguration. Notes on Numerical Fluid Mechanics and Multidisciplinary Design, 2009, , 246-260.	0.2	28
36	Modeling and Reasoning about Service-Oriented Applications via Goals and Commitments. Notes on Numerical Fluid Mechanics and Multidisciplinary Design, 2010, , 113-128.	0.2	27

#	ARTICLE	IF	CITATIONS
37	Towards an Ontology for Privacy Requirements via a Systematic Literature Review. Lecture Notes in Computer Science, 2017, , 193-208.	1.0	25
38	Tropos. , 2005, , 20-45.		25
39	Protos: Foundations for engineering innovative sociotechnical systems. , 2014, , .		24
40	Designing secure business processes with SecBPMN. Software and Systems Modeling, 2017, 16, 737-757.	2.2	24
41	Toward GDPR-Compliant Socio-Technical Systems: Modeling Language and Reasoning Framework. Lecture Notes in Business Information Processing, 2017, , 236-250.	0.8	24
42	Managing Security Requirements Conflicts in Socio-Technical Systems. Lecture Notes in Computer Science, 2013, , 270-283.	1.0	24
43	Information systems as social structures. , 2001, , .		23
44	Information systems development through social structures. , 2002, , .		22
45	Security requirements engineering via commitments. , 2011, , .		22
46	Taking goal models downstream: A systematic roadmap. , 2014, , .		20
47	Using Goal Models Downstream. International Journal of Information System Modeling and Design, 2015, 6, 1-42.	0.9	20
48	A Goal Modeling Framework for Self-contextualizable Software. Lecture Notes in Business Information Processing, 2009, , 326-338.	0.8	19
49	Implicit: a multi-agent recommendation system for web search. Autonomous Agents and Multi-Agent Systems, 2012, 24, 141-174.	1.3	18
50	A Formal Definition of Culture. Advances in Group Decision and Negotiation, 2013, , 1-26.	0.1	18
51	Analyzing Business Continuity through a Multi-layers Model. Lecture Notes in Computer Science, 2008, , 212-227.	1.0	17
52	Acceptance Requirements and Their Gamification Solutions. , 2016, , .		17
53	Modeling Social and Individual Trust in Requirements Engineering Methodologies. Lecture Notes in Computer Science, 2005, , 161-176.	1.0	16
54	Designing Cooperative IS: Exploring and Evaluating Alternatives. Lecture Notes in Computer Science, 2006, , 533-550.	1.0	16

#	ARTICLE	IF	CITATIONS
55	Multi-agent Systems and Security Requirements Analysis. Lecture Notes in Computer Science, 2004, , 35-48.	1.0	15
56	Requirements Evolution: From Assumptions to Reality. Lecture Notes in Business Information Processing, 2011, , 372-382.	0.8	14
57	STS-tool: Socio-technical Security Requirements through social commitments. , 2012, , .		14
58	Privacy Requirements: Findings and Lessons Learned in Developing a Privacy Platform. , 2016, , .		14
59	Design Thinking and Acceptance Requirements for Designing Gamified Software. , 2019, , .		14
60	COPri v.2 "A core ontology for privacy requirements. Data and Knowledge Engineering, 2021, 133, 101888.	2.1	14
61	Business Processes Contextualisation via Context Analysis. Lecture Notes in Computer Science, 2010, , 471-476.	1.0	14
62	Agent-Oriented Methodologies. , 2005, , 1-19.		14
63	Secure and dependable patterns in organizations: an empirical approach. , 2007, , .		13
64	Requirements-driven deployment. Software and Systems Modeling, 2014, 13, 433-456.	2.2	13
65	Location-Based Software Modeling and Analysis: Tropos-Based Approach. Lecture Notes in Computer Science, 2008, , 169-182.	1.0	13
66	Distributed Belief Revision. Autonomous Agents and Multi-Agent Systems, 2003, 6, 115-143.	1.3	12
67	A Holistic Approach for Privacy Protection in E-Government. , 2017, , .		12
68	Analysis of information quality requirements in business processes, revisited. Requirements Engineering, 2018, 23, 227-249.	2.1	12
69	Security Patterns Meet Agent Oriented Software Engineering: A Complementary Solution for Developing Secure Information Systems. Lecture Notes in Computer Science, 2005, , 225-240.	1.0	12
70	Implicit Culture for Multi-agent Interaction Support. Lecture Notes in Computer Science, 2001, , 27-39.	1.0	12
71	Modeling and Reasoning About Information Quality Requirements. Lecture Notes in Computer Science, 2015, , 49-64.	1.0	12
72	Social specifications of business processes with Azzurra. , 2015, , .		11

#	ARTICLE	IF	CITATIONS
73	Gamification solutions for software acceptance: A comparative study of Requirements Engineering and Organizational Behavior techniques. , 2017, , .		11
74	COMPRO: A Methodological Approach for Business Process Contextualisation. Lecture Notes in Computer Science, 2010, , 132-149.	1.0	11
75	Formative User-Centered Evaluation of Security Modeling. International Journal of Secure Software Engineering, 2012, 3, 1-19.	0.4	11
76	IC-service. , 2007, , .		10
77	Adaptation in Open Systems: Giving Interaction Its Rightful Place. Lecture Notes in Computer Science, 2010, , 31-45.	1.0	10
78	Trust-based specification of sociotechnical systems. Data and Knowledge Engineering, 2013, 87, 339-353.	2.1	10
79	From Secure Business Process Modeling to Design-Level Security Verification. , 2017, , .		10
80	Filling the Gap between Requirements Engineering and Public Key/Trust Management Infrastructures. Lecture Notes in Computer Science, 2004, , 98-111.	1.0	10
81	Auctions Negotiation for Mobile Rideshare Service. , 2007, , .		9
82	Maintaining Secure Business Processes in Light of Socio-Technical Systems' Evolution. , 2016, , .		9
83	COPri - A Core Ontology for Privacy Requirements Engineering. Lecture Notes in Business Information Processing, 2020, , 472-489.	0.8	9
84	In-Time Explainability in Multi-Agent Systems: Challenges, Opportunities, and Roadmap. Lecture Notes in Computer Science, 2020, , 39-53.	1.0	9
85	An Ontology for Privacy Requirements via a Systematic Literature Review. Journal on Data Semantics, 2020, 9, 123-149.	2.0	9
86	Towards a Unified Framework for Contextual Variability in Requirements. , 2009, , .		8
87	Simulating BDI-Based Wireless Sensor Networks. , 2009, , .		8
88	The Next Release Problem Revisited: A New Avenue for Goal Models. , 2018, , .		8
89	Requirements Evolution and Evolution Requirements with Constrained Goal Models. Lecture Notes in Computer Science, 2016, , 544-552.	1.0	8
90	Extending Organizational Modeling with Business Services Concepts: An Overview of the Proposed Architecture. Lecture Notes in Computer Science, 2010, , 483-488.	1.0	8

#	ARTICLE	IF	CITATIONS
91	Threat Analysis in Goal-Oriented Security Requirements Modelling. International Journal of Secure Software Engineering, 2014, 5, 1-19.	0.4	8
92	STS-Tool: Security Requirements Engineering for Socio-Technical Systems. Lecture Notes in Computer Science, 2014, , 65-96.	1.0	7
93	Modelling the interplay of security, privacy and trust in sociotechnical systems: a computer-aided design approach. Software and Systems Modeling, 2020, 19, 467-491.	2.2	7
94	Analyzing Trust Requirements in Socio-Technical Systems: A Belief-Based Approach. Lecture Notes in Business Information Processing, 2015, , 254-270.	0.8	7
95	Modeling Structured and Unstructured Processes: An Empirical Evaluation. Lecture Notes in Computer Science, 2016, , 347-361.	1.0	7
96	Optimizing Monitoring Requirements in Self-adaptive Systems. Lecture Notes in Business Information Processing, 2012, , 362-377.	0.8	7
97	Belief Revision as Applied within a Descriptive Model of Jury Deliberations. Information and Communications Technology Law, 2001, 10, 53-65.	1.0	6
98	Detecting Conflicts of Interest. , 2006, , .		6
99	A multi-agent system that facilitates scientific publications search. , 2006, , .		6
100	From Early to Late Requirements: A Goal-Based Approach. , 2006, , 123-142.		6
101	Exploring alternative designs for sociotechnical systems. , 2014, , .		6
102	Information quality requirements engineering with STS-IQ. Information and Software Technology, 2019, 107, 83-100.	3.0	6
103	Using Risk Analysis to Evaluate Design Alternatives. , 2006, , 140-155.		6
104	ToothAgent: A Multi-agent System for Virtual Communities Support. , 2006, , 212-230.		6
105	Dealing with Information Quality Requirements. Lecture Notes in Business Information Processing, 2015, , 379-394.	0.8	5
106	Location-Based Variability for Mobile Information Systems. Notes on Numerical Fluid Mechanics and Multidisciplinary Design, 2008, , 575-578.	0.2	5
107	Aligning Service-Oriented Architectures with Security Requirements. Lecture Notes in Computer Science, 2012, , 232-249.	1.0	5
108	Modeling and Analyzing Information Integrity in Safety Critical Systems. Lecture Notes in Business Information Processing, 2013, , 524-529.	0.8	5

#	ARTICLE	IF	CITATIONS
109	Threat Analysis in Goal-Oriented Security Requirements Modelling. , 0, , 2025-2042.		5
110	Requirements as Goals and Commitments Too. , 2010, , 137-153.		5
111	Information access in implicit culture framework. , 2001, , .		4
112	Modeling and Reasoning about Information Quality Requirements in Business Processes. Lecture Notes in Business Information Processing, 2015, , 231-245.	0.8	4
113	Solving the next adaptation problem with prometheus. , 2016, , .		4
114	Applying social norms to high-fidelity pedestrian and traffic simulations. , 2016, , .		4
115	RT-BDI: A Real-Time BDI Model. Lecture Notes in Computer Science, 2020, , 16-29.	1.0	4
116	Modeling and Reasoning on Requirements Evolution with Constrained Goal Models. Lecture Notes in Computer Science, 2017, , 70-86.	1.0	4
117	Supporting Requirements Analysis in Tropos: A Planning-Based Approach. Lecture Notes in Computer Science, 2009, , 243-254.	1.0	4
118	An evaluation of business solutions in manufacturing enterprises. International Journal of Business Intelligence and Data Mining, 2008, 3, 305.	0.2	3
119	Multi-dimensional Uncertainty Analysis in Secure and Dependable Domain. , 2010, , .		3
120	Social Software Product Lines. , 2011, , .		3
121	Multi-objective risk analysis with goal models. , 2016, , .		3
122	Modeling and Reasoning About Privacy-Consent Requirements. Lecture Notes in Business Information Processing, 2018, , 238-254.	0.8	3
123	A data-driven, goal-oriented framework for process-focused enterprise re-engineering. Information Systems and E-Business Management, 2021, 19, 683-747.	2.2	3
124	Agent-Oriented software engineering report on the 4 th AOSE workshop (AOSE 2003). SIGMOD Record, 2003, 32, 117-119.	0.7	2
125	An architectural description language for secure Multi-Agent Systems. Web Intelligence and Agent Systems, 2010, 8, 99-122.	0.4	2
126	Modeling and verification of ATM security policies with SecBPMN. , 2014, , .		2

#	ARTICLE	IF	CITATIONS
127	Consent Verification Under Evolving Privacy Policies. , 2019, , .		2
128	Aligning Software Configuration with Business and IT Context. Notes on Numerical Fluid Mechanics and Multidisciplinary Design, 2012, , 206-221.	0.2	2
129	Information Security Risk Management. Lecture Notes in Business Information Processing, 2017, , 18-33.	0.8	2
130	From Security-by-Design to the Identification of Security-Critical Deviations in Process Executions. Lecture Notes in Business Information Processing, 2018, , 218-234.	0.8	2
131	Modeling and Analyzing Variability for Mobile Information Systems. Lecture Notes in Computer Science, 2008, , 291-306.	1.0	2
132	Software engineering for large-scale multi-agent systems - SELMAS'05. , 2005, , .		1
133	A goal-based approach for automated specification of Information Quality policies. , 2015, , .		1
134	Towards an Integrated Platform for Adaptive Socio-technical Systems for Smart Spaces. , 2016, , .		1
135	BarterCell: An Agent-Based Bartering Service for Users of Pocket Computing Devices. Lecture Notes in Computer Science, 2013, , 236-245.	1.0	1
136	Security and Trustworthiness Threats to Composite Services: Taxonomy, Countermeasures, and Research Directions. Lecture Notes in Computer Science, 2014, , 10-35.	1.0	1
137	The Socio-technical Security Requirements Modelling Language for Secure Composite Services. Lecture Notes in Computer Science, 2014, , 63-78.	1.0	1
138	Applying Acceptance Requirements to Requirements Modeling Tools via Gamification: A Case Study on Privacy and Security. Lecture Notes in Business Information Processing, 2020, , 366-376.	0.8	1
139	Reasoning About Risk in Agentâ€™s Deliberation Process: A Jadex Implementation. , 2008, , 118-131.		1
140	Software Engineering for Large-Scale Multi-Agent Systems - SELMAS 2005. Software Engineering Notes: an Informal Newsletter of the Special Interest Committee on Software Engineering / ACM, 2005, 30, 1-8.	0.5	0
141	Software engineering for large-scale multi-agent systems - SELMAS'05. , 2005, , .		0
142	Service-driven negotiation for autonomous software agents in robotics-oriented multi-agent systems. , 2012, , .		0
143	Balancing Business Perspectives in Requirements Analysis. Communications in Computer and Information Science, 2010, , 47-59.	0.4	0
144	Implicit Culture Framework for Behavior Transfer. , 2011, , 213-241.		0

#	ARTICLE	IF	CITATIONS
145	The Architecture of VisiOn Privacy Platform. Lecture Notes in Computer Science, 2020, , 54-76.	1.0	0
146	A Holistic Approach for Privacy Requirements Analysis: An Industrial Case Study. Lecture Notes in Computer Science, 2020, , 22-53.	1.0	0
147	Correction to: Visual Privacy Management. Lecture Notes in Computer Science, 2020, , C1-C1.	1.0	0
148	Increasing Interactivity in Agent-based Advanced Pocket-Device Service Application. , 2008, , 103-113.		0
