#	ARTICLE	IF	CITATIONS
1	Integrated justification of technological structure for coal mine. Mining Informational and Analytical Bulletin, 2021, , 5-22.	0.2	2
2	Implementation of production potential of high-performance equipment- A key trend of improvement in underground mining of power-generating coal. Mining Informational and Analytical Bulletin, 2020, , 156-165.	0.2	2
3	Estimation of influence of the longwall panel width on height of complete groundwater drainage zone in thick coal seam mining under increased water inflow conditions. Mining Informational and Analytical Bulletin, 2020, , 3-10.	0.2	0
4	Providing the operational state of local entries when mining longwall panels with the increased sizes. Mining Informational and Analytical Bulletin, 2020, , 3-15.	0.2	0
5	Diagnostic methods of rock massif state as the forecasting tool for geodynamic phenomena. Mining Informational and Analytical Bulletin, 2020, , 3-12.	0.2	0
6	Analysis of classifications of geodynamic processes based on evaluation of the energy balance. Mining Informational and Analytical Bulletin, 2020, , 3-9.	0.2	0
7	Influence of face advance rate on geomechanical and gas-dynamic processes in longwalls in gassy mines. Eurasian Mining, 2018, , 3-8.	0.3	12
8	Numerical Simulation of Aerogasdynamics Processes in A Longwall Panel for Estimation of Spontaneous Combustion Hazards. E3S Web of Conferences, 2017, 21, 01028.	0.5	7
9	Technological Peculiarities the Development of Watered Sand Deposits Leningrad Region. Biosciences, Biotechnology Research Asia, 2015, 12, 2911-2919.	0.5	0
10	Improving the efficiency of the technology and organization of the longwall face move during the intensive flat-lying coal seams mining at the Kuzbass mines. Journal of Mining Institute, 0, 249, 342-350.	0.8	13
