| #  | Article                                                                                                                                                                                        | IF  | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Smart HR Competencies and Their Applications in Industry 4.0. Intelligent Systems Reference Library, 2022, , 293-315.                                                                          | 1.2 | 2         |
| 2  | An approximate model matching technique for controller design of linear time-invariant systems using hybrid firefly-based algorithms. ISA Transactions, 2022, 127, 437-448.                    | 5.7 | 4         |
| 3  | Optimal sizing of different configuration of photovoltaic, fuel cell, and biomass-based hybrid energy system. Environmental Science and Pollution Research, 2022, 29, 17425-17440.             | 5.3 | 6         |
| 4  | Parameter estimation of different solar cells using a novel swarm intelligence technique. Soft Computing, 2022, 26, 5833-5863.                                                                 | 3.6 | 8         |
| 5  | Deep Learning Based Dual Channel Banana Grading System Using Convolution Neural Network. Journal of Food Quality, 2022, 2022, 1-9.                                                             | 2.6 | 2         |
| 6  | An IoT and Machine Learning-Based Model to Monitor Perishable Food towards Improving Food Safety and Quality. Journal of Food Quality, 2022, 2022, 1-6.                                        | 2.6 | 5         |
| 7  | A global optimization technique for modeling and control of permanent magnet synchronous motor drive. , 2021, , 74-81.                                                                         |     | 10        |
| 8  | Power and energy measurement devices: A review, comparison, discussion, and the future of research. Measurement: Journal of the International Measurement Confederation, 2021, 172, 108961.    | 5.0 | 14        |
| 9  | Optimal parameter estimation of <scp>PEM</scp> fuel cell using slime mould algorithm. International Journal of Energy Research, 2021, 45, 14732-14744.                                         | 4.5 | 44        |
| 10 | Parameter Estimation of Fuel Cell Using Chaotic Mayflies Optimization Algorithm. Advanced Theory and Simulations, 2021, 4, 2100183.                                                            | 2.8 | 14        |
| 11 | Parameter extraction of solar <scp>PV</scp> cell models using novel metaheuristic chaotic tunicate swarm algorithm. International Transactions on Electrical Energy Systems, 2021, 31, e13244. | 1.9 | 8         |
| 12 | Identification in the delta domain: a unified approach via GWOCFA. Soft Computing, 2020, 24, 4791-4808.                                                                                        | 3.6 | 5         |
| 13 | Hall effect instruments, evolution, implications, and future prospects. Review of Scientific Instruments, 2020, 91, 071502.                                                                    | 1.3 | 17        |
| 14 | Theoretical foundation of a scheme for the study of dielectrics by analyzing the distortion in fringing field. Review of Scientific Instruments, 2020, 91, 095101.                             | 1.3 | 0         |
| 15 | A new Hall-effect enabled voltage amplifier device based on magnetic and thermal properties of materials. Journal of Magnetism and Magnetic Materials, 2020, 514, 167054.                      | 2.3 | 4         |
| 16 | A new hybrid algorithm for identification in the unified delta framework. AIP Conference Proceedings, 2020, , .                                                                                | 0.4 | 3         |
| 17 | A unified machine system identification technique using FAGWO algorithm. AIP Conference Proceedings, 2020, , .                                                                                 | 0.4 | O         |
| 18 | A new method to realize nonrational drivingâ€point functions. International Journal of Circuit Theory and Applications, 2020, 48, 385-393.                                                     | 2.0 | 0         |

| #  | Article                                                                                                                                                                                                              | IF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | An Algorithmic Approach to System Identification in the Delta Domain Using FAdFPA Algorithm. EAI/Springer Innovations in Communication and Computing, 2020, , 203-211.                                               | 1.1 | 8         |
| 20 | An IoT-Based Controller Realization for PV System Monitoring and Control. EAI/Springer Innovations in Communication and Computing, 2020, , 213-223.                                                                  | 1.1 | 15        |
| 21 | Development of an Efficient, Cheap, and Flexible IoT-Based Wind Turbine Emulator. EAI/Springer Innovations in Communication and Computing, 2020, , 225-231.                                                          | 1.1 | 14        |
| 22 | Identification in the delta domain: a unified approach using hybrid FAPS algorithm. , 2019, , .                                                                                                                      |     | 0         |
| 23 | A hybrid intelligent technique for model order reduction in the delta domain: a unified approach. Soft Computing, 2019, 23, 4801-4814.                                                                               | 3.6 | 13        |
| 24 | A novel hybrid metaheuristic algorithm for model order reduction in the delta domain: a unified approach. Neural Computing and Applications, 2019, 31, 6207-6221.                                                    | 5.6 | 12        |
| 25 | Model order reduction of continuous time system using hybrid metaheuristic algorithm., 2016,,.                                                                                                                       |     | 1         |
| 26 | Solar and Wind Power Estimation and Economic Load Dispatch Using Firefly Algorithm. Procedia Computer Science, 2015, 70, 688-700.                                                                                    | 2.0 | 34        |
| 27 | Design of A 11 KW <sub>p</sub> Grid Connected Solar Photovoltaic Power Plant on 100 m <sup>2</sup> available Area in the Birbhum District of West Bengal. Journal of the Institute of Engineering, 2011, 8, 105-112. | 0.3 | 4         |
| 28 | Global heuristic methods for reduced-order modelling of fractional-order systems in the delta domain: a unified approach. Ricerche Di Matematica, $0$ , , $1$ .                                                      | 1.0 | 7         |
| 29 | Model order diminution of MIMO systems using the delta transform method with new firefly-based hybrid algorithms. Soft Computing, 0, , $1.$                                                                          | 3.6 | 2         |
