

# Pablo N De Francesco

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/9205065/pablo-n-de-francesco-publications-by-year.pdf>

**Version:** 2024-04-26

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

30  
papers

683  
citations

16

#	Paper	IF	Citations
30	Growth hormone secretagogue receptor signaling in the supramammillary nucleus targets nitric oxide-producing neurons and controls recognition memory in mice.. <i>Psychoneuroendocrinology</i> , <b>2022</b> , 139, 105716	5	
29	GHSR controls food deprivation-induced activation of CRF neurons of the hypothalamic paraventricular nucleus in a LEAP2-dependent manner.. <i>Cellular and Molecular Life Sciences</i> , <b>2022</b> , 79, 277	10.3	1
28	THE INTRIGUING LIGAND-DEPENDENT AND LIGAND-INDEPENDENT ACTIONS OF THE GROWTH HORMONE SECRETAGOGUE RECEPTOR ON REWARD-RELATED BEHAVIORS. <i>Neuroscience and Biobehavioral Reviews</i> , <b>2021</b> , 120, 401-416	9	10
27	Circulating ghrelin crosses the blood-cerebrospinal fluid barrier via growth hormone secretagogue receptor dependent and independent mechanisms. <i>Molecular and Cellular Endocrinology</i> , <b>2021</b> , 538, 111449	4.4	6
26	Plasma levels of ghrelin, des-acyl ghrelin and LEAP2 in children with obesity: correlation with age and insulin resistance. <i>European Journal of Endocrinology</i> , <b>2020</b> , 182, 165-175	6.5	15
25	Growth hormone secretagogue receptor in dopamine neurons controls appetitive and consummatory behaviors towards high-fat diet in ad-libitum fed mice. <i>Psychoneuroendocrinology</i> , <b>2020</b> , 119, 104718	5	4
24	Fasting induces remodeling of the orexigenic projections from the arcuate nucleus to the hypothalamic paraventricular nucleus, in a growth hormone secretagogue receptor-dependent manner. <i>Molecular Metabolism</i> , <b>2020</b> , 32, 69-84	8.8	14
23	Inter-individual Variability for High Fat Diet Consumption in Inbred C57BL/6 Mice. <i>Frontiers in Nutrition</i> , <b>2019</b> , 6, 67	6.2	10
22	Development of a novel fluorescent ligand of growth hormone secretagogue receptor based on the N-Terminal Leap2 region. <i>Molecular and Cellular Endocrinology</i> , <b>2019</b> , 498, 110573	4.4	14
21	Rhinoxenus (Dactylogyridae) parasitizing piranhas (Serrasalminidae) at its southernmost limit of distribution (Paraná River, Argentina), with the description of two new species. <i>Anais Da Academia Brasileira De Ciencias</i> , <b>2019</b> , 91, e20190711	1.4	1
20	Brain accessibility delineates the central effects of circulating ghrelin. <i>Journal of Neuroendocrinology</i> , <b>2019</b> , 31, e12677	3.8	29
19	Evidence Supporting a Role for the Blood-Cerebrospinal Fluid Barrier Transporting Circulating Ghrelin into the Brain. <i>Molecular Neurobiology</i> , <b>2019</b> , 56, 4120-4134	6.2	31
18	Gastrointestinal Hormones Controlling Energy Homeostasis and Their Potential Role in Obesity <b>2018</b> , 183-203		1
17	Ghrelin Recruits Specific Subsets of Dopamine and GABA Neurons of Different Ventral Tegmental Area Sub-nuclei. <i>Neuroscience</i> , <b>2018</b> , 392, 107-120	3.9	30
16	Ghrelin receptor signaling targets segregated clusters of neurons within the nucleus of the solitary tract. <i>Brain Structure and Function</i> , <b>2018</b> , 223, 3133-3147	4	17
15	Circulating Ghrelin Acts on GABA Neurons of the Area Postrema and Mediates Gastric Emptying in Male Mice. <i>Endocrinology</i> , <b>2017</b> , 158, 1436-1449	4.8	29
14	A simple strategy for culturing morphologically-conserved rat hypothalamic tanycytes. <i>Cell and Tissue Research</i> , <b>2017</b> , 369, 369-380	4.2	1

13	Three-dimensional morphology of rigid structures as a tool for taxonomic studies of Dactylogyridae (Monogenea). <i>Parasitology Research</i> , <b>2017</b> , 116, 2813-2819	2.4	5
12	Des-Acyl Ghrelin Directly Targets the Arcuate Nucleus in a Ghrelin-Receptor Independent Manner and Impairs the Orexigenic Effect of Ghrelin. <i>Journal of Neuroendocrinology</i> , <b>2016</b> , 28, 12349	3.8	62
11	A galectin-specific signature in the gut delineates Crohn's disease and ulcerative colitis from other human inflammatory intestinal disorders. <i>BioFactors</i> , <b>2016</b> , 42, 93-105	6.1	22
10	Escalation in high fat intake in a binge eating model differentially engages dopamine neurons of the ventral tegmental area and requires ghrelin signaling. <i>Psychoneuroendocrinology</i> , <b>2015</b> , 60, 206-16	5	50
9	Brain circuits mediating the orexigenic action of peripheral ghrelin: narrow gates for a vast kingdom. <i>Frontiers in Endocrinology</i> , <b>2015</b> , 6, 44	5.7	42
8	Ghrelin's Orexigenic Effect Is Modulated via a Serotonin 2C Receptor Interaction. <i>ACS Chemical Neuroscience</i> , <b>2015</b> , 6, 1186-97	5.7	83
7	Neuroanatomical and functional characterization of CRF neurons of the amygdala using a novel transgenic mouse model. <i>Neuroscience</i> , <b>2015</b> , 289, 153-65	3.9	20
6	Uncoupling of osteoblast-osteoclast regulation in a chemical murine model of Gaucher disease. <i>Gene</i> , <b>2013</b> , 532, 186-91	3.8	19
5	Fabry disease peripheral blood immune cells release inflammatory cytokines: role of globotriaosylceramide. <i>Molecular Genetics and Metabolism</i> , <b>2013</b> , 109, 93-9	3.7	78
4	Induction of osteoclastogenesis in an in vitro model of Gaucher disease is mediated by T cells via TNF- $\alpha$ . <i>Gene</i> , <b>2012</b> , 509, 51-9	3.8	28
3	Higher apoptotic state in Fabry disease peripheral blood mononuclear cells.: effect of globotriaosylceramide. <i>Molecular Genetics and Metabolism</i> , <b>2011</b> , 104, 319-24	3.7	20
2	An easy and sensitive method for determination of globotriaosylceramide (Gb3) from urinary sediment: utility for Fabry disease diagnosis and treatment monitoring. <i>Clinica Chimica Acta</i> , <b>2009</b> , 403, 194-7	6.2	16
1	Leukocyte perturbation associated with Fabry disease. <i>Journal of Inherited Metabolic Disease</i> , <b>2009</b> , 32 Suppl 1, S67-77	5.4	24
