Francisco J Salazar

List of Publications by Year
in descending order

17 papers	204 citations	1040018 9 h-index	1125717 13 g-index
18 all docs	18 docs citations	18 times ranked	219 citing authors

#	Article	IF	Citations
1	Sex Differences in the Renal Changes Elicited by Angiotensin II Blockade During the Nephrogenic Period. Hypertension, 2007, 49, 1429-1435.	2.7	50
2	Age- and Sodium-Sensitive Hypertension and Sex-Dependent Renal Changes in Rats With a Reduced Nephron Number. Hypertension, 2008, 51, 1184-1189.	2.7	38
3	Role of COX-2-derived metabolites in regulation of the renal hemodynamic response to norepinephrine. American Journal of Physiology - Renal Physiology, 2001, 281, F975-F982.	2.7	23
4	Role of angiotensin II in arterial pressure and renal hemodynamics in rats with altered renal development: age- and sex-dependent differences. American Journal of Physiology - Renal Physiology, 2013, 304, F33-F40.	2.7	17
5	Role of cyclooxygenase-2-derived metabolites and nitric oxide in regulating renal function. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2000, 279, R1641-R1646.	1.8	16
6	Sex-dependent hypertension and renal changes in aged rats with altered renal development. American Journal of Physiology - Renal Physiology, 2014, 307, F461-F470.	2.7	15
7	Renal effects induced by prolonged mPGES1 inhibition. American Journal of Physiology - Renal Physiology, 2014, 306, F68-F74.	2.7	13
8	Renal effects of prolonged high protein intake and COX2 inhibition on hypertensive rats with altered renal development. American Journal of Physiology - Renal Physiology, 2011, 301, F327-F333.	2.7	11
9	Nitric oxide, prostaglandins and angiotensin II in the regulation of renal medullary blood flow during volume expansion. Journal of Physiology and Biochemistry, 2016, 72, 1-8.	3.0	9
10	COX2 inhibition during nephrogenic period induces ANG II hypertension and sex-dependent changes in renal function during aging. American Journal of Physiology - Renal Physiology, 2014, 306, F534-F541.	2.7	6
11	Cardiac, renal and uterine hemodynamics changes throughout pregnancyÂin rats with a prolonged high fat diet from an early age. PLoS ONE, 2020, 15, e0234861.	2.5	3
12	SGLT2 inhibition potentiates the cardiovascular, renal, and metabolic effects of sGC stimulation in hypertensive rats with prolonged exposure to high-fat diet. American Journal of Physiology - Heart and Circulatory Physiology, 2022, 322, H523-H536.	3.2	2
13	Gender differences in the renal changes induced by a prolonged high-fat diet in rats with altered renal development. Journal of Physiology and Biochemistry, 2021, 77, 431-441.	3.0	1
14	Altered renal hemodynamic and excretory response to aminoacids when nephron number is diminished. FASEB Journal, 2007, 21, A894.	0.5	0
15	Gender differences in the altered renal excretory response to an acute volume expansion in rats with low glomerular number. FASEB Journal, 2007, 21, A1417.	0.5	0
16	Greater Renal Sensitivity to Angiotensin II in Rats with a Lower Nephron Number. FASEB Journal, 2008, 22, 735.2.	0.5	0
17	Altered renal hemodynamic and excretory function in rats treated with a COX2 inhibitor during the nephrogenic period. FASEB Journal, 2009, 23, 969.12.	0.5	0
