

Antonio Huerta

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/9191300/antonio-huerta-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
170	A non-oscillatory face-centred finite volume method for compressible flows. <i>Computers and Fluids</i> , 2022 , 235, 105272	2.8	0
169	Parametric solutions of turbulent incompressible flows in OpenFOAM via the proper generalised decomposition. <i>Journal of Computational Physics</i> , 2021 , 449, 110802	4.1	0
168	Hybridisable Discontinuous Galerkin Formulation of Compressible Flows. <i>Archives of Computational Methods in Engineering</i> , 2021 , 28, 753-784	7.8	4
167	HDGlab: An Open-Source Implementation of the Hybridisable Discontinuous Galerkin Method in MATLAB. <i>Archives of Computational Methods in Engineering</i> , 2021 , 28, 1941-1986	7.8	2
166	Separated response surfaces for flows in parametrised domains: Comparison of a priori and a posteriori PGD algorithms. <i>Finite Elements in Analysis and Design</i> , 2021 , 196, 103530	2.2	3
165	Tutorial on Hybridizable Discontinuous Galerkin (HDG) Formulation for Incompressible Flow Problems. <i>CISM International Centre for Mechanical Sciences, Courses and Lectures</i> , 2020 , 163-201	0.6	5
164	Hybrid coupling of CG and HDG discretizations based on Nitsche's method. <i>Computational Mechanics</i> , 2020 , 65, 311-330	4	5
163	Nonintrusive proper generalised decomposition for parametrised incompressible flow problems in OpenFOAM. <i>Computer Physics Communications</i> , 2020 , 249, 107013	4.2	13
162	Fast solution of elliptic harbor agitation problems under frequency-direction input spectra by model order reduction and NURBS-enhanced FEM. <i>Coastal Engineering</i> , 2020 , 156, 103618	4.8	2
161	Encapsulated PGD Algebraic Toolbox Operating with High-Dimensional Data. <i>Archives of Computational Methods in Engineering</i> , 2020 , 27, 1321-1336	7.8	12
160	A weakly compressible hybridizable discontinuous Galerkin formulation for fluid-structure interaction problems. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2020 , 372, 113392	5.7	7
159	Hybridisable discontinuous Galerkin solution of geometrically parametrised Stokes flows. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2020 , 372, 113397	5.7	5
158	A staggered high-dimensional Proper Generalised Decomposition for coupled magneto-mechanical problems with application to MRI scanners. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2020 , 370, 113271	5.7	3
157	Reshaping diagrams for bending straightening of forged aeronautical components. <i>International Journal of Advanced Manufacturing Technology</i> , 2020 , 110, 1485-1502	3.2	
156	Solution of geometrically parametrised problems within a CAD environment via model order reduction. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2020 , 358, 112631	5.7	8
155	A second-order face-centred finite volume method for elliptic problems. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2020 , 358, 112655	5.7	9
154	A regularised-adaptive Proper Generalised Decomposition implementation for coupled magneto-mechanical problems with application to MRI scanners. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2020 , 358, 112640	5.7	3

153	Multiscale proper generalized decomposition based on the partition of unity. <i>International Journal for Numerical Methods in Engineering</i> , 2019 , 120, 727-747	2.4	1
152	A local multiple proper generalized decomposition based on the partition of unity. <i>International Journal for Numerical Methods in Engineering</i> , 2019 , 120, 139-152	2.4	4
151	Tensor Representation of Non-linear Models Using Cross Approximations. <i>Journal of Scientific Computing</i> , 2019 , 81, 22-47	2.3	3
150	A locking-free face-centred finite volume (FCFV) method for linear elastostatics. <i>Computers and Structures</i> , 2019 , 212, 43-57	4.5	11
149	A simple microstructural viscoelastic model for flowing foams. <i>International Journal of Material Forming</i> , 2019 , 12, 295-306	2	
148	HDG-NEFEM with Degree Adaptivity for Stokes Flows. <i>Journal of Scientific Computing</i> , 2018 , 77, 1953-1980		17
147	An upwind cell centred Total Lagrangian finite volume algorithm for nearly incompressible explicit fast solid dynamic applications. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2018 , 340, 684-727	5.7	14
146	Reshaping of large aeronautical structural parts: A simplified simulation approach 2018 ,		1
145	Algebraic PGD for tensor separation and compression: An algorithmic approach. <i>Comptes Rendus - Mecanique</i> , 2018 , 346, 501-514	2.1	12
144	Proper generalized decomposition solutions within a domain decomposition strategy. <i>International Journal for Numerical Methods in Engineering</i> , 2018 , 113, 1972-1994	2.4	12
143	A Superconvergent HDG Method for Stokes Flow with Strongly Enforced Symmetry of the Stress Tensor. <i>Journal of Scientific Computing</i> , 2018 , 77, 1679-1702	2.3	18
142	A Multidimensional Data-Driven Sparse Identification Technique: The Sparse Proper Generalized Decomposition. <i>Complexity</i> , 2018 , 2018, 1-11	1.6	28
141	A face-centred finite volume method for second-order elliptic problems. <i>International Journal for Numerical Methods in Engineering</i> , 2018 , 115, 986-1014	2.4	14
140	A superconvergent hybridisable discontinuous Galerkin method for linear elasticity. <i>International Journal for Numerical Methods in Engineering</i> , 2018 , 116, 91-116	2.4	23
139	Generalized parametric solutions in Stokes flow. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2017 , 326, 223-240	5.7	15
138	Simulating squeeze flows in multiaxial laminates: towards fully 3D mixed formulations. <i>International Journal of Material Forming</i> , 2017 , 10, 653-669	2	7
137	Meshfree Methods 2017 , 1-38		7
136	Model Reduction Methods 2017 , 1-36		12

135	Arbitrary LagrangianEulerian Methods 2017 , 1-23		25
134	Error estimation for linear and nonlinear problems 2017 , 183-194		1
133	Analysis of the average efficiency of an error estimator 2017 , 113-126		2
132	Space-time NURBS-enhanced finite elements for free-surface flows in 2D. <i>International Journal for Numerical Methods in Fluids</i> , 2016 , 81, 426-450	1.9	9
131	Real-time simulation techniques for augmented learning in science and engineering. <i>Visual Computer</i> , 2016 , 32, 1465-1479	2.3	5
130	Implicit Residual Type Error Estimators. <i>SpringerBriefs in Applied Sciences and Technology</i> , 2016 , 19-32	0.4	1
129	Vademecum-based GFEM (V-GFEM): optimal enrichment for transient problems. <i>International Journal for Numerical Methods in Engineering</i> , 2016 , 108, 971-989	2.4	11
128	Tutorial on Hybridizable Discontinuous Galerkin (HDG) for Second-Order Elliptic Problems. <i>CISM International Centre for Mechanical Sciences, Courses and Lectures</i> , 2016 , 105-129	0.6	16
127	Elliptic Harbor Wave Model with Perfectly Matched Layer and Exterior Bathymetry Effects. <i>Journal of Waterway, Port, Coastal and Ocean Engineering</i> , 2016 , 142, 04016008	1.7	2
126	Proper generalized decomposition for parameterized Helmholtz problems in heterogeneous and unbounded domains: Application to harbor agitation. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2015 , 295, 127-149	5.7	47
125	Real-time monitoring of thermal processes by reduced-order modeling. <i>International Journal for Numerical Methods in Engineering</i> , 2015 , 102, 991-1017	2.4	39
124	Effect of the separated approximation of input data in the accuracy of the resulting PGD solution. <i>Advanced Modeling and Simulation in Engineering Sciences</i> , 2015 , 2,	2.7	7
123	Proper generalized decomposition of a geometrically parametrized heat problem with geophysical applications. <i>International Journal for Numerical Methods in Engineering</i> , 2015 , 103, 737-758	2.4	31
122	Hybridizable Discontinuous Galerkin with degree adaptivity for the incompressible Navier-Stokes equations. <i>Computers and Fluids</i> , 2014 , 98, 196-208	2.8	34
121	On the natural stabilization of convection dominated problems using high order Bubnov-Galerkin finite elements. <i>Computers and Mathematics With Applications</i> , 2014 , 66, 2545-2558	2.7	8
120	Parametric solutions involving geometry: A step towards efficient shape optimization. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2014 , 268, 178-193	5.7	54
119	PGD for solving multidimensional and parametric models. <i>CISM International Centre for Mechanical Sciences, Courses and Lectures</i> , 2014 , 27-89	0.6	3
118	Stability of anchored sheet wall in cohesive-frictional soils by FE limit analysis. <i>International Journal for Numerical and Analytical Methods in Geomechanics</i> , 2013 , 37, 1213-1230	4	9

117	High-order continuous and discontinuous Galerkin methods for wave problems. <i>International Journal for Numerical Methods in Fluids</i> , 2013 , 73, n/a-n/a	1.9	5
116	PGD-Based Computational Vademecum for Efficient Design, Optimization and Control. <i>Archives of Computational Methods in Engineering</i> , 2013 , 20, 31-59	7.8	210
115	Hybridizable discontinuous Galerkin p-adaptivity for wave propagation problems. <i>International Journal for Numerical Methods in Fluids</i> , 2013 , 72, 1244-1262	1.9	41
114	Efficiency of high-order elements for continuous and discontinuous Galerkin methods. <i>International Journal for Numerical Methods in Engineering</i> , 2013 , 96, 529-560	2.4	59
113	One-dimensional shock-capturing for high-order discontinuous Galerkin methods. <i>International Journal for Numerical Methods in Fluids</i> , 2013 , 71, 737-755	1.9	21
112	Streamline upwind/Petrov-Galerkin-based stabilization of proper generalized decompositions for high-dimensional advection-diffusion equations. <i>International Journal for Numerical Methods in Engineering</i> , 2013 , 94, 1216-1232	2.4	7
111	Dimensionless Analysis of HSDM and Application to Simulation of Breakthrough Curves of Highly Adsorbent Porous Media. <i>Journal of Environmental Engineering, ASCE</i> , 2013 , 139, 667-676	2	12
110	Computable exact bounds for linear outputs from stabilized solutions of the advection-diffusion-reaction equation. <i>International Journal for Numerical Methods in Engineering</i> , 2013 , 93, 483-509	2.4	5
109	Estimation of crack opening from a two-dimensional continuum-based finite element computation. <i>International Journal for Numerical and Analytical Methods in Geomechanics</i> , 2012 , 36, 1813-1830	4	14
108	Un método de captura de choques basado en las funciones de forma para Galerkin discontinuo de alto orden. <i>Revista Internacional De Metodos Numericos Para Calculo Y Diseno En Ingenieria</i> , 2012 , 28, 204-213	1.8	0
107	A note on upper bound formulations in limit analysis. <i>International Journal for Numerical Methods in Engineering</i> , 2012 , 91, 896-908	2.4	11
106	A simple shock-capturing technique for high-order discontinuous Galerkin methods. <i>International Journal for Numerical Methods in Fluids</i> , 2012 , 69, 1614-1632	1.9	49
105	High-order implicit time integration for unsteady incompressible flows. <i>International Journal for Numerical Methods in Fluids</i> , 2012 , 70, 603-626	1.9	9
104	Proper Generalized Decomposition based dynamic data-driven control of thermal processes. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2012 , 213-216, 29-41	5.7	76
103	NURBS-Enhanced Finite Element Method (NEFEM). <i>Archives of Computational Methods in Engineering</i> , 2011 , 18, 441-484	7.8	63
102	Comparison of high-order curved finite elements. <i>International Journal for Numerical Methods in Engineering</i> , 2011 , 87, 719-734	2.4	37
101	3D NURBS-enhanced finite element method (NEFEM). <i>International Journal for Numerical Methods in Engineering</i> , 2011 , 88, 103-125	2.4	57
100	Error Estimation and Quality Control 2010 ,		3

99	A new least-squares approximation of affine mappings for sweep algorithms. <i>Engineering With Computers</i> , 2010 , 26, 327-337	4.5	3
98	A flux-free a posteriori error estimator for the incompressible Stokes problem using a mixed FE formulation. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2010 , 199, 2383-2402	5.7	11
97	Modeling, with a unified level-set representation, of the expansion of a hollow in the ground under different physical phenomena. <i>Computational Mechanics</i> , 2010 , 46, 315-327	4	4
96	SUPG-based stabilization using a separated representations approach. <i>International Journal of Material Forming</i> , 2010 , 3, 883-886	2	3
95	An error estimator for separated representations of highly multidimensional models. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2010 , 199, 1872-1880	5.7	90
94	Discontinuous Galerkin methods for the Navier-Stokes equations using solenoidal approximations. <i>International Journal for Numerical Methods in Fluids</i> , 2009 , 64, 549-564	1.9	19
93	Upper and lower bounds in limit analysis: Adaptive meshing strategies and discontinuous loading. <i>International Journal for Numerical Methods in Engineering</i> , 2009 , 77, 471-501	2.4	74
92	Strict error bounds for linear solid mechanics problems using a subdomain-based flux-free method. <i>Computational Mechanics</i> , 2009 , 44, 533-547	4	31
91	Exact Bounds for Linear Outputs of the Advection-Diffusion-Reaction Equation Using Flux-Free Error Estimates. <i>SIAM Journal of Scientific Computing</i> , 2009 , 31, 3064-3089	2.6	25
90	NURBS-enhanced finite element method (NEFEM). <i>International Journal for Numerical Methods in Engineering</i> , 2008 , 76, 56-83	2.4	136
89	Bounds for quantities of interest and adaptivity in the element-free Galerkin method. <i>International Journal for Numerical Methods in Engineering</i> , 2008 , 76, 1782-1818	2.4	5
88	NURBS-enhanced finite element method for Euler equations. <i>International Journal for Numerical Methods in Fluids</i> , 2008 , 57, 1051-1069	1.9	34
87	Discontinuous Galerkin methods for the Stokes equations using divergence-free approximations. <i>International Journal for Numerical Methods in Fluids</i> , 2008 , 57, 1071-1092	1.9	51
86	Bounds of functional outputs for parabolic problems. Part II: Bounds of the exact solution. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2008 , 197, 1661-1679	5.7	28
85	Bounds of functional outputs for parabolic problems. Part I: Exact bounds of the discontinuous Galerkin time discretization. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2008 , 197, 1641-1660	5.7	31
84	Stability of incompressible formulations enriched with X-FEM. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2008 , 197, 1835-1849	5.7	44
83	Extraction of a crack opening from a continuous approach using regularized damage models. <i>Computers and Concrete</i> , 2008 , 5, 375-388		40
82	Exact Bounds for Linear Outputs of the Convection-Diffusion-Reaction Equation Using Flux-Free Error Estimates. <i>Lecture Notes in Computational Science and Engineering</i> , 2008 , 215-230	0.3	

81	Stabilized updated Lagrangian corrected SPH for explicit dynamic problems. <i>International Journal for Numerical Methods in Engineering</i> , 2007 , 69, 2687-2710	2.4	55
80	Hydraulic behaviour of a representative structural volume for containment buildings. <i>Nuclear Engineering and Design</i> , 2007 , 237, 1259-1274	1.8	24
79	Goal Oriented Error Estimation for the Element Free Galerkin Method 2007 , 265-282		
78	Etude de la stabilité d'une formulation incompressible traitée par X-FEM. <i>European Journal of Computational Mechanics</i> , 2006 , 15, 257-268	0.5	1
77	UPDATED LAGRANGIAN FORMULATION FOR CORRECTED SMOOTH PARTICLE HYDRODYNAMICS. <i>International Journal of Computational Methods</i> , 2006 , 03, 383-399	1.1	6
76	Subdomain-based flux-free a posteriori error estimators. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2006 , 195, 297-323	5.7	86
75	The computation of bounds for linear-functional outputs of weak solutions to the two-dimensional elasticity equations. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2006 , 195, 406-429	5.7	66
74	An elastic plastic damage formulation for concrete: Application to elementary tests and comparison with an isotropic damage model. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2006 , 195, 7077-7092	5.7	116
73	Continuous blending of SPH with finite elements. <i>Computers and Structures</i> , 2005 , 83, 1448-1458	4.5	38
72	A new damage model based on non-local displacements. <i>International Journal for Numerical and Analytical Methods in Geomechanics</i> , 2005 , 29, 473-493	4	27
71	Mesh projection between parametric surfaces. <i>Communications in Numerical Methods in Engineering</i> , 2005 , 22, 591-603		6
70	A new least-squares approximation of affine mappings for sweep algorithms 2005 , 433-448		7
69	Accurate upper and lower error bounds by solving flux-free local problems in stars. <i>Revue Européenne Des Elements</i> , 2004 , 13, 497-507		4
68	Numerical modelling of void inclusions in porous media. <i>International Journal for Numerical Methods in Engineering</i> , 2004 , 59, 577-596	2.4	4
67	Efficient and reliable nonlocal damage models. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2004 , 193, 3431-3455	5.7	29
66	A comparison of two formulations to blend finite elements and mesh-free methods. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2004 , 193, 1105-1117	5.7	29
65	Pseudo-divergence-free element free Galerkin method for incompressible fluid flow. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2004 , 193, 1119-1136	5.7	53
64	Imposing essential boundary conditions in mesh-free methods. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2004 , 193, 1257-1275	5.7	298

63	Benchmarks for the validation of a non local damage model. <i>Revue Européenne De Génie Civil</i> , 2004 , 8, 303-328		6
62	Arbitrary LagrangianEulerian Methods 2004 ,		253
61	Computing Bounds for Linear Functionals of Exact Weak Solutions to Poisson's Equation. <i>SIAM Journal on Numerical Analysis</i> , 2004 , 42, 1610-1630	2.4	42
60	Meshfree Methods 2004 ,		10
59	Continuum damage modelling in geomechanics 2004 , 77-105		
58	Goal-oriented adaptivity for shell structures Error assessment and remeshing criteria. <i>Revue Européenne Des Elements</i> , 2003 , 12, 691-715		1
57	2003 ,		501
56	Convergence of finite elements enriched with mesh-less methods. <i>Numerische Mathematik</i> , 2003 , 96, 43-59	2.2	11
55	Efficient and accurate approach for powder compaction problems. <i>Computational Mechanics</i> , 2003 , 30, 220-234	4	15
54	Numerical representation of the quality measures of triangles and triangular meshes. <i>Communications in Numerical Methods in Engineering</i> , 2003 , 19, 551-561		10
53	Locking in the incompressible limit: pseudo-divergence-free element free Galerkin. <i>Communications in Numerical Methods in Engineering</i> , 2003 , 19, 725-735		20
52	Time accurate consistently stabilized mesh-free methods for convection dominated problems. <i>International Journal for Numerical Methods in Engineering</i> , 2003 , 56, 1225-1242	2.4	9
51	Recovering lower bounds of the error by postprocessing implicit residual a posteriori error estimates. <i>International Journal for Numerical Methods in Engineering</i> , 2003 , 56, 1465-1488	2.4	29
50	Coupling Finite Elements and Particles for Adaptivity: An Application to Consistently Stabilized Convection-Diffusion. <i>Lecture Notes in Computational Science and Engineering</i> , 2003 , 117-129	0.3	3
49	Efficient and Reliable Nonlocal Damage Models. <i>Lecture Notes in Applied and Computational Mechanics</i> , 2003 , 239-268	0.3	2
48	Arbitrary LagrangianEulerian (ALE) formulation for hyperelastoplasticity. <i>International Journal for Numerical Methods in Engineering</i> , 2002 , 53, 1831-1851	2.4	47
47	Time-accurate solution of stabilized convectionDiffusionReaction equations: II Time and space discretization. <i>Communications in Numerical Methods in Engineering</i> , 2002 , 18, 565-573		10
46	Time-accurate solution of stabilized convectionDiffusionReaction equations: I Accuracy analysis and examples. <i>Communications in Numerical Methods in Engineering</i> , 2002 , 18, 575-584		10

45	The efficient computation of bounds for functionals of finite element solutions in large strain elasticity. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2002 , 191, 4807-4826	5.7	8
44	Locking in the incompressible limit: pseudo-divergence-free element free Galerkin. <i>Revue Europeenne Des Elements</i> , 2002 , 11, 869-892		3
43	Enrichissement des interpolations d'éléments finis en utilisant des méthodes sans maillage. <i>ESAIM: Mathematical Modelling and Numerical Analysis</i> , 2002 , 36, 1027-1042	1.8	6
42	Adaptive analysis based on error estimation for nonlocal damage models. <i>Revue Europeenne Des Elements</i> , 2001 , 10, 193-207		6
41	Consistent tangent matrices for substepping schemes. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2001 , 190, 4627-4647	5.7	63
40	Arbitrary Lagrangian-Eulerian formulation for fluid-rigid body interaction. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2001 , 190, 3171-3188	5.7	74
39	Consistent tangent matrices for density-dependent finite plasticity models. <i>International Journal for Numerical and Analytical Methods in Geomechanics</i> , 2001 , 25, 1045-1075	4	15
38	Locking in the incompressible limit for the element-free Galerkin method. <i>International Journal for Numerical Methods in Engineering</i> , 2001 , 51, 1361-1383	2.4	41
37	Implementation of a stabilized finite element formulation for the incompressible Navier-Stokes equations based on a pressure gradient projection. <i>International Journal for Numerical Methods in Fluids</i> , 2001 , 37, 419-444	1.9	45
36	An improved algorithm to smooth graded quadrilateral meshes preserving the prescribed element size. <i>Communications in Numerical Methods in Engineering</i> , 2001 , 17, 89-99		13
35	Numerical differentiation for non-trivial consistent tangent matrices: an application to the MRS-Lade model. <i>International Journal for Numerical Methods in Engineering</i> , 2000 , 48, 159-184	2.4	39
34	Adaptivity based on error estimation for viscoplastic softening materials. <i>International Journal for Numerical and Analytical Methods in Geomechanics</i> , 2000 , 5, 87-112		32
33	Enrichment and coupling of the finite element and meshless methods. <i>International Journal for Numerical Methods in Engineering</i> , 2000 , 48, 1615-1636	2.4	150
32	Efficient unstructured quadrilateral mesh generation. <i>International Journal for Numerical Methods in Engineering</i> , 2000 , 49, 1327-1350	2.4	56
31	Error estimation and adaptivity for nonlocal damage models. <i>International Journal of Solids and Structures</i> , 2000 , 37, 7501-7528	3.1	39
30	Error estimation including pollution assessment for nonlinear finite element analysis. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2000 , 181, 21-41	5.7	39
29	High-order accurate time-stepping schemes for convection-diffusion problems. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2000 , 182, 249-275	5.7	40
28	Numerical differentiation for local and global tangent operators in computational plasticity. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2000 , 189, 277-296	5.7	60

27	Error estimation for adaptive computations of shell structures. <i>Revue Europeenne Des Elements</i> , 2000 , 9, 49-66		1
26	Numerical differentiation for non-trivial consistent tangent matrices: an application to the MRS-Lade model 2000 , 48, 159		3
25	Adaptivity based on error estimation for viscoplastic softening materials 2000 , 5, 87		3
24	Accuracy of Two Stress Update Algorithms for Shear-Free Large Deformation Paths. <i>Journal of Engineering Mechanics - ASCE</i> , 1999 , 125, 715-717	2.4	
23	Plastic Flow Potential for Cone Region of MRS-Lade Model. <i>Journal of Engineering Mechanics - ASCE</i> , 1999 , 125, 364-366	2.4	4
